It was not until the discovery of the barometer, in 1643, that the first great step was made towards a knowledge of the nature of our atmosphere. We were then, by its help, enabled to ascertain the weight and pressure of the great aerial ocean which surrounds us, and to learn when and where it was in a state of calm or storm. The invention of the thermometer, shortly afterwards, gave the means of determining its temperature. The hygrometer, for showing the amount of moisture it contained, and the anemometer, for giving the direction and force of the wind, are also instruments of great importance to the meteorologist. The indications of these instruments, combined with the careful observation of atmospheric appearances, interpreted by the results of former observations, will enable the individual observer generally to predict the kind of weather that may be expected in his immediate locality for a day or sometimes longer in advance.

A strip of sea-weed forms a very useful hygrometer for practical purposes, provided it be not kept in a room warmed artificially. In fine weather it will keep dry and have a somewhat dusty feeling, but with an increase of moisture in the air will become limp and sticky, indicating a probable change of weather in the shape of rain.

Since the time of Admiral FitzRoy the science of weather forecasting has made much progress in its details, but, for the individual observer, the method remains much the same now as then. The principal rules in use for forecasting the weather may be briefly stated as follows:—

A rising barometer usually foretells less wind or rain, and a falling barometer more wind or rain, or both; a high barometer, fine weather, and a low one the contrary.

If the barometer has been *about* its ordinary height at the sea level, and is steady or rising, while the thermometer falls and the air becomes drier, north-westerly, northerly, or north-easterly wind, or less wind, may be expected; and, on the contrary, if a fall takes place with rising thermometer and increasing dampness, wind and rain may be looked for from the south-east, south, or south-west; a fall of the barometer, with low thermometer, foretells snow.

With the barometer *below* its ordinary height a rise foretells less wind, or change in the direction towards the north, or less wet; but when the barometer has been low, the first rising usually precedes strong wind or heavy squalls from the north-west, north, or north-east, and continued rising foretells improving weather. If the barometer falls and warmth continues, the wind will probably *back*, and more southerly or south-westerly winds will follow.

In northern latitudes the heaviest northerly

gales occur after the barometer first rises from a very low point. A rapid rise generally indicates unsettled weather; slow rise or steadiness, with little moisture in the atmosphere, fair weather. A considerable and rapid fall signifies stormy weather and rain. The barometer generally falls with a southerly and rises with a northerly wind; though sometimes the contrary happens, and then the southerly wind is dry and the weather fine, or the northerly wind wet and violent.

When the barometer sinks considerably, high wind and rain or snow will follow; wind from the northward, if the thermometer is low for the season; from the southward, if high.

When a gale sets in from the east or south-east, and wind *veers* by the south, the barometer will continue falling till the wind becomes south-west, when, after a lull, the gale will be renewed.

The north-east wind tends to *raise* the barometer most, and the south-west to lower it most.

Instances of fine weather often happen with a low barometer, and are generally followed by a duration of wind or rain, or both.

Predictions founded solely on the indications of the barometer and thermometer may be made with more certainty if combined with careful observation of the appearance of the sky, and the atmospheric effects peculiar to the particular locality.

A rosy sky at sunset, whether clouded or clear, a grey sky in the morning, a low dawn (that is, when the first signs of the dawn appear on the horizon), all indicate fair weather. A red sky in the morning indicates bad weather, or much wind; and a high dawn (or when the first signs of the dawn are seen above a bank of clouds) presages wind.

From the clouds we may draw the following conclusions:—Soft-looking and delicate clouds foretell fine weather, with moderate breezes; hard-edged clouds, wind; rolled or ragged clouds, strong wind. A bright yellow sky at sunset also presages wind, and a pale yellow sky wet.

Dew and fog both indicate fine weather, while remarkable clearness of the atmosphere near the horizon (causing distant objects to appear very distinct and nearer than usual) is one of the most characteristic signs of coming wet.

At the present day, by the help of the electric telegraph, the meteorologist can obtain from as many stations as he desires the height of the barometer, direction and force of wind, &c., data which will inform him of the condition and movements of the aerial ocean at a definite time. He then marks on a map the height of the barometer at each place, and, drawing lines through all the places where the quicksilver stands at the same height, at any convenient interval he obtains a series of lines of equal pressure or weight, called shortly *isobars*, which show the height or depression at those places as the contour lines on a map show the different altitudes of the mountains and valleys. The thermometer readings, treated in the same way, are called *isotherms*. To make these synoptic charts (as they are called) complete, the force and direction of the wind, the amount of humidity, character of clouds, and other weather signs are also marked down, so that the chart may furnish a view of the weather at that particular time over the area from which reports have been obtained.

Supposing now that at the same time the next day a new set of data are received and marked on another chart, a comparison of the two will show the nature and direction of the change going on, and enable the meteorologist to pre-

dict, to a certain extent, what will be the immediately coming weather. This is a general description of the way in which the forecasts of weather, printed in the daily papers, are made. The interpretation of these synoptic charts may not appear to the reader to be a very difficult operation, but it must be remembered that meteorology is purely a science of observation, and as such will be most successfully handled by the observer of the greatest experience. From want of knowledge concerning the laws which govern the fluctuations of the weather, failures in the forecasts must happen now and again, and no reason can be given why certain states of the atmosphere, which previous observation would lead us to believe should be stable, suddenly break up without any apparent warning.

The extended use of the telegraph, due to the introduction of wireless telegraphy on board ships, especially on the great liners between Great Britain and America, has already done much, and will probably do still more in the future, to improve our means for forecasting the weather.

Besides the meteorological instruments mentioned above, there is one often used to indicate weather changes which is known as the chemical weather-glass, camphor-glass, or storm-glass.

Though sold in London more than a hundred years ago, no scientific explanation of its indications seems to have been attempted till the late Admiral FitzRoy took it in hand. He considered that this instrument had a scientific value, used in conjunction with the barometer and thermometer, in predicting local storms. Some other writers are at variance with the Admiral on this point, affirming that the weather indications of the storm-glass are not to be relied on; another, that light and temperature are the agents that bring about the changes observed.

The instrument itself consists of a mixture of camphor, nitrate of potassium, and muriate of ammonia, partly dissolved in alcohol, with a little water. This solution is placed in a long glass vial or tube, with some air, and hermetically sealed. Some authorities say that a small hole should be left in the top to admit the external air.

At one time the upper part of the liquid in the tube will appear quite clear, the bottom portion being occupied by a shapeless mass like melting white sugar. Again, the liquid portion will be more or less filled with crystallizations like fern-leaves or hoar-frost, and under some circumstances, like stars.

The general rules given for interpreting the readings of the storm-glass are as follows:—

(a) If the undissolved substance lies low and smooth at the bottom of the tube—fine weather.

(b) If it rises gradually in the shape of fern or feather-like crystallizations—rain.

(c) If it rises much higher than in (b), and if the liquid portion is less clear, with star-like crystals in motion, high wind or storm will follow.

RIGHT ASCENSION.

The Right Ascension of any heavenly body is its angular distance measured along the Equator from that point of intersection of the Equator and Ecliptic known as the Vernal Equinox. In the time of the ancient astronomers this point was situated in the constellation of Aries, and called by them the "First Point of Aries," but it has since then retrograded considerably behind that constellation, and is at present in the constellation Pisces. Modern astronomers, however, still speak of this zero point, whence Right

Ascensions are measured, as the "First Point of Aries." The Right Ascension and Declination are the two co-ordinates which define the position of any point on the celestial sphere with regard to the Equator as a fundamental plane, just as those of longitude and latitude define the position of any place on the terrestrial globe; the meridian of Greenwich being taken as the starting-point by geographers from which to reckon their longitudes, while the astronomer reckons his from the meridian passing through the Vernal Equinox.

Since a well-regulated astronomical clock should show *oh. om. os.* when the First Point of Aries is on the Meridian, the Right Ascension may be called the Sidereal time of Southing, and the approximate Mean time corresponding to it may be easily found for any object whose Right Ascension is given in this Almanack by means of the column headed Sidereal Time at Mean Noon, printed on the second page of each month. The rule may be thus stated:—*From the given Right Ascension subtract the Sidereal time at the preceding Noon, and further diminish the result at the rate of 10 secs. an hour. If the Right Ascension should be smaller than the Sidereal time to be subtracted, then 24 hours must be added to it. As an example:—At what time will α Orionis South on March 4?*

R. A. of α Orionis + 24h. 25h. 50m. 11s.
Sidereal time at Mean Noon (sub.) 24h. 47m. 23s.

7h. 2m. 48s.

Diminish by the Acceleration for 7h. 2m. 48s. at 10s. 1m. 10s.
per hour

Approximate Mean time of Southing, March 4 7h. 1m. 38s.

In a similar manner the Sidereal time corresponding to any Mean time may be found by adding the Mean time to the Sidereal time at Noon of that day. As an example, let it be required to find the Sidereal time corresponding to 9h. P.M. on September 16.

Sidereal time at Mean Noon 11h. 40m. 7s.
Mean time (add) 9h. 0m. 0s.

20h. 40m. 7s.

Add for Acceleration for 9h. }
at 10s. per hour 1m 30s.

Approximate Sidereal time }
Sept. 16 at 9h. P.M. 20h. 41m. 37s.

APPARENT DIMENSIONS, ILLUMINATED PORTIONS OF SATURN'S RING, OF THE DISCS OF MERCURY AND VENUS, 1908.

Date.	Major Axis.	Minor Axis.	Date.	Mercury.	Venus.
Jan. 9	38" 83	— 0" 04	Jan. 16	0.998	0.867
Feb. 18	37" 13	— 1" 27	Feb. 15	0.423	0.794
Mar. 9	36" 75	— 1" 98	Mar. 16	0.314	0.696
April 18	37" 04	— 3" 43	April 15	0.763	0.566
May 8	37" 69	— 4" 12	May 15	0.925	0.388

Oct. 5	45" 57	— 4" 78	Oct. 17	0.289	0.054
Nov. 4	44" 63	— 3" 99	Nov. 16	0.687	0.761
Dec. 4	42" 70	— 3" 58	Dec. 16	0.993	0.845

The figures in the second and third columns of the preceding table give the apparent dimensions of Saturn's Ring as seen from the Earth, and refer to the outer limit of the outer Ring. The sign + signifies that the northern surface will be visible, and - the southern surface. The Ring will be invisible when its plane passes through either the centre of the Sun, centre of the Earth, or when the Sun and Earth are on opposite sides of the plane of the Ring.

The figures in the fifth and sixth columns represent respectively the illuminated portions of the discs of Mercury and Venus.

MAGNETIC ELEMENTS.

The following table of mean magnetic elements is derived from the observations made at Greenwich in the respective years, and applies to Greenwich only.

The diurnal variation of the magnetic declination at Greenwich is about 12' in summer and 7' in winter. The needle occupies its mean position about 10h. a.m., and again about 6h. p.m., throughout the year. It reaches its most westerly position about 2h. p.m., and its most easterly position during the night or early morning, according to the season of the year. The inclination or dip also varies, from hour to hour, in a similar manner to the declination. The declination and dip are also subject to secular variations, the duration of which is not accurately known. Accidental perturbations, due to magnetic storms, affect the needles. These variations in the position of the magnets occur with great suddenness, deflecting the needle right and left with great rapidity, almost like ordinary telegraphic signalling, and are, generally speaking,

coincident with the passage of great outbursts of sun spots across the sun's central meridian.

Year.	Mean Magnetic Declination at Greenwich West.	Horizontal Magnetic Force in C. G. S. Units at Greenwich.	Mean Inclination or Dip of Needle at Greenwich.
1889	17 24.9	1821	67 24.9
1890	17 28.6	1823	67 22.9
1891	17 23.4	1825	67 21.4
1892	17 17.4	1826	67 19.8
1893	17 11.4	1829	67 17.8
1894	17 4.6	1829	67 17.3
1895	16 57.0	1832	67 14.7

GREENWICH OBSERVATORY.

Founded 10th August, 1675.

ASTRONOMERS ROYAL.

John Flamsteed	1675
Edmund Halley	1719
James Bradley	1742
Nathaniel Bliss	1762
Nevil Maskelyne	1765
John Pond	1811
Sir George Biddell Airy	1835
Sir William Henry Mahoney Christie, K.C.B.	1881

THE GRAND PRIORY OF THE ORDER OF THE HOSPITAL OF ST. JOHN OF JERUSALEM IN ENGLAND.

(INCORPORATED 14 MAY, 1888, WITH ADDENDA 1888, 1890 AND 1907.)

<i>Sovereign Head and Patron</i>	H.M. King Edward VII.
<i>Grand Prior</i>	H.R.H. The Prince of Wales, K.G.
<i>Sub Prior</i>	The Marquess of Linlithgow, K.T.
<i>Balliff of Eagle</i>	H.R.H. The Duke of Connaught, K.G.

EXECUTIVE OFFICERS.

Prælate—His Grace the Archbishop of York.
Chancellor—The Earl Egerton of Tatton.
Secretary-General—Col. Sir Herbert Jekyll, K.C.M.G., R.E.
Receiver-General—Edwin Freshfield, LL.D.
Almoner—The Rev. Canon Duckworth, C.V.O., D.D.
Registrar—Maj.-Gen. Lord Chylesmore, C.V.O.
Genealogist—Sir Alf. Scott Scott-Gatty, C.V.O. (Garter).

Director of the Ambulance Department—The Marquess of Breadalbane, K.G.
Librarian—Lt.-Col. R. Holbuehe.
Secretary—Colonel Sir Herbert C. Perrott, Bt., C.B.
Chairman of the British Ophthalmic Hospital, Jerusalem, The Earl Egerton of Tatton.
Chief Secretary of the Ambulance Department, Col. Sir Herbert C. Perrott, Bt., C.B.

ASSISTANT EXECUTIVE OFFICERS.

Assistant Director of Ambulance Department—Lieut.-Col. Sir Richard Temple, Bt., C.I.E.
Assistant Librarian—Cyril Davenport, V.D., F.S.A.
Assistant Secretary—Lockhart Stockwell.
Accountant—William R. Edwards, A.C.A.
Honorary Secretary of British Ophthalmic Hospital Jerusalem—Lt.-Col. J. T. Woolrych-Perowne.
Assist. Hon. Sec. for Scotland—J. H. Stevenson, M.A. (Unicorn).

Celestial Objects and Phenomena for Observation, 1908.

THE following is a summary of the more prominent and interesting astronomical objects and occurrences visible during the year. The information is intended as a guide to that ever-increasing band of amateur observers who "consider the heavens" and take a delight in watching the many attractive pictures displayed therein. Of course, certain phenomena, according to the brightness and size of the objects implicated, may require a good telescope in order to be effectively witnessed, others will need an opera-glass only, while others again will afford satisfactory spectacles to the unaided eye. We have only attempted to describe such events as are capable of being definitely predicted. There are various sights and wonders presented in the firmament which do not admit of being foretold with accuracy. Among the latter class of objects may be included large Sun-Spots, displays of Aurora Borealis, bright Comets, New Stars, and brilliant Meteors or Fireballs. As regards these objects, observers must be on the look-out for them, and the most diligent are likely to be the most successful. Occasional phenomena of the sort alluded to are usually noticed in the newspapers at about the times of their apparitions. If a new star appears or if a conspicuous comet should come into view the public journals usually give some particulars concerning it, including its position in the sky, so that observers can often find such objects without difficulty. In the case of some appearances, such as those of Aurora and Meteors, they are so fugitive in their durations that they are only witnessed by those persons who happen to be on the look-out at the times when they are presented. Everyone, therefore, desirous of being spectators of these transitory, though sometimes brilliant, objects should examine the sky on clear nights specially in quest of them. The firmament is always liable to present us with some unexpected though possibly beautiful aspect, and in the course of each year the persevering student who seeks to behold natural wonders of this kind will be successful on not only one but many occasions. Though no particular phenomenon may be known to be in progress, the heavens should be frequently scanned in the hope of discovering some indications of one or other of the many highly interesting displays it is so well calculated to afford, and whenever anything unusual is detected by the student it should be accurately observed and carefully described as regards its time of occurrence, position, and changes of aspect. In fact, amateurs should always recognise the importance of keeping records of the progress in detail of every noteworthy event or appearance which may arrest their attention. At the time of observation, things may appear unimportant which are not really so, and which if properly recorded may afterwards acquire considerable value for comparison with others of similar character. It is not too much to say that many useful facts have been lost to science owing to the negligence of spectators in omitting to preserve all the salient details of their visible characteristics. It should indeed be the object of every scientific enquirer to keep a diary or notebook in which records should be kept of things attracting his attention.

The successful student of Nature is not always

the individual who possesses keen powers of observation. It is rather the man who combines good sight with the sound judgment necessary to interpret what he sees, to recognise the essential features requiring detailed notice, and the perseverance to suitably marshal his facts, to form them into summaries, and to publish them in a form most useful for reference by other observers. There have been astronomical workers who have really laboured very earnestly in observational work during a great number of years and who have accumulated numerous facts in certain departments of astronomy, but who have really assisted scientific progress very little because they failed to properly arrange, discuss, and publish their results, except in fragmentary or detached form. The really master-hand in the field of Nature observation is he who is scrupulously accurate, who accepts every opportunity offered for acquiring materials, who capably records all the details presented, and who puts his imagination entirely on one side. This is particularly the case in telescopic work, in which there are a great many difficulties and complicated features, some of which contribute to bring about very erroneous views, and this has especially been noticeable with regard to the study of planetary markings by several observers in recent years who have announced results of so chimerical a nature that they are obviously more suitable for the pages of the novelist than for the realm of serious science.

Eclipses.—In the year 1908 there will be three eclipses of the Sun and one of the Moon, but only two of these will be visible at Greenwich.

On January 3rd there will be a total eclipse of the Sun, but it will occur some time after sunset in this country.

On June 28th there will be an annular eclipse of the Sun, which will be perceptible in England as a small obscuration of the Sun's southern limb. At Greenwich the magnitude of the eclipsed portion of the Sun's disc at the time (5.38 P.M.) of greatest phase will equal about 1-15th of the whole surface, for if the solar diameter is considered equal to 1 the relative proportion eclipsed will be 0.065.

On December 7th, 1908, there will occur a penumbral eclipse of the Moon, which will be visible at Greenwich, the middle of the phenomenon being at 9.55 P.M. This, it may be mentioned, is not an ordinary eclipse by the Earth's dark shadow, but merely a faint obscuration by the outlying fringe of shade surrounding the dense shadow. And when the Earth is involved in this feeble secondary shade, the Moon apparently loses little of her brilliant aspect. In fact, spectators not acquainted with the circumstance that an eclipse is in progress will probably fail to notice any peculiar effect about the appearance of the lunar disc. An attentive examination of her features will, however, reveal the fact that her southern limb is involved in a dim, smoky veil, rendering it palpably less luminous than the bright silvery lustre of the northern limb.

On December 23rd there will be another annular eclipse of the Sun, but it will only be visible at places far south of this country.

Occultations.—There will occur no occultations of very bright objects during the year; in fact, the various stars hidden by our satellite in 1908 will

be less than the 3rd magnitude. The principal events will be as under:—8 Geminorum (mag. 3.6) on January 17 and February 13, ζ Tauri (mag. 3.0) on February 12, μ Geminorum (mag. 3.2) May 4, ϵ Tauri (mag. 3.7) September 26 and November 9. The particular times at which these occurrences may be witnessed will be found in the calendar portion of the Almanack.

Planetary Conjunctions occasionally supply spectacles of a very agreeable kind, and, as they are often observable without instrumental aids, form events specially calculated to engage the interested attention of amateur astronomers, the only essential to success being a clear atmosphere.

Feb. 10, 7h. 50m.	Venus	$1^{\circ} 18'$ N. of Saturn.
Apr. 4, 3h. 27m.	Venus	$1^{\circ} 37'$ N. of Mars.
June 7, 4h. 24m.	Mercury	$0^{\circ} 19'$ N. of Mars.
June 22, 8h. 32m.	Venus	$2^{\circ} 4'$ S. of Mars.
July 27, 23h. 45m.	Mercury	$0^{\circ} 44'$ S. of Neptune.
Oct. 13, 15h. 58m.	Venus	$0^{\circ} 36'$ S. of Jupiter.
Nov. 30, 11h. 15m.	Venus	$1^{\circ} 17'$ N. of Mars.

In the conjunction of July 27, when Neptune will be implicated, it will be necessary to employ a powerful telescope.

Jupiter's Satellites.—Amateurs possessing telescopes of moderate dimensions will find the four bright Galilean satellites of Jupiter very attractive objects for study. They can be distinctly perceived in any small glass, and the circumstance which, more than any other, renders them so interesting is that their relative places vary from hour to hour and from night to night. The different positions they successively occupy are entertaining to the observer, who experiences nothing of the monotony which often arises from a view stationary in all its details. And the satellites not only change their positions at brief intervals, but frequently become eclipsed in the shadow of Jupiter or occulted by the large globe of the planet. They also make transit across the disc, and it is at these times that they occasionally become visible as circular dark spots projected on the bright surface of Jupiter. The shadows of the satellites are also to be distinguished on the face of the planet at such time, and a telescope will sometimes reveal the gratifying spectacle of two or three black spots coursing along the line of the Jovian belts and imparting quite an abnormal appearance to the planet's scenery. The satellites are not generally known by distinguishing names, it being customary to refer to them by the Roman numerals I., II., III., IV., V., VI., and VII., but of late the idea of employing the names given to the four brighter ones by Simon Marius, soon after their discovery in 1610, has been more favourably regarded. The fifth satellite, which was discovered by means of the great 36-inch refracting telescope at the Lick Observatory in California on September 9, 1892, is exceedingly faint and close to the planet, so that it requires a large instrument to reveal it. The sixth and seventh satellites, discovered by photography at the same Observatory by Perrine in 1905, are also far beyond the reach of ordinary appliances. The Satellites III. and IV. are the two outermost of the four Galilean Moons from Jupiter, and they are frequently seen transformed into dark spots when in transit. Under such circumstances they are fairly conspicuous objects even in small instruments. Appended are the occasions in 1908

when Satellite III. may be discerned in transit:—

SATELLITE III. (Ganymede).

1908.	Ingress.		Egress.		Duration of Transit.	
	H.	M.	H.	M.	H.	M.
Jan. 15	3	32	7	14	3	42
" 22	6	48	10	31	3	43
" 29	10	4	13	46	3	42
Feb. 5	13	19	17	1	3	42
Mar. 5	2	43	6	24	3	41
" 12	6	12	9	54	3	42
" 19	9	47	13	28	3	41
April 24	4	45	8	27	3	42
May 1	8	46	12	28	3	42
June 6	5	37	9	20	3	43
" 13	9	57	13	39	3	42
Oct. 13	13	1	16	37	3	36
" 20	17	20	20	54	3	34
Nov. 25	14	18	17	46	3	28
Dec. 2	18	19	21	45	3	26
" 31	9	42	13	4	3	22

Similar transits of Satellite IV. (Callisto) will take place as follows:—

1908.	Ingress.		Egress.		Duration of Transit.	
	H.	M.	H.	M.	H.	M.
Feb. 5	6	22	11	12	4	50
Mar. 9	11	42	16	31	4	49
" 26	3	35	8	23	4	48
May 15	8	42	13	31	4	49
June 1	3	54	8	45	4	51
Oct. 30	18	0	22	35	4	35
Nov. 16	13	12	17	37	4	25

Astronomical time, counted from noon to noon, has been employed in the foregoing tables.

A telescope of about three inches aperture will exhibit the satellites Ganymede and Callisto and their shadows during these transits, for the dark circular spots representing them will be very obvious on the bright surface of the planet. The shadows are larger and more conspicuous from their darker tone than the satellites themselves, and mistakes in identifying them from one another are frequently made. The times of occurrence included in the foregoing tables should, however, prevent errors of this kind, for, except at the period of opposition, the satellites and their shadows will differ materially in their times of transit. Before opposition the shadows precede the satellites; after opposition the order is reversed, the satellites taking precedence of their shadows.

Thus, on October 20, 1908, more than four months before opposition, Satellite III. (Ganymede) commences its transit 3h. 54m. after its shadow; while on June 6, more than four months after opposition, the same satellite begins its transit 4h. 15m. before its shadow. In the case of Satellite IV. (Callisto) the differences are often much greater, for they occasionally extend to 22 hours.

The third satellite of Jupiter is so bright that it has been occasionally glimpsed with the naked eye. All four of the old Galilean satellites would be visible without telescopic aid but for the brilliancy and neighbouring position of the planet. The fifth, sixth, and seventh satellites are only objects for the professional astronomer

who has an exceedingly large telescope at his command. Their periods of revolution are:—

Satellite.	Period.	Discoverer and Date.
	D. H. M. S.	
Fifth ...	0 11 57 22.7	Barnard, 1892, Sept. 9
Sixth ...	250 12 . . .	Perrine, 1904, Dec. 3
Seventh 257 . . .		Perrine, 1905, Jan. 2

The two latter have very long periods, which have not yet been very exactly determined.

The four bright satellites are usually seen ranged in a line approximately parallel with the belts and with the planet's equator, but there are notable exceptions. Sometimes they are symmetrically arranged, two being on one side and two on the other. On certain dates they are placed three on one side and one on the other, while occasionally they are all clustered on one and the same side of Jupiter. The following are some of the dates when they may be observed in the latter position:—

Satellites on East side of Jupiter.	Satellites on West side of Jupiter.
February 4 P.M.	January 8 P.M.
April 18 "	" 22 "
May 23 "	March 26 A.M.
June 13 "	March 15 P.M.
July 11 "	April 29 "
" 16 "	April 13 "
September 22 A.M.	May 18 "
October 13 "	June 1 "
November 11 "	" 8 "
December 2 "	" 22 A.M.
" 16 "	October 16 "
" 30 "	November 6 "
	December 26 "

Interesting conjunctions of three of the satellites will occur on the evenings of March 22, April 12 and 21, May 23 and 31, June 10 and 17, and July 16; and on the mornings of September 28, October 22, November 16, and December 11. Only one satellite will be visible on May 12, 7h. 52m. to 9h. 59m., and May 19, 9h. 36m. to 10h. 38m., I. being in transit, while II. and III. will be occulted. On December 20 only Satellite IV. will be perceptible between 11h. 33m. and 13h. 42m., I. and III. being eclipsed, and II. in transit.

The four brighter satellites of Jupiter deservedly form one of the first and certainly one of the most attractive natural pictures viewed by the young telescopic observer, for they may be detected and followed with great facility, taking up, as they do, a series of extremely interesting positions as a result of their different periods of revolution. The student may find a little agreeable entertainment in watching the satellites and delineating on a number of diagrams their changes in relative positions on different nights. They may be individually identified by reference to the calendar portion of this Almanack, which contains a monthly column exhibiting their daily configurations. It often happens that two of the satellites approach each other so closely as to be scarcely separable with moderate powers, the appearance being analogous to that of a difficult double star.

The Sun, forming as he does the great central source of light and heat and the mainstay of planetary life, is naturally entitled to marked attention from everyone interested in astronomy. A mighty orb, exhibiting evidences of great activity and capable of exerting physical influences of far-reach-

ing and forcible character, it is not to be wondered at that he has always been studied with distinguished regard, and that the investigation of solar phenomena is considered to be of the highest importance. Many persons have heard something about the "spots on the Sun," but comparatively few have ever seen these curious formations. That an object so dazzlingly luminous to our vision as the Sun should exhibit dark markings is a circumstance very surprising in itself, but when it is stated that these markings are often of enormous dimensions (individual spots may be 50,000 miles in diameter, while groups may be 150,000 miles or more in length), and that they undergo exceedingly rapid changes, sometimes appearing or disappearing in a few hours, the attention becomes riveted on phenomena occurring on so gigantic a scale and so materially affecting the leading body of our system. The spots are occasionally sufficiently large to be distinguished without instrumental aid; indeed, their discovery antedates the invention of the telescope by many centuries. Whenever this instrument is employed for solar observation a dark-tinted glass should be attached to the eye-piece, in order to moderate the intense brilliancy of the Sun, for unless precautions of this kind are taken serious damage may result to the observer's sight. A very convenient plan of effecting observations of the Sun is to detach the coloured glass from the instrument, and to allow the telescopic image of the Sun to fall upon a piece of white cardboard. The details of the spots may be readily perceived in this manner, and the speckled appearance of the whole disc will be displayed satisfactorily. This method is to be recommended for general purposes, inasmuch as it prevents possible injury to the eye and affords an easy means of exhibiting the spots to several persons at the same time. For critical examination of sun-spot structure and variation in detail, we must, however, resort to the ordinary plan of direct vision as decidedly the most effective. During the ensuing few years solar phenomena as evidenced in the spots (including the facule and dark cyclones) will become decreasingly numerous. The maximum epoch of these appearances occurred in 1905, and in 1908 we shall be approaching a minimum. But large groups and isolated spots will occasionally appear and afford the observer ample scope for continued study. In 1907 some spots of unusually great dimensions were seen; there was one on the central meridian on June 19 which was 120,000 miles long, and again in July the solar disc was marked by a very extensive group. In late years certain scientists have countenanced the view that the weather is influenced by solar disturbances, but it is very difficult to believe that this theory can be substantiated on adequate evidence. The weather is not subject to similar vagaries over the whole globe; some parts experience atmospheric changes and phenomena quite distinct and indeed opposite to others. We should expect the Sun's influence to have a general widespread effect. In June, 1907, we had very bad weather during the time the great sun-spot was visible, yet at its return in July we experienced a beautiful summer-like spell. The spots are abundantly displayed at intervals of about eleven years with intervening times of minima. We may look at the Sun many times during two or three successive years, and scarcely ever see a large dark spot amid the bright stippling of the solar surface. In other

years we shall see spots distributed in plentiful array along zones lying not far N. and S. of the Equator. Thus in 1901 and 1902 the Sun was practically free from conspicuous spots, while in the last two or three years they have been very abundantly presented. But with a decline in these solar disturbances students will now find more time to engage in investigating the large array of significant facts which have accumulated in recent years and which promise some considerable additions to our knowledge of the subject.

For a long period it had been known that sun-spots and magnetic storms present some suggestive coincidences in their times of occurrence, but the nature and extent of the connection has remained doubtful for the want of suitable and sufficient data. Recently, however, the whole question has been ventilated, with the result that the sun-spots and magnetic storms appear to be directly and closely associated. But though the main fact may be said to have been demonstrated on conclusive evidence, the subject is a complicated and difficult one, and further observations and comparisons are necessary before the problem will be fully and completely solved.

The spots apparently transit the solar surface in about 13½ days, and merit close study when near the margin of the disc, for certain modern observers object to the idea that they represent cavities in the sun's atmosphere. When the dimensions of a sun-spot reach one minute of arc, it may be considered large enough to be distinguished by the naked eye. A spot of this size can generally be well seen through a piece of smoked or coloured glass, or possibly near the times of sunrise or sunset without any protection for the eye if the sun's light is sufficiently moderated by fog, mist, or thin cloud.

The Moon admittedly forms the most diversified, attractive, and distinct object in the firmament for telescopic study. Her invariable features present a striking contrast to the evanescent formations disturbing the luminous atmosphere of the Sun. The lunar landscape is, it is true, subject to many apparent variations quite altering the visible aspect of the features in detail; but these are merely due to the constantly changing angle at which the Sun's rays fall upon them. Objects differently illuminated undergo some curious transformations of aspect; but real changes in the actual surface formations of the Moon have never been conclusively proved, though often suspected. The expanse of hill and valley, mountain, crater and ridge, with extensive plains here and there, seen on our satellite are permanent features liable to no rapid alterations of shape or size, though it is perhaps quite possible that many of them undergo slight modifications during long periods of time. Evidences of great activity in the earlier stages of the Moon's existence are distributed abundantly over the lunar orb, but the markings appear to have settled down into a rigid, immovable state so far as the imperfect and somewhat limited evidence afforded by our telescopes enables us to judge. The most suitable period at which to view the craters and mountainous regions of the Moon is when her disc is only partly illuminated, and she is in a crescent form, near the first or last quarter. At these periods the shadows of the various inequalities of landscape near the terminator are strikingly manifested, and the diversified character of the formations most attractively portrayed.

This is not the case at the period of full Moon, for lunar objects are then placed under a vertical Sun, and their shadows have disappeared, so that the features seem to have lost their distinctive characters. The great brightness of the full Moon is also an impediment to successful observations, especially when a large telescope is employed. Let the observer, therefore, avail himself of the period near the first quarter, for the Moon is then very conveniently situated in the evening sky, and especially so in the spring months. The surface of our satellite has already been thoroughly surveyed, but there remains much to be done in the re-examination and drawing of details in regard to which our knowledge is far from perfect. Observers should specially search for evidences of active change, and compare reliable charts of the Moon with new observations at the telescope. Splendid photographs of our satellite have been obtained in late years in America and elsewhere, and these exhibit a surprising amount of detail far more accurately reproduced than on the best drawings. Should any marked differences be discovered between old and new records, the observer should not too hastily infer the occurrence of real changes. There are imperfections and errors in the best charts of the Moon, some delicate features have been omitted altogether, while others have been incorrectly delineated. And it must be remembered that as the Sun's altitude above a lunar object varies so does the object alter in appearance. Fair comparisons can therefore only be instituted when the conditions are identical. It is fair to suppose that we must look to photography, rather than to direct telescopic observation, to supply us with new facts and clear up some long-standing mysteries, in connection with the visible details of the lunar surface and their physical condition.

In past years, several interesting instances of supposed real change on the Moon have been discussed and investigated, but without definite issue as regards proof of the alleged variation. The crater Linné, in the Mare Serenitatis, was thought to have been filled up, and a depression near the cleft of Hyginus, in the Mare Valorum, was said to have materially altered its character: but these instances could not be demonstrated on sufficient evidence. We are now in a much better position than we were a generation ago to detect cases of lunar activity, should they occur, for drawings and photographs have multiplied to such an extent that we possess tolerably full and reliable means of comparison. Selenographical students should, therefore, by the most accurate means available, continue to apply themselves to the search for instances of lunar activity, as it forms a most attractive branch of investigation on a wonderfully diversified and beautiful object.

Mercury will shine in the evening sky during the first half of February. He reaches his greatest distance East of the Sun on the 13th (18° 9' E.). He should be looked for low in the western horizon soon after sunset. As he never departs more than 28° from the Sun it is considered an interesting feat to pick him up whenever the atmosphere is of sufficient clearness to reveal his flashing lustre. It is best to use an opera-glass when looking for Mercury, until the exact position is known, after which it is generally easy to see him with the naked eye. He shines with a strongly sparkling light, in contrast to most of the primary planets. English astr.

nomers, both professional and amateur, are always interested in obtaining naked-eye observations of this small planet, because our climate makes him a difficult object. In the clear air of the Mediterranean and Australia he was seen every evening for a month during his Eastern elongation in June, 1907!

The late Rev. S. J. Johnson made it a point to look out for Mercury at favourable times, and viewed him as an evening star with the naked eye about 150 times during the years 1858-1905. The writer, at Bristol, has seen the planet 130 times since February, 1868, but has not availed himself of many opportunities. Probably this object could be seen on about 15 occasions annually in England if searched for systematically. In the spring apparitions Mercury should be looked for before the date of maximum E. elongation, and in the autumn after W. elongation. The alteration of phase is rapid, and though near E. elongation the planet is approaching the Earth, the decrease in the illuminated portion of the disc is so great that the increased diameter does not compensate, and a considerable decline in lustre becomes apparent. Mercury is sometimes quite a striking object for about 10 evenings before maximum E. elongation, but may be utterly invisible a week or so after passing that position. The albedo of Mercury is not nearly so great as that of some of the other planets, being only 17, whilst that of Venus and Jupiter is about 65, and that of clouds 72. Under normal conditions he becomes visible to a good eye about 30 minutes after sunset, and is brightest when the western quarter is clear right down to the horizon, about the same period before his setting. The times of Mercury's setting and also those of the Sun are given in the following table:—

seeing the smallest of the primary planets. The times of his rising and those of the Sun are given in the following table:—

1903.	Mercury rises.	Sun rises.	Interval.

The conditions under which Mercury is presented alternately as a morning and evening star are repeated at nearly the same dates every 13 years. Viewed telescopically his disc shows very few certain markings; all observation is most difficult owing to his nearness to the Sun. The true rotation period is still unknown, but the most probable is that of Harding, 24 hrs. 5 mins. 28 secs.; although the eminent Italian astronomer Schiaparelli thinks that the planet turns on his axis in the same time that he performs a revolution around the Sun, *i.e.*, 87.969 days, and therefore always presents the same hemisphere to that luminary, as our Moon does to the Earth. Definite markings appear to have been first seen on Mercury by Schröter; he observed a blunting of the S. horn, an irregular contour of the terminator (the border between the illuminated and unilluminated portion of the planet), and projections from the limb. From these appearances he inferred the planet's surface to be mountainous. The rotation of Mercury in little more than a terrestrial day was derived from these results. This rotation period was also confirmed by many observations made at Bristol in 1882 and succeeding years. Schiaparelli thinks it probable that Mercury has a very dense and imperfectly transparent atmosphere. In 1896 Herr Brenner saw polar spots similar to those on Mars. In 1900 the planet was observed by Professor Barnard with the great 40-inch refractor at the Yerkes Observatory. He found for the diameter at mean distance 2,965 English miles; there were three or four large dark spots very much resembling those seen on the Moon with the naked eye. His surface markings have at different times been compared to Mars and the Moon. There was a transit of Mercury across the disc of the Sun on November 14th, 1907; another will not occur for seven years, *i.e.*, on November 6th, 1914. The planet only appears as a small black spot on the dazzling surface of the primary orb of our system.

Venus has always upheld her title to be considered the most beautiful, as a naked-eye object, of all the planetary members of the solar system. She will be a very brilliant evening star during the last half of April and the whole of May, and is particularly well placed for observation, as she is then above the horizon for a period of about 4½ hours after sunset. Like Mercury, Venus may be best observed at the evening apparitions which occur in the first half of the year, and at the morning apparitions in the last half, because

Mercury will again present himself after sunset in the western sky at the beginning of June, being at greatest elongation (23° 58') East of the Sun on the 8th. At 4h. 24m. P.M. on the 7th he is only 19 mins. of arc N. of the planet Mars.

In July Mercury will appear as a morning star shortly before sunrise towards the end of the month. He is at greatest elongation West of the Sun (19° 50') on the 25th, and should be visible for about 11 days after this date. In conjunction with the Sun at the end of October, Mercury will emerge from his rays and again be visible to the naked eye before sunrise in November. He is at greatest elongation West (19° 18') of the Sun on the 13th, and this is the last occasion during this year on which observers will have a chance of

at such periods her position is N. of the Sun's place, and she is a long time above the horizon in the absence of that luminary. Her elongations usually extend to between $45\frac{1}{2}'$ and $47'$, and she displays maximum brilliancy at a time preceding or following inferior conjunction by 36 days, when her disc is one-fourth illuminated and her apparent diameter about 40 seconds of arc.

At the opening of the year Venus is in the constellation of Capricornus, passing from thence during February and March through Aquarius, Pisces, and Aries. On March 1 she is in conjunction with ζ Piscium, and on April 1 only 3 degrees S.W. of the well-known asterism of the Pleiades. She is very near β Tauri on April 23, and is at greatest elongation ($45^\circ 37'$ East of the Sun) on the 26th, when she can easily be identified by her intensely white light, in the western sky shortly after sunset. On May 4, at 9h. 59m. A.M., she will be $4^\circ 15'$ N. of the crescent Moon, and on the 10th about 5° to the West of ϵ Geminorum and N. of the variable star η Geminorum. Venus will also be in conjunction with ϵ Geminorum on the 16th (Venus $1\frac{1}{2}^\circ$ N.). During May she gradually increases in brilliancy, becoming more crescented in phase, and arriving at maximum on the 29th, after which she will decrease and become invisible to the naked eye, being at inferior conjunction with the Sun on July 5. In conjunction with the Moon on June 2, at 10h. 43m. A.M. (Venus $1^\circ 12'$ N.), and on the 13th about 6° S. of the 1st magnitude star Pollux (β Geminorum); at 9h. 0m. P.M. on the same date she will appear stationary in the heavens, after which her course is retrograde in Gemini until July 27, when she will resume her motion eastwards.

When viewed through a telescope Venus shows fewer markings even than Mercury, although when crescented she makes a beautiful picture and presents an attractive effect when in conjunction with the Moon, at which times the surprising brilliancy of her light forms a pleasing contrast to the dull and yellowish colour of our satellite. Galileo appears to have been the first telescopic observer of Venus, and he discovered the phases of the planet in 1610; but no further advances seem to have been made until 1643, when Fontana, at Naples, saw irregularities along the inner edge of the crescent. Two years later he detected a dark spot. In 1665 Bursellini is said to have noticed spots on Venus similar to those on the Moon. The greatest astronomer of the seventeenth century, J. D. Cassini, was the first to really study the markings on this planet. His earliest observation of them was in 1665, when he saw a bright point near the inner edge, and three very obscure spots at the W. part of the disc. From observations in that and the following year he concluded the rotation period to be 23 hrs. 21 mins., although the exact time was somewhat doubtful. Bianchini, La Hire, the younger Cassini, Maraldi, Schröter, and Madler were some of the most successful observers of the planet's markings up till 1836. Little substantial progress appears to have been effected of late years in regard to our knowledge of the forms, character, and motion of the indefinite shadings and spots, and many striking differences exist in the work and conclusions of the various observers. With regard to the rotation period, most modern observations seem to point to a short period of about 23 hrs. 21 mins. or 24 hrs. The Italian astronomer Schiaparelli, on

the contrary, favours a much longer time, probably 224 $\frac{1}{2}$ days—that is, in a period exactly equal to the duration of the sidereal revolution of Venus. He accounts for the rapid changes in the aspect of her disc by the varying altitude of the planet above the horizon and the different illumination of the background of the sky. In 1862 Trouvelot, as a result of 20 years' observations, concluded that the brilliant spots on the limb are permanent, and are very high mountains occupying only the two regions where one ordinarily sees the horns. Flammarion in 1864 said that Venus has polar caps similar to those on Mars, but they are less evident owing to the difference in the general tone of the discs of the two planets. In 1899 the Abbe Moreaux agreed with Antoniadi that the scattering of light by atmospheric particles of the planet hides all surface markings from our view. Thus we see that after all the earnest application of telescopic observers during three centuries the problem of this planet's real aspect and axial velocity remains unsolved. Both Mercury and Venus are attractive to the eye, Venus for her dazzling beauty amid the twilight, Mercury for his flashing rosy light; but they are apt to disappoint telescopic students, although the phases have always furnished interesting spectacles ever since Galileo first saw Venus in the form of a glittering crescent about three centuries ago.

Mars.—At the commencement of the year Mars is in the extreme south of the constellation Pisces, moving to the N.E.; he is very near ζ and in conjunction with ϵ Piscium on February 3, when the planet is less than 1° E. of the star. He passes through Aries in March, and Taurus in April, on the 3rd being only 3° S. of the Pleiades; and on the 17th is in conjunction with κ Tauri and 6° N.W. of Aldebaran (α Tauri), the easily recognised brilliant of the Hyades. In October he enters Virgo, and on the 2nd is in conjunction with β Virginis, being only $\frac{1}{2}^\circ$ W. of the star, and with η Virginis on the 14th (Mars $\frac{1}{2}^\circ$ W.). On November 1 he is $1\frac{1}{2}^\circ$ W. of θ Virginis, and on the 12th in conjunction with Spica (α Virginis), the brilliant 1st magnitude star of Virgo (Mars $2\frac{1}{2}^\circ$ N.). On December 16 there will be a very close conjunction of the planet and α Libræ, the most southern of the two conspicuous stars in the constellation of Libræ the Balance. At the close of the year his position is $3\frac{1}{4}^\circ$ S.S.W. of γ Libræ, and 8° W.N.W. of the well-known stars β and δ Scorpil. Mars will be in conjunction with the Moon on the following dates:—

Jan. 8	at	10 7 P.M.	Mars 5°	8' N.
Feb. 6	"	5 21	"	5' 49' N.
Oct. 23	"	6 49 A.M.	"	4' 24' S.
Nov. 21	"	3 49	"	4' 0' S.
Dec. 20	"	1 56	"	2' 58' S.

The planet Mars will not be a very conspicuous object this year, as he approached near the Earth and was in opposition to the Sun in July, 1907. He will not be so favourably presented again for telescopic study until September 23, 1909. Unfortunately, in 1907, although very well placed for southern, he was badly situated for northern observers, owing to his low altitude of only 10° when viewed from Greenwich. The study of his surface is, perhaps, of more interest than that of any other planet, as the markings we discern are stable features of his actual globe. Our telescopes to-day show us precisely the same objects as were glimpsed by Fontana, Huygens, Hooke, and Cassini about two and a half centuries ago.

There is no dense atmosphere on Mars to curtain his ground formations or obscure his natural scenery, nor any very rapid rotation to drift such vapours as he may possess into bands parallel with his equator as is the case with Jupiter and Saturn. What we see may be regarded as appertaining to the real surface, and as representing the outlines of continents, seas, snow areas, or, at least, regions of very different reflective power and very definitely bounded forms. Mars is the only planet (apart from the Earth) whose rotation period is accurately known, and the best values place this at 24h. 37m. 22^s. The two hemispheres of Mars are notably dissimilar in their respective configurations. The southern presents large, irregular, dark patches, with light areas and some brilliant spots. The northern exhibits a large number of dusky streaks and delicate lineaments extending over long ranges and apparently intersecting or interlacing in certain positions. These streaks are knotted in places and are by no means straight, very dark, and sharply outlined, as they have been represented by some observers. Of the objective existence of these canal-like markings there is no doubt whatever, though their number has been multiplied beyond reasonable belief by very imaginative observers.

Minor Planets.—These small bodies, revolving between the orbits of Mars and Jupiter, lie quite beyond the sphere of popular observation. Over 600 of them have been discovered up to the present time, and hundreds of others await detection. Several have recently been found which revolve in orbits about equal to that of Jupiter. One only of the large number mentioned moves in a path the mean distance of which falls between the Earth and Mars. This particular planet is named Eros, and is the most important minor planet known, since its occasional near approaches to the Earth will enable the Sun's distance to be determined more accurately than is possible by any other object or method. Eros, however, is usually extremely faint, and may be dismissed as beyond our scope, for it is only visible as a tiny telescopic star. A really favourable opposition will not occur until 1924. Of the ordinary members of this abundant family, four are of some importance, viz.: Ceres, Pallas, Juno, and Vesta. They were discovered early in the 18th century, and are brighter than the others.

Whenever it is desired to identify one of these small planets, or any other object of similar character beyond reach of the naked eye, its exact position relatively to a known star should be found, and the telescope directed to the place. The observer should then construct a diagram of the small stars visible, and on succeeding nights, by comparing this diagram with the same spot in the heavens, the object sought for will reveal itself by its motion.

Ceres arrives at opposition to the Sun on March 31, therefore she is favourably situated for observation during March and April. At the date of opposition her position is in the northern region of Virgo, 2½° E.S.E. of the 3rd magnitude star ε Virginis, almost midway between a Böötis (Arcturus) and β Virginis. She rises in the evenings and is visible through the night in the spring and early summer. Her motion is retrograde N.W. until May 25, after which date her course is to the S.E. On April 11 she is in conjunction with ε Virginis, Ceres being only ¼° S., and on several succeeding nights she will be less than 1° S. of the star. Ceres was the first

of the minor planets discovered in 1801 by Piazzi at Palermo. She is also the largest, having a diameter of 477 miles.

Pallas.—This minor planet will be visible, by the aid of a small telescope, during the spring evenings; she is fainter than Ceres, being only of the 8th magnitude even when at opposition to the Sun on March 10. On this date the planet is 3½° W. of α Leonis, and 7° S.W. of β Virginis. Her course in Leo is to the N.N.W.; after April 17 she moves N. until the end of the month, and E. to July. On March 22 she is 1½° to the S.W. of σ Leonis, on April 1¼° E. of χ Leonis, and on May 1¼° W. of θ Leonis. For more than a week Pallas is less than 1° N.W. and N. of this 3rd magnitude star. On June 16 she is 2° N. of Denebola (β Leonis), in the extreme E. of Leo. These well-known stars should enable the planet to be picked up in a telescope of low power and large field. Pallas was discovered by Dr. Olbers in 1802, and is the second largest of the asteroids, having a diameter of about 304 miles.

Juno is at opposition to the Sun on July 4, and is an evening star during the summer and autumn months. At the beginning of June she is in the S.W. region of Aquila, on the 13th is in conjunction with λ Aquilæ (the small planet 1° N.W.), and on the 19th only ½° N. of the 3rd magnitude star. Her course being retrograde until the end of August, she enters Scutum Sobieski in July, and on the 4th is 3° W. of λ Aquilæ. On August 2 she is 4° S.E. of η Serpentis. From the end of August to November her course is eastwards through Scutum and the S.W. portion of Aquila. On November 9 she is 5° S.E. of λ and 4° S.W. of κ Aquilæ. Juno was discovered by Harding in 1804. She is the smallest of the four first asteroids, her diameter being only 120 miles. At the time of opposition her magnitude is 8.65.

Vesta is the brightest of the minor planets, and is occasionally distinctly visible to the naked eye. She will be favourably presented in the evening sky during the first quarter of 1908, as she is at opposition to the Sun on January 4, when her magnitude is 6.94; and may also be seen during the last quarter of the year, in the morning sky. Her position at the date of opposition is 2° N. of the variable star ζ Geminorum, and 4° W. of δ Geminorum (3rd magnitude); at the same time she is in conjunction with the small star 44 Geminorum. Her course in Gemini is retrograde during January and until February 22, after which her movement is eastwards. On January 17, at 3 A.M., Vesta is only 52' N. of the full Moon, and on the 23rd she is 1° S. of ε Geminorum. On March 23 the planet is ¼° N. of ε Geminorum—Vesta 7½ magnitude at the time; and on May 10 she is less than ¼° S. of κ Geminorum, and a little N. of two variable stars marked T and S on the maps; κ is about 4¼° S. of Pollux (β Geminorum), the well-known 1st magnitude star. Vesta was discovered by Olbers in 1807. Her diameter is 239 miles, and her albedo very high, being almost as great as that of fresh-fallen snow.

Jupiter.—At the opening of the year the largest of the planets, Jupiter, will occupy a position in Cancer 5° E.S.E. of δ Cancri; he is in conjunction with the Moon on the 19th at 2h. 57m. P.M. (Jupiter 1° 33' S.). Arriving at opposition to the Sun on January 29, he will be a conspicuous object in our evening sky during the spring months, being visible throughout the night. In January, February, and March he will slowly retrograde through that superb cluster of stars

known as "Præsepe," between γ , δ , and ζ Cancri. When viewed through a telescope of low power and wide field Jupiter and his satellites will form a beautiful picture against a background sparkling with innumerable points of light, for this region is one of the richest in the heavens. On February 10 he is in conjunction with δ Cancri, being only $\frac{1}{2}^{\circ}$ N., and for more than a week he remains within 1° distance from this star. On the 20th he is 2° S.W. of γ , and N.W. of δ Cancri, and therefore amongst the southern portion of the cluster of Præsepe. On March 10 Jupiter is in conjunction with η Cancri, being 1° S.; and on the 13th, at 4h. 7m. P.M., with the Moon (the planet $1^{\circ} 7' 8''$). He is stationary on March 30, 1° S.W. of η Cancri, after which date he resumes his direct motion eastwards. In conjunction with the Moon on April 9, at 10h. 55m. P.M. (Jupiter only $1^{\circ} 21' 8''$), and with the small stars η , θ , and ζ Cancri on the 15th. On May 7, at 10h. 41m. A.M., he is again in conjunction with the Moon (Jupiter $1^{\circ} 47' 8''$), and near δ Cancri from the 11th to the end of the month. On June 4, at 1h. 56m. A.M., the planet is $2^{\circ} 15'$ S. of the Moon. He enters Leo in July, and is in conjunction with the Sun on August 17, and therefore invisible during the latter part of July and August, until he emerges from the Sun's rays and becomes visible as a morning star before sunrise early in September. On September 1 he is in conjunction with the 1st magnitude star Regulus (α Leonis), the planet being $\frac{1}{2}^{\circ}$ to the N.W., and with the Moon on the 22nd, at 12h. 19m. midnight. On October 1 Jupiter is 5° E.S.E. of Regulus, and on November 17, at 5h. 42m. A.M., near the Moon; and in conjunction with χ Leonis on the 30th (Jupiter $\frac{1}{2}^{\circ}$ S.). On December 30 Jupiter is stationary in the S.E. portion of Leo, 10° S. of θ Leonis.

One of the most interesting planetary markings ever observed is that of the Great Red Spot on Jupiter. Possibly this feature is identical with a similar object discovered by Hooke in 1664, and seen by Cassini and others in 1665 and later years. It varies considerably in its aspect, having been sometimes conspicuous and at other periods invisible. It has endured for such a long period that it may be almost considered as a permanent feature of the planet. It first came under general observation in July, 1878, when it was of an intensely red colour. This object is still faintly visible, and seems to exhibit a variable motion as well as to undergo remarkable changes in tone and tint. No doubt its appearance is affected by the atmospheric vapours surrounding it, which in recent years appear to have covered the spot with a highly reflective material almost sufficient to obliterate it. Schwabe, a German observer, made drawings of Jovian features 75 years ago, and amongst them we may clearly recognise the peculiar surroundings of the red spot, if we cannot identify the object itself. The mean rotation period of this marking during a very long period has been 9h. 55m. 37s., but the rate has varied between about 9h. 55m. 33s. and 9h. 55m. 42s. During the last few years the velocity has shown some remarkable oscillations, due to the existence of an irregular spot in nearly the same latitude, which has the capacity of accelerating the motion of the red spot when they come into conjunction every two years.

For the guidance of those observers who may desire to examine the faint remains of the great red spot and its neighbouring features, a list of some of the times when it may be expected to

present itself on or very near the central meridian of the planet is given below. The observer may readily calculate for himself the times of transit on other nights, should he require to know them, by adopting the rotation period of 9h. 55m. 40s., which is equivalent to the interval elapsing between successive returns of the same marking.

TRANSIT TIMES OF RED SPOT ON JUPITER.

1908.	H.	M.	1908.	H.	M.
Jan. 19 ...	8	16	Mar. 9 ...	9	27
" 21 ...	9	54	" 21 ...	9	23
" 23 ...	11	32	" 23 ...	11	2
Feb. 5 ...	7	15	Apr. 9 ...	10	6
" 7 ...	8	53	" 21 ...	10	3
" 9 ...	10	31	Dec. 7 ...	11	3
" 19 ...	8	46	" 17 ...	9	18
" 21 ...	10	24	" 19 ...	10	56
Mar. 7 ...	7	48	" 29 ...	9	12

These predictions are made on the basis that the position of the spot remains the same as at present, with a longitude of 30° , which enables it to follow the transits of the zero meridian of System II. of the Ephemeris in 50 minutes.

At intervals of 12 days (which include 29 rotations) the spot becomes central on Jupiter at nearly the same times as before. These remarks only have a special reference to the red spot, for it is found that different latitudes furnish objects controlled by different periods of rotation. Some of the markings have exhibited a proper motion so rapid that they complete a circuit of Jupiter in 8m. less time than others. These features are doubtless of an atmospheric character, and are certainly influenced by currents of different velocity operating far above the sphere of the planet. As to the red spot, it is desirable that it should continue to be watched and its further changes of tint and motion duly recorded. Though it cannot be a formation cohering with the actual surface of Jupiter, it must possess elements of remarkable permanency. Notwithstanding the large amount of observation which in past years has been given to the planet, there still remain a great number of interesting facts to be gleaned respecting his atmospheric currents and the many curious light and dark spots carried along at different velocities in them.

Saturn.—The conditions attending the annual apparitions of this planet are successively repeated with little change, as the dates of opposition are only about 12 days later every year. The second largest planet in the solar system will be a fairly conspicuous object in the N.E. region of the constellation of Aquarius; he may easily be recognised, as there are no fixed stars of equal brilliancy in his vicinity. When viewed through a telescope he will appear ringless early in January, the major axis of the outer ring being $38.88''$ and the minor axis $0.04''$ on the 9th. He will then be divested of his chief charm in the eyes of amateur observers, although astronomers find this a favourable time to study his surface markings. Possessors of good telescopes should try to ascertain if the rings are quite invisible, or whether there remains a narrow line of light, or bright points, marking their position. From January 9 to September 25 the rings will gradually become more open, but they will not be visible to their fullest extent until 1915 and 1916. In February the planet enters the southern part of Pisces, and will be visible in the evening

sky early in September, becoming more conspicuous as he nears the time of his opposition to the Sun on September 30. He will be seen to best advantage from that date to the end of the year. He is in conjunction with the Moon on July 19, at 4h. 11m. A.M. (the planet $3^{\circ} 2' N.$). Saturn is stationary in Pisces on July 23, being $5^{\circ} S.$ of δ Piscium at the time. In August he rises at about 9h. P.M., and is visible all night. His course is retrograde in the extreme S. of Pisces until December 7, when he will again appear stationary, after which date he resumes his direct motion eastwards. The planet is in conjunction with the full Moon on September 11, at 7h. 45m. P.M., being $2^{\circ} 33' N.$, and is again near her on October 9, at 3h. 7m. A.M. For the last time during this year he will be in conjunction with our satellite on December 29, at 8h. 14m. P.M., being $3^{\circ} 4' N.$ at the time of nearest approach. In recent years Saturn has been badly placed for northern observers: in 1907 he was about $5^{\circ} S.$; but the next few years will find him still coming northwards and bettering his position for telescopic study in this country. Of all the objects presented in the sky the astronomical observer will find Saturn one of the most picturesque, for his luminous rings possess a unique charm, no other body in our system possessing, as far as we know, a similar appendage. The rings and globe are visible in a comparatively small telescope, but large instruments and high powers are necessary to exhibit the planet to the best advantage. In the summer of 1903 several very large white spots appeared in his northern hemisphere and in the light zone dividing the N. equatorial belt from the N. polar shading. These markings were attentively followed, and they enabled the planet's rotation period to be computed as 10h. 37m. 52⁹s. In 1794 Sir W. Herschel determined the period as 10h. 16m. 0⁴s., and Professor A. Hall in 1877 found it 10h. 14m. 23⁸s. These values were the most reliable ones ascertained in former years. It is true that at various times many observers had seen, or thought they had seen, spots on Saturn; but other persons, with excellent sight and very powerful telescopes, had failed to detect anything of them.

The irregular markings on Saturn, like the similar features on Jupiter, are evidently influenced by proper motions of considerable extent. In fact, different latitudes of these planets give discordant rotation periods, as there are a number of atmospheric currents of different velocities circulating round them. Saturn has ten satellites, but only half of this number are visible in ordinary telescopes. The brightest satellite, appropriately designated Titan, is visible in any small glass, and Iapetus is sometimes to be glimpsed with very small instruments, but Mimas and Hyperion require far greater power. Instances are recorded where the fainter satellites are supposed to have been detected with telescopes apparently quite incapable of such a feat, but these results may generally be dismissed as mere efforts of the imagination. A ninth and tenth satellite of the planet have been recently discovered on photographs taken by Professor W. H. Pickering in America. The period of the ninth satellite (named Phœbe) has been computed to be 547 days, and its distance from Saturn eight millions of miles. The period of the tenth satellite is, approximately, 21 days, and its distance a little less than that of the eighth satellite, Hyperion

(about 900,000 miles). The motion of the ninth moon is said to be retrograde, which is a surprising departure from the direction of motion followed by the other satellites; but our knowledge of the new bodies is somewhat uncertain, and further observations must be awaited.

Uranus.—Uranus is in Sagittarius, and the extent of his direct motion during the whole year will not exceed 5° . He moves slowly eastwards until April 21, when he is stationary $6^{\circ} E.$ of γ^1 and γ^2 Sagittarii, and $3^{\circ} S.E.$ of π Sagittarii (mag. 3). After this date his course is retrograde until September 22, when he is again stationary $1^{\circ} S.$ of σ Sagittarii (mag. 4). He will then continue his motion eastwards, at the end of the year being $3^{\circ} S.E.$ of π Sagittarii. He is in conjunction with the Moon at last quarter on February 27, at 12h. 48m. midnight (Uranus $7^{\circ} S.$), and on May 19, at 8h. 34m. P.M., is $35^{\circ} N.$ of the Moon four days after the full, and again on June 16, at 3h. 13m. A.M., the Moon one day past full (Uranus $33^{\circ} N.$). The planet is at opposition to the Sun on July 7, being $15^{\circ} S.$ of the 3rd magnitude star π Sagittarii at the time. When near opposition, and presented under favourable circumstances, he may be seen with the naked eye as a star of the 6th magnitude. He is in conjunction with the nearly full Moon on August 9, at 8h. 31m. P.M. (Uranus $24^{\circ} N.$), and with the Moon at first quarter on September 6, at 4h. 55m. A.M. (the planet $31^{\circ} N.$). He is near the crescent Moon on October 30, at 6h. 22m. P.M. (Uranus $1^{\circ} 3' N.$), and for the last time this year on November 27, at 2h. 6m. A.M. (Uranus $1^{\circ} 17' N.$). As a telescopic object Uranus is not at all attractive to amateurs, as a very clear atmosphere and powerful telescope are necessary, although the outermost pair of his four moons (Titania and Oberon) have sometimes been glimpsed with moderate appliances. If an instrument of low power is directed towards the place of the planet, and a diagram made of the stars visible in the field, he will reveal his presence by motion if comparisons are made on subsequent nights. The most suitable time to observe Uranus will be near his opposition to the sun in July, at a time when the Moon is absent from the sky. The planet emits a pale blue light, and probably exhibits a belted aspect, like Jupiter and Saturn; but markings of irregular character, likely to afford a clue to the rotation period, have very seldom, if ever, been certainly observed. This period is likely to be a short one, and intermediate between that of the larger planets Jupiter and Saturn, and that of the smaller planets Mercury, Venus, the Earth, and Mars.

Neptune.—During the first few nights of January Neptune will be $14^{\circ} N.$ of the variable star ζ Geminorum. The planet is quite invisible to the naked eye, as he shines no brighter than a star of the 8th magnitude. A pretty good telescope must be employed in searching for this faint and rather difficult object. Everyone has viewed Venus, the brightest and most beautiful of the major planets, but few persons have ever beheld Neptune, the faintest. There is a satellite attending the latter, but it does not come within the reach of small telescopes. The most distant known planet of the solar system is at opposition to the Sun on January 5, at 5h. 0m. A.M.; he is therefore favourably situated for observation in the winter and early spring. He is in conjunction with the crescent Moon on March 11, at 7h. 55m. P.M., the

planet being only 50' S. On March 23 he will finish his retrograde motion and be stationary $1\frac{1}{2}^{\circ}$ N. of ζ Geminorum, after which date he continues his direct course eastwards until October 20, when he will again retrograde, on the last day of the year being situated 2° S.W. of the 3rd magnitude star δ Geminorum. Neptune is a morning star early in September, and is in conjunction with the last quarter of the Moon at 6h. 42m. A.M. on the 19th (Neptune $2^{\circ} 7'$ S.). For the last time during this year he is in conjunction with the crescent Moon, at 7h. 2m. A.M., on December 10 (the planet $2^{\circ} 38'$ S.). Neptune can be observed best by charting the small stars near the position of the planet as seen in the telescope, and by comparing these charts on several nights, when he will have moved amongst the other stars.

Comets.—These remarkable bodies have always aroused a large amount of speculation and discussion, and they are invariably observed with eagerness by interested students of the heavens. Often coming unannounced, and frequently assuming a variety of curious shapes as well as exhibiting rapid fluctuations in light, they always excite notice, both from practical and theoretical astronomers, and whenever a comet is sufficiently large to be displayed as a naked-eye object the public generally become its interested spectators. But comets of really great apparent size are somewhat rare, and we must go back to the years 1881 and 1882 for the last conspicuous examples of these bodies. On the average there is one naked-eye comet per year, for during the period from 1852 to 1907 we had 60 instances of naked-eye comets, though these were mostly small and only just discernible without telescopes. But large comets, though attractive both to scientists and the public, are usually temporary in their apparitions, and make but one visit to our regions of the universe.

As a matter of fact, the small periodical comets, revolving around the Sun at intervals of from 3 to 9 years, are entitled to equal regard, from the highly interesting nature of their orbits and the fact that they may be re-observed again and again similarly to the well-known planets of the solar system. The majority of these short-period comets extend their flights to a short distance outside the path of Jupiter, and approach the Sun to about the average distance of Mars. About 34 of these objects are now known to exist, and the number is being frequently augmented by the persevering efforts of those keen-sighted and patient observers who sweep the sky in quest of them. It appears that though new comets of short period are being introduced by means of planetary perturbations (for which Jupiter is mainly responsible), there are others which meet with disturbances in pursuing their paths sufficiently forcible to endanger, if not to terminate, their visible existences. Biela's double comet has not reappeared during the last half a century, and its material seems to have been distributed into a stream of shooting stars. Brorsen's comet has also been missing, and may have followed the same fate. The materials of which these presumably lost comets were composed no doubt still exist and revolve around the Sun in regular periods, but it is doubtful whether they will ever be viewed again under the same aspect as formerly. As an example of the increase in the number of known periodical comets, it may be stated that during the 15 years from

1880 to 1896 no less than 16 new comets of short period were discovered. The following table includes details of those comets which are expected to appear during the ensuing few years:—

	Date of Return.	Period in Years.	Name of Comet.
1908.	April	3·303 ...	Encke.
	May	5·534 ...	Tempel-Swift (1869).
1909.	Jan.	7·419 ...	Denning (1894).
	Oct.	5·595 ...	Brooks (1886).
	Oct.	6·441 ...	Perrine (1896).
1910.	Jan.	7·186 ...	Swift (1895).
	Feb.	6·647 ...	Giacobini (1896).
	May	76·370 ...	Halley.

A few of these must necessarily be considered uncertain, as they have only been observed at a single apparition. In some cases the circumstances will be unfavourable, and the objects will probably escape observation at their next passage through perihelion, but the majority of those included in the list will doubtless return at the computed times, and be suitably observed. It forms a most entertaining branch of astronomical work to trace a small comet threading its way amongst the neighbouring stars from night to night. Large comets appear promiscuously and with more or less suddenness, so that in the present state of our knowledge it is impossible to definitely predict the times of their apparitions. The only intimation of their approach is that given by observers who are fortunate enough to discover them and give warning of their appearance before they have visibly developed the conspicuous features which belong to comets of the largest class.

Meteoric Showers.—Fireballs, meteors, shooting stars, or falling stars, as they are differently called, represent one and the same class of objects, the distinction being only one of size. They are visible in varying number on every night of the year, and are sometimes so abundant as to form impressive showers. There were brilliant and plentiful displays of the November Meteors, called Leonids, in the years 1799, 1833, 1866, 1867, 1868, and less striking exhibitions of the same objects in 1901 and 1903. It is not to be expected, however, that this particular system of falling stars will again show itself prominently until the years 1933 to 1937. The meteors appear numerously every 33 years, but it appears that just before their last return the planet Jupiter disturbed their orbit so much that the main collection of meteors was enabled to avoid encountering the Earth, and the observed showers were more scanty than usual. But some of the meteors are visible every year, and furrow the morning sky with their rapid flights and luminous streaks at the middle of November. This meteoric system appears to be identical with, and its material actually derived from, a periodical comet, which was discovered by Tempel in December, 1865. In November, 1908, very few of these Leonid meteors are expected in our skies, but observers should maintain an attentive watch for them at the important time. The maximum date is usually the morning of November 15 or 16, but it varies a little owing to leap year. Whenever any conspicuous meteors are seen, whether during a known shower or on an ordinary night, their paths amongst the stars should be carefully and accurately recorded. The same advice applies to occasional fireballs, which often appear

suddenly and startle spectators by lighting up the heavens very vividly for two or three seconds. Observers should always remember that mere descriptions of the brilliancy or general situation of these phenomena are practically useless for scientific purposes. What is required by those who critically discuss such observations relates specially to the exact path of the object in the heavens and to the duration of its visible flight. The following is a table of the most prominent meteoric streams visible during the year:—

No.	Epoch.	Radiant Point. R.A. Dec.	Name of Shower.
1	Jan. 2-4	230° 53'	Quadrantids.
2	Jan. 11	220° 13'	ζ Bootids.
3	Jan.	295° 53'	κ Cygnids.
4	Feb. 5-23	75° 41'	α Aurigids.
5	Feb. 20	263° 35'	ρ Herculis.
6	March 1-4	166° 4'	τ Leonids.
7	March 13-24	161° 58'	β Ursids.
8	April 12-24	210° 10'	α Virginids.
9	April 17-22	218° 31'	Hydrids.
10	April 20-22	271° 33'	Lyrids.
11	May 1-6	338° 2'	γ Aquarids.
12	May, June, July	253° 21'	α Scorpids.
13	May 7-18	231° 27'	α Coronids.
14	May 24-27	194° 58'	ε Ursids.
15	May 26-31	310° 80'	κ Cepheids.
16	May 30 & Aug.	333° 27'	γ Pegasids.
17	June and Aug.	312° 61'	α Cepheids.
18	June 10-28	335° 57'	δ Cepheids.
19	June—Aug.	302° 24'	η Sagittids.
20	July 6—Aug. 22	284° 13'	λ Aquilids.
21	July—Aug.	269° 48'	γ Draconids.
22	July 6—Aug. 16	315° 48'	α Cygnids.
23	July 15-28	304° 10'	α Capricornids.
24	July 15—Oct.	23° 43'	γ Andromedids.
25	July Oct.	30° 36'	β Triangulids.
26	July 23—Aug. 4	47° 48'	α-β Perseids.
27	July 27-29	339° 11'	δ Aquarids.
28	July—Oct.	310° 79'	κ Cepheids.
29	August 10-12	45° 57'	Perseids.
30	August 5-16	292° 53'	κ Cygnids.
31	Aug.—Oct. 2	346° 1'	β Piscids.
32	Aug. 12—Oct. 2	74° 41'	α Aurigids.

No.	Epoch.	Radiant Point. R.A. Dec.	Name of Shower.
33	August 15-25	291° 60'	ο Draconids.
34	Aug. 21—Sep. 21	62° 37'	ε Perseids.
35	Aug.—Sept.	332° 71'	β Cepheids.
36	Aug. 4—Sep. 22	64° 22'	ε Taurids.
37	Sep. 15—Oct. 11	14° 7'	ε Piscids.
38	Sep. 27	75° 15'	ο Orionids.
39	Oct. 4	133° 79'	Ursids.
40	October 11-24	40° 20'	ε Arietids.
41	October 17-24	92° 15'	Orionids.
42	October	100° 13'	ε Geminids.
43	Nov. 2-3	55° 9'	ε Taurids.
44	Nov. 13-15	150° 23'	Leonids.
45	Nov. 13-28	155° 40'	Leo Minorids.
46	Nov. 17-23	25° 43'	Andromedids.
47	Nov. 23—Dec. 1	189° 73'	χ Draconids.
48	Nov. 30—Dec. 9	162° 58'	β Ursids.
49	Dec. 1-14	108° 33'	Geminids.
50	Dec. 7-10	119° 29'	α Geminids.
51	Dec. 22-29	194° 32'	Canis Veneticids.

The Perseids (No. 29 in the foregoing list) display some singular characteristics, for they probably continue visible for more than a month, during which period their radiant point exhibits a diurnal motion of about 1° to the E.N.E. The places of this radiant on alternate days during about four weeks of the chief activity of the shower are as follows:—

DATES AND POSITIONS OF PERSEID RADIANT.

Date.	Radiant R.A. Dec.	Date.	Radiant R.A. Dec.
July 19	18° 9' 50" 5	Aug. 4	35° 4' 55" 5
" 21	20° 8' 51" 1	" 6	38° 9' 56" 0
" 23	22° 8' 51" 8	" 8	41° 5' 56" 5
" 25	24° 9' 52" 5	" 10	44° 3' 56" 9
" 27	27° 1' 53" 2	" 12	47° 1' 57" 3
" 29	29° 3' 53" 8	" 14	50° 0' 57" 7
" 31	31° 6' 54" 4	" 16	52° 9' 58" 0
Aug. 2	33° 9' 55" 0	" 18	55° 9' 58" 4

The Taxes as Contributed.

THE following table shows the amount contributed by each of the three kingdoms (England and Wales, Scotland, and Ireland) under the various schedules of the Property and Income Tax, Inhabited House Duty, and Land Tax in the financial year 1906-7. The estimated population of each of the kingdoms is also given for purposes of comparison:—

Kingdom.	Tax.				Population, 30 June, 1906.
	Income.	Inhabited House.	Land.	Total.	
England and Wales	£ 30,587,503	£ 1,959,847	£ 726,171	£ 33,273,524	34,547,016
Scotland	3,133,054	125,870	33,774	3,292,398	4,726,070
Ireland	1,266,511	nil	nil	1,266,511	4,387,887
United Kingdom	34,987,068	2,085,417	759,945	37,832,433	43,660,973

In September, 1906, sharp earthquake shocks were felt at Kingston, St. Vincent, and also in St. Lucia and Grenada. In the last place the shock was strong and protracted. The volcano of La Soufrière, in Guadeloupe, was not disturbed. Since the terrible eruption of Vesuvius in April the Neapolitans have been in a state of terror, and this was greatly increased by a slight earthquake shock and detonations from the volcano on Nov. 5. The detonations were accompanied by a rain of cinders and ashes, whilst mud flowed down the side of the mountain. The panic of the people in the numerous small villages at the base of the volcano was so great that they fled in all directions, carrying their valuables with them; they were only persuaded to return after the Director of the Vesuvius Observatory had declared that there was no real eruption, but that the explosions had been caused by a portion of the crater becoming detached owing to the heavy rains, and falling into the fires in the crater of the volcano. In the same month there were several severe earthquakes and tidal waves in the South Pacific, much damage being done in German New Guinea. The loss of life among the natives was heavy, and immense fissures appeared in the mountains along the coast. On December 3, at about 7 P.M., a heavy shock of earthquake surprised and alarmed Georgetown, British Guiana, and practically the whole colony. Seismic disturbances of perceptible violence are extremely rare in this district, this shock being the second in 20 years. At the same time the ocean cable was interrupted, and a great catastrophe was feared in the Caribbean Islands or the Andes; but when communication was restored it was found that the disturbance had not been dangerous, though widespread and prolonged. At about that period a telegram from Santiago de Chile stated that half the town of Arica had been destroyed and that other towns in the vicinity suffered in varying degrees, several houses being wrecked and a few persons injured. Shocks were felt at Iquique and Pisagua. There was an earthquake recorded at Laibach Observatory, Austria, on Dec. 15, beginning at 8.25 P.M. and reaching its height at 8.30. It probably took place in Asia Minor, 940 miles from Laibach. On Dec. 20 a rain of ashes fell over Naples for twenty minutes, completely obscuring all view of Vesuvius, and a portion of the crater fell in, but there were no detonations or shocks of earthquake such as there usually are before eruptions. Violent shocks of earthquake were felt in Central Asia on Dec. 22, and were recorded in England, Austria, and Italy.

Earthquake shocks were felt late on January 2, 1907, in the higher parts of Newport, Monmouthshire. A loud rumbling noise was heard at 10.45 P.M., being followed by a distinct movement of the earth and the violent shaking of windows, some of which were broken. It is stated that the rumbling was followed by flashes of lightning. Phenomenal tidal waves occurred on Jan. 3 on the south coast of Ceylon three hours after a great submarine disturbance had been recorded, which probably had taken place in the vicinity of Wharton Deep, 2,000 miles to the S.E. On Jan. 10 two distinct shocks of earthquake were felt in various parts of Europe, and four in Pennsylvania. Reports from Norway and Ekaterinburg, a Russian town S.W. of the Caspian Sea, show the wide extent affected. At the same time Vesuvius, Mount Etna, and

Mauna Loa, in Hawaii, were in a state of eruption, and a disastrous tidal wave swept over the island of Tana and the southern coast of Pulo Simalu, off the west coast of Sumatra. A terrible earthquake, resulting in much loss of life and property, occurred at Kingston, the capital of Jamaica, on Monday, January 14. The population of Kingston is about 62,000, but on the day of the catastrophe this number had been greatly augmented by country people coming to market in the capital. There was nothing abnormal in the state of the weather, except that it became very hot towards the afternoon. The first shock appears to have taken place at 3.30 P.M.; this was immediately followed by the sea coming in like a tidal wave. Continual detonations were heard, and fissures appeared in the streets. The dust caused by falling houses hung over the town like a pall and half choked the panic-stricken people who were trying to escape. The whole island felt the tremors, but only Kingston the severe part of the earthquake. To make matters worse, fire broke out in several parts of the town, starting at Burke's wine and spirit stores in Harbour Street. In Machado's cigar stores 40 men were missing; and nearly all the men employed at Lyons' ironware store—about 100—were buried in the ruins. The Parish Church was destroyed, and the clock stopped at the hour of the earthquake. Fortunately, the sewage plant was not seriously damaged, so there was no epidemic, and the weather being fine the homeless people did not suffer as might otherwise have been the case. Mr. Tait, the Mayor of Kingston, died the following month from injuries received during the earthquake. Sir James Fergusson, formerly Under-Secretary for India and Postmaster-General, was killed, at the age of 75 years; and Sir Alfred Jones (the head of the firm of the Elder, Dempster Co.) and his party on board the *Port Kingston* had a very narrow escape. Many people were smothered by the smoke and flames whilst lying wounded under the debris of the falling houses, and the death-roll was very high. For a week no newspapers could be published, owing to the destruction of their business premises. Slight tremors were felt until nearly the end of the month, but no more serious damage resulted. Another severe shock was experienced on Feb. 10; the rocking was violent enough to throw sleepers out of their beds on to the floor, but the material damage done in the town was not serious. Violent shocks of earthquake during the end of January in the island of Sinalu, near Sumatra, caused the death of probably 1,500 people, and the island nearly disappeared. Considerable damage was done to property at Bitlis, in Asiatic Turkey, by seismic disturbances at the beginning of April. Many people, including certain foreign missionaries, were rendered homeless, and had to encamp in the snow. The houses are built of stone, with flat earthen roofs. On April 2 violent earthquake shocks were felt in the island of San Miguel, and particularly in the town of Villa Franca, which was formerly destroyed by earthquake. Two shocks occurred in the Rhetic Alps, on the Austro-Swiss frontier, on April 4. Numerous avalanches were caused and tracts of forest swept away by the landslides. A slight shock was also felt at Meyenfeld, in the Canton of Grisons. On April 9, at 2.40 A.M., a heavy earthquake shock occurred at Kingston, Jamaica, preceded by a loud detonation

as if caused by a disruption of rocks. The shock was followed a few seconds later by a light tremor, the direction being 12° East by North. Earthquake shocks were reported on April 19 from Portugal, Calabria, Constantinople, the Philippines, and Santiago de Chilo, where they were severe. The volcano of Puyehue, in Valdivia, was also in eruption, devastating fields, killing cattle, and spreading ashes a distance of 150 miles. Prof. Milne, at his observatory in the Isle of Wight, had a slight indication of earthquake at 3.50 P.M. on the same date. During the first week of May Mount Etna, in Sicily, was in eruption, emitting from the mouth at the base of the central crater smoke and small stones in an incandescent state. On the 3rd another mouth of smaller dimensions opened and threw up boiling lava. At the observatory the sound of an almost continuous eruption was heard until the 6th. Three earthquake shocks were felt in Guayaquil at 3.20 on May 31, and another in the Tonga Islands on June 1.

Slight shocks of earthquake were felt in the district surrounding Van, near the Turco-Persian frontier, on June 6; the village of Serai, about 50 miles to the east of Van, was reported to have been destroyed. On June 10 Cotopaxi was in eruption, throwing up numbers of stones, to the accompaniment of loud detonations. On June 13 a severe shock of earthquake was experienced at Valdivia, Chill. Four or five people were killed, and the Custom House, Parish Church, several other buildings, and two railway bridges were destroyed. A shock was also felt at 11.18 a.m. the same morning in Jamaica, but no damage was done.

There was a shock of earthquake in the Holyhead district, North Wales, at 9.10 A.M. on June 26, lasting about ten seconds. Disturbances were felt throughout the island of Anglesey and at Valley, three and a half miles from the town.

In the Holborn Road district of Holyhead it was thought at first that there had been an explosion. No serious damage was done, but numerous large houses were shaken and crockery was broken.

On July 20, at 8.37 A.M., two earthquake shocks were felt at Aden. The tremors only lasted a few seconds, and the damage done was very slight. There was an eruption lasting a fortnight in July near Togatabu, the largest island of the Tonga group; seven distinct columns of fire, smoke, steam, and black pumice-stone appeared to rise from the sea to a height of 250 ft. A continuous roar was heard and frequent explosions occurred, pumice-stone being thrown on the island of Nukualofa, 30 miles distant. It was thought that a new island was being formed.

There was an earthquake on August 6, at 4.21 P.M., in Dalmatia, and another distant shock on the following day at 7.53 A.M. On August 14 three slight earthquake shocks were felt in Gibraltar and neighbourhood, particularly in the districts of Gaucin and Cortes. On Aug. 18, at 5.38 P.M. English time, a violent but distant earthquake was recorded at the Lailach Observatory, Austria. It was also registered by Prof. Milne at the Isle of Wight. The instruments at the Hamburg Seismographical Station also indicated several earthquake shocks on the same date; they lasted two hours, but proceeded from a distant disturbance. The 37 seismographs throughout the world record every year over 30,000 earthquakes, big and small, of which 50 are large enough to shake the whole earth throughout its entire mass. In Japan there are an immense number of shocks every year. In the British Isles, although tremors are felt, there are never any of great intensity. Many earthquakes occur in connection with volcanic eruptions, but others, much exceeding the former in numbers, energy, and extent of areas shaken, are independent of volcanic action.

Telescopic Powers Suitable for Observing Celestial Objects.

COMETS, and large nebulae such as those in Orion and Andromeda, require very low powers and an extensive field of view, so that the objects may be presented in their entirety, and their light sufficiently concentrated to display the fainter portions. If it is decided to critically examine the structure of a comet's nucleus or details of form in a nebula, then powers of 150 or 200 may be used. The cluster in Hercules (Messier 13) is splendidly resolved with 100 on a 10-in. reflector.

The spots on the Sun may be very distinctly seen in any small telescope, care being taken to protect the eye with deeply-tinted glass. A 3-in. refractor, powers from 60 to 100, reveals the spots in great detail and under many varieties of form and grouping. The craters, mountains, clefts, and ridges of the Moon are satisfactorily seen in general outline with about 50 and 75, though, for very minute features, powers of 300 and 400 are necessary on a 10 or 12 in. glass. Solar and lunar eclipses are best visible under low powers, with fields sufficiently ample to include a picture of the whole phenomenon.

The phases of Mercury may be discerned with 100 or 200, but the air must be steady and the object not very near the horizon; those of Venus are plain with far less power. These planets appear under the most satisfactory aspect near

the times of sunrise or sunset, and indeed all observations of conspicuous planets are best made at such times. When the image is surrounded with dark sky the glare from a bright object is sometimes troublesome, for it is apt to aggravate telescopic defects and obliterate faint details.

The chief spots on Mars, such as the *Syrtis Major* and *Acidaliuum Mare*, may be distinguished with 90 on a 2-in. refractor, but powers of 300 and 350 and an 8-in. refractor or 10-in. reflector are desirable to exhibit the outlines of the fainter, narrower markings, many of which are delicate, intersecting lines suggesting a canaliform structure of surface.

Jupiter's equatorial belts are perceptible in a 1½-in. telescope, power 40, but for studying their variable appearances and the different velocities of the bright and dark spots 200 and 250 are requisite on a much larger instrument. The writer has successfully employed 1540 with a 12½-in. reflector on Jupiter, but there was no advantage over powers of 200 to 440. The four bright satellites are visible in an opera-glass. Dark transits of Satellites III. and IV. and their shadows may be observed with a 3-in. refractor and power of 120 or 150.

Saturn and Mars usually appear well defined under higher powers than Jupiter. The division

in Saturn's ring and his principal dark belt are to be readily glimpsed, when the system is sufficiently inclined, with a $2\frac{1}{4}$ -in. glass, power 120. But magnifiers of 250 to 350, and greater aperture, are essential to reach the delicate features of the planet, such as the spots which appeared in his northern hemisphere in 1903. A good $4\frac{1}{2}$ -in. refractor will occasionally show Encke's division in the ring when this feature is visible, but at the best it is only a faint pencil-like marking; also the interior crape ring and five of the satellites; but the night must be good. Titan is visible in any small telescope, and Iapetus is sometimes an easy object, but Tethys, Rhea, and Dione are much more difficult, requiring careful scrutiny of the region just outlying the rings, where they will be usually recognised as tiny points of light.

In planetary work the observer will ultimately find it an advantage to accustom himself to one and the same power. When on special occasions or for particular purposes really high magnifiers are employed, they should be single lenses, as they possess a decided advantage in light and definition at the centre of the field.

Occultations of stars by the Moon may generally be well observed with a 3-in. glass, power 50 to 75.

For double stars the powers required will depend in a great measure upon the character of the object. For very close pairs, high powers, such as 300 or 400, and even more, are sometimes desirable, but in cases where the components are distant and the magnitudes differ considerably, as Vega, Polaris, or Rigel, then a moderate power, such as 100 or 150, will give excellent results. For showing variable stars a good field-glass is to be recommended. For groups of stars a comet eyepiece, power 25 or 30 and field about $1\frac{1}{2}^\circ$, will be best. The latter would also be well adapted for comet-seeking, and for general views of large comets, nebulae, and parts of the Milky Way.

It should always be remembered that on nights of good seeing, when the air is tranquil and planetary features very sharply defined, telescopes will bear much higher powers than on less favourable occasions. The observer should not fail to remember that his personal capacity really counts for more than the size or efficiency of his telescope. A really able student will accomplish more valuable work with an indifferent instrument than an incompetent man with the very best appliances.

The Variable Star Algol (Beta Persei).

This is one of the most conspicuous and noteworthy variable stars in the heavens. Its remarkable fluctuations of light were probably known to the ancient observers, but the first definite record of its discovery is by Montanari, in 1669, and the accurate determination of its period was not effected until 1782 by Goodricke. At that time the star passed through all its gradations of brilliancy in *2d. 20h. 48m. 59s.*, but the period seems decreasing, for Chandler has recently found it $8\frac{1}{2}$ seconds less. The star is usually a little fainter than *2nd mag.*, and re-

mains so for about *2d. 17h.*, when it rapidly declines in lustre, and in about $4\frac{1}{2}$ hours arrives at a minimum of $3\frac{3}{4}$ mag. There is then a revival of its brilliancy, and in $5\frac{1}{2}$ hours it reaches its normal magnitude of *2 $\frac{1}{4}$* . The following are the computed times of minima in 1908. From the end of March until the beginning of August the star is not favourably visible, being immersed in the vapours and twilight over the northern horizon; but in the autumn and winter months it may be viewed with advantage. Astronomical time is employed in the table.

To make these quantities additive π has been added to them; the final result must therefore be diminished by that amount.

TO CHANGE INTERVALS OF MEAN SOLAR TIME INTO THE EQUIVALENT INTERVALS OF SIDEREAL TIME.

			30	30	4' 93	60	60	9' 86	30	30' 08	60	60	16	

To obtain the Sidereal Time corresponding to a given Mean Solar Time, we must take, from the second page of the month, the preceding Sidereal Time at Mean Noon, and add to it the Sidereal Equivalents corresponding to the hours, minutes, and seconds of the given Mean Time. Should the sum come out more than twenty-four hours, that amount must be subtracted from it. As an example, let the Sidereal Time corresponding to the Mean Time of January 16, 1908, 54m. 48s., be required:—

	H.	M.	S.
Sidereal Time at Mean Noon, on January 16	19	38	8
Mean Time intervals and Sidereal Equivalents.....	10	1	38' 56
	54m.	=	54
	48s.	=	48' 13

Corresponding Sidereal Time = 6 34 43' 56

This table is also useful in showing the acceleration of Sidereal on Mean Solar intervals.

Table for Finding the Times of Sunrise and Sunset.

THIS double entry table provides the means for finding, with sufficient accuracy for all practical purposes, the times of sunrise and sunset for any place situated between latitudes 1° and 66° .

To use the table: With the Sun's declination, in the first column, and under the required latitude on the horizontal line, will be found the apparent time of sunset. Subtracting the time so found from 12h. will give the apparent time of sunrise. To obtain the mean or clock time, the numbers in the column headed *before* or *after* clock (which will be found on the second page of each month), giving the difference in time between the mean and true sun for each

day in the year, must be applied to the apparent times of sunrise and sunset, as the particular case may require; that is to say, if the true sun is *before* the clock the equation of time must be subtracted from the apparent to obtain the mean or clock time, and if *after*, added.

The table is arranged for northern latitudes, but will serve equally well for places south of the Equator by changing the declination from North to South and *vice versa*.

If the time of sunrise or sunset should be required for any declination or latitude falling between the arguments in the table, these times may easily be found by simple proportion.

To obtain the Mean Time corresponding to a given Sidereal Time, take, from the second page of the month, the preceding Mean Time at Sidereal Noon, and add to it the Mean Time Equivalents corresponding to the hours, minutes, and seconds of the Sidereal Time.

As an example, convert the Sidereal Time 13h. 43m. 40s., on February 21, into Mean Time:—

	H.	M.	S.
Mean Time at Sidereal Noon, Feb. 21	1	59	36
Sidereal intervals and Mean Time Equivalents	13h. =	13	57 52.22
	43m. =	42	52.96
	40s. =		39.89
Corresponding Mean Time, Feb. 21	25	41	1.07

SOME ELEMENTS OF THE PLANETARY SYSTEM.

* The periods of rotation of Mercury and Venus have not been definitely ascertained.

N.B.—The numbers in the third column refer to the mean distances at inferior conjunctions for the inferior planets; at opposition, for the superior planets.

Asteroids.—A large number of these bodies, known till recently by numbers, had names given to them in the past year:—398, Admete; 420, Chloris; 421, Xanthe; 424, Liriope; 426, Hippo; 427, Galene; 429, Lotis; 430, Hybris; 432, Nephelē; 437, Rhodia; 438, Zeuxo; 441, Bathilde; 452, Hamiltonia; 453, Tea; 459, Signe; 461, Saskia; 463, Lola; 464, Megaira; 465, Alekto; 466, Tisiphone; 467, Laura; 468, Lina; 469, Argentina; 471, Papagena; 473, Noll; 474, Prudentia; 479, Caprera; 480, Hansa; 481, Enita; 490, Veritas; 492, Gismonda; 495, Eulalia; 497, Eva; 500, Seliur; 501, Urhixidur; 502, Signe; 506, Marion; 508, Princetonia; 510, Mabilla; 513, Centesima; 514, Arnida; 515, Athalia; 517, Edith; 518, Halawe; 519, Sylvania; 523, Ada; 524, Fidelio; 525, Adelaide; 526, Jena; 527, Euryanthe; 528, Rezia; 529, Preciosa; 530, Turondot; 531, Zerlina; 533, Sara; 534, Nassovia; 535, Montague; 536, Merapi; 537, Pauly; 539, Pamina; 540, Rosamunda; 541, Deborah; 549, Jessonda; 550, Senta; 551, Ortrud; 552, Sigelinde; 553, Kundry; 555, Norma; 557, Violetta; 558, Carmen; 559, Nanon; 560, Delila; 561, Ingwelde; 562, Salome; 581, Tauntonia; 583, Clotilda; 588, Achilles; TE, Marianna; XM, Hector; VY, Patroclus; WE, Drakonia.

The two asteroids Hector and Patroclus have, like that of 588, Achilles (alluded to in 1906 as TG), a period and mean distance nearly identical with that of Jupiter. The interest attaching to the study of the perturbations of TG by Jupiter will be much enhanced from the similar relations existing between Jupiter and the more recently discovered bodies Hector and Patroclus.

Examination of photographs taken at Greenwich on August 6, 31, and September 1, showed the image of a planet, which, on calculation of the elements of the orbit, was found to be a new one, and not identical with any previous discovery. This is the first time a planet has been discovered at Greenwich. Of these bodies now known and numbered there are 635.

The Sun.—In the latter months of the year 1906 the number of spots had so greatly decreased that it appeared as if the minimum period would be reached much earlier than might have been expected, but after the month of October a period of considerable activity set in, consisting of a series of groups of moderate size which followed each other continuously up to the middle of December. In this last stream there appeared a spot nearly as large as that of the previous July. This group appeared again in January, 1907, when the large spot broke up into a number of scattered groups extending over three or four times the area of the former group. On February 10 four groups were plainly visible to the naked eye—an unusual phenomenon in spot group observations. On the previous day fine aurora were observed, accompanied with great magnetic disturbance, the movement of the declination magnet being unusually large.

The discussion of the photographs of the planet Eros, taken at Greenwich during the opposition 1900-01, have been completed, and a value of the solar parallax arrived at. The plates were taken with two different instruments—151 with the astrographic 13-inch refractor, and 103 with the Thompson 26-inch refractor. Of this number, 224 were made use of in the discussion, and after an exhaustive investigation of all possible sources of systematic error, the combined result from the two instruments gave a parallax of $8.800''$, with a probable error of ± 0.044 . Fifty-

eight observatories have taken part in the work, and when the immense amount of material has been collected from the co-operating observatories and finally discussed, we may expect a determination of this important element of greater precision than that obtained by any previous method.

Mars.—In a paper dealing with the Martian canal system, Professor Newcomb remarks on two classes of principles involved—the one optical and the other psychological—the former including all cases affecting the formation of an image on the retina, and the latter including all the cases which affect the observer's perception of the image. As the result of his reasoning on both these classes he comes to the conclusion that the narrowest visible canals must exceed ten miles, and may be as much as twenty.

From Professor David Todd, Director of Anherst College Observatory, we learn that he some time since dismantled his 18-inch Clark refractor and transported it to the elevated desert pampa of Tarapacá, in Northern Chili, where, between the middle of June and 1st of August—a complete revolution of the planet—with Mars near the zenith, about 7,000 photographic exposures were made. In a large majority of these, canals and oases were visible, a large proportion containing unmistakable double canals. The expedition was conducted at the charge of Professor Percival Lowell, of Flagstaff, Arizona, whose diligent study of this fine series of photographs will be awaited with great interest.

Jupiter.—On a recent examination of some photographs taken with the Bruce 24-inch telescope in December, 1904, an object was measured which was supposed to be one of the small planets. In searching previous records, it appeared on a plate taken in July, 1899, but the image of Jupiter did not fall on this plate; otherwise, no doubt, the discovery at Lick of the sixth satellite on January 5, 1905, would have been anticipated.

The sixth and seventh satellites have been photographed by Professor Max Wolf with a 28-inch reflector, by keeping the telescope fixed on a star, and by this means the full motion of the satellites was shown by the length of the photographic trail described on the plate. The trail given by the sixth satellite was conspicuous; that of the seventh, owing to its greater faintness, was feeble and difficult.

Saturn.—It had long ago been observed that the light of the satellites of Saturn was subject to variation, and in order to determine the amount of variability Mr. G. A. Quignou made a series of comparisons with neighbouring stars of known magnitude. Titan was found to vary between 8° and 8.6 , the maximum occurring between the Western elongation and superior conjunction. Rhea appeared brighter between Eastern elongation and superior conjunction. Tethys and Dione were found to vary three-quarters of a magnitude.

Some interesting results have been obtained from a study of the photographic spectra of Saturn. Special plates, sensitised to the orange red, were prepared for the purpose, and the spectra were compared with those of the Moon at the same altitude. Five absorption bands were observed, presumably due to the atmosphere of the planet. No such bands were shown in the spectrum of the rings, so that if they have any atmosphere it must be extremely rare. No indications of aqueous vapour were

found. The ninth satellite has been photographed several times at Greenwich.

Comets.—(g) 1906. A new comet, discovered by Holger Thiele, at Copenhagen, on November 10, in R.A. 5^h . 16^m . and declination $12^\circ 20'$ North, of the 8.5 magnitude. The magnitude increased up to November 27, when it was 1.34 times that at discovery. It was moving rapidly northward, and became circumpolar in December.

(h) 1906. A new comet, photographically discovered by Mr. Metcalf, at Taunton, Mass., U.S.A., in R.A. 4^h . 47^m . 36^s . and declination $2^\circ 16'$ South. It was observed two days later at Washington. It was a very faint comet, being only about the 12th magnitude at time of discovery, and then getting fainter. It appears to be one of the Jovian family, with a period of about seven and a half years.

(a) 1907. A comet of the 11th magnitude, discovered at Nice by Giacobini on March 9, in R.A. 7^h . 47^m . 38^s . and declination $18^\circ 21'$ South. The orbit resembles that of comet IV., 1890, and, though they are not identical, they may have had a common origin.

(b) 1907. Discovered at Washburn, Wisconsin, by Mr. Mellish, on April 14, in R.A. 6^h . 40^m . and declination $8^\circ 4'$ North, magnitude 11, and rapidly decreasing in brightness. It was moving at the rate of 12m. a day in R.A. and 7° in declination, showing that at the time of discovery the comet was very near the Earth. It was previously independently discovered at Wellington, in New Zealand, by Mr. John Grigg, on April 8, and noted as a large faint comet appearing as a diffused mass of light $15'$ in diameter and moving with great rapidity. At this time it was in R.A. 4^h . 33^m . and $44^\circ 38'$ South declination. Another observer described it in much the same terms as being so attenuated that the faintest stars shone through it, and showing no defined tail or nucleus. The priority of discovery certainly rests with Mr. Grigg, but unfortunately, through some misunderstanding, his telegram to Melbourne was not circulated in the usual way.

(c) 1907. A new comet, discovered by Giacobini, at Nice, on June 1, in R.A. 10^h . 13^m . 10^s . and $24^\circ 5'$ North declination. It was extremely faint, being of the 13th magnitude, and slowly decreasing in brightness.

(d) 1907. Discovered on June 9, at Princeton, by Professor Daniel, in the southern portion of the constellation Pisces. At the time of discovery it was noted as being of the 11th magnitude, increasing in the next ten days to the 8th, and so continuing till it became visible to the naked eye in August, and, on the 13th of the month, was equal to a star of the 2nd magnitude. It grew rapidly fainter in September. On August 4 the comet was observed by Mr. Denning without telescopic aid, and seen to possess a nucleus of $2\frac{1}{2}$ magnitude, with a tail spreading out towards the West, which could be traced over 5° , and which, on later mornings, appeared to have increased to 5° . Several photographs were taken at Greenwich, which showed a number of streamers of a very complicated structure. Those taken with a Dallmeyer rapid rectilinear lens, on a smaller scale, showed a tail extending over 7° in length—the general direction being towards the West, with the streamers spread out fan-like, and curving towards the South. The comet was nearest to the Earth on August 1, and on September 12 the Earth passed so near the comet's orbit that a watch was kept for possible meteor showers, but without success.

Halley's comet, according to the most recent investigations, should return to perihelion about the middle of the year 1910, probably in May. It might possibly become visible at the end of 1908 or beginning of 1909.

Stars.—The remarkable variable star Mira Ceti attained its maximum towards the end of 1906, on which occasion it was observed to be unusually bright, remaining for three weeks at the 2nd magnitude. It was noted that the rise from the 6th to the 3rd magnitude, between October 26 and November 14, was very rapid. The fluctuations in brightness at the maxima are very remarkable and often have a wide range. In 1779, Sir W. Herschel set it down as nearly equal to Aldebaran, and it was still brighter in 1839.

The discovery of a new nebula was reported by the Rev. T. E. Espin on January 18. On February 1 it was well seen, and appeared markedly elongated, so that sometimes it looked like two nebulae. In magnitude it appeared equal to a 10th magnitude star. On February 20 it was observed at Yerkes (with the 40-inch refractor) in a moonlight sky, when its position was found to agree with that given by Espin, near to B.D. + $23^\circ 746$.

Professor Millosevich observed on November 6, 1906, a faint star which might, he thinks, be either a new variable star, or a fading Nova. When first seen it was of the 8.4 magnitude, and decreasing in brightness. By November 26, 1906, it had dwindled down to 12.3, the colour having changed in the interval from yellow to ruby red. Its position in 1907 was R.A. 1^h . 24^m . 08^s . and declination $50^\circ 23'$ North.

Hamburg is to have a new observatory, at a cost of a million of marks, voted by the Council and Senate. It will contain a meridian circle of 18 cm. aperture, a refractor of 60 cm., a reflector of 1 m., and a double photographic telescope.

The observatory of the late M. Bishoffsheim, which was founded in 1881, and maintained by him till his death, has become, by bequest, the property of the University of Paris, and will in the future be carried on under the direction of General Bassot, a member of the Bureau des Longitudes, and well known for his geodetic work.

In a paper in the Proceedings of the Amsterdam Academy of Sciences, Professor Backhuysen writes that, in the light of our present knowledge of the condition of the atmosphere, the assumption that it consists of concentric spherical layers—with the centre of the Earth as their common centre, the temperature decreasing with the increasing radius—is not accurate enough on which to build a theory of refraction, as it has now been ascertained, from observations in a balloon, that at certain altitudes the temperature rises instead of falls as the height increases.

The Council at Port Louis have enacted that the mean solar time of a longitude 60° East of Greenwich—that is, four hours fast on Greenwich time—shall be the standard throughout the Mauritius and its dependencies, except the group of islands (eight in number) known as the Chagos Archipelago, in 72° East of Greenwich and 3° South latitude.

Sir Charles Todd retired from the Directorship of the Government Observatory, Adelaide, South Australia—an appointment he had held since 1856. The Directorship at first carried with it the office of Postmaster-General. The vacancy

has been filled by the appointment of the chief assistant, Mr. Griffith.

Sir David Gill, another, of our Southern astronomers, retired at the end of 1906 from the Directorship of the Royal Observatory at the Cape. He also was succeeded by his chief assistant, Mr. S. S. Hough, and Dr. Halm, from the Royal Observatory, Edinburgh, went to the Cape as chief assistant in Mr. Hough's place.

Obituary.—*Miss Agnes Mary Clerke*, who died on January 20, 1907, was born in 1842. Her first important work was "A History of Astronomy during the Nineteenth Century," which appeared in 1885, and carried on to date Professor Grant's classical work "A History of Physical Astronomy." Between 1885 and 1903, other valuable contributions to the science of astronomy were published—notably "The System of the Stars" and "Problems in Astrophysics," together with other smaller works. Other subjects than those related to astronomy also engaged her attention. She was the author of a treatise entitled "Familiar Studies in Homer," and wrote many biographies of astronomers in the "Encyclopædia Britannica" and "Dictionary of National Biography." Miss Clerke was elected an honorary member of the Royal Astronomical Society in 1903.

Mr. H. C. Russell, C.M.G., F.R.S., formerly Government Astronomer of New South Wales, and Director of the Sydney Observatory, died on February 22, 1907. Mr. Russell had previously been assistant in the observatory, and was appointed Director in 1870. He resigned the appointment in 1904, after having been connected with the observatory for forty-six years. He was elected a Fellow of the Royal Astronomical Society in 1871, and of the Royal Society in 1886; to the former he contributed several papers on observations made in the Southern hemisphere, mostly of a miscellaneous character. Mr. Russell was particularly successful in his observation of the transit of Venus in 1874.

William Simms, formerly a member of the famous firm of Troughton & Simms, opticians, was long connected with the progress of practical astronomy. He retired from business in 1871, owing to ill-health, which it was supposed would be permanent, but from which he ultimately recovered. He was the senior Fellow of

the Royal Astronomical Society, having been elected in 1851. The Monthly Notices of the R.A.S. contain many papers by him, chiefly concerning improvements in the construction of the larger astronomical instruments. Mr. Simms was totally blind in the later years of his life, the result of his observations of the Sun. He was born in London in 1817, and died in the Isle of Wight in 1907.

Professor Alexander Herschel was born at the Cape in 1836, and educated at the Clapham Grammar School, and Trinity College, Cambridge, where he distinguished himself in mathematics. Being greatly interested in meteoric astronomy, he was not only a prolific writer on this and cognate subjects, but was himself an ardent observer of shooting stars, and the author of many papers on their paths, and the accordance of the orbits of meteoroids with those of comets. In the assistance Professor Herschel gave to Professor Maxwell in his well-known experiment of "The Devil on Two Sticks," where a double cone was brought into violent rotation by means of a cord between two sticks, we have, no doubt, the parent of the now almost universally played game of Diabolo. Professor Herschel held, at different times, many appointments. Among others, he was at one time lecturer on Natural Philosophy, and Professor of Mechanical and Experimental Physics in the Andersonian University of Glasgow; and at another time, Professor of Physics and Experimental Philosophy in the University of Durham College, Newcastle-on-Tyne, and Honorary Professor from 1886 to his death. Professor Herschel was elected a Fellow of the Royal Astronomical Society in 1867, and of the Royal Society in 1884. His death took place at Slough in June, 1907.

M. Charles Trépied, the first Director of the Algiers Observatory, died on June 20, 1907, in his 63rd year. The observatory was founded in 1880, and more completely equipped in 1885. M. Trépied was chosen as one of the secretaries to the Congress which met at Paris in 1887, to arrange the manner in which the work of the contemplated international photographic survey of the heavens should be carried out. A zone was allotted to the Algiers Observatory. Many sections of the catalogue have been published, and reproductions of the chart plates distributed.

THE VISIBLE OR SENSIBLE HORIZON.

THE limit of vision at any given point varies with the height of the spectator. The greatest distance at which an object on the surface of the sea or of a level plain can be seen by a person whose eyes are at a height of 5 ft. from the same level is $2\frac{1}{4}$ miles. At a height of 20 ft. the range is increased to $5\frac{1}{4}$ miles. The following table shows approximately the radius of vision at different heights over 20 ft.: the radius does not increase in proportion to the height, the distance being nearly half a mile greater at 6 ft. than at 5 ft., and gradually diminishing with every foot till at 19 ft. it is only a sixth of a mile less than at 20 ft.—

At a height of	50 ft.	the radius is about	9 $\frac{1}{4}$ mls.

THE WEATHER IN THE BRITISH ISLANDS DURING THE YEAR ENDING

OCTOBER 31, 1907.

This summary of the weather experienced in the British Islands during the year commencing November 1, 1906, and ending October 31, 1907, has been mainly compiled from the data contained in the daily and weekly reports issued by the Meteorological Office. It is hoped that

the remarks on each month will be useful for the purposes of reference and for comparison with current weather, when considered in relation to the daily results of the Greenwich observations given for each day in the pages of the Calendar.

November, 1906. - The weather was very mild with much mist and fog, an ample supply of rain in the east and marked deficiency in the west. The lowest temperature was reported at Llangamarch on 13th, 22°; highest at Lairg 23rd, 68°. Surprising contrasts of temperature were exhibited by the 8 A.M. observations, Greenwich time: and, Nairn 51°, Birr Castle 29°; 6th, Portland 51°, Oxford 31°; 10th, Scilly 50°, Wick 30°; 21st, Portland 54°, Nairn 29°. Rain, measured in the morning, 3rd, amounted to 1'13 inch at Dungeness, 5th Jersey 1'5; 7th Jersey 1'06; 9th Oxford 1'08; Ondle 1'7; Woburn 1'9; Arlington 2'04; 21st, Pembroke 1'05. Electrical storms were reported on 4th at Spurn Head and at Roche's Point; 7th, Spurn. Aurora was seen at Stokesay on 27th, at Epsom 29th. On 18th snow fell in Lancashire, 30th in Scotland and north Wales. Wind came from the east side on 7 days, was variable on 3, stormy on 7. Mist was charted in places on 7 days, in east 3, Ireland 5, south-east 3, west Ireland 1; fog in Midlands 1, east 1, south-east 4, south-west 1. Scotland was free apparently from mist and fog. Atmospheric pressure was least on 3rd, 29 inches and 18th, 28'8; greatest on 11th, 30'5, and 25th, 30'55. The period 21-5th was remarkably warm. A cyclonic depression which came from the S.E. was in the North Sea 1st 6 P.M., off the Humber at 8 A.M. and started W.N.W. to the Atlantic. Another depression near Brest 4th 8 A.M. arrived off the Humber on 5th; and one in the Bay of Biscay 6th was at the entrance to the Seine at 6 P.M., travelled W. to near Portland by next morning, thence S.W. to mid-Channel, afterwards E.N.E. to Ostend 8th 8 A.M. giving heavy rain to London, and on 9th it was back to Brest; a noteworthy career. Bright sunshine, estimated in percentage of its possible duration, varied between 24 in the south-west and 12 in the north district.

The Autumn was mild; fine with much sunshine in September, much rain in October, prevalent gloom in November. The autumnal rainfall being 2'25 inches less than the average of twenty-one years as given in these summaries, was a good indication for a favourable harvest in 1907.

December, 1906, had seasonable weather. The highest temperature was reported at Wick 17th, 58°; lowest at Swarraton 28th, 3'4°. The week ending 15th was cold with some snow, though it had the most sunshine. The following week was dull and had the least sunshine. On 25th, 8 A.M., while the temperature at Valentia was 47°, Sumburgh had only 23°; 26th, Scilly 46°, Nairn 25°; 29th, Holyhead 37°, Birr 13°; 30th, Portland 40°, Aberdeen 16°; 31st, Valentia 48°, Wick 12°. At 8 A.M., 10th, 1'17 inch of rain was measured(?) at Yarmouth. Electrical storms occurred at Arlington on 11th, in England and Wales 12th, north-west England 13th, at Yarmouth, Scilly, and Valentia 27th, Shields 28th. Aurora was seen in north Scotland 8th. The air was bitterly cold with northerly wind on 10th, and snow fell in parts of eastern Britain, varying from 4 to 10 inches. The 26th had blizzard-like weather all over the kingdom. At London 3 to 6 inches of snow fell during 26th to 28th. Atmospheric pressure was least on 5th, 28'9 inches; greatest on 21st, 30'7 inches. A cyclonic centre north of Shetland on 5th moved southward over the North Sea. Heavy gales raged on 7 days, and stormy winds were frequent. Mist was noted on 3 days in West Ireland, 2 east England, 1 over England, 5 in places; fog 1 in Midlands, 1 east England, 1 places, 2 north-east. Bright sunshine varied between 24 per cent. in south England and 5 per cent. in north Scotland.

January, 1907, was somewhat mild though variable with extremes; large rainfall in the north and small in the south; snowfalls were rather frequent locally; and frequent hoarfrosts happened in the mornings. The highest temperature was reported at Killarney on 5th, 56°; the lowest at Llangamarch Wells on 25th, 5°. At 8 A.M., 18th, while the temperature at Blacksod Point was 47°, at Oxford it was only 26°; 24th, Stornoway 38°, Birr Castle 19°; 25th, Blacksod 43°, Nottingham 17°; 26th, Scilly 44°, Wick 24°; 27th, Valentia 48°, Yarmouth 20°; 31st, Scilly 44°, Nairn 24°. At Glencarrow 1'96 inch of rain was measured on 11th. Electrical storms occurred on 3rd at Valentia, Pembroke, Worthing; 28th between Edinburgh and Glasgow accompanied

by a whirlwind: 29th in north-west England. Aurora was seen at Balmoral on 20th, 21st, 25th. Atmospheric pressure was least on 2nd, 28° 35 inches, on 28th, 29° 0; greatest on 23rd at Aberdeen, 31° 06. Gales prevailed on 7 days. Mist was noted in places on 6 days, in the south-east 3, east Britain 1, Ireland 1, Scotland 1; fog in south-east 5, north-east 1. Bright sunshine varied between 30 per cent. in the north-east and 9 per cent. in the north district.

February, 1907, had seasonable weather with frequent strong winds. The lowest temperature was reported at Llangamarch Wells on 3rd, 10°; highest at Killarney on 15th, 59°. At 8 A.M., 1st, while Valentia had 49°, Nairn only 24°; 2nd, Valentia 46°, Bath 10°; 3rd, Blackrod 46°, Bath 18°; 12th, Scilly 48°, Stormoway 25°; 14th, Valentia 50°, Bath 30°. Electrical storms occurred over Sunderland on 19th, extinguishing the electric lights; 20th over north-east England and one was reported at Malin Head on 9th, on which day aurora was seen as far south as Guernsey, but in south-east England fog hid it from view. Aurora was again seen in Scotland on 11th and 13th. Winds were very strong on 8 days and very variable on 7. The 17th to 21st inclusive comprised a remarkable storm of vast extent; at Greenwich 22 lbs. on the square foot were recorded on 20th and 21st. Atmospheric pressure was greatest, 30° 55 inches, on 2nd and 28th; least, 28° 11, on 20th. Mist was noted in places on 7 days, south-east 4, west Ireland 2, south England 1; fog in north-east 1, south-east 3. Bright sunshine varied between 39 per cent. in east Scotland and 27 in north Scotland.

The *Winter* temperature was about normal, the rainfall less, and west winds predominated, but the changes of weather were very severe, frequent sharp cold, violent winds, much hoar-frost and occasional snow.

March, 1907.—The weather was fine, mild with abundant sunshine. The first four days and the last ten were remarkably tranquil, the intervening days mostly had strong wind or gales. Rain was generally deficient; Scilly had rain only on 12 days. Mist was noted in west Ireland on 4 days, in places 6, in the south-east 8, south-west 1, England 1; fog in south-east 7, north 1, places 2. The highest temperature was reported at Galdenston on 29th, 70°; the lowest at Balmoral on 10th, 10°. At 8 A.M., 5th, while Valentia had 48° Bath had only 27°; 9th, Roche's Point 51°, Wick 27°; 10th, Oxford 53°, Wick 28°; 11th, Scilly 46°, Wick 20°; 12th, Blackrod Point 47°, Bath 25°. Electric storms occurred on 10th at Armagh and Isle of Man. In the morning 17th, 1° 47 inch of rain was measured at Markree, 1° 02 Blackrod Point, 1° 03 Malin Head; 18th, 1° 05 Blackrod Point. Aurora was seen in Scotland on 10th, 12th, 21st and 24th, Spuru Head 11th, Isle of Man and Armagh 19th, Roche's Point 21st. Atmospheric pressure was greatest, 30° 5 inches, on 12th, also 27th; least, 28° 8, on 17th. Bright sunshine varied between 57 per cent. in the east and in the south, and 30 in the north district; 84 was recorded in the Channel Isles during the week ending 30th.

April, 1907, had much rain, less sunshine than March; temperature in short high spells and short low spells, atmospheric pressure equally distributed so that winds were light and variable, only two days being stormy. The highest temperature was reported at Greenwich on 24th, 72°; lowest at Balmoral on 18th, 24°. Electric storms occurred on 7th in Isle of Wight, 5th

Lancashire, 10th south Wales, 16th south Ireland, 17th west England. Aurora was seen in the north on 14th. Snow and hail showers were widely distributed in Great Britain on 6th and 7th. Mist was noted in the south-east on 2 days, places 3, south 3, south-west 3. Atmospheric pressure was least on 6th, 29 inches; greatest on 24th, 30° 45. A vortex of wind lingered about the chops of the Channel from 12th to 15th inclusive, passing from Brittany to Portland, thence to the entrance of Channel and returning to Brest. Bright sunshine varied between 42 per cent. in south England and 30 in north Ireland.

May, 1907.—The weather was unpleasant, cold and wet, with easterly winds on 20 days. Heat and sunshine were wanted, but several rather severe frosts were not desirable. The customary cold snap, 9th to 14th, replaced by a warm snap, appeared later on 17th to 23rd. Bank Holiday, 20th, was enjoyed with shiver demanding activity. The mean temperature was below normal, the frequency and amount of rain excessive. The highest temperature was reported on 12th, 84° 3; at Great Billing; the lowest at Balmoral 5th, 27°. Electrical storms occurred on 6th in Wales and Dublin, 9th in the south-west, 8th along east coast, 9th in north England, 11th and 25th in south-east, 12th over the Irish Sea, north Ireland and north-west England, 14th in the midlands, and aurora witnessed in the Hebrides, 24th over England, 26th in northwest Ireland; that of the 24th gave Lincoln 1° 25 inch of rain. On 12th Southampton credited 1° 12 for rain between 9.40 and 10.10 p.m. Atmospheric pressure was least on 2nd, 28° 75 inches; greatest on 18th, 30° 35, and on 29th 30° 3. Mist was noted in places on 2 days, east England 1, Channel 2, west Ireland 2, fog in east England 1. The air was gloomy with intermittent showers of rain or hail, fitful intervals of feeble sunshine, and long enduring searching winds. Bright sunshine varied between 37 per cent. in east England and 24 in east Scotland; the last week had only 21 for the United Kingdom.

The *Spring* for the first part was better than the latter, having more than normal heat, sunshine and rain; and these declined to the end with excess of rain.

June, 1907.—The weather was detrimental to social, commercial and agricultural affairs. Mean temperature 4° below normal, 21 rainy days, sufficiently indicate the chilly, moist, gloomy, windy character of the month. The highest temperature was reported at Dumfries on the 6th, 76°; lowest at Glencarron on 4th, 33°. Electrical storms were numerous and sporadic; 1st in south-east England and north Ireland, 5th south-east, 6th places, 9th Liverpool, Wick and east coast, 10th north-west, 12th north England, 13th and 15th Lincolnshire, 22nd north and central England, 24th Dublin, 28th east England and north-east Ireland, 29th Great Britain, 30th south-west. At London the storm of 29th was very severe, 1° 03 inch of rain fell at Greenwich; Battersea was in flood. Rain measured on 3rd 1 inch at Stonyhurst, 4th 1 at Aspatria, 5th 1 at Stonyhurst, 1° 09 at Holyhead, 9th 1° 05 Tunbridge Wells, 1° 35 Chester, 24th 1° 01 Prestwich, 29th 1° 39 Fulbeck. Mist was noted on 3 days in places, 1 west Ireland, fog 1 in south-west. Snow and hail fell on the hills of north England and south Scotland on 26th. Atmospheric pressure was greatest, 30° 25 inches, on 17th, least, 29° 25, on 27th. So unpropitious a

summer month has seldom been experienced; strong winds were cold, prevalent clouds prevented sunshine which ranged between 36 per cent. in south England and 21 in west Scotland. For anything like such broken weather reference must be to June 1892.

July, 1907, had little claim to be a summer month. The temperature was below normal; and though the rainfall was also below normal very deficient, the persistence of cloud and gloom permitted scanty sunshine. The week ending 20th was the best, the afterpart very unsettled. The 15th was the only brilliant day. The highest temperature was reported at Laing on 16th, 86°; the lowest at Llangamarch Wells, 11th, 34°. The morning of June 30th reported 1.18 inch of rain at Liverpool, 1.08 at Jersey; July 10th, Clacton 0.99, 25th Roche's Point 1.33; but there were very heavy rains in the midlands during the latter part of the month. Electrical storms occurred on 1st in west England, 2nd Isle of Wight, 3rd Wales, 8th Shields, 18th and 20th central Ireland, 21st and 22nd Ireland and southern England where floodings happened, 23rd north-west Ireland, 29th North Channel, 30th midlands and south-east. After the 12th much mist was noted; in places on 6 days, in the north 1, over Ireland 2, off west Ireland 1; fog in the north-west 2, over Ireland 1, over Scotland 1. Atmospheric pressure was least on 5th, 29.4 inches; greatest on 11th and 16th, 30.5. The winds were often variable and light; when steady, moderate. Bright sunshine varied between 44 per cent. in the south-west, and 53 in east Scotland; for the week ending 20th, 23 for the United Kingdom, 73 in the Channel Isles.

August, 1907.—The days wanted more sunshine and heat, the nights had undue warmth, thus the mean temperature was 4° below normal in the north, only 1° in the east, where rain was excessive and defective respectively, both results of overmuch cloudiness. The highest temperature was reported at Southend, on 4th—76°; lowest at Balmoral, 28th—32°. Rain measured on 3rd, 1.11 inch at Valentia; Roche's Point, 1.12; 4th, Valentia, 1.05; 5th, Castlebay, 1.16; 8th, Stonyhurst, 1.41; 15th, Spurn Head, 1.01. Electrical storms occurred in east England 6th, 15th; at Fulbeck, 7th; on Irish Sea, 10th; off South Ireland, 11th; in Kent, 14th, 19th; over the south-east, 17th, 20th; at Aberdeen, 18th; east Scotland, 28th, 31st. Wind was stormy on 4th and 8th. Atmospheric pressure was least on 14th—29.1 inches; greatest on 22nd—30.45. Mist was noted in places on four days—Ireland 2, south-east 1, fog in south-west 1. Bright sunshine varied between 43 per cent. in south England and 21 per cent. in north Scotland. The last week was the best—sunshine, 42 per cent. for the British Islands.

The Summer was considered absent or disappointing. The weather, though not exceptionally wet, exhibited persistent clouds, hence the air was cool and wanting in sunshine. Except succession of cyclonic systems, no cosmic or climatic causation can be assigned.

September, 1907.—The weather was very fine, the chief feature having been absence of rain—partially a drought in England and Ireland. The rainfall was only a twelfth of the normal in the east, about a half in the west, and deficient in the south very much, in the north slightly; but, in the north, rain fell on 27 days, while in the east on only 4. The maximum temperature of daylight was seldom intense, the minimum by

night-time was higher than usual. The highest temperature was reported at Laing, on 10th—89°; the lowest at Newton Rigg, on 4th—28°. On 2nd, 1.05 inch of rain was measured at Stornoway; 4th, 1.20 at Blacksd Point, 1.34 Pembroke. Electrical storms occurred on 10th in north Ireland, and aurora was seen from various stations as far south as Dunmow; 28th, Valentia had a thunderstorm, and on 26th Falmouth. The winds were from eastward on 9 days. Mist was charted in the east on 1 day, places 5 days, south-east 5, Ireland 1, sporadic 2; fog in south-east 4, south Ireland 1, places 1, Scotland 1, Ireland 1. Atmospheric pressure was greatest on 9th and 22nd—30.5 inches; least on 26th—29.45; had been 29.5 on 2nd and 5th. Bright sunshine varied between 53 per cent. in east England, and 25 per cent. in north Ireland; generally the percentage was remarkably high during the two weeks ending 21st, and the weather the finest of the year.

October, 1907.—The weather was mild, rainy, and stormy. The highest temperature was reported at Skegness on the 2nd—73°; lowest at Markree, 15th—25°. At 8 a.m., 15th, while Dunge-ness had 56°, Nairn only 35°; 16th, Clacton 54°, Birr Castle 31°; 19th, nearly uniformly 54° over the United Kingdom; 28th, Portland Bill, 54°. Nairn, 34°. Rain measured on 4th at Margate 1.17, Guernsey 2.08 inches; 6th, Portland Bill 1.02; 15th, Leith 2.61; 16th, Nairn 1.40, Aberdeen 2.61; 17th, Portland Bill 1.81, Oxford 1.01; 28th, Lincoln 3.50, Aberdeen 1.20; 30th, Portland Bill 1.11; Harrogate 1.19; 31st, Pembroke 1.04, Harrogate 1.17. Electrical storms occurred on 2nd at Holyhead; 10th in Ireland and north England; 11th in south-east England; 14th, St. George's Channel; 15th, north Scotland; 16th, Cornwall; 19th, Derbyshire. Aurora was seen on 27th in north Scotland. On 3rd a well defined waterspout was seen eight miles off Brighton. Atmospheric pressure was greatest on 4th and 31st, 30.05 inches; least 18th, 28.6. Fog was charted once in east Scotland, once in west Ireland, thrice in the south-east, once in places. The wind came from eastward on 11 days. There was a good deal of snow in the district of Ben Nevis on the 7th. A thunderstorm on the 8th gave something like a deluge of rain to Swansea; another, on 12th, dropped a layer of hail, said to be 3 inches thick, over north-west Kent. Strong winds were frequent. Cyclonic storms raged on 10th and 11th from Bay of Biscay to north of Ireland; 17th to 22nd over Ireland and most of England; the Trent rose two feet. Following the prolonged deficiency of rain, and the long drought in September, places where people were dreading scarcity of water were taken unawares, for Nature seemed in a hurry to make compensation, but has not quite succeeded yet. Bright sunshine varied between 28 per cent. in the south-west district and 19 in west Scotland.

The weather and the crops.—November found the land too damp to be workable. Some frost came about mid-month, and fine weather following good work was done, vegetation was active and pastures verdant. The frost at the end of December did little damage. Notwithstanding variable conditions—snaps of severe cold, frost, snow, or strong winds—drilling and sowing progressed during the winter. March came in "like a lamb," very cold, but permitted sowing, and the winter crops were healthy. April gave more than usual rain after five months of short supply. The crops flourished and pastures benefited. A heavy fall of snow on the 7th

was a surprise. Temperature ranged high and low in short spells, trying to vegetation. May came with storms and rain, proved a damp dreary month, wanting more warmth and sunshine. Whit Monday, 20th, was like mid-winter. However, the crops and fruits did not suffer materially. June was chilly, windy, gloomy, too damp for hay-making, unfavourable for all growth except hay. July had few bright days, delayed harvest, and threatened to depreciate the crops. Hay-making was hazardous, but the crop was large. As a certain summation of heat is required for maturation, it became evident that the defect had to be met later than normally or not at all. The weather though cold and gloomy satisfied the crops. The lengthened ripening period was expected to produce good quality and average yields. August brought little heat, less gloom, and a tendency to dryness. Harvest did not commence till mid-August, even in the southern parts. The summer was disappointing, cool air and grey skies were predominant, without a single spell of heat. An

almost unnatural season, yet healthy, for the death rates were remarkably low; diarrhoea was almost absent. Humid weather accounted for luxuriant grass, and want of sunshine for its defective quality. Beyond expectation the cereals were at least of normal quantity and quality. The fine September served well for preparing the seed-bed, only a little moisture would have rendered the land more pliable and improved the tilth. Tillage could not be well conducted on a stiff soil, rain having been deficient all the summer, and drought throughout September. October brought rain and promised well for tillage and autumn sowing. The agricultural year having been deficient in rain, the underground water wants replenishing. The autumn 1906, according to Whitaker's summary, had rainfall less than ten inches, and was good for autumn-sown wheat; subsequent moderate rainfall during the cereal year, as well as the mild winter, cool spring and summer were just the conditions for a good though late harvest.

Storms and Floods in 1906-1907.

[1 NOV., 1906, to 31 OCT., 1907.]

1906. ON November 2nd a storm in the Riviera district, attended by a huge sea-wave, destroyed cottages, boats, and a steamer; while at Toulon a warship, as well as fishing boats and yachts, were carried away; quays were demolished, and much wreckage scattered over the coast. On 6th occurred a devastating break of the Colorado river. On 7th, Halifax reported the Atlantic coast strewn with wrecks, resulting from a gale on the 4th. By the 10th a large tract within a radius of 20 miles from Huntington was under water. The Ouse and Nene overflowed. In the afternoon, 17th, a whirlwind with noise like thunder passed over Herne Bay, carrying a roof a distance of 400 yards, and doing other serious damage.

On December 5th, the violence of a gale destroyed a telegraph tower, 400 feet high, at Machrihanish, Argyre. On the same date, a dam burst near Clifton, Arizona, drowning 30 persons, and sweeping away buildings and damaging roads and mines.

1907.—On January 3rd, a rapid thaw led to floods in various parts of England. On 10th, a typhoon struck the Philippines, and at Leyte 100 persons were killed. On the 11th, a tidal wave on the west coast of Sumatra swept off 340 persons. On 19th, a hurricane severely damaged Cooktown, Queensland. On 28th, a rainstorm of ten minutes' duration swamped more than 50 vessels at Hong Kong, and it is believed that about 100 lives were lost.

On February 3rd, a blizzard snowed up trains from the Great Lakes to the Rocky Mountains. From 17th to 22nd the British Islands and the North Sea experienced violent storms passing between Norway and Central Europe. Pressure as low as 27.7 inches in latitude 60°N, longitude 5°E, was registered. In Scotland many rivers overflowed. The loss of the *ss. Berlin*, at the Hook of Holland, was "due solely to the violence of the storm" at 6 a.m., 21st.

About March 14th there were destructive floods at Pittsburg, Cincinnati, and in West Virginia. As a result many thousands of people were homeless and starving, and the damage was estimated at £2,000,000. On 17th, the shores of

the Irish Sea suffered from high tides. The *Sueric* grounded off the Lizard and the *Jebba* near the Start. On 20th the tidal walls were broken in the estuary of the Lune. On 24th and 25th a blizzard blocked the coast of Newfoundland with ice, and the railway with snow. Lightning was severe, and the frost intense. In the last part of the month a typhoon lasting three days struck upon some of the Caroline islands; a wave swept the land, and left sand covering uprooted trees; 1,500 persons became homeless and 250 were drowned.

On May 30th storms which covered the country with water were reported from Texas.

On June 8th a tornado caused floods on the borders of Illinois and Kentucky. About the same date a cyclone at Karaki wrecked the lighting system, as well as many buildings and some vessels. On 20th, after torrential rains in Thessaly, the Lethaios overflowed, causing the loss of 300 lives. Trikkala reported 102 persons drowned and 1,000 houses ruined. On 29th the severe electrical disturbances in various parts of Great Britain will be remembered by aeronauts. Battersea was like a system of canals. South London suffered much. From Cardiff to Chatham and as far north as Glasgow disasters were numerous.

On July 3rd the bursting of a dam at Buenventa Lake, California, flooded 30,000 acres. By the 17th the rivers of Silesia had flooded the country, and snow fell in the Black Forest. During three days Austria experienced very cold wind and rain; two inches of rain at Vienna flooded the western district.

By August 16th floods were extensive in Bombay and in Baluchistan.

On September 23rd St. John's reported that a recent storm had destroyed 70 fishing boats. By the 25th floods at Malaga had caused the loss of many lives and destroyed numerous buildings. On 26th the rivers about Montpellier overflowed, and damaged many vineyards and villages. On 27th the Guadalmedina rose a metre, 72 persons were drowned and 68 injured. Parts of Granada were five feet under water. Inundation in the south of France was a serious catastrophe.

extending to five departments and causing much destruction and loss of life. There were floods also in Cornwall.

On October 8th great havoc was wrought by a storm at Ottawa. On 9th floods from the Loire and its affluents were reported. The Rhone rose 10 feet at Avignon during the night. The Tarn rose 23 feet and flooded the valley. By the 13th floods in the vicinity of Arles had destroyed bridges and damaged railways and villages. By the 17th extraordinary floods had

taken place in France and in the district of Turin. Exceptionally large rainfalls caused rivers to overflow between Edinburgh and the west of Scotland, as well as in many parts of England. By the 22nd the Rhone valley and the upper part of the Loire basin were again in flood. Over Spain waterspouts caused incalculable loss; 102 persons were drowned at Malaga. At the end of the month the flood in the Teme valley was peculiarly severe, especially around Knighton, in Radnorshire.

THE ROYAL RED CROSS. R.R.C.

(Instituted St. George's Day, 1883.)

Ribbon, Dark blue with red edge.

For zeal and devotion in providing for and nursing sick and wounded sailors, soldiers, and others with the army in the field, on board ship, or in hospitals

HER MAJESTY QUEEN ALEXANDRA.

H.M. The Queen of Greece.
H.R.H. The Princess Christian.
H.R.H. The Duchess of Argyll.
H.R.H. The Princess Henry of Battenberg.
H.R.H. The Duchess of Connaught.
H.R.H. The Duchess of Albany.
H.R.H. The Baroness von Pawel-Rammingen.
H.R.H. The Duchess of Sparta.
H.R. Princess Victoria of Schleswig-Holstein.
Addison, Miss C.
Airy, Miss Sybil.

* Return for 1868 incomplete.

In the first half of the seventeenth century (1633 has been cited as the best approach to a definite date) we meet with the earliest mention of the introduction of rails for the lessening of friction upon roads. Beams of wood, some six or seven inches in breadth, were about this time laid down to facilitate the draught of the waggons in the vicinity of some of the coal-mines at Newcastle; and as a matter of necessity the addition of "sleepers" had speedily to follow. In 1738, at Whitehaven, it is stated that iron was first substituted as the material of the rails; and in 1767 it appears established that this revolution was adopted at Combrookdale, being followed nine years later at the Sheffield Colliery. As yet, how-

ever, only thick plates of iron were fastened to the surface of the wooden rails, and it was not till 1789 that "edge rails" were introduced, the credit of their adoption being assigned to William Jessop, on the Loughborough and Nanpantan line. James Watt had conceived the idea of utilizing steam for locomotion; and there is a record of a model locomotive having been used in Cornwall in 1784. George Stephenson, however, in the year 1825, was the first to bring the project fairly into practical shape.

The first Act obtained for the construction of a railway was that of the Surrey Iron Railway Company in 1801, for a line 9½ miles long from Wandsworth to Croydon. In 1804 an Act was

passed "for making and maintaining a railway or tramroad from the town of Swansea into the parish of Oystermouth, in the County of Glamorgan, and for the hauling or drawing of waggons or other carriages passing upon the said railway or tramroad with men, horses, or otherwise." On the 21st of February, 1804, Trevithick's patent locomotive steam engine was tried at Penydarran, near Merthyr, and conveyed along a tramroad 10 tons of bar iron, and about 70 persons, a distance of 9 miles. The application passed the third reading as a railway or tramroad. The word "otherwise" was evidently intended to cover the use of Trevithick's engine, and this Act may therefore be considered the first in which steam was contemplated as the motive power. The line is now known as the Swansea and Mumbles Railway. Then followed the Kilmarnock and Troon, the Severn and Wye, the Gloucester and Cheltenham, Plymouth and Dartmoor, Stratford-Avon and Moreton, and other small under-

takings, about twenty-five in number altogether, with an aggregate of 325 miles, and an authorized capital somewhat over a million. It is almost unnecessary to add that animal power only was contemplated in their working. The Stockton and Darlington Act was obtained in 1821, with a capital of £102,000; and it is remarkable that, while animal power was to be relied upon for working the line, the clause in the Act states "with men and horses or otherwise." George Stephenson came upon the scene immediately after this Act was obtained, and was appointed engineer of the line; and at his urgent request, Edward Pease, the promoter, applied for a new Act empowering the company to work the railway with locomotive engines. Great opposition was encountered, but the Bill finally passed in 1825, and the line, which was 25 miles in length, was opened on the 27th of September, 1825. A duplicate system of working was at first adopted, the passenger traffic being conducted by single one-horse coaches, while that of minerals was

TABLE SHOWING THE HIGHEST AND LOWEST PRICES OF THE ORDINARY STOCKS OF THE PRINCIPAL RAILWAY COMPANIES IN 1906 AND 1907 UP TO OCTOBER 4TH, TOGETHER WITH THE PRESENT PRICE AND THE YIELD THEREUPON, CALCULATED UPON THE BASIS OF THE DIVIDEND PAID FOR THE LAST TWELVE MONTHS ENDING 30TH JUNE, 1907.

worked by a locomotive engine made under Stephenson's own directions and bearing the simple but significant designation of "No. 1." The first train consisted of 33 coal waggons with one passenger carriage in the rear, and during a portion of its journey it attained a speed of fifteen miles an hour. It appears to have been several years, however, before horse-power was wholly displaced by steam locomotives. The above notable engine was long exhibited in front of the Darlington Station of the Stockton and Darlington line; but it is now placed under cover, mounted on stonework, in the Bank Top Station of the same town. This line—the germ, it may be called, of the railway system—proved a great success financially and otherwise. Nevertheless, the employment of locomotives remained almost unknown to the public at large until the opening of the Liverpool and Manchester line, five years later. The Monkland and Kirkintilloch Railway, a colliery line near Glasgow, opened in 1826, was really the first to follow the example of the Stockton and Darlington, and several other small lines—many of them worked partly by fixed and partly by locomotive engines—quickly adopted the new traction power. The inauguration of the Liverpool and Manchester line in 1830, attended as it was with a tragic result, was the first to impress upon the people that a revolution in travelling had really taken place; but even then the aid of the Press, powerfully and influentially invoked, failed to arouse anything in the shape of enthusiasm. Royal patronage was not bestowed upon the opening ceremony, although eagerly solicited. To the great minds of the time, however, the event assumed more than ordinary importance, and it is reported that the impression made upon Lord Brougham's contemplative mind forced a tear from his eye. Leicester to Swannington came next, but that from London to Birmingham was the largest that had yet been projected. A great struggle took place with landowners and other influential personages, opposed not only to this Bill in particular, but to the introduction of railways generally. Undaunted courage and perseverance on the part of the promoters prevailed, and the Bill, which was rejected in 1832, passed in 1833, but not until landowners and others had been conciliated by having the price originally estimated for their land, &c., doubled and even trebled. The expenses of carrying this Bill, which was probably the most momentous Par-

liamentary campaign in the history of railways, were over £70,000. The line was opened throughout in 1838, and the first train accomplished the distance at an average speed of over twenty miles an hour. The tide of public opinion was now fairly turned, and ran as strongly in favour of railways as it had before been against them. The Grand Junction, the London and Greenwich, London and Southampton, the Great Western, Birmingham and Derby, Bristol and Exeter, Eastern Counties, Manchester and Leeds, Midland Counties, North Midland, South Eastern, London and Croydon, Birmingham and Gloucester, together with a large number of small Bills, were all passed in four years from the passing of the London and Birmingham Bill, and before that line was opened. Thus in four or five years was witnessed the laying of the foundations of nearly all the existing great trunk lines of railway in this country.

The expenditure incurred in securing legislative authority to construct railways was enormous. The Parliamentary costs of the Brighton Railway averaged £4,806 per mile; of the Manchester and Birmingham, £5,190 per mile; and of the Blackwall, £14,414 per mile! The solicitors' bill for the South-Eastern Railway contained 10,000 folios, and amounted to £240,000.

Up to 1840, inclusive, notwithstanding the delays and difficulties which surrounded railway projectors, even in the earliest stages of legislation, 299 Acts, authorizing the construction of 3,000 miles of line, had been passed. The inevitable reaction set in, and in 1841-2-3 only a few small Bills were passed by the Legislature; but as the Liverpool and Manchester, the London and Birmingham, and other leading concerns were paying 10 per cent. dividends, and some of the smaller lines were yielding even larger returns, attention was naturally drawn to the remunerative character of this class of property, and the supply of railway shares became far below the demand. A flood of new projects appeared before the public, and the Legislature even, labouring apparently under the general excitement, encouraged promoters by relaxing or withdrawing the general opposition which had previously been offered. In 1844, 797 miles were authorized; in 1845, 2,883 miles; and in 1846, the prodigious total of 4,790 miles, under no less than 272 Acts, obtained Parliamentary sanction. The succeeding years saw some abatement, but still there were 1,663 miles passed in 1847, and 300 in 1848. These

figures illustrate the rise and fall of the great fever known as the "railway mania." At least four times as many schemes came before the credulous and overweening public as ever came to receive legislative deliberation, and between the close of the 1845 session and the opening of that for 1846, no less than 1,300 projects were brought out, and it was calculated that even the small Parliamentary deposits required to be lodged with each Bill would aggregate to nearly sixty millions. Gradually, however, it dawned upon the minds of reflecting people that of the £600,000,000 required, a vast proportion were mere paper projects or competitive schemes, alike unnecessary and uncalled for, and the inevitable collapse soon followed.

General legislation relative to railways was introduced about 1840. The lines that had been constructed previous to this were established under Special Acts. More than anything else in the nature of public or private enterprise, it was beginning to be felt that the railways were instrumental in promoting the interests not only of the rich, but perhaps even in a greater degree the interests of the community at large. The enormous development of the trade of the country was ascribed to the instrumentality of railways. It is not wonderful, therefore, that a new branch of law for their regulation was introduced. The variety and repeated alterations in the railway

laws showed the difficulty of dealing with the various and often conflicting interests concerned. The Railways Regulation Act of 1840, the first of the General Acts, provided for a month's notice being given to the Board of Trade before opening; for returns of traffic to be made by the companies, as also of accidents involving personal injury; for Government inspection of works, for the approval of bye-laws, &c. Afterwards were passed Acts for their better regulation, and for the conveyance of troops, 1842, the Railways Further Regulation Act of 1844, the Railways Clauses Consolidation Act, 1845, and the Canal and Railway Carriers Act of the same session. Then followed legislation on the leasing and sale of railways, on the gauge, on cheap trains, passenger duty, &c. In their civil and commercial importance, and the enormous interests they represented, railways soon came to occupy the attention of leading minds of the day, and an active part in their administration was shared by members of the Government and of both Houses of Legislature, and the railway interest has continued powerfully represented.

RAILWAYS IN 1906.

The number of persons employed in working the railways of the United Kingdom in 1906 was 581,664. The number dependent upon this large body must also be very great; and if we take into account the vast numbers besides who are

employed in branches of trade which administer to the requirements of railways, the social dependence upon their existence must be something enormous.

At the close of the year 1906 there were in use upon the railways 23,147 locomotive engines, 50,966 carriages for the conveyance of passengers, 19,739 other vehicles attached to passenger trains, 731,639 waggons for the conveyance of live stock, minerals, and general merchandise, and 20,215 miscellaneous vehicles.

Capital embarked in Railways.—The total amount of capital authorized by Parliament to be raised for the construction of railways in the United Kingdom amounted on the 31st December, 1906, to £1,384,996,465. Of this sum, £1,286,883,341 (which includes £195,286,000 nominal capital caused by the consolidation or conversion of stocks) exists and forms the capital account of the various railway companies, and shows an increase over the year 1905 of £14,282,000, or 1·1 per cent. The £1,286,883,341 is composed of £121,790,461 guaranteed, £329,552,037 debenture, £336,674,114 preferential, and £486,720,013 ordinary stocks and shares, besides a sum of £12,146,716 raised by loans. The net receipts for the year amount to £44,446,077, equal to 3·45 per cent. on the total capital sunk, as compared with £43,466,356 in 1905, with a corresponding capital of £1,382,971,868, which gave a net receipt of 3·42 per cent. It may be seen, therefore, from the foregoing figures that the total amount of capital raised at the close of the year was nearly £1,287,000,000, of which more than £195,000,000, or approximately 15 per cent., was due to nominal additions. These nominal additions formed approximately 18½ per cent. of the ordinary stock, 13½ per cent. of the guaranteed and preference, and 13 per cent. of the loans and debenture stocks. The total amounts of capital at the end of 1906 compared with 1905 show an increase of about £5,750,000 in the ordinary, £4,500,000 in the guaranteed and preference, and £4,000,000 in the loans and debenture stocks, making a total increase of £14,250,000—a smaller increase than that of any previous year since 1895. The proportions which the various classes of stock bore to the total paid-up capital differed but slightly from the year 1905, the ordinary stock forming 38 per cent., the guarantee and preference 36 per cent., and loans and debenture stock 26 per cent. of the total. The proportion of net earnings to capital, although slightly greater in 1906 than in 1905, shows a general tendency to decline. This, however, arises partly from nominal additions to capital on the conversion of stocks. Another cause of the decline is the increased wages and curtailment of the hours of labour of railway servants, and the rapid growth of

local taxation, which is increasing in an alarmingly disproportionate ratio to the net profit and to the benefits which the companies derive from the expenditure of the rates. That this burden of taxation shows a constant tendency to grow heavier year by year is illustrated by the fact that during the last ten years there has been an increase of £1,671,000 in this item. As compared with the 1897 total, the sum paid by the railway companies under the head of Rates and Taxes in 1906 shows an advance of nearly 51 per cent.

Gross Earnings of the Railways.—The earnings for the year 1906 amounted to £117,227,931, as compared with £113,531,019 for the year 1905, which gives an increase of £3,697,000, equal to 3·3 per cent. The increase in the passenger receipts is £948,052, made up as follows:—

	1906.	1905.	Inc. or Dec.
1st Class	3,428,816	3,467,098	—38,282
2nd „	2,923,444	3,054,196	—130,752
3rd „	30,583,555	29,628,839	+954,716
Season & Periodical Ticket Holders	4,269,167	4,106,797	+162,370
	41,204,982	40,256,930	+948,052

The numbers carried were:

	1906. No.	1905. No.	Inc. or Dec. No.
1st Class.....	35,600,157	36,414,492	—814,335
2nd „	42,565,023	52,583,258	—10,018,235
3rd „	1,162,181,952	1,110,024,352	+52,157,600
	1,240,347,132	1,199,022,102	+41,325,030
Seas. & Periodical Tk. Holders	*693,466	*663,040	+30,426

* For 1905 and 1906 the equivalent number of holders of annual tickets is given. Previous to 1902 the returns were not wholly but only partially on this basis; they are, as regards the years 1902 to 1906, on a uniform basis.

An examination of the details given in previous statement shows that there was a considerable increase in the receipts from third class ordinary passengers, but a slight falling off in the receipts from first and second class ordinary passengers. It must be borne in mind, however, that while there was undoubtedly a general increase in the number of third class passengers, more than half the increase of fifty-two millions shown is accounted for by the underground railways of the metropolis, partly owing to the changes made on the Metropolitan and Metropolitan District Railways, and partly to the fact that more than ten million third class passengers were carried in 1906 on two metropolitan “tube” railways which were not open in 1905. A large proportion of the decrease

RAILWAYS OPENED IN 1907.

Railway.	From	To	Date.	Miles.

Nidd Valley	Pateley Bridge	Lofthouse.....	Sept. 1	6
G.N. and Brompton	Finsbury Park	Hammersmith	Dec. 15/06	9

in the number of second class passengers is also attributable to the former of these two causes, the number of second class passengers carried on the Metropolitan and Metropolitan District Railways being some six millions less in 1906 than in 1905.

It will be seen that the number of first class passengers decreased in 1906 by 2·2 per cent., and second class by 19·1 per cent., but third class increased by 4·7 per cent., or a total increase of 3·4 per cent. The receipts from these classes decreased by 1·1 per cent., 4·3 per cent. respectively, but third class increased by 3·2 per cent.

The annual increase in third class is still small as compared with the annual increases for years previous to 1902. This falling off in the rate of increase is undoubtedly due to the increasing competition of tramways, as may be deduced from the fact that in 1897 the increase in number of railway passengers was 5·2 per cent., but that of tramway passengers the increase in numbers was 3·8 per cent. only. In 1904 the increase in numbers of third class railway passengers was 0·6 per cent., whereas

the increase in numbers of tramway passengers was 15 per cent., and in 1905 8·1 per cent.

The receipts from season ticket holders show a further considerable increase, following on those of previous years, the increase in the receipts from third class season tickets having been in 1902, £79,000; in 1903, £126,000; in 1904, £171,000; in 1905, £131,000; and in 1906, £137,000. The earnings for the conveyance of parcels, mails, and such other traffic as is generally carried by passenger trains, amounted in 1906 to £8,677,794, as compared with £8,463,190 in 1905, being an increase of £214,604, or 2·4. The total figures of traffic falling under the heading of "goods" are £58,394,217, as compared with £56,411,589 in 1905—an increase of £1,982,628, or 3·2. The aggregate is made up of £29,391,412 from merchandise; £27,556,863 from minerals; and £1,405,942 from live stock. The total quantity of goods carried in 1906 was 488,790,683 tons, as compared with 461,139,023 tons in 1905, showing an increase of 27,651,660 tons, or 5·7 per cent.; owing, however, to the revision of the list of articles included under the head of "minerals," the tonnages of minerals and

The Midland Railway Company took the initiative in passenger traffic reforms, having run third-class carriages by all trains from 1st April, 1872; afterwards, from 1st January, 1875, greatly reducing the first-class and abolishing second-class fares. From 1st November, 1891, the Great Northern Railway Company also abolished second class fares to all stations north of Hatfield; from 1st January, 1893, the Great Eastern abolished them in the provinces; the Cambrian followed on 1st May of the same year, but re-introduced them in 1899. They have also disappeared from all journeys between London and Scotland, and on the 1st of July, 1897, the Furness Company discontinued second-class accommodation. On July 1st, 1905, the Metropolitan District Company commenced to work their electric train service, the cars being first and third class only.

general merchandise previous to the years 1903, 1904, 1905, and 1906 are not comparable with those for previous years.

Expenditure.—The total working expenses of the whole of the railways for the year 1906 amounted to £72,781,854, equal to 62 per cent. of the gross earnings, as compared with a total of £70,064,663 for the year 1905, equal also to 62 per cent. The increase compared with 1905 amounts to £2,717,191, or 3·7 per cent. The total number of miles travelled by passenger and goods trains during the year 1906 was 414,235,244, or 13,312,046 more than in 1905. Analysing the expenditure, we find the item £19,367,193 for locomotive power; £6,062,379 for repairs and renewals of carriages, &c.; £10,985,653 for maintenance of permanent way, stations, &c.; and £21,057,646 for traffic expenses. The locomotive expenses in 1906 amounted to 11·24d. per train-mile.

Compensation.—The amount paid for compensation for personal injuries sustained during the year 1906 amounted to £262,507, as compared with

£143,656 for the year 1905, resulting in an increase of £118,851. In the movement of goods the companies have paid for damages and losses £386,231, as compared with £381,459 in 1905—an increase of £4,772. We subjoin a statement showing the amounts paid by the principal companies under both heads:—

Net Result of Working the Railways.—The gross receipts, compared with those of the preceding year, show an increase from passengers (which

includes season ticket, carriage, horse, dog and post office mail traffic) of £1,162,656; from goods an increase of £1,982,628; and an increase from rents, tolls, navigation and steamboats, &c., of £551,628; and a total increase from all sources of £3,696,912. The net receipts for 1906 on the capital outlay give a sum of 3.45 per cent., compared with 3.42 per cent. for the year 1905, and 3.39 per cent. for the year 1904. As may be seen, however, on page 712, over 14 millions additional capital has been raised during the year 1906, a large proportion of which is "locked up" in works either unfinished or only partly finished, therefore unproductive. Increased working expenses, caused by diminished hours of labour and a proportionate increase in the number of men employed, and increased wages, have largely operated on the net profit. The increase in the amount of wages has for some years been gradually getting larger. A few years ago the amount paid as wages was less than 20 per cent., but now the wages bill represents over 25 per cent. of the total. Rates and taxes are also yearly increasing in a disproportionate ratio to the net profit; for instance, some of the railway companies are paying an annual sum for rates and taxes equal to 1 per cent. on the ordinary stock of those companies.

RAILWAY SPEED.—The Fastest Running, without Stoppage, is made by the Companies as under:—

or about 6½ per cent. of the gross receipts, and where this burden is due to the building of tramways by municipalities the position is of course exceptionally hard. In fact, since the County Councils came into existence thirteen years ago, many extra duties have been imposed upon railway companies. The Education Act alone has brought about an enormous increase in the rates. But even with these increasing expenses a percentage of 3·45 on the net receipts for the year must be viewed as a very favourable result.

RAILWAY ACCIDENTS.

To the public generally, one of the most interesting points in connection with the working of the railways is the immunity from accidents, as evidenced for a considerable number of years past in the amount paid by the companies by way of compensation for personal injury to passengers. In 1905 and 1906 the cost per passenger train-mile for personal injury was 0·14*d.* and 0·24*d.* respectively. In loss and damage of goods, the cost in 1905 was 0·59*d.*, and in 1906 0·58*d.* per goods train-mile. The general report to the Board of Trade for 1906 shows that although accidents and collisions of a serious nature have occurred during the year to passenger trains, yet the numbers (particularly in the case of the number killed) are very low when compared with the millions of passengers carried by the companies during the year.

The number of personal accidents on railways to passengers, railway servants, and others, reported to the Board of Trade during the year, show a total of 1,252 killed and 20,478 injured (as compared with 1,180 killed and 18,236 injured in 1905).

The increase since the year 1897 in the number injured is owing to an order recently made by the Board of Trade regarding the mode in which the returns are to be compiled by the railway companies. Hitherto some companies have only reported accidents of gravity, but they are now directed to report all accidents which prevent the servant injured from being employed for five hours on his ordinary work on one of the three working days next after the accident. We will now proceed to investigate under three distinct heads the various causes from which these accidents arose.

Accidents to Passengers.—Fifty-eight passengers were killed and 631 injured from accidents to trains, rolling stock, permanent way, &c. (as compared with 39 killed and 396 injured in 1905); while 108 passengers were killed and 1,949 injured from other causes—such as falling between carriages and platforms, or on to the platforms, on getting into or alighting from trains, passing over the line at stations, falling out of carriages during the travelling of trains, and inclusive of 520 injuries resulting from the closing of carriage doors. In addition to the above may be recorded 8 killed and 791 injured by accidents in which the movement of railway vehicles was not concerned, viz., ascending or descending steps at stations, falling off platforms, &c., and inclusive of 96 injured by being struck by barrows or stumbling over packages.

Accidents to Servants in the employ of the railway companies or contractors.—The casualties under this head resulting from accidents to trains, or in which the movement of trains or vehicles

used exclusively upon railways is concerned, show that 438 were killed and 4,365 injured during the year, the following being an analysis of such accidents:—

	Killed.	Injured.
1. While coupling or uncoupling vehicles	9	572
2. By coming in contact, whilst riding on vehicles, with other vehicles, &c., standing on adjacent lines	2	30
3. While passing over, under, or standing on buffers	1	13
4. When getting on or off, or falling off, engines, waggons, &c.	3	205
5. While braking, spragging, or chocking wheels	13	445
6. While attending to ground-points	—	91
7. While moving vehicles by capstans, turn-tables, props, levers, &c.	11	458
8. By other accidents not included in the preceding	42	456
9. From falling off trains, engines, &c., in motion	2	61
10. When getting on or off engines, vans, &c., during the running of trains	9	207
11. By coming in contact with over-bridges or erections on the sides of the line	3	58
12. While attending to the machinery, &c., of engines in motion ..	1	507
13. While working on the permanent way, sidings, &c.	68	117
14. While attending to gates at level crossings	2	2
15. While walking, crossing, or standing on the line on duty :—		
(1) At stations	88	267
(2) At other parts of the line ..	60	52
16. From being caught between vehicles	30	101
17. From falling or being caught between trains and platforms, walls, &c.	12	66
18. While walking, &c., along the line to or from work	45	28
19. Miscellaneous	24	489
20. From accidents to trains, rolling stock, permanent way, &c.	13	140
Total	438	4,365

In addition to these accidents, other casualties, in which the movement of vehicles used exclusively upon the railways are not concerned, have occurred, viz., 7 killed and 2,195 injured whilst loading, unloading, or sheeting waggons, 1 killed and 126 injured by the falling of waggon-doors, lamps, bales of goods, &c., 11 killed and 705 injured by falling off platforms, ladders, scaffolds, &c., in addition to a large number of accidents from various other causes, either the result of want of caution or misconduct.

Accidents to Persons other than Passengers or Servants.—Under this head is classed casualties whilst passing over railways at level crossings; this caused 76 deaths and 24 injuries in 1906 (as compared with 57 deaths and 37 injuries in 1905). There were 274 deaths and 92 injuries resulting from persons trespassing on the railways, and 181 persons committed suicide upon the lines in 1906 (as compared with 176 in 1905).

CLASS OF SERVANTS.	Number Employed at the end of 1905.	Number Killed and Injured in 1906 from all causes.*		Proportion to the Number Employed.

The Cheap Trains Act, 1883, provides that fares not exceeding the rate of one penny per mile shall be exempt from duty, but fares for return or periodical tickets shall be exempt from duty only where the ordinary fare for the single journey does not exceed that rate. Duty shall be payable at a reduced rate of 2 per cent. on fares exceeding the rate of one penny a mile between stations within one urban district. Such district will contain not less than one hundred thousand inhabitants, and must be of a continuous urban as distinguished from a rural or suburban character.

Officers or men in the King's forces, regular, reserve, or auxiliary, or in any police force, when conveyed by railway on any occasion for the public service, are, when travelling in bodies under one hundred and fifty in number, to be charged three-fourths the rates for ordinary passengers; when over that number, at half rates. The Act does not extend to Ireland.

Hiring of Special Trains.—Although the majority of railway companies have no fixed charges for hire of special trains, the general charges are five shillings per mile, plus the ordinary fare for each passenger according to class of vehicle hired. The railway companies, however, reserve to themselves the right to make whatever charges they may think fit in accordance with circumstances of hiring special trains.

The Workmen's Compensation Act, 1897.—This Act, which received the Royal assent on August 6, 1897, and came into operation on July 1, 1898, is intitled "An Act to amend the law with respect to compensation to workmen for accidental injuries suffered in the course of their employment."

The Employers' Liability Act of 1880 only gives compensation in cases where the personal injury is caused by the negligence of the employer or his representatives, or by a defect in the works or machinery used in his business. The Act of 1897 entirely disregards the cause of the accident, with the exception of the wilful misconduct of the injured workman himself, and awards

compensation to employees in all cases of personal injury by accident arising out of and in the course of their employment. It further provides that compensation for injuries received whilst performing duties involving considerable personal danger shall become a charge upon the profits of the undertaking, thus throwing a serious burden upon Railway Companies and other employers specifically enumerated in the 7th section of the Act. The new Act will in time cause the entire extinction of the companies' accident insurance societies, by whatever title they may be known. The amount paid for compensation under this Act to railway employees during the year 1905 was £173,148.

The Railway (Prevention of Accidents) Act, 1902.—By this Act, where the Board of Trade consider that avoidable danger to persons employed on any railway arises from anything done or omitted to be done by the companies, or from want of proper appliances or plant, they may, after giving a reasonable opportunity of removing the danger, make rules for that purpose, by compelling them to use plant or appliance to the satisfaction of the Board, or the disuse of any plant or appliance which involves danger. The Act also empowers the Board to make rules in order to minimise danger generally. The penalties for non-compliance with these rules is a fine of £50, or in the case of a continuance of the offence (after conviction) a fine of £10 for every day during that continuance. The Board of Trade may appoint such persons as appear to them to be required for carrying this Act into effect, and may hold such inquiries and make such experiments as they think expedient for that purpose.

THE RAILWAY CLEARING HOUSE.

THIS Institution was opened in Jan. 1842, and in addition to the work of clearing through bookings of passenger and luggage traffic, is the medium through which agreements relating to rates and fares, &c., are arrived at. *Chairman*, Lord Claud Hamilton; *Sec.*, Frank Mansfield; *Offices*, Seymour Street, N.W.

* Previous years' figures have only shown the number killed and injured in accidents to trains, or by the running of trains or the movement of railway vehicles. The figures in above table, however, include accidents from all causes.

Indian Railways.

THE construction of Railways in India, which commenced in 1853, has been conducted on three different systems: first, the employment of companies under a system of guarantee; secondly, by the State through its own officials; and thirdly, by assisted companies either with or without guarantee or subsidy from the State, and working with capital wholly raised by themselves or partly with capital provided by the State.

The total length of Railway open in India on 31st December, 1906, was 29,097 miles. This mileage includes tramways working outside municipal limits, which are treated as light railways. The capital outlay was £252,804,866. The gross receipts for 1906 amounted to £29,411,533; the working expenses to £14,671,600, or 49·88 per cent. of gross receipts. The net revenue amounted to £14,739,933, which gave a return of 5·83 per cent. per annum upon the capital invested. The number of passengers carried in the year was over 271 millions. The Indian Railways have in their service 479,284 employees, of whom 6,850 are Europeans, 9,326 Eurasians, and 463,108 Natives. The number of servants killed and injured during the year from all causes was 380 killed and 599 injured; passengers, 164 killed and 562 injured; other persons, 1,070 killed and 333 injured; total, 1,614 killed and 1,494 injured. The Railways of India have up to the end of

1899 involved a yearly loss to the Indian revenues, but the working of the year 1900 resulted for the first time in their history in a net gain to the State, and the result of the working for the year 1906 was a gain to the Government of £1,650,113.

There is to be a "battle of the gauges" in India in the near future, the question at issue being the metre *versus* the 5 ft. 6 in. gauge. At present there are 11,562 miles of 3 ft. 3½ in. gauge, 14,733 of 5 ft. 6 in. gauge, 942 of 2 ft. 6 in. gauge, and 328 miles of a ft. gauge. In addition, it seems from a report on Indian railways that the present vehicular width makes the railways work at 22½ per cent. under power, the vehicles on the broader gauge being 9 ft. 6 in., and on the metre gauge 7 ft. 9 in. The 5 ft. 6 in. width might, it is stated, be increased to 12 ft. 3 in.

The principal recent event was the constitution of a Railway Board, consisting of a chairman and two members—with the necessary clerical establishment—to whom is entrusted the general control and administration of the railways in India, hitherto exercised by the Government of India in the Railway Branch of the Public Works Department.

The chairman of the Board is Mr. F. R. Upcott, C.S.I., and the two members are Mr. W. H. Wood and Mr. T. R. Wynne, C.I.E. These gentlemen assumed office in March, 1905.

Indian Railways.

STATEMENT OF CAPITAL, REVENUE, DIVIDENDS, &c.
In the year 1894 an Act was passed making it legal for Indian Railway Companies to pay interest out of capital during construction, subject to the Secretary of State's specific sanction, and to certain other conditions.

Shipbuilding at Home and Abroad.

We have been supplied with the following information by "Lloyd's Register of British and Foreign Shipping":—

MERCHANT AND OTHER VESSELS (not Warships)
LAUNCHED IN THE UNITED KINGDOM DURING
RECENT YEARS.

Year.	No.	Gross Tonnage.
1896.....	696	1,159,751
1897.....	591	952,486
1898.....	761	1,357,570
1899.....	726	1,416,791
1900.....	692	1,442,471
1901.....	639	1,524,739
1902.....	694	1,427,558
1903.....	697	1,190,618
1904.....	712	1,205,162
1905.....	795	1,623,168
* 1906.....	886	1,828,343

* In addition, there were launched in the United Kingdom during 1906 29 Warships of 108,450 tons displacement, of which 23, of 85,700 tons, were for the British Government.

Of the merchant steamers (815 in all) launched in the United Kingdom during 1906 6 vessels were over 10,000 tons, the largest being the *Mauritania*, of 31,937 tons, and the *Lusitania*, of 30,822 tons; 14 were between 7,000 and 10,000; 148 were between 4,000 and 7,000 tons each; and 272 were between 1,000 and 4,000 tons. Only one sailing

vessel of over 1,000 tons was launched in the United Kingdom during 1906.

MERCHANT AND OTHER VESSELS (not Warships) UNDER CONSTRUCTION IN THE UNITED KINGDOM AT VARIOUS DATES. (Vessels not to be classed by Lloyd's Register are also included.)

DESCRIPTION OF VESSELS BUILDING IN THE UNITED KINGDOM IN 1875 AND 1907 RESPECTIVELY.

DATE.	STEEL.				IRON.				WOOD.				TOTAL.			
	STEAM.		SAIL.		STEAM.		SAIL.		STEAM.		SAIL.		STEAM.		SAIL.	
	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.	No.	Tons Gross.
* 30 Sept. 1875 ...	...	...	...	...	144	162,325	110	105,081	6	1,065	173	36,103	150	163,390	283	141,184
30 Sept. 1907 417	1,068,271	17	10,484	...	...	...	...	...	2	151	14	1,181,419	1,068,422	31	11,605	...

* The figures for this date include vessels preparing, but not actually commenced.

These figures show that the average size of vessels building at the present time is nearly $\frac{1}{3}$ times that of vessels built thirty-two years ago. Then, steel was not used for shipbuilding purposes;

now, it has entirely supplanted iron. Then, the tonnage in hand was equally divided between steamers and sailing vessels; now, the proportion of sailing to steam tonnage is insignificant.

MERCHANT AND OTHER VESSELS (not Warships)
LAUNCHED IN EACH OF THE PRINCIPAL SHIP-
BUILDING DISTRICTS OF THE UNITED KINGDOM
DURING 1906.

* Wooden Vessels trading on the Great Lakes of North America are not included in the Register Book. † In the absence of satisfactory information the records of numerous small sailing vessels belonging chiefly to Greece, Turkey, Southern Russia, and the Dutch East Indies have been omitted from the Register Book. ‡ Japanese sailing vessels of under 500 tons net are not re-warded in Lloyd's Register Book.

FIRST STEAMBOATS—EARLIEST LINES—HISTORICAL SKETCHES—EVOLUTION FROM STEAM PACKET TO STEAM PALACE ON THE ATLANTIC—OWNERS OF THE LARGEST FLEETS, STEAM AND SAIL—BIGGEST AND FASTEST STEAMERS.

IN the early part of the 18th century numerous inventors propounded schemes for applying steam power to vessels to be run upon rivers and canals, but only their names can be given in the chronological list of the first steamboats (*vide page 745*).

1824 witnessed the birth in England of the railway system. With the introduction of the "iron horse" the General Steam Navigation Company arose to champion the adoption of steam. The national benefits calculated to result from steam power, enabling vessels to enter and quit harbour regardless of wind and tide, were emphasised by the directors in the prospectus. Ocean trade was then carried on with sailing ships, mostly under 500 tons each, and all the steamboats in the United Kingdom only numbered 109.

Since the beginning of the last reign, steam-propelled vessels have vanquished the time-honoured "clippers." Iron for building purposes, being stronger, supplanted wood, but had itself to yield to steel as soon as that lighter material could be produced cheaply.

The "auxiliary screw" only stayed long enough to enable the unobtrusive "propeller" to make sure of superseding, for ocean services, the unwieldy "paddle-wheels." "Compound engines," which largely reduced coal consumption, paved the way for "triple-expansion" ones. These were next duplicated to drive "twin screws," with which all steamers of the highest class are fitted, and now steam turbines, having been tried successfully, have been adapted to the largest and fastest liners, increased speed per indicated horse-power, diminished coal consumption, and reductions in weight of machinery, engine-room staff and vibration being obtained.

Space being so limited, the evolution "from steam packet to steam palace" in the North Atlantic trade is presented in tabular form (*page 746*).

To Canada belongs the credit of having built and engined the first steamer to cross the Atlantic. This was the *Royal William*, launched at Wolfe's Cove, Quebec, 1831. In 1833 she went from Pictou, N.S., to Gravesend, arriving Sept. 11th, after 22 days' passage.

The pioneer steamer from the Old World to the New was the Cork packet *Sirius*. Leaving Cork April 5th, 1838, she reached New York April 23rd, having been compelled to burn everything available. On the same day the *Great Western*, the first specially built for the Atlantic service, paddled in, having left Bristol April 8th—a wonderfully quick passage of 14½ days. A third company started with the *Royal William*; she was the earliest steamer with watertight compartments, and the first to cross from Liverpool, July, 1838, taking 19 days.

The *Royal William* had been chartered from the City of Dublin Steam Packet Company, now the oldest steamship company in the world.

The Irish company was practically the godfather of the Peninsular and Oriental Company, so called when the mail services upon this side of Egypt were combined in 1839 under the time-honoured flag of the "P. & O.," which received its charter in 1840.

The failure of the earliest Atlantic companies

did not deter the establishment and development of the Cunard Company. Samuel Cunard, to the discomfiture and astonishment of the Great Western Company, secured the subsidy of £80,000 a year for a monthly Atlantic service of 4 steamers. The gun-brigs were thereupon superseded as mail carriers, and a brighter era was auspiciously commenced by the despatch of the *Britannia*, 1,133 tons, on July 4th, 1840.

In 1839, the Royal Mail Steam Packet Company undertook the conveyance of mails to the West Indies at a time when a steam passage of even a fortnight's duration was to many a subject of wonder, and in 1840 the Pacific Steam Navigation Company was formed to run a service between Panama and Valparaiso.

Owing to the revolution mechanical science caused in the carrying trade of the sea, antiquity by itself counted gradually less even in the conservative kingdom of the sailor, and as the old order changed, shipowners who neglected to advance with the growing wants of the times fell out or dropped behind. As the size of steamships increased, the heavy cost of construction necessitated the establishment of corporations with great strength of capital, which control the principal ocean routes. The origin of each leading company is briefly outlined in a series of "Historical Sketches," and the largest British and foreign owners are referred to.

The *Great Britain* was 322 × 40 × 31; tonnage 3,270; h.p. 1,500.

The *Great Eastern* was 680 feet long, paddle engines 1,710 h.p. and screw engines 1000 h.p.; tonnage, 18,918; 14 knots speed; daily coal consumption, 300 tons; longest day's run, 333 knots.

Some homeward runs by clippers were of sufficient interest to be chronicled here. The *Red Jacket* in 1854 crossed from New York to the Mersey in 13 days; the *Dreadnought*, 1413 tons, 220 × 45 × 26, eclipsed all previous runs in 1862, when she reeled off between Sandy Hook and Queenstown the enduring record of 9 days 17 hours. The *Thermopylae's* maiden voyage in 1868, of 60 days between London and Melbourne, remains the fastest ever known. In 1869 the *Patriarch*, 1339 tons, made for the same owners (the Aberdeen Line) the record passage of 68 days between London and Sydney.

In 1814 the steamboats of all kinds registered in the United Kingdom amounted to less than 1,000 tons, increased to nearly 8,000 tons by 1820. There were 766 British steamers afloat in 1838, in all just short of 150,000 tons. The invaluable Register Book which is published by the Committee of Lloyd's Register of British and Foreign Shipping shows that on June 30th, 1907, nearly every other steamer upon the high seas was under the British ensign, the steamship empire-builders of Greater Britain owning 9,511 vessels, 17,001,139 gross tons, exclusive of 2,006 ships (1,319,529 tons) belonging to the dwindling disciples of time-honoured canvas.

The British flag still flies over nearly one-half of the entire shipping tonnage of the world, but this preponderance is steadily decreasing, and a perusal of the statistical tables which are appended evidences the ever-increasing activity of foreign nations for the carrying trade of the sea.

FIRST STEAMBOATS, PIONEER SAILINGS
AND EARLIEST LINES.

1707. Denis Papin experimented on River Fulda with paddle-wheel steamboat.
1736. Jonathan Hulls patented designs similar to modern paddle boat.
1769. James Watt invented a double-acting side-lever engine.
1783. Marquess of Jouffrey made experiments in France.
1785. James Ramsey, in America, propelled a boat with steam through a stern-pipe.
1785. Robert Fitch, in America, propelled a boat with canoe-paddles fixed to a moving beam.
1787. Robert Miller, of Edinburgh, tried primitive manual machinery.
1788. Miller, with Symington, produced a double-hull stern-wheel steamboat.
1802. Charlotte Dundas, the first practical steam tugboat, designed by Symington.
1804. *Phœnia*, screw-boat designed by Stephens in New York; first steamer to make a sea voyage.
1807. *Clermont*, first passenger steamer continuously employed; built by Fulton in U.S.A.
1812. *Comet*, first passenger steamer continuously employed in Europe; built by Miller in Scotland.
1818. *Rob Roy*, first sea-trading steamer in the world; built at Glasgow.
1819. *Savannah*, first auxiliary steamer, paddle wheels, to cross the Atlantic; built in New York.
1821. *Acron Manby*, first steamer (English canal boat) built of iron.
1823. City of Dublin Steam Packet Co. was established.
1824. General Steam Navigation Co. was established at London.
1824. George Thompson & Co. (Aberdeen Line) were established.
1825. *Enterprise* made the first steam passage to India.
1825. *William Fawcett*, pioneer steamer of the P. & O. S.N. Co.
1830. T. & J. Harrison (Harrison Line) were established at Liverpool.
1832. *Elbarkah*, iron steamer, took a private exploring party up the Niger.
1834. Lloyd's Register for British and Foreign Shipping established.
1836. F. Green & Co. established at London.

1836. Austrian Lloyd Steam Navigation Co. established at Trieste.
1837. *Francis B. Ogden*, first successful screw tugboat; fitted with Ericsson's propeller.
1838. *Archimedes*, made the Dover-Calais passage under two hours, fitted with Smith's propeller.
1838. R. F. Stockton, built for a tugboat, fitted with Ericsson's propeller, sailed to America; first iron vessel to cross the Atlantic; first screw steamer used in America.
1839. *Thames*, pioneer steamer of the Royal Mail Steam Packet Co.
1839. George Smith & Sons (City Line) were established at Glasgow.
1840. *Britannia*, pioneer steamer of the Cunard Line.
1840. *Chile*, pioneer steamer of the Pacific Steam Navigation Co.
1845. *Great Britain*, first iron screw steamer, precursor of modern Atlantic steamer.
1845. Thos. Wilson, Sons & Co., Ltd. (Wilson Line) established at Hull.
1847. Pacific Mail Steamship Co. established in America.
1849. Houlder Brothers & Co. established at London.
1850. Bullard, King & Co. (Natal Line) established at London.
1850. Messageries Maritimes de France established.
1850. Inman (now American) Line, established at Liverpool.
1851. *Tiber*, first steamer of the Bibby Line, established 1821 at Liverpool.
1852. *Fore-runner*, pioneer steamer of the African Steamship Co.
1853. Union Steamship Co. was established (now Union-Castle Line).
1853. *Borussia*, first steamer of the Hamburg-American Packet Co., established 1847.
1854. *Canadian*, first steamer of the Allan Line, established 1820.
1855. British India Steam Navigation Co. was established.
1856. *Tenpest*, first steamer Anchor Line.
1857. *Waldensian*, first steamer of J. T. Rennie, Son & Co. (Aberdeen Line).
1858. *Bremen*, first Atlantic steamer of the Norddeutscher Lloyd, established 1856.
1858. *Great Eastern* launched into the Thames, Jan. 31; commenced, May 1, 1854.

NUMBER OF VESSELS OVER 5,000 TONS EACH, AND PARTICULARS OF LARGEST

Historical Sketches.

For other large Steamship Owners, see p. 748.

ABERDEEN LINE, between London and Australia *via* South Africa, is managed by the owners, Messrs. George Thompson & Co., Ltd. (founded at Aberdeen, 1824), who have long occupied a prominent position in the Australian cargo and passenger trades, due to the "runs" of their noted clippers to Melbourne and to Sydney, the general high standard of their fleet, and its exceptional immunity from loss over more than half a century. Their ss. *Aberdeen*, built in 1881, was the earliest ocean steamer to demonstrate decisively the superior merits of triple-expansion engines. The tonnage does not include any sailing vessels, but the reputation of the line is well sustained by modern steam favourites bearing such time-honoured names of former "fliers" as *Miltiades*, *Moravian*, and *Salamis*. Two twin-screw steamers, *Miltiades*, 6,793 tons, and *Marathon*, 6,794 tons, each 15 knots, were recently added to the company's fleet, while the twin-screw steamer *Pericles*, 11,500 tons gross register, will be ready early this year. This vessel will be the largest British-owned passenger ship trading to Australian ports.

Fleet, 7 vessels; 42,067 tons.

London Office, 7, Billiter Square, E.C.

AFRICAN STEAMSHIP COMPANY, the earliest African line, originated from a private expedition of the *Eltharaka* up the Niger in 1832, its success leading to others for opening up the West Coast of Africa or suppressing the slave trade. This company received its charter in 1852, with an annual subsidy of £30,000 for a monthly mail, passenger, and freight service performed continuously ever since, the pioneer boats *Forerunner*, *Faith*, *Hope*, and *Charity* rendering valuable aid in the Crimean War. In 1891 the company came (see p. 752) under the management of Messrs. Elder, Dempster & Company, of Liverpool, and now maintains seven distinct services from Liverpool, Hamburg, Rotterdam, and Antwerp to West and South-West Africa, the one from the last-mentioned port being under contract with the Congo Free State.

Fleet, 23 steamers; 65,714 tons.

London Office, 17, Leadenhall Street, E.C.

ALLAN LINE.—The Allan Line and State Line of Steamers was originally called the Montreal Ocean Steamship Company, formed by the Allan Brothers, who, as sailing-ship owners, had been connected with Canada since 1820. The first steamer of the line, the *Canadian*, 1,700 tons, was despatched from Liverpool to Quebec and Montreal Sept. 20, 1854. It was intended to inaugurate at that time a fortnightly mail service, but owing to the Crimean War, during which the steamers were engaged as transports, the mail service did not begin until April, 1856, with the sailing of the *North American*. The line has since continued to meet and promote the postal, commercial, and passenger requirements of the now vast Dominion, and has carried the mails nearly the whole of the time and is still doing so. Since 1859, sailings have been weekly. The steamers go to Halifax and St. John, N.B., when the St. Lawrence is closed. The itinerary includes Glasgow, Liverpool, Londonderry, and London, embracing on the other side, in addition to several Canadian ports, Boston, New York, Philadelphia, and the River Plate. In 1905 the

Virginian and *Victorian* (540'×60'×40' 6": 17½ knots), the first turbine-propelled Atlantic steamers, successfully augmented the service; both beat all records, the passage of *Virginian* (10,754 tons) in August, 1907, between Rimouski and Moville in 5 days 14 hours being the fastest. One twin-screw steamer is building, of 10,000 tons, exclusive of total tonnage given.

Fleet, 30 steamers; 169,000 tons.

Head Office, 25, Bothwell Street, Glasgow.

AMERICAN LINE (and Red Star Line) (see International Mercantile Marine Co.) inherited the records of the noted Inman Line. The International Navigation Company, the proprietary organisation, was incorporated in Pennsylvania in 1871; a fortnightly service was established in 1873 between Antwerp and Philadelphia, with steamers under the Belgian flag, known as the Red Star Line; and the American Line was started with the American-built *Illinois*, *Indiana*, *Ohio*, and *Pennsylvania*. 1880 brought a weekly line between New York and Antwerp, this expansion being followed in 1886 by the important acquisition of the Inman Line. The years 1883 and 1885 witnessed the enterprising appearance of the *City of New York* and *City of Paris*, which vessels marked an advance in size as well as the adoption of twin-screws. In 1893 the Inman and International, as the line was then called, extended into the American Line, the mail steamers exchanging Liverpool for Southampton, their names being all shortened to the bare titles of cities. The *New York* and *Paris*, since re-named *Philadelphia*, were, under a special Act of Congress, naturalised into the U.S. register, and the *St. Louis* and *St. Paul* in 1895 emanated from the busy yards at Philadelphia of Cramp & Sons. Weekly New York mail lines are run to and from Antwerp and also Southampton, the latter departures calling at Cherbourg on the West-bound voyage and at Plymouth and Cherbourg on the East-bound voyage. The steamers running between Antwerp and New York call at Dover each way. Philadelphia passenger and freight lines are maintained to and from Liverpool, as well as Antwerp. The *Kronland*, 12,760 tons, is the largest steamer.

Fleet, 15 steamers; 153,000 tons.

London Offices, 1, Cockspur Street, S.W.; and 38, Leadenhall Street, E.C.

ANCHOR LINE.—In 1852 a service was established from the Clyde to Portuguese and Spanish ports extending later to upper Mediterranean ports. Some years later additional services between Glasgow and New York *via* Moville; Mediterranean and New York; and Glasgow and Liverpool to Bombay, and to Calcutta were inaugurated, which trades have since been vigorously prosecuted with fine steamers, the sizes increasing with the development of the trades. *Columbia*, 8,500 tons, *Caledonia*, 9,222 tons, and *California*, 8,662 tons, are latest additions to New York service; a sister ship to the latter is building. *Olympia*, 5,124 tons, *Massilia*, 5,091 tons, *Circassia*, 6,716 tons, and *Castalia*, 6,388 tons, have recently been added to Indian service, for which a steamer of 6,500 tons is building. About 90,000 passengers are carried annually.

Fleet, 23 steamers; 118,000 tons.

London Office, 4, St. Mary Axe, E.C.

ATLANTIC TRANSPORT CO., Ltd. (see International Mercantile Marine Co.), originated in London in 1886. In 1889, the boats were all transferred to the Atlantic Transport Co., Ltd., registered in London for the purpose, the prime movers and principal stock-holders being Americans. The company in 1896 purchased the controlling interest in the National Steamship Co., a line which dated back to 1863 and, after flourishing into front rank, declined by degrees. When the Atlantic Transport Co. commenced, a line was run from London to Baltimore, *via* Swansea; soon Philadelphia was added to the itinerary, subsequent growth leading to a service to New York, necessitating large steamers built specially for the carriage of cargo, refrigerated meat and live stock, together with only first-class passengers. Saloon accommodation has increased from 50 to 250, which can be carried by the new twin-screw steamers *Minnehaha*, *Minneapolis*, *Minnetonka*, and *Minnewaska* (building), each 13,400 tons.

Fleet, 18 steamers; 135,832 tons.

London Office, 38, Leadenhall Street, E.C.

AUSTRIAN LLOYD STEAM NAVIGATION COMPANY, established in 1836, belongs to Trieste, whence services are kept up to and from Adriatic, Mediterranean, and Levant ports, served by three branch lines. Besides a line to the West as far as Brazil, there is an accelerated fortnightly mail service between Trieste, Brindisi, and Bombay; also an ordinary monthly service as between Trieste, Bombay, China, and Japan. The itinerary now includes a monthly line to Calcutta. The largest steamers are the *Austria*, 7,588 tons, and *Erzherzog Franz Ferdinand*, 6,046 tons, *Nippon*, 6,350 tons, and *Vorwarts*, 5,590 tons; nine steamers are building, aggregating 32,000 tons, counted in total.

Fleet, 71 steamers; 221,000 tons.

London Agents, M. Samuel & Co., 20, Billiter Street, E.C.

BIBBY LINE.—This line was founded in 1807 by Mr. John Bibby, the grandfather of the present representatives, the fleet at that time consisting of small sailing vessels. In 1851 the steam fleet was commenced with the *Tiber* and the *Arno*. In 1891 the *Lancashire*, whose passage of 23 days 20 hours, in July, from Liverpool to Rangoon stands the fastest, started the present service, which runs to Colombo and Rangoon, *via* Marseilles, from which port of call Ceylon is 18 days' passage, and Burmah 23. The fast and modern steamers of this line, which belong chiefly to the Bibby family, are all built by Harland & Wolff, and authorised by the Indian Government for officers returning on expiry of furlough, it being the recognised route to Burmah; easy connections being made with Southern India generally by a daily steam service between Colombo and Tuticorin. Largest steamer, *Warwickshire*, 7,966 tons.

Fleet, 7 steamers; 46,590 tons.

London Office, 20 & 21, Mincing Lane, E.C.

THE BOOTH LINE was founded in 1866 by Messrs. Alfred Booth & Co., of Liverpool. In 1869 Messrs. R. Singlehurst & Co.'s Red Cross Line was founded. These two lines have since been closely identified with the rapid progress of the Amazon ports of Pará and Manaus. A further service between North Brazil and New York was started in 1882. In 1901 the Booth and Red Cross Lines were amalgamated in the

Booth Steamship Co., Ltd., under the management of the former owners. The steamers sail at frequent intervals from New York, Liverpool, Havre, Leixões, and Lisbon to Pará, Manaus, Maranham, and Ceará, and a large passenger business is done between the Portuguese ports and the Amazon. The twin-screw steamers *Antony* and *Lanfranc*, of about 6,400 tons each, have a speed of 14 knots and carry 200 saloon and 350 third-class passengers; and a sister ship, the *Hilary*, is under construction to the same specification. The company is interested in and manages the Iquitos Steamship Co., Ltd., whose steamers trade from Liverpool and New York more than 2,000 miles up the river Amazon to Iquitos, in Peru. The company carries the royal mails to Pará and Manaus; also the mails between New York and Brazil; and the combined fleets include 16 passenger steamers.

Combined fleet, 37 steamers; 111,940 tons.

London Office, 8, Adelphi Terrace, W.C.

Tel. Addresses: Booth, Liverpool; Lusiad, London.

BRITISH AND AFRICAN STEAM NAVIGATION COMPANY (1900), Ltd., established in 1858 a mail, passenger, and cargo service of steamers, named after various ports, trading stations, and rivers on the West Coast of Africa, to which they run from Liverpool, Rotterdam and Hamburg. Waterways have been discovered, explored, and brought into prominence by their captains; one, the *Jones*, being so called after Sir A. L. Jones, K.C.M.G., the presiding genius of the firm of Messrs. Elder, Dempster & Co., of Liverpool, who acquired this company in 1900, and considerably enlarged its fleet. Owing to the head of the firm's extraordinary energy, Messrs. Elder, Dempster & Co. are now established at Liverpool, Manchester, Bristol, Cardiff, London, Hamburg, Antwerp, Grand Canary, Santa Cruz, Tenerife, New Orleans, Montreal, Mobile and Galveston. Their rapidly extending trade enterprises are upon a comprehensive and enormous scale, but space only admits of the following summary of the lines controlled by this wonderful firm:—

Name of Company.	No. of boats.	Gross tonnage
African Steamship Co.	23	65,714
British & African S.N.C. (1900) Ltd.	38	95,542
Elder, Dempster Shipping, Ltd. ...	23	77,120
Imperial Direct W. India Mail Serv.	6	25,152
Cie. Belge Maritime du Congo	3	11,966
Elder, Dempster & Co.	13	37,347
Building	6	19,390
	112	332,231

Fleet, 112 steamers; 340,898 tons.

London Office, 4, St. Mary Axe, E.C.

BRITISH INDIA STEAM NAVIGATION COMPANY.—In 1855 the founder of this company, the late Sir William MacKinnon, arranged to establish the Calcutta and Burmah Steam Navigation Company for the performance of mail services for the East India Company, with which object it was incorporated in 1856, the *Baltic* and *Cape of Good Hope* being sent out in 1857 to start the business. In 1862 a fresh mail service was entered into which included additional routes, and the name of the company was officially altered to its present title—more in keeping with its business, which strikingly benefited from the opening of the Suez Canal, through which the company's

steamship *India* conveyed the first cargo of Indian produce. The Aden-Zanzibar mail service was put on in 1872, and from then until now new routes have been constantly added to its itinerary, the extent of which will not admit of more than a bare outline. The company is under contract with the Home and Indian Governments for mail services to Arabia, Persia, India, Burmah, East India, the Mauritius, and also runs other services to Batavia, Queensland, &c. In 1899 a three-weekly line from Calcutta to Manila was established, which has since been extended to Yokohama, Kobe, and Moji. This important undertaking, with its far-reaching organisation and connections, supplies over 100 ports with commercial facilities; it is under the management of Messrs. MacKinnon, MacKenzie & Co., in India; Messrs. Gray, Dawes & Co. having represented the company in London since 1866. The s.s. *Quilca*, 7,703 tons, is the largest. Latest additions, *Reud*, 7,267 tons (turbine steamer), and *Rohilla*, 7,144 tons (twin-screw).

Fleet, 110 steamers; 438,000 tons.

London Office, 23, Great Winchester Street, E.C.

THE BUCKNALL STEAMSHIP LINES, Ltd., managed by the founders, Messrs. Bucknall Bros., was formed in 1900, with a share and debenture capital of £1,985,000, to take over and extend the British and Colonial Line from London to S. and E. African ports, established in 1892, for passengers and cargo; also lines between N. York and S. Africa, N. York and Australia and New Zealand, and N. York and India, London and other English ports to ports on the Red Sea. A further line has recently been established between Vancouver and New Zealand ports, under arrangement with the Canadian and New Zealand Governments, and Persian Gulf ports *via* Marseilles.

Fleet, 28 steamers; 115,210 tons.

London Office, 23, Leadenhall Street, E.C.

CANADIAN-AUSTRALIAN LINE was established in 1893, and runs in connection with the Canadian Pacific Railway. The steamers *Aorangi*, 4,268 tons, *Miwera*, 3,345 tons, and *Moana*, 3,915 tons, are under contract with the Canadian, New South Wales, Queensland, and Fijian Governments for a four-weekly mail service between Vancouver, Victoria (B.C.), Honolulu, Brisbane, and Sydney, N.S.W.

London Office, 138, Leadenhall Street, E.C.

CANADIAN PACIFIC RAILWAY.—The rail mileage, about 13,000, extends from Atlantic Ocean to Pacific Ocean, including branch lines north and south. THE EMPRESS LINE, a three-weekly service between Vancouver and Japan and China, was established 1891. A contract exists between the British Government and the Canadian Pacific Railway under which mails are carried from Liverpool in the following time: To Yokohama, 22½ days; Shanghai, 27½ days; Hong Kong, 29½ days. Mails and passengers are carried in "Empress" Atlantic steamers from Liverpool to Quebec, where close connection is made with the "Over-Seas Limited," fastest long-distance train in the world, which covers the distance between the two oceans in about 88 hours.* During 1903 13 large Atlantic steamers, aggregating 94,026 tons, were purchased from Messrs. Elder, Dempster & Co. The steamers in the Atlantic Ocean services include the *R.M.S. Empress of Britain* and *Empress of Ireland*, 14,500 tons, 18,000 H.P. (largest and fastest to

Canada). The *Empress of Ireland* made a record westbound passage, Liverpool to Quebec, of 6 days 2 hrs. 47 mins., and the *Empress of Britain* made a record eastbound voyage from Rimouski (Newfoundland) to Liverpool of 5 days 6 hrs. 26 mins. There is also an Upper Lake Service (Fort William—Owen Sound Route), a British Columbia Coast Service, and a British Columbia Lake and River Service.

Fleet, 63 steamers; about 193,000 tons.

London Office, 62 to 65, Charing Cross, S.W.

CHARGEURS RÉUNIS of Paris (Port of Registry, Havre) was established in 1872, and is the third largest shipping company in France. Services are maintained to Indo-China, West Africa, Brazil, River Plate, Gulf of California, China, and Japan. The fleet includes 5 mail and 9 intermediate steamers, ranging in size from the *Amiral de Kersaint*, 5,913 tons, to the *Ville de Maceio*, 2,688 tons. Two 16 knots twin-screw passenger steamers and one 17 knots are building. 92 voyages in 1906, and 1,790,862 miles traversed.

Fleet, 33 steamers; 153,000 tons.

London Agents, Hackett, Ausender & Co., 123, St. Dunstan's Hill, E.C.

CHINA MUTUAL STEAM NAVIGATION COMPANY, Ltd. See Ocean Steam Ship Co., page 759.

CITY LINE.—Messrs. George Smith & Sons, who sold their line and fleet in 1901 to Mr. J. R. Ellerman, celebrated their jubilee at Glasgow in 1889, fifty years after their *Constellation*, 344 tons, sailed thence for Calcutta. Sailings are from Glasgow and Liverpool to Calcutta and back to London; as well as to Bombay and Karachi, returning to Liverpool; all the steamers carrying passengers regularly to and from Malta and Egypt, in addition to the above ports. Large extensions have been made in the passenger fleet, over £1,000,000 having been spent in recent years upon new steamers.

Fleet, 22 steamers; 122,000 tons.

London Agents, Montgomerie & Workman, 36, Gracechurch Street, E.C.

CLAN LINE began a fortnightly service from Glasgow and Liverpool to Bombay and Karachi in 1878, adding one to South and East African ports in 1881, and another to Colombo, Madras, and Calcutta in 1882, a joint service from N. York direct to South and East African ports appearing in 1893. Since then a direct service has been added to the principal South African ports, Malabar Coast, and Chittagong. Twenty-nine turret-deck steamers figure in the fleet, of which the *Clan Colquhoun*, 5,856 tons, is the largest. The line is under the management of Messrs. Cayzer, Irvine & Co., Limited, of Glasgow, Liverpool, Manchester and London, whose chairman, Sir Charles Cayzer, Bart., M.P., was the founder.

Fleet, 50 steamers; 206,000 tons.

London Office, 115, Leadenhall Street, E.C.

COMPAGNIE GÉNÉRALE TRANSATLANTIQUE, established 1862, is the second largest company in France, and is heavily subsidised by that Government. With its fine fleet of mostly fast boats, the company maintains important connections between Havre (its head port), St. Nazaire, Bordeaux, Marseilles, &c., and various Mediterranean, African, West Indian, and North, Central, and South American ports. *La Provence*, 14,744 tons, 22 knots, *La Lorraine*, 11,869 tons, and her sister ship *La Savoie*, are now in the service, having been built on French soil.

* Record time, 78 hours.

according to terms of mail contract, at the company's own shipyard. They are the largest ever constructed in France, and have a speed of 21 knots. In 1906 the boats of the company made 1,081 voyages; conveyed 339,807 passengers, and carried 1,145,831 tons of cargo. Nine steamers building included in total.

Fleet, 68 steamers; 264,159 tons.

London Office, 36, Leadenhall Street, E.C.

COMPANIA TRASATLANTICA of Barcelona and Cadiz is the leading company in Spain, the largest steamers in the fleet being *Alfonso XII.*, 6,748 tons, *Antonio Lopez*, 5,975 tons, and *Manuel Calvo*, 5,617 tons.

This company in 1881 succeeded Messrs. A. Lopez & Co., who were established in 1860. Regular mail and passenger services are maintained to New York, Antilles, Canary Islands, Mexico, Colon (for Pacific ports), River Plate, North Africa, Philippines, &c. Liverpool agents, Messrs. Larrinaga & Co.

Fleet, 23 steamers; 86,370 tons.

THE CUNARD STEAMSHIP COMPANY, Ltd., completed 67 years of successful Atlantic service on July 4, 1907. Starting in 1840 with the *Britannia*, a wooden paddle steamer, which made her first voyage between Liverpool and New York in 14 days 8 hours at the rate of 8½ knots per hour, which was a wonder of her time, the Cunard Company's steamers have steadily advanced in size and speed, till their Atlantic fleet contains steamers crossing from Liverpool to Boston (the *Ivernia* and *Saxonia*) with 2,000 passengers and 10,000 tons of freight, and others to New York (the *Campania* and *Lucania*) which make the passage in a little over 5 days at an average speed of more than 21 knots (25 miles) an hour. The *Ivernia* and *Saxonia* have also earned a reputation for remarkable steadiness, which confers the greatest possible immunity from sea-sickness. The *Carpathia* (1903) is a twin-screw steamer of 13,603 tons constructed on similar lines to the *Ivernia* and *Saxonia*, and equally steady, all three providing unrivalled accommodation. The New York and Mediterranean service is conducted with the *Carpathia*, *Utopia*, *Slavonia*, and *Pannonia*, and conveys passengers at moderate rates to Gibraltar, Algiers, Naples, Palermo, Venice, Trieste and Fiume, with the option of crossing Europe by train and returning to New York or Boston by Cunard steamer from Liverpool. There is a freight service to Boston from Liverpool, also one to Havre, Portugal, Mediterranean and Black Sea ports. All the passenger ships of the Cunard Company are fitted with Marconi's system of wireless telegraphy. The *Lucania*, Oct., 1903, with Signor Marconi on board, was the first vessel to hold communication with both sides of the Atlantic. The *Cunard Daily Bulletin*, a thirty-two page illustrated paper published on board these boats, records news received by wireless telegraphy, and is the first real ocean newspaper. In August, 1903, an agreement was made with the British Government by which the Cunard Co. were to build two new steamers, to be, with all other Cunard ships, at the disposal of the Admiralty for hire or purchase whenever they may be required, the Government lending the company £3,600,000 to build the ships and granting them a subsidy of £150,000 a year. One, the *Lusitania*, 30,822 tons, was launched on June 7, 1906, and the *Mauritania*, about 32,000 tons, on Sept. 19. (See p. 750.)

They are quadruple screw turbine steamers, about 70,000 horse-power, the largest, fastest, and most palatial steamers in the world. The *Lusitania*, Sept., 1907, on her maiden voyage to New York, broke all records for maiden trips with a passage of 5d. 6h. 54m., or an average of 23 knots, 593 knots being the highest day's run. The safety and comfort of passengers is the especial care of the Cunard Company, and every precaution is taken to ensure the best possible ships, the most capable officers, and the most reliable crews to worthily uphold the honourable traditions of the company. The total given includes the *Caronia*, 20,000 tons, fitted with reciprocating engines, and the *Carmania*, 20,000 tons, turbine steamer. These steamers mark a distinct advance in the accommodation and comfort provided for all classes of passengers.

Head Office, 8, Water Street, Liverpool.

DOMINION LINE.—(See International Mercantile Marine Co.) In 1870 some Liverpool and New Orleans cotton merchants formed the Mississippi and Dominion Steamship Company, Ltd. Since 1894 the proprietary company has been the British and North Atlantic Steam Navigation Company, Ltd. A weekly passenger service between Liverpool and Quebec and Montreal in the summer, and Halifax and Portland (Maine) in the winter is maintained, as well as a regular weekly freight service from Liverpool to Portland throughout the year. There is also a fortnightly freight service between Avonmouth and Quebec and Montreal in the summer, and Portland in the winter. The largest steamer is the *Norseman*, 9,546 tons. *Alberta* and *Albany*, each 14,000 tons, are building.

Fleet, 14 steamers; 88,650 tons.

London Office, 38, Leadenhall Street, E.C.

DONALDSON BROTHERS (Donaldson Line) began business at Glasgow in 1854. The twin-screw steamers *Athenia* and *Cassandra* are the latest additions, fitted with very superior and excellent accommodation for passengers and regularly engaged in Canadian trade. The principal trade of the firm is between Glasgow and Montreal, steamers sailing every Saturday from Glasgow and every Thursday from Montreal during the open navigation of the St. Lawrence. In winter-time the service is a weekly one to St. John, N.B. The steamers are fitted with cold storage, also with mechanical ventilation. The St. John, N.B., service in the summer months is fortnightly, and the other regular services of the firm are Glasgow to Baltimore and Glasgow to Newport News and Norfolk, Va.

Fleet, 14 steamers; 64,726 tons.

ELDER, DEMPSTER & CO.—See p. 752.

ELDERS & FYFFES, Ltd. This company, which was formed in 1901, is the outcome

of the immense development of the West Indian banana trade. The service began in 1902 with 4 steamers adapted for the carriage of fruit; the company have since had built 9 steamers with special arrangements for the safe conveyance of fruit and accommodation for a limited number of first-class passengers, the vessels being fitted with all the latest appliances, the largest being the *Reventazon*, *Chiripa*, and *Barranca*, each 5,000 tons. Regular services are maintained between Jamaica and Costa Rica from Manchester; and from Bristol (Avonmouth). In the coffee season large consignments are brought from Costa Rica. In 1904 the company was entrusted by the British Postal authorities with the carriage of parcels mail to Costa Rica. The small inter-insular steamers employed at the Canary Islands are not included below.

Fleet, 13 steamers, 48,873 tons.
London Office, 9, Bow Street, W.C.

ELLERMAN LINES, Ltd.—The Ellerman Lines of steamers comprise the following:—The *Ellerman Line*, which trades between Liverpool and Portugal, Italy, Sicily, Adriatic, Alexandria, Gibraltar, Malta, Syra, Smyrna, Constantinople, and Odessa, was founded in 1840, and was conducted by Messrs. John Bibby, Sons & Co. under the style of the "Bibby Line" until the year 1870, when it passed into the hands of Messrs. Frederick Leyland & Co., and was thereafter known as the "Leyland Line" until the Leyland Line was acquired by the Morgan combination, who sold the Mediterranean portion of their business to (now) Sir J. R. Ellerman, Bart., then chairman of the Leyland Line, the line in January, 1902, passing into the ownership of the Ellerman Lines, Ltd.—The *City Line*, see p 753.—The *Hall Line*, which traces its history back for about forty years, has a regular service of passenger and cargo steamers between Liverpool and Bombay and Karachi, calling at Marseilles on the homeward passage. Also in conjunction with the Harrison and Clan Lines from Glasgow and Liverpool to South and East African ports, and in conjunction with the Allan Line one Uruguay and River Plate service.—The *Papayanni Line*, which was acquired from Messrs. Papayanni & Co., was established in the early 'forties, trading between Liverpool and the Mediterranean, touching at Tangiers, Algiers, Malta, Syra, Smyrna, Constantinople, Odessa, and Alexandria. In May, 1901, the business was sold to Sir J. R. Ellerman, Bart., and in January, 1902, passed into the ownership of the Ellerman Lines, Limited.—*Westcott & Laurance Line*. This business, established in 1866, was in December, 1901, acquired by the Ellerman Lines, Limited, the services consisting of lines between Antwerp and London to Malta, Alexandria, Smyrna, Odessa, Constantinople, Batoum, Novorossisk, &c.—*Coverley and Westray Line*. This line runs its service of steamers between London and Oporto, taking both passengers and cargo.

London Registered Office, 12, Moorgate Street, London, E.C.

FEDERAL STEAM NAVIGATION CO., Ltd.—Upon the retirement of the noted firm of Messrs. Money Wigram & Son, Mr. Allan Hughes (the chairman of the company), who had been connected with them, organised the above line in 1885, the steamers of which fly a similar flag and bear names similar to the well-known Money Wigram's Blackwall packets, some of which were early to the fore in the adoption of the screw as an auxiliary. The fleet consists of large steamers engaged in conveying general merchandise to Australia and New Zealand, returning to South Africa and London with wool and frozen produce, being fitted with very large capacity for refrigerated cargoes. The twin-screw steamers *Essex*, 7,162 tons, and *Somerset*, 7,150 tons, are the largest.

Fleet, 11 steamers; 67,012 tons.
London Office, 2, Fenchurch Avenue, E.C.

FORWOOD BROTHERS & CO. began their Morocco, Canary Islands, and Madeira Line of first-class passenger steamers in 1872; the sailings are now fortnightly from London, the voyage usually occupying 25 days and the line specially caters for those desiring short sea trips for health or pleasure. Two new steamers, the *Agadir* and *Arzila*, each of 3,000 tons, have been added to the service.

Fleet, 5 steamers; 11,000 tons.
London Office, 46, St. Mary Axe, E.C.

GENERAL STEAM NAVIGATION COMPANY, Ltd., established 1824, incorporated by Act of Parliament 1834, and incorporated under the Companies Acts 1862 to 1900 in 1902, is essentially a London institution. Besides East Coast services to Scotland, Continental trades are served between Hamburg in the north and Bordeaux in the south; other lines extend to the Mediterranean, Adriatic, Levant, and Black Sea. The sea-going services include the *Sheldrake*, 2,697 tons; *Adjuvant*, 2,392 tons; the *Ortolan*, 1,800 tons, and *Grove*, 2,037 tons. The turbine *Kingfisher*, the fast paddle steamer *Eagle*, and five similar popular pleasure boats run during the summer season to seaside resorts in Essex, Kent, Suffolk, and Norfolk.

Fleet, 55 steamers; 55,148 tons.
London Office, 55, Great Tower Street, E.C.

GLEN LINE of steamships, which began about 30 years ago to run from London to the Straits, China, and Japan, belongs to Messrs. McGregor, Gow & Co., whose service for cargo and passengers is one of the most important of the few lines now owned privately, and has superseded the famous racing tea-clippers. *Glen Logan* is 5,723 tons, and *Glenroy* 4,910 tons.

Fleet, 9 steamers; 40,624 tons.
London Office, 1, East India Avenue, E.C.

HAMBURG-AMERICAN LINE, in point of carrying capacity, owns the largest fleet in the world, with the exception of the International Mercantile Marine Co. (Morgan Combine). The packet company began its Transatlantic service in 1847 with sailing vessels. The ss. *Borussia*, 2,026 tons, appearing in 1855, was followed by other steamers, monthly departures being kept up from 1856 until 1860, when the ships were sold, and enough steamers purchased to make fortnightly departures to New York, the sailings being increased to weekly ones in 1866. In 1888

the company decided upon twin-screws, and the *Columbia*, *Auguste Victoria*, *Normanna*, and *Furst Bismarck* successively joined the ever-swelling fleet. The *Deutschland* (16,502 tons, built at Stettin, 1900) held for some years the record for ocean steaming with an average speed on a homeward passage of 23.51 knots. The "P" ships are noticeable for their size as cargo and passenger ships, being each over 13,000 tons, with accommodation for 350 cabin and 2,400 'tween deck passengers, and very large cargo space. The Company's largest and best equipped Transatlantic steamers are the new leviathans *Amerika* and *Kaiserin Auguste Victoria*. Both represent the latest developments in ocean travel, and are fitted with every comfort and luxury. The routes of the weekly twin-screw express steamers carrying the American and European mails are: Hamburg, Southampton, Cherbourg to New York, returning *via* Plymouth and Cherbourg. Other services leave Hamburg every Thursday for New York *via* Boulogne-sur-Mer and Plymouth, returning *via* Plymouth and Cherbourg, in addition to which there are regular services from Hamburg to Montreal, Halifax, Boston, Philadelphia, Baltimore, New Orleans, Galveston, West Indies, North, Central, and South Brazil, River Plate, Panama, Mexico (4 lines), Venezuela, Colombia and West Coast of S. America. There is also a service to Eastern Asia, to the West Coast of Africa, and to Persia; and others from New York to China and Japan, from New York to West Indies, New York to Brazil, Genoa to River Plate, and Stettin *via* Helsingborg, Gothenberg, and Christiansand to New York, returning *via* Christiania and Copenhagen. Mediterranean Steamship Lines run from Genoa *via* Palermo and Naples to New York, also Naples to Alexandria. In Europe there are services from Hamburg to various other places. This company also manages the passenger business of the Union Line to New York, the Hamburg South American Company to Brazil and the Argentine Republic. Winter and summer cruises are conducted by the specially designed twin-screw steamers *Oceana*, 7,859 tons, and *Prinzessin Victoria Luise*, 4,409 tons, the fine ocean pleasure yacht, and the steamer *Meteor*, 3,613 tons. In July, 1907, there were 11 steamers building (113,720 tons), counted in the total tonnage given, but 45,295 tons of river steamers, lighters, &c., are not included; 431,955 passengers were carried, in 1,266 voyages (miles traversed, 7,432,000), in 1906, and 6,182,868 cubic meters of cargo.

Fleet, 167 steamers; 915,518 tons.

London Offices, 22, Cockspur Street, S.W.; 81, Strand; 78, Gracechurch Street, E.C.

HAMBURG SOUTH AMERICAN STEAMSHIP COMPANY was established at Hamburg in 1871, the largest steamers being *Cap Arcana*, 9,955 tons; *Cap Vilano*, 9,467 tons. Regular passenger services are maintained from Hamburg *via* Belgium, France, Portugal, and Spain, to Brazil, Uruguay and Argentine. A new service has been established from New York to Brazil. There is also a Patagonian coasting line from there down to Punta Arenas and the Terra del

Fuego. Four steamers (two each 9,000 tons, and two each 5,000 tons) are building.

Fleet, 44 steamers; 212,000 tons.

HANSA COMPANY, of Bremen, established in 1881, maintains regular cargo services from Bremen, Hamburg, and Antwerp to Bombay and Karachi; fortnightly to Colombo, Madras, and Calcutta; fortnightly to Raagoon; a three-weekly service between Bremen, Antwerp, and the River Plate. Lines have also been established from New York to Calcutta and to South African ports, Savannah to Bremen and Hamburg, and Middlesbrough to India (four weekly). The *Drachensfels*, 7,217 tons, is the largest; the total includes 5 steamers building, but is exclusive of 12 lighters (4,581 tons), 2 tugs, and 2 launches.

Fleet, 51 steamers; 234,000 tons.

London Agents, J. H. Wackerbarth & Co., 26, Billiter Buildings, E.C.

HARRISON LINE was established in 1830, and is managed by Messrs. Thos. and Jas. Harrison, of Liverpool, under the name of the Charente Steamship Company, Limited, regular services being maintained to and from West Indies, United States, Mexico, Brazil, East Indies, South and East Africa, and South of France. In May, 1902, the *Magician* was despatched to Cape Town and Mossel Bay to inaugurate the Ellerman Line and Harrison Line joint service to South and East Africa. The *Wayfarer*, 9,599 tons, *Custodian*, 9,214 tons, and *Mechanician*, 9,044 tons, are the largest. *Orator*, 3,330 tons, *Candidate*, 5,858 tons, and *Commodore*, 5,858 tons, latest additions.

Fleet, 39 steamers; 199,000 tons.

London Agents, J. B. Westray & Co., 138, Leadenhall Street, E.C.; Gellatly, Hankey & Co., Billiter Street, E.C.

HOLLAND-AMERICA LINE, of Rotterdam, was established in 1872, and maintains a regular passenger and freight service between that port and New York *via* Boulogne-sur-Mer, as well as a direct line between Amsterdam and Newport News. The twin-screw steamers *Potsdam*, 12,606 tons, *Rijnland*, 12,527 tons, *Noordam*, 12,531 tons, have been surpassed in size by the *New Amsterdam*, 16,967 tons, and the *Rotterdam*, 24,200 tons. The quickest passages between New York and Boulogne-sur-Mer are about nine days.

Fleet, 9 steamers; 108,542 tons.

London Agents, Browne, Geveke & Co., 102, Fenchurch Street, E.C.

HOULDER BROS. & CO., Ltd., which became a public company in 1898, was established in 1849 by the late Mr. Edwin Houlder. Regular steamship services for passengers and cargo are maintained between England and Australia and New Zealand, England and River Plate, England and South and East Africa, New York and Australia and New Zealand, River Plate and South Africa, Australia and New Zealand and South Africa. The steamers of the Grange Fleet, under the company's management, are specially fitted for the conveyance of live-stock and frozen meat, in which an important trade is carried on between this country and Australia and River Plate. *Royston Grange* ran out from United Kingdom to River Plate in a few hours over 21 days, the homeward passage occupying a day longer. The two twin-screw steamers, *Drayton Grange* and *Oxvestry Grange*, are re-

spectively 6,664 tons and 6,830 tons. The twin-screw steamer *Everton Grange* is 7,204 tons.

Fleet, 12 steamers; 62,505 tons.

Head Office, 146, Leadenhall Street, London.

THE HOUSTON LINE was formed in 1883 by the senior partner of the firm of R. P. Houston & Co., of Liverpool. Regular services of freight steamers are maintained to and from United Kingdom to River Plate and South Africa; United States to River Plate and South Africa; Corunna and Vigo to River Plate; also Galveston to Liverpool and Continental ports; and from Australia to U.K. and Continent; River Plate to United States; also to Antwerp and Hamburg. The *Hyacinthus*, 5,756 tons, heads the list. 850 tons of harbour craft are not included in the total given.

Fleet, 25 steamers; 94,000 tons.

London Office, 16, Leadenhall Street, E.C.

IMPERIAL DIRECT WEST INDIA MAIL SERVICE COMPANY, Ltd., from Bristol to Kingston, Jamaica, W.I.—The *Port Morant*, 2,900 tons, opened this service from Bristol, Feb. 16, 1901, followed by *Port Antonio*, 4,455 tons; *Port Royal*, 4,455 tons; *Port Maria*, 2,900 tons; and *Port Kingston*, 7,584 tons, and *Port Henderson*, 5,167 tons, with a capacity for 40,000 bunches of bananas, all new steamers. The *Port Kingston* accommodates 160 first and 60 second class passengers; the *Port Antonio* and *Port Royal*, 100 first and 50 second class; and the *Port Henderson*, 80 first and 40 second class. They are subsidised for the carriage of H.M. Mails, and specially fitted up for conveying fruit, being expected to bring home 20,000 bunches of bananas every voyage. The *Port Kingston*, sailing every six weeks, also calls at Bermuda outward bound. This praiseworthy effort to foster the West Indian-Bristol trade was promoted by (now) Sir Alfred L. Jones, K.C.M.G., whose firm (Elder, Dempster & Co.) manage the company.

Fleet, 6 steamers; 25,152 tons.

Head Office, Colonial House, Liverpool.

INTERNATIONAL MERCANTILE MARINE COMPANY.—A company formed in 1902, embracing the American, Atlantic Transport, Dominion, Leyland, Red Star, and White Star lines, together representing a total of 130 steamers and 2,136,286 tons.

JOHNSTON LINE gradually entered the Mediterranean, Black Sea, Danube, and American trades, and keep up regular lines from Liverpool, London, and Antwerp. *Quernmore*, 7,302 tons, and *Rovanmore*, 9,456 tons—amongst the finest freight and live-stock carriers in existence—head the well-built, well-kept, and well-managed steamers belonging to Messrs. Wm. Johnston & Co., Ltd., of Liverpool.

Fleet, 18 steamers; 74,440 tons.

London Office, 1, St. Mary Axe, E.C.

KOSMOS COMPANY, of Hamburg, performs a direct service from Hamburg, Antwerp, and London, to the West Coast of South, Central, and North America, via Straits of Magellan. The line was begun in 1873 to Chile and Peru, and afterwards extended to various other Central American ports, the service having recently developed to the inclusion of Mexican ports, 'Frisco and Seattle. There are fortnightly departures to Chile and Peru from Hamburg and Antwerp, also a sailing from London every four weeks to Chile, Peru, Ecuador, Central America,

Mexico, 'Frisco, and Seattle. The steamers range from the *Serapis*, 2,456 tons, to the *Rhodopis*, 6,975 tons, and the *Rhakotis*, 6,982 tons.

Fleet, 36 steamers; 174,265 tons.

London Agents, Browne, Beveke & Co., 108, Fenchurch Street, E.C.

LAMPART AND HOLT LINE.—The Liverpool, Brazil, and River Plate Steam Navigation Company, Limited, was formed in 1865, being popularly known as the Lampart and Holt Line, after its first and present managers. The steamers are run at regular intervals from Glasgow, Liverpool, Manchester, London, Antwerp, Havre, and New York to Pernambuco, Bahia, Rio de Janeiro, Santos, Montevideo, Buenos Ayres, and Rosario; also to the ports of Chile, Peru, and Ecuador, on the West Coast of South America. There is also a line from New York to Manchester. All the steamers are fitted with telescopic masts. Those running between New York and South America form an excellent passenger line, while many of the ordinary cargo steamers have first-class accommodation for a limited number of passengers. Others have been specially constructed to carry large numbers of horses, cattle, and sheep. Among the largest are the *Velasquez*, 6,988 tons; *Veronese*, 7,022 tons; *Voltaire*, 7,000 tons; *Rossetti*, 6,508 tons; *Raeburn*, 5,183 tons; and *Canning*, 5,366 tons. The *Verdi*, 7,000 tons, is the latest addition to this firm's large fleet. In addition to their own fleet, 12 vessels, with a total tonnage of 40,000 tons, run regularly under the "L. & H." flag.

Fleet, 30 steamers; 130,000 tons.

London Office, 36, Lime Street, E.C.

LEYLAND LINE.—This old-established business was converted into a public company in 1892, after the death of its founder, Mr. F. R. Leyland. The company's fine fleet now includes the *Devonian*, 10,418 tons; *Winifredian*, 10,405 tons; *Bohemian*, 8,548 tons; *Canadian*, 9,301 tons, and *Cestrian*, 8,823 tons. In 1900 the company acquired by purchase the business of the West India and Pacific S.S. Co., an old-established concern, with a fleet consisting of 22 steamers with a gross tonnage of 111,183 tons, and maintaining services from Liverpool to St. Thomas, Colon (for ports on West Coast of America), Kingston (Jamaica) and Mexican ports; also Barbados, Trinidad, and Spanish Main ports, returning to Liverpool from Galveston or New Orleans. Special attention has been paid to the cotton trade, and the steamers of the company engaged in it have the largest cotton-carrying capacity of any entering the port of New Orleans. In addition to the Liverpool and Boston weekly service, the company maintain a line between Liverpool and New Orleans for both passengers and cargo, as well as one between London, Antwerp, and New Orleans. Lines for cargo only are run between London and Boston, Antwerp and Montreal, and Manchester and Boston.

Fleet, 45 steamers; 255,118 tons.

Head Office, 27, James Street, Liverpool.

London Offices, 1, Cockspur Street, S.W., and 38, Leadenhall Street, E.C.

WILLIAM LUND commenced in the sailing-making business in 1861, and in 10 years ably carved his way to the ownership of a fleet of sailing ships. After the Suez Canal was opened he changed to steam, and in 1880 he began his Blue Anchor Line of passenger steamships from

London to and from Adelaide, Melbourne and Sydney with the ss. *Delcompi*, 1,818 tons, this being the first regular direct steam cargo service between England and Australia; the *Narrung*, *Wakool*, and *Wilcannia* are each about 5,000 tons, and steam 13 knots. The twin-screw steamer *Commonwealth* is 6,611 tons, the *Geelong* (also twin-screw) is 7,954 tons. They are all first-class passenger steamers and carry H.M. mails between South Africa and Australia. The *Geelong* has gone from London to Adelaide, *via* Cape of Good Hope, in 36½ days. The average passage to Cape Town is 21 days, and to Australia 42 days. A twin-screw steamer of 9,900 tons is building.

Fleet, 6 steamers; 38,656 tons.

London Office, 3 & 5, East India Avenue, E.C.

MANCHESTER LINERS, LIMITED (first and present chairman, Sir Christopher Furness, M.P.), was formed in 1898 to work steamship lines of modern cargo carriers to and from the port of Manchester, &c. Itinerary includes Canada, Philadelphia, and New Orleans. New lines, to Philadelphia (*via* St. John, N.B.) and to River Plate, both back to Manchester. Largest is *Manchester City*, 5,832 tons. Eighty-two voyages in 1906; 564,000 miles traversed; 10,197 cattle and 585 sheep carried to Manchester.

Fleet, 14 steamers, 61,510 tons.

London Office, 4, Fenchurch Avenue, E.C.

MESSAGERIES MARITIMES DE FRANCE.

From a concern for inland mail carriage, the present noted company developed. In 1851 an over-sea contract was entered into for the French mails to Italy, Egypt, Syria, the Levant, and Greece. There are five services to Mediterranean and Black Sea ports, the last two trades being taken up in 1857. The India and China mail contract was secured in 1861. There is a service every 28 days to Australia and New Zealand, *via* Aden, Bombay, and Colombo; connecting at Colombo with the China main lines. A fortnightly service is maintained to Aden or Jibouti, Colombo, Singapore, Saigon, China, and Japan, with monthly connections for Pondicherry and Calcutta, and fortnightly for Java and the Tonquin ports. There are departures on 25th of every month to Aden, Jibouti, Mahé (Seychelles), Madagascar and Mauritius, connecting at Diego-Suarez for West Coast, and on 10th of every month to Jibouti, Monbasa, Zanzibar, Madagascar and Mauritius. The foregoing, with a weekly cargo line to London *via* Havre, sail from Marseilles. The mail service from Bordeaux to Brazil and River Plate, commenced in 1861, now leaves fortnightly, with a steamer once a month for cargo only. Cargo steamers are run from Antwerp to the Far East every two months, and from Marseilles every month to the French Possessions in Indo-China. The largest passenger steamers are the *Atlantique*, 6,446 tons; *Armand-Béhic*, 6,385 tons; *Ville de la Ciotat*, 6,378 tons; *Australien*, 6,365 tons; *Polynésien*, 6,363 tons. Included in the total are two steamers building, each 7,500 tons.

Fleet, 70 steamers; 312,232 tons.

London Office, 97, Cannon Street, E.C.

THE MOOR LINE of steamers, which trade to all parts of the world, was commenced in 1885 by Messrs. Walter Runciman & Co., of Newcastle-on-Tyne; the fleet is composed of

modern-built vessels. The *Castle-moor*, 3,732 tons, and *Pearl-moor*, 4,119 tons, are the largest.

Fleet, 27 steamers; 92,809 tons.

London Office, 55 and 56, Bishopsgate St., E.C.

NATAL LINE.—In the middle of the last century, the firm of Bullard, King & Co. established a line of clipper ships between England and Natal, and in 1879 inaugurated the present service with the *Pongola*. Steamers are despatched every 10 days from London direct to Natal, Delagoa Bay, Beira, and East African ports, which offer special facilities for passengers and cargo for those ports. Besides a through service at regular intervals between South African ports and China and Japan, another fortnightly one, under contract with the Natal Government, from Cape Colony and Natal *via* East African ports to Madras and Calcutta, calls at Ceylon. The *Umzumbi* is 3,379 tons and 13 knots and the *Umhlali*, the latest addition, is the same size and speed. Quickest passages: Outward, *Umvoti*, 22 days, 23 hours; Homeward, *Umtata*, 21 days, 12 hours.

Fleet, 16 steamers; 38,453 tons.

London Office, 14, St. Mary Axe, E.C.

NAVIGAZIONE GENERALE ITALIANA.

Under this title were united the lines which formerly belonged to Florio, of Palermo, and Rubattino, of Genoa, having the head office at Rome. There are lines from Italy to India, China, New York, Brazil, and River Plate, in connection with the company's Mediterranean, Adriatic, and Levant services. In 1901 this company joined La Veloce Navigation Italiana Co. in making the services weekly (instead of fortnightly), Genoa and Naples to New York, and from Genoa to Monte Video and Buenos Ayres. The total given includes eight steamers building, aggregating 50,800 tons. The largest is the *Lazio*, 9,396 tons.

Fleet, 107 steamers; 289,000 tons.

London Agents, A. Laming & Co., 8, Leadenhall Street, E.C.

THE NEDERLAND LINE, of Amsterdam, is subsidised by the Government of the Netherlands to maintain a mail service between Holland and Java. The Nederland Steam Navigation Company was established in 1870, and now maintains two separate services, one, with nine steamers, carrying the royal mails, passengers and goods, and the other employing nine steamers carrying cargo only. Calling at Southampton, the mail steamers proceed to Sabang Bay, Singapore, Batavia, Samarang, and Sourabaya *via* Genoa, Port Said, and Suez, connection with ports in Netherlands India being made with the steamers of the Koninklyke Packetvaart Co. Passengers to Java have the option of returning either by this line or by the Rotterdam Lloyd. The *Grohus* is 5,800 tons, from which size the boats range to the *Soembawa*, 3,400 tons. Three mail steamers, of 5,800 tons each, are building.

Fleet, 19 steamers; 81,000 tons.

London, Southampton and Manchester Agents, Keller, Wallis & Co.

NEW ZEALAND SHIPPING COMPANY, organised at Christchurch, New Zealand, in 1873, carried on business for ten years with sailing ships specially built for passengers and the trade. The first direct steamer, *Stad Harlem*, conveyed in 1879 600 emigrants to the enterprising colony; four years later the *British King* began the Government mail contract, for which five steamers were built. Of the present fleet, seven

are twin-screw steamers, the largest being the *Turakina*, 8,220 tons, and *Ruapohu*, 7,801 tons. New Zealand emphasises its British characteristics by sending here nearly all its produce, which the development of the frozen industries has multiplied. This company's *Mataura* sailed from Port Chalmers in 1882, with 150 tons of mutton prepared on board in the absence of the necessary plant ashore. The passenger steamers sail from London every fourth Thursday *via* Plymouth, Tenerife, Cape Town, and Hobart, returning round Cape Horn *via* Montevideo. Rates are low compared with the conveniences and table supplied to all classes.

Fleet, 14 steamers; 95,553 tons.

London Office, 138, Leadenhall Street, E.C.

NIPPON YUSEN KAISHA.—In 1868 steamship communication was opened between Tokyo and Osaka by a company which gave way to a Mail Line under Imperial control in 1871. In 1882 the Union Navigation Company was started, but in three years the proved inexpediency of having two State-aided concerns resulted in amalgamation, and the above, known as the Japanese Mail Steamship Company, was established in 1885. Regular services were kept up from Kobe to Vladivostok, Tientsin, and Korean ports; a line between Japan and Bombay being put on in 1892. The importance of the company rose with the size of its fleet owing to the war with China in 1894, fifty of its steamers being engaged at one time transporting the 120,000 fighting men with their 100,000 attendant coolies. Independent of a complete Japanese coastal system, extending to all the principal ports in Japan, as well as to Keelung from Kobe, and to Bonin Islands from Yokohama, the European passenger line runs fortnightly from Japan to Antwerp and London, starting from Middlesbrough on the return journey; the American line is a fortnightly service connecting at Seattle with the Great Northern Railway for inland United States points. There is also a monthly line to and from Australia, and other services to China, Corea, Asiatic Russia, Hawaii, Straits Settlements, and India. By continually adding boats like *Tango Maru*, 7,463 tons, the fleet which hails from the kingdom of the Mikado has made such phenomenal progress that it now takes a prominent place amongst the first companies in the world. Steam launches (1,138 tons), 4 hulks, and 241 lighters, and 40 steam launches and tugs are not included in the total given. Ten steamers are building (6 each, 8,600 tons).

Fleet, 80 steamers; 262,120 tons.

London Office, 2, Fenchurch Avenue.

NORDDEUTSCHER LLOYD sprang into existence in 1856, initial operations taking the form of lines to Hull and to London. On 19th June, 1858, the *Bremen*, 334 × 42 × 28, sailed to New York *via* Southampton with 22 cabin passengers, 92 steerage, and 150 tons of cargo, followed by the *Weser*, the service being made fortnightly in 1866. Extensions to Baltimore 1868, New Orleans 1869, West Indies 1871, Brazil and River Plate 1876, evidenced the growth towards front rank which was assumed in 1881 with fast mail-boats built for an express Atlantic service, now maintained weekly from Bremen to New York *via* Southampton and Cherbourg. The Imperial German Mail Service from Bremen and Hamburg *via* Antwerp, Southampton, and Genoa to Eastern Asia and Australia, with various branch lines, began in 1885, and was followed in 1891 with

an express line between Italy and New York in conjunction with the Hamburg-American Line. In 1892, the first twin-screw steamer, *H.H. Meier*, joined the fleet, which from that date has been completely reorganised and doubled. In 1897 the *Kaiser Wilhelm der Grosse* promptly won and for a time held the palm for ocean speed: in March, 1900, she crossed from Cherbourg to Sandy Hook in 5 days 20 hours 58 minutes, averaging 22.33 knots per hour over 3,148 miles distance run. In 1900 the steamers and trade were acquired of the Scottish Oriental Co. and the East Indian Ocean S.S. Co., and extensions made between Penang and Belawan (Deli) and between Singapore and Palembang, Asahan, and Sandakan (Borneo). The line from Singapore to Labuan has been extended one way to Sulu and the Archipelago, and the other way to Manila. Steamers have been built for the development of the company's Chinese coasting business, and which now carry the German postal flag far into the interior of China up the Yangtze. A branch line has been established between Hong Kong and Sydney *via* Mariana Islands, Carolines, New Guinea, and Queensland. In 1901 sailings were resumed from Bremerhaven to Cuba. In 1904 the Singapore and Sydney line *via* Batavia, &c., was superseded by a new line from Sydney to Yokohama *via* New Guinea, Manila, and Hong Kong; additional lines being also established between Stettin and New York, and between Marseilles and Alexandria, *via* Naples. In 1906 the company started a weekly service to the Levant. The *Kronprinz Wilhelm*, 14,900 tons, 35,000 H.P., joined the stately N.D.L. fleet in 1901, followed by the *Kaiser Wilhelm II.*, 19,361 tons, 45,000 H.P., built by the Vulcan Works at Stettin, and *Kronprinzessin Cecilie*, 19,500 tons, 46,000 H.P., all magnificent monuments to German shipbuilding and industrial art. The fleet includes 49 twin-screw ocean steamers (13 over 10,000 tons each), also 49,600 tons of river steamers and lighters, and 2 training ships, 5,823 tons, not included in total given below. The chief new ship now being built is the *Prinz Friedrich Wilhelm of the Grosser Kurfürst* type. River craft, 49,599 tons; 6,469,217 passengers carried in 1906; 6,000,938 miles traversed; 3,804,738 tons cargo carried.

Fleet, 145 ocean steamers; 736,011 tons.

London Agents, Keller, Wallis & Co., 2, King William Street, E.C.

OCEAN STEAM SHIP COMPANY, Ltd., and CHINA MUTUAL STEAM NAVIGATION CO., Ltd.—The Ocean Steam Ship Company was formed in 1865 by Mr. Alfred Holt. The *Agamemnon* began the line on April 19th, 1866, sailing from Liverpool for Singapore and China *via* Mauritius. The Cape route was given up on the opening of the Suez Canal. The company maintains (in

conjunction with the China Mutual S.N.C., Ltd., which was formed in 1882, and of which Messrs. Alfred Holt & Co. acquired the control in 1902) a weekly service of cargo steamers from Glasgow, Bristol Channel ports, and Liverpool to the Straits Settlements, China, and Japan, with a four-weekly extension across the Pacific to British Columbia and Puget Sound; a three-weekly one from Amsterdam *via* Liverpool to Sumatra and Java, and another between Singapore and West Australian ports. In 1901 a monthly line was begun from Glasgow to Australia. The *Antiochus*, *Bellerophon*, *Cyclops*, *Keemun*, *Ningchow*, *Oanfa*, *Teucer*, and *Titan* are from 8,900 to 9,000 tons each.

Fleet, 59 steamers; 326,817 tons.

London Agents, J. Swire & Sons, 8, Billiter Square, E.C.

ORIENT-ROYAL MAIL LINE are the contractors with the Commonwealth Government for the carriage of mails between England and Australia. The managers of the line are the well-known firms of F. Green & Co. and Anderson, Anderson & Co. The steamers, which have to make uniformly quick passages, sail from London on alternate Fridays, calling at Plymouth, Gibraltar, Marseilles, Naples, Port Said, Suez, Colombo, Fremantle, Adelaide, Melbourne, Sydney, and Brisbane, returning homewards in the reverse order. The comfortable accommodation afforded by this line to long-distance travellers, able to pay only the cheapest fares, testifies to the benefits conferred by steam navigation. When the Orient-Royal Mail Line began to carry passengers the passage from England to Australia occupied about 50 days; now it takes about 33 days. The outward and homeward steamers are timed to connect at Marseilles, so as to provide a sea voyage from London and back of 14 to 15 days, with not more than one day on shore. The Orient-Royal Mail Line are noted for their excellent system of pleasure cruises by large ocean steamships. Some of their fine vessels are employed in cruises varying in length from two to ten weeks to various parts of the world, according to season. In 1901 the *Ophir* was selected and specially fitted for H.R.H. the Prince of Wales when, with the Princess, he visited Australia to open the first Parliament of the Commonwealth.

Fleet, 9 steamers; 62,090 tons.

London Office, 5, Fenchurch Avenue, E.C.

PACIFIC MAIL STEAMSHIP COMPANY.—This well-known American line, which was established at San Francisco in 1847, maintains services to Central America, Japan, China, Honolulu, &c. The *Korea*, 11,276 tons, and *Siberia*, 11,284 tons, recently built in the United States, steam 18 knots, and the *Manchuria*, 13,638 tons, and *Mongolia*, 13,639 tons, each 16 knots.

Fleet, 18 steamers; 98,711 tons.

London Agent, Rudolph Falck, 49, Leadenhall Street, E.C.

PACIFIC STEAM NAVIGATION COMPANY. incorporated by Royal Charter in 1840, began business with the *Chile* and *Peru*, receiving a small subsidy. A bi-monthly service between Valparaiso and Pauama necessitated four more steamers in 1852, the Pacific trade developing and fresh branches of commerce being opened up. Compound engines were welcomed and adopted in 1856, thereby reducing the costly consumption of coal, the scarcity of which article had been the earliest

difficulty. The company's powers were enlarged in 1865 to run as far as the River Plate. In 1867 the capital was increased for the onerous performance of a monthly mail service from Liverpool, through the Straits of Magellan to Valparaiso, the *Pacific*, 1,630 tons, sailing from that port May, 1868. The success of the new line resulted in three sailings a month, and an extension to Callao by 1870. Again, two years later, the capital was added to, the *Sorata*, 4,038 tons, starting in 1873 a weekly service from Liverpool to Callao *via* France, Spain, Portugal, Brazil, and River Plate, but trade with South America falling off, fortnightly departures were reverted to, and the requisite employment for some of the boats presented itself in 1877, when the *Lusitania* led the way to the Orient-Pacific Line. The fleet owned by the company contains a long list of noble vessels (called after South American places), with which its reputation is well sustained for safety, speed and comfort. The *Oreonia*, 11,500 tons (the largest steamer in the South American trade), and the *Oriana*, *Ortega*, and *Oronsa*, each 8,000 tons, all twin-screw steamers, are the latest additions to the fleet.

Fleet, 50 steamers; 187,183 tons.

Head Office, 31-33, James Street, Liverpool.

PENINSULAR & ORIENTAL STEAM NAVIGATION COMPANY.—Mr. Brodie McG. Wilcox began to sow the seeds in 1825, and from the *William Farquett*, 206 tons: 60 h.p.: 74×15×8, blossomed the Peninsular Company, subsequently ripening into the above institution, which was incorporated 1840 (see p. 743), and celebrated its Jubilee 1887. Universally known as the "P. & O.," it glories in the motto, "Quis separabit."

Mails were conveyed by Post Office sailing packets from Falmouth to Lisbon before the contract was given to the Peninsular Company. The Indian mails were at that time taken in Government steamers from Bombay to Suez. Prior to the completion of the railway, 1857 (followed by the Suez Canal, 1870), everybody and everything had to take the caravan route across the desert to Cairo, intimately associated with the name of Lieut. Waghorn, who organised quicker and better facilities, Nile steamers afterwards superseding the sailing boats between Cairo and Alexandria. From Alexandria, Home Government steam packets carried the mails to Gibraltar, where the Peninsular Company received them. They soon suggested and pressed a better service than this upon the Government, and eventually a line from England *via* Gibraltar and Malta to Alexandria was begun by the *Oriental*, 1,610 tons, and *Great Liverpool* 1,540 tons, for which purpose the above company was constituted. The P. & O. Company secured the contract for the mails between Suez and Calcutta, in 1842, the first sailing being the *Hindustan*, 1,800 tons; but the East India Company obstinately refused to hand over their inferior Bombay-Suez Line until 1854, by which period the P. & O. had engaged to run to China and Singapore. The first service to Australia was interrupted by the Crimean War, 11 P. & O. boats being employed for the transport of troops. The necessity growing for an independent Australian mail line, the Government called for tenders in 1856, but the P. & O. declined the onerous conditions, which were swallowed by the European and Australian Steam Navigation Company, who soon failed. The Royal Mail Company stopped the breach

but temporarily, and the Government, having learnt a lesson, accepted the tender of the P. & O. Company in 1859.

The mails are invariably ahead of the contract times, which for 1908 have been reduced to the following:—

Indian	mails: Bombay, 13½ days from Lond.
China	" Shanghai 30½ "
Australian	" Adelaide 28½ "

The *Caledonia*, 7,558 tons, has landed the mails at Bombay within 12½ days from London *via* Brindisi, and the steamer's own passage between Bombay and Plymouth has been less than 17 days. The *Isis* and *Ociris*, running in the Brindisi-Port Said Express Service, have delivered the Egyptian mails within four days from the Metropolis of the Empire. The *Macedonia*, *Marmora*, *Moldavia*, *Mongolia* and *Mooltan*, each about 10,000 tons, and 18 knots speed, are the newest and largest mail steamers in the company's service, and the Company have under construction two additional steamers of the *Mooltan* type, but of larger tonnage, and a 19-knot steamer of 6,000 tons for the Bombay-Aden Mail Service. In 1906, 2,980,000 miles were traversed.

Fleet, 61 steamers; 405,260 tons.

London Office, 122, Leadenhall Street, E.C.

THE PRINCE LINE is the substantial handiwork of Mr. James Knott, of Newcastle-on-Tyne, since he despatched the *Saxon Prince* in 1881 as the pioneer of his present big fleet of ubiquitous steamers, of which the largest are the *Spanish Prince* of nearly 10,000 tons carrying capacity, and the *Norse* and *Royal Princes*, each of 9,500 tons capacity, and with a speed of 12 knots. The line has regular services from Manchester, Middlesbrough, Antwerp, London and Dunkirk to Tunis, Malta, Alexandria, Syrian Coast, Cyprus, Levant, and Smyrna, with return services to Manchester, Liverpool, Dunkirk, London, and other ports in the United Kingdom and Continent. Other lines maintained are those from Antwerp and London to the River Plate, and returning to the United Kingdom; New York to the Brazils and River Plate, and back to New York; New York to the Brazils, thence New Orleans, and from the latter port to the United Kingdom and Continent; Italian ports and Greece and the Levant to New York, with a return service to Italy, Greece and the Levant, carrying on the said line emigrants and cargo, New York to China, Japan, Philippines, Straits, and back to New York; New York to South African ports and back. During last year the steamers of the company carried 15,000 emigrants from Grecian and Italian ports to New York.

Fleet, 44 steamers; 136,220 tons.

London Office, 5, Fen Court, Fenchurch Avenue, E.C.

JOHN T. RENNIE, SON & COMPANY, ABERDEEN LINE.—The steamers of this line leave the West India Dock every ten days for Natal, calling at Portland and the Canary Islands (Las Palmas and Teneriffe alternately); they also take cargo and passengers for East African ports as far as Quilimane. The line was inaugurated in the year 1856 with sailing ships which traded regularly between London and Natal. Steam was first tried in 1857 with the *Waldensian* and *Madagascar*, which were the first steamers on the South African coast, and carried the mails from Cape Town as far as the port of Durban. The present service was commenced

in 1882 with the *Dabulamanzi*, 1,679 tons. In 1886 the *Matabel* was the first steamer in the South African trade to be fitted with triple expansion engines, and steamed nearly 7,000 miles from London to Port Natal, without a single stoppage. The East African service was commenced in the year 1892, and the steamers of the Aberdeen Line now maintain a regular service as far north as Beira, calling at Delagoa Bay and Inhambane, and carrying goods also to the British concession at Chinde and Quilimane, these ports forming the best and cheapest routes for passengers for Rhodesia, Matabeland, British Central Africa, and the African Lakes District. Steamers carry the British and Portuguese mails from Durban to the various ports they serve. The passenger fares are moderate and the accommodation, especially on the newer steamers, superior. The ss. *Inkosi*, 3,576 tons, 13 knots, has gone from London to Natal in 23 days 10½ hours' steaming time, and the *Insizwa* has completed the return passage in 22 days 2½ hours. The *Inanda* (4,400 tons, 13 knots, latest addition) and *Inkosi* were the first ocean-going steamers outside transatlantic boats to be fitted with Marconi's system of wireless telegraphy.

Fleet, 9 steamers; 26,700 tons.

London Office, 4, East India Avenue, E.C., and 21, Cockspur Street, S.W.

ROTTERDAM LLOYD line of steamers to Java, *via* Suez Canal, is under special mail contract with the Netherlands Government. The service was established in 1883 by the present managers, Messrs. Wm. Ruys & Sons, one of the oldest and most important shipowning and shipbroking firms in Holland. The steamers are despatched from Rotterdam, *via* Southampton, fortnightly, for Padang, Batavia, Cheribon, Samarang and Sourabaya, calling at Lisbon and Marseilles, from which last port passages of 20 days have been made to Batavia. The largest are the *Sindoro*, 5,468 tons, and *Gventoor*, 5,894 tons, both twin-screw steamers, 15 knots speed; one mail steamer is building of 4,900 tons; and two cargo steamers, each 9,000 tons dead-weight; 44 voyages in 1906; about 850,000 miles traversed; 3,791 passengers carried; 341,000 tons of cargo.

Fleet, 16 steamers; 63,790 tons.

London and Southampton Agents, Escombe, McGrath & Co.

THE ROYAL MAIL STEAM PACKET COMPANY was incorporated 1839 by Royal Charter with a subsidy of £240,000. In 1857 the company temporarily took over the carriage of the Australian mails *via* Suez. In 1868 the West Indian Mail Line was extended to Colon. In 1869 the South American main line was continued to Buenos Ayres (doing away with branch steamers from Brazil), developing by 1872 into a fortnightly service, and later into a weekly service. Services have recently been established from Glasgow, Avonmouth, Cardiff, Hull, London and Antwerp to the West Indies; and from Newport, Swansea, and Antwerp to Brazil; also a line to Cuba from Hull and Antwerp *via* Bilbao, Vigo, Corunna and the Canary Islands. The West Indian Mail subsidy, which had dwindled to £35,000 a year, was allowed by the Government to lapse in 1905, much against the expressed wishes of the Colonies. The company availed themselves of the freedom to extend their West Indian Main Line service to New York *via* Jamaica, maintaining their communications with the West Indian and British

Guiana Colonies. In August, 1907, a contract was signed with H.B.M. Government Agents of the Colonies for a fortnightly inter-colonial service from and to Barbados—quite distinct from the West Indies and New York transatlantic service (run without subsidy). During 1904, 6 new cargo steamers joined the fleet. The *Aragon*, 9,795 tons, which sailed on her maiden voyage July 14, 1905, is the first of a series of similar vessels for the Brazil and River Plate route. The *Amazon*, 10,036 tons, and *Araguaya*, 10,537 tons, were launched in 1906, the *Avon*, 11,072 tons, and *Asturias*, 12,500 tons, in 1907. The R.M.S.P. service to Australia (carried on for a short time in 1857) was resumed at the end of 1905, the Company then acquiring a half-interest in the Australian mail service, which is now carried on by them jointly with the Orient Company under the title of the "Orient-Royal Mail" Line. In 1907 the company acquired a half share in the "Shire" Line, thus extending their operations to Japan, China, and the Far East. From London (Albert Dock), the ports of call including Port Said, Suez, Penang, Singapore, Hong Kong, Shanghai, Nagasaki, Kobe, and Yokohama. Several steamers of 13,000 tons are building for the Australian mail service.

Fleet, 47 steamers; 204,206 tons.

London Office, 18, Moorgate Street, E.C.

SHAW, SAVILL AND ALBION COMPANY, LIMITED.—This company, successors to Messrs. Shaw, Savill & Co. and The Albion Co., established over 50 years ago, maintain a regular service of fast steamers between London and New Zealand. Their passenger steamers are despatched from London to New Zealand every four weeks, calling on the outward journey at Plymouth, Teneriffe, Cape Town, and Hobart (to tranship Australian passengers), and on the homeward journey, *via* Cape Horn, they call at Monte Video or Rio de Janeiro, Teneriffe, and Plymouth. The company also despatch fast direct cargo steamers monthly from London to various ports in New Zealand, while in addition a service of cargo steamers from Glasgow and Liverpool to New Zealand is maintained at regular intervals. The company own 16 steamers, including the twin-screw steamers *Mamari*, 7,062 tons, and *Matatua*, 6,488 tons. The new twin-screw steamer *Arawa*, of 9,372 tons, has recently been added to the passenger fleet, while the cargo fleet has just been strengthened by the addition of the new twin-screw steamer *Kia Ora*, of 6,750 tons. All the steamers are fitted with patent refrigerators for the conveyance of frozen meat, as well as butter, cheese, and fruit, from New Zealand, and aggregate a total carrying capacity equal to about 3,000,000 carcasses of sheep annually. Messrs. Ismay, Imrie & Co. have associated with this line their ss. *Athenic*, ss. *Corinthic*, ss. *Ionic*, and ss. *Delphic*, not included in the total tonnage below.

Fleet, 12 vessels; 67,865 tons.

Head Office, 34, Leadenhall Street, London, E.C.

THE "SHELL" TRANSPORT AND TRADING COMPANY, LIMITED, which has been conducted with remarkable financial success, was formed as a limited company in 1898 to take over the business founded by Messrs. M. Samuel and Co. for the transport of petroleum in bulk through the Suez Canal. Started in 1892,

the fleet has increased with extraordinary rapidity, the newest being the *Pectan*, *Spondilus*, *Goldmouth*, and *Silverlip*, each with a capacity of 10,300 tons, to steam 12 knots. The steamers are adapted for carrying general cargo as well as oil, and owing to special systems of ventilation are reliable carriers for the most delicate cargoes. A number of the vessels use entirely liquid fuel instead of coal. The steamers carry petroleum and its products in bulk all over the world, and the special trade of carrying full cargoes of benzine in bulk from Sumatra and Borneo to Europe *via* the Cape, of which the "Shell" Co. were the pioneers, has now assumed great dimensions. The carriage of creosote in bulk across the Atlantic has also been instituted by the "Shell" Co. The largest steamer is the *Silverlip*, 7,492 tons. The company in 1907 merged their business with that of the Royal Dutch Petroleum Co., and the fleets of the two concerns are combined under the Anglo-Saxon Petroleum Co., Ltd.

London Office, 19-21, Billiter Street, E.C.

THE UNION-CASTLE LINE.—Early in 1900 the two well-known steamship companies, the Union Steamship Company, Limited, and the Castle Mail Packets Company, Limited, the former company having been formed in 1853 and the latter one in 1872, who for many years have performed the mail service between England and S. Africa, were formally amalgamated, under the title of the Union-Castle Mail Steamship Company, Limited, the joint concern being managed by Messrs. Donald Currie & Co., who were the managers of the Castle Line. The Royal Mail steamships of the line, under contract with the Colonial Governments, are despatched from Southampton every Saturday for the Cape of Good Hope and Natal, calling at Madeira. The Intermediate steamships are despatched every week from London, calling at Southampton, for the Cape Colony, Natal, and Delagoa Bay, taking passengers at lower rates than the Mail steamers. These steamers proceed alternately *via* Las Palmas, Grand Canary and Teneriffe, and call once a month for mails at Ascension and St. Helena under contract with His Majesty's Government. At regular intervals, as the trade requires, an extra steamship, carrying passengers at low rates, is despatched to the South African ports, Lobito Bay and Mauritius. The steamers of the fleet are amply furnished with every contrivance for the safety, comfort, and convenience of all classes of passengers. The largest steamers in the fleet are: *Mail*—*Kenilworth Castle*, 12,975 tons; *Armada Castle*, 12,973 tons; *Walmer Castle*, 12,546 tons. *Intermediate*—*Durham Castle*, 8,267 tons; *Dover Castle*, 8,262 tons; *Dunluce Castle*, 8,114 tons.

Fleet, 44 steamers; 260,634 tons.

London Office, 3 & 4, Fenchurch Street.

UNION STEAMSHIP COMPANY OF NEW ZEALAND.—This company, established in 1875, is now the most important shipping concern in the Southern Hemisphere, and testifies to the expansion of both colony and company. In 1901 the company established a four-weekly mail service from Sydney to Vancouver, and discontinued running a steamer on the San Francisco mail route. The *Aporima*, 5,700 tons; the *Moeraki*, 4,400 tons, and *Manuka*, 4,400 tons, are twin-screw steamers added recently, with a

speed of 14 knots; the turbine steamer *Maheno*, 5,500 tons, is 17 knots. The *Loonunga*, an 18-knot turbine steamer of 1,000 tons, is in the service between Melbourne and Launceston, a distance of 276 miles; the first steamer of this kind in the Southern Hemisphere. Four steamers are building.

Fleet, 62 steamers; 122,000 tons.

London Office, 34, Leadenhall Street, E.C.

DET FORENEDE DAMPSKIBS SEISKAB (The United Steamship Co.) of Copenhagen celebrated its 40th anniversary in 1906. It is the largest maritime undertaking in Denmark. The company's far-reaching operations cover services with Russia, Germany, Norway, U. Kingdom, Belgium, France, Spain, Italy, the Levant, also North and South America, 20 of the fastest steamers being fitted with refrigerating machinery for the transport of dairy produce. The Scandinavian America Passenger Line is maintained between Copenhagen and New York, *via* Christiania and Christiansand, for which service 4 twin-screw steamers, each over 10,000 tons, have recently been built, with a speed of 16 knots, each with accommodation for 1,500 passengers. The largest steamer is the *United States*, 10,095 tons. One ice-breaker and salvage steamer, 12 sea-going lighters, and 7 tug-boats belong to the company (4,837 tons). In 1906 3,451,817 miles were traversed.

Fleet, 125 steamers; 152,865 tons.

London Agents, The United Shipping Co., Ltd., 108, Fenchurch Street, E.C.

ANDREW WEIR & CO. were established in 1885 by the senior partner, when the barques *Willowbank*, 862 tons, and *Francis Thorpe*, 1,343 tons, were acquired. Starting building for themselves in 1886, the size of the fleet, known as the Bank Line, grew to 43 clippers, which gradually diminished as the number of steamships increased, the first belonging to the firm being the ss. *Dueneric*, 1,878 tons, in 1896; now the ss. *Kumeric*, 7,000 tons, heads a list of 21 steamers grossing 81,536 tons. The *Cedarbank*, 2,825 tons, is the biggest of the 17 sailing ships, representing a further 32,398 tons, this being still one of the largest sailing fleets in the world. Both fleets are mostly employed in general trades. They have the following lines of steamers: New York to the Far East; New York to the River Plate; Calcutta to the River Plate and West Coast of South America; Calcutta to Durban and South African ports; Puget Sound and British Columbia to China and Japan; and an Australian mail line from San Francisco to New Zealand and Australia. Since 1896 a regular service has been conducted between the Tees and the Forth.

Fleet, 28 vessels, steam and sail; 114,002 tons.

Head Office, 6, Lloyd's Avenue, E.C.

WHITE STAR LINE.—(See International Mercantile Marine Co.) The Oceanic Steam Navigation Company, Ltd., better known as the White Star Line, was founded in 1869 by the late Mr. T. H. Ismay. The *Oceanic* (3,807 tons, 430 feet long) sailed from Liverpool on her first voyage to New York on 10 March, 1871. The *Britannic*, 5,004 tons, *Germanic*, 5,070 tons (1874-5), *Teutonic*, 9,984 tons (1889), *Majestic*, 9,955 tons (1890), were followed by *Oceanic II.*, 17,274 tons. In August, 1890, the *Medic*, 12,000 tons, inaugurated a service from Liverpool to South African and Australian ports. In 1903

the four largest steamers of the Dominion Line were taken over and renamed, a regular service being inaugurated from Liverpool to Boston *via* Queenstown and from New York and Boston to Mediterranean ports. Early in 1907 the White Star Line made an important announcement, viz., that with a view to meet the growing demand of travellers that facilities should be provided to enable them to embark and disembark at either a Continental or British port, thus obviating the necessity of crossing the English Channel, its Wednesday Royal United States Mail service would be transferred from Liverpool to Southampton in the following June. The new service was auspiciously inaugurated on June 5 by the departure from Southampton of the palatial new twin-screw steamer *Adriatic*, 25,000 tons, which, with its unique system of Turkish baths and other innovations, has proved a very popular vessel. The New York Mail steamers of the White Star Line now leave Southampton each Wednesday morning, call at Cherbourg the same afternoon, and then proceed to Queenstown to take the mails on board. Homewards the steamers leave New York every Wednesday, and steam direct to Plymouth (where the mails and such passengers as so elect are landed); from thence to Cherbourg, and end the voyage at Southampton. As a consequence of this change, the White Star Line's passenger steamers from Liverpool for New York now sail each Thursday, and this service is maintained by the magnificent twin-screw steamers *Baltic*, *Cedric*, *Celtic*, and *Arabic*, the first three of which are each over 20,000 tons. The Boston steamers are now despatched from Liverpool on Wednesdays, instead of Fridays as heretofore; and in addition to the foregoing the White Star Line also has services between Liverpool and New York (cargo and live stock), Liverpool, South Africa, and Australia (passengers and cargo), Liverpool and Australia (cargo), Liverpool and New Zealand (cargo), New York and Mediterranean ports (passengers and cargo), Boston and Mediterranean (passengers and cargo). For the London and New Zealand passenger and cargo services, under the auspices of the Shaw, Savill & Albion Co., Ltd., the White Star Line has had built the *Athenic*, *Corinthic*, and *Ionic*, each 12,230 tons, the largest vessels in the New Zealand trade. The *Celtic II.* (20,904 tons) sailed from Liverpool for New York on her maiden voyage July 26, 1901. She has been surpassed in size by the *Cedric*, 21,035 tons, by the *Baltic*, 23,876 tons, and by the *Adriatic*, 25,000 tons. All the services are maintained entirely with twin-screw steamers, and the average size of the White Star steamers is the largest in the world (13,020 tons per steamer), including some of the largest cargo and live-stock carriers in existence.

The following table gives quickest crossings to date:—

Steamer's Name.	West.	East.	Average Sea Speed.	Highest Day's Run.
	d. h. m.	d. h. m.	Knots.	Knots.
<i>Oceanic</i>	5 16 40	5 18 30	20.7	524
<i>Teutonic</i>	5 16 31	5 21 3	20.3	528
<i>Majestic</i>	5 17 56	5 23 16	20.4	520

Fleet, 28 steamers; 375,000 tons.

London Offices, 38, Leadenhall Street, E.C., and 1, Cockspur Street, S.W.

WILSON LINE.—The firm of Beckinton, Wilson & Co., founded at Hull, about 1835, by Mr. Thos. Wilson, became a private company in 1891 (Messrs. Thos. Wilson, Sons & Co., Ltd.), and has since been conducted by Messrs. Charles and Arthur Wilson. Mr. Charles Wilson was created Lord Nunburnholme in 1906, and died in 1907. The company is now the largest private ship-owning concern in the world. Ever since 1845, the firm has held the foremost position in the Baltic trade. In 1850 the present mail service between England and Sweden was started with the *Courier*, 400 tons, and soon developed into a large mail passenger service to the principal Swedish and Norwegian ports. The St. Petersburg, Riga, and Stettin trades were next included, the *Dido*, 1,409 tons, in 1869, being the first departure to the Adriatic, the same year operations being extended to the Black Sea. In 1875 the New York and Boston trades were entered, and have been developed into employing the most tonnage, the *Toronto*, 6,035 tons, and *Consuelo*, 6,025 tons, both twin-screw steamers, being the largest. In 1878 the steamers of Messrs. Brownlow, Marsden & Co. were purchased, and the Hamburg, Antwerp, and Dunkirk trades taken up. Connection with India, which had been maintained from 1870 to 1875, was resumed in 1883, with a line between Hull and Bombay, and in 1896 a service between London and Boston, U.S., was established in association with the Furness and Leyland Lines. In 1903 the fleet was acquired of Messrs. Bailey & Leatham, Ltd., numbering 22 steamers, with a total gross tonnage of 32,497 tons. In 1906 the firm amalgamated with the North-Eastern Railway Co., and Wilsons, and North-Eastern Railway Shipping Company was formed for Hamburg, Antwerp, Ghent, and Dunkirk trades, employing 9 steamers with an aggregate tonnage of 7,780 tons. *Kolpino*, 1,819 tons, is the latest addition; a 4,050 tons steamer for Atlantic trade is building. Fleet, 81 steamers; 183,871 tons.

London Agents, W. E. Bott & Co., 1, East India Avenue, E.C.

Our thanks are due to the owners and agents who have furnished us with information, and also to the Secretary of Lloyd's Register of British and Foreign Shipping.

Nationality of "British" Seamen, 1896-1905.

THE following table shows the number of British and Foreign Seamen employed in the sea-going Mercantile Marine of the United Kingdom, and the percentage of Foreign to British:

Year.	Total British and Foreign.*	British.	Foreign.*	Proportion of Foreign Percentage to British.*	Lascars and Asiatics.
1896	210,040	178,994	33,046	18.46	29,999
1897	209,447	175,549	33,898	19.31	31,484
1898	210,288	174,980	35,308	20.18	32,265
1899	210,330	174,266	36,064	20.69	33,805
1900	211,425	174,532	36,893	21.14	36,023
1901	210,542	172,912	37,630	21.76	37,431

The 61 County Boroughs named in the Third Schedule of the Local Government Act, 1888, are distinguished by having a * prefixed, those since constituted under the Act of 1888 have a § prefixed

For the use of Parish Councils, Overseers, Churchwardens, Vestry Clerks, Magistrates' Clerks, Clerks of the Peace, and Town Clerks, Superintendent and District Registrars, Coroners, and County, Municipal, District, and Parochial Officers and Citizens generally, showing the days when certain Official Duties are to be performed; also the days when Inland Revenue Licences expire.

NOTES.—1. SUNDAYS, BANK HOLIDAYS, &c.—A rule of law is that Sunday is no day. Any act, therefore, which falls to be done on a Sunday should be performed the day previous unless statutory provision exists to the contrary. Every meeting or adjourned meeting of any vestry or corporation (other than Municipal, but including Parish, Rural, and Urban District Councils), or of any public company, for the nomination, election, or admission of any officer, or for the transaction of any affair of such vestry, corporation, or company which, according to any Act of Parliament, charter, prescription, or usage whatsoever, is or shall be required to be held on any day which shall happen to be a Lord's Day, shall, by 3 & 4 Will. IV. c. 31, be held on the Saturday preceding or on the Monday ensuing; and every matter transacted at any meeting or adjourned meeting held upon any Lord's Day shall be absolutely void. When no such nomination, election, or admission shall have taken place on the Saturday, every person whose term of office would have expired on any such Lord's Day shall continue in office, and exercise and enjoy all powers and privileges, until the Monday next ensuing.

By the Municipal Corporations Act, 1882, when a limited time from or after any date or event is appointed for the doing of any act, the time is exclusive of the day of that date or of the happening of that event, and as commencing at the beginning of the next following day; and the act is to be done on the last day of the limited time, unless that should be a Sunday, Christmas Day, Good Friday, Monday or Tuesday in Easter Week, or a day appointed for a public fast or thanksgiving, in which case the act will be done in due time if performed the day following. The same applies to any act directed to be done on a certain day, and that day falls on one of the days above mentioned. Further, if any act or proceeding is directed to be done within any time not exceeding seven days, the days above specified are not to be reckoned. Under the Local Government Acts 1888 and 1894 similar rules apply.

"Three clear days" means that three days must intervene between the day on which a notice is given and the day on which a meeting is held, so that notices sent by post must be delivered three clear days before a meeting.

2. BILLS OF EXCHANGE.—In regard to Bills of Exchange that fall due on a Sunday, Good Friday, Christmas Day, or a day appointed for a fast or thanksgiving, presentation for payment should be made on the preceding business day. Bills of Exchange falling due on a Bank Holiday are not payable until the following day, and when the last day of grace is a Sunday, and the second day of grace is appointed as a Bank Holiday, such bills are due and payable on the succeeding business day (see 45 & 46 Vict. c. 61).

3. PARLIAMENTARY ELECTIONS.—The times that must elapse between the receipt of the writ by the Returning Officer and the dates fixed for the various steps in the election are as follows:—Assuming that the writ is received on the 1st of any month, the notice of election must be issued on the 2nd in Boroughs, and 3rd in Counties.

The nomination must take place on the 4th or 5th in Boroughs, and on any day between the 5th and 10th (both inclusive) in Counties. The poll (if any) must be fixed for some date between the 6th and 9th (both inclusive) in all Boroughs, except those mentioned in Rule 57, Schedule 1., to the Ballot Act, 1872, in which the date may be between the 7th and 12th (both inclusive).

4. LOCAL GOVERNMENT AUDIT STAMP DUTY.—The following is the scale of Stamp Duty payable by County and Urban and Rural District Councils and Parish Councils, and by the Chairmen of Parish Meetings, by Joint Committees, by Local Education Authorities under the Education Act, 1902, and by the London Municipalities, on the Audit of their accounts by District Auditors:—

Where the total of the expenditure comprised in the Financial Statement is—

Under £	...	the sum shall be	£	s.	d.
£20	...	£50	0	5	0
£30	and under	£50	0	10	0
£50	do.	£100	1	0	0
£100	do.	£500	2	0	0
£500	do.	£1,000	3	0	0
£1,000	do.	£2,500	4	0	0
£2,500	do.	£5,000	5	0	0
£5,000	do.	£10,000	10	0	0
£10,000	do.	£20,000	15	0	0
£20,000	do.	£50,000	30	0	0
£50,000	do.	£100,000	30	0	0
£100,000	do.	£150,000	50	0	0
£150,000	do.	£200,000	60	0	0
£200,000	and upwards	shall be	£15	in addition for every £50,000 or part thereof.	

In the case of Urban District Councils, to which the Local Government Act, 1888, does not apply, the maximum Duty is £50.

January.

1. W.—The Land Tax, Income Tax, and the Duties on inhabited houses are due on this date. Under the Finance Act, 1898, any person who is entitled to exemption from or abatement of income tax may obtain from the Surveyor of Taxes a certificate of exemption from or abatement of land tax. Licences for carriages, male servants, and to use armorial bearings fall due and must be taken out before the end of the month, and thereafter within twenty-one days after a person becomes liable to duty. Dog licences must be taken out without delay: no grace can be claimed, but on renewal, if with other licences, they may be taken out any time during January.

The Registers of Parliamentary, Local Government and Parochial Electors come into force for the year.

The following Acts come into force:—Butter and Margarine Act, 1907; Patents and Designs Act, 1907; Vaccination Act, 1907; Factory and Workshop Act, 1907; Lights on Vehicles Act, 1907; Small Holdings and Allotments Act, 1907; and the Railway Fires Act, 1905, which provides for compensation for damage by fires caused by sparks or cinders from railway engines.

Watch Committee of Town Council to send to Secretary of State a copy of all rules made for

the regulation and guidance of borough constables since the last quarterly return.

Between this date and the 31st March the Medical Officer of the parish to visit every pauper lunatic not in an asylum; and before the 7th of this month make a report to the Clerk to the Guardians, or to the Overseers, of his visits during the preceding quarter, which report, within three days after its receipt, is to be transmitted to the Commissioners in Lunacy, and a copy sent to the Clerk to the Visitors of the asylum for the county or borough in which the union or parish is situate.

Clerk to Guardians on this date, or as soon after as may be, to make out an annual list of all lunatics chargeable to the Union, and send copies before the 1st February to the Local Government Board, the Commissioners in Lunacy, Clerk to Visitors of Asylums, and to the Clerk of the Peace of the county, or Clerk to the Justices of the borough, to be by him laid before the Justices.

Return of Paupers relieved on 1st instant and of children board-out to be made to Local Government Board.

On this date, or within ten days after (if no other day be prescribed), municipal corporations to appoint members of the council as trustees of corporate property.

Registrars, except of London districts, to post to the Registrar-General a correct return of births and deaths registered during the preceding quarter.

Coroners to send return of inquests for preceding year to Secretary of State during this month.

Within fifteen days after this date Registrars of Dioceses to send to the Registrar-General a list of all chapels wherein marriages may be lawfully solemnized.

Within fifteen days after this date bankers not registered under the Joint Stock Companies Act to deliver returns at the Stamp Office in London.

Medical Officers of Health are required to send their annual reports for the past year to the District Council for the district, to the County Council and to the Local Government Board as soon as possible.

Quarter Sessions to be held during this week. Under the Quarter Sessions Act, 1894, the Justices in General Quarter Sessions, or at any adjourned or special meeting thereof, may at any time, when it may appear desirable for the purpose of not interfering with the Assizes then next ensuing, fix or alter the time for holding the then next General Quarter Sessions so that they shall be held not earlier than fourteen days before and not later than fourteen days after the week in which they would otherwise be held.

Within one week after the termination of Quarter Sessions the gaoler to send to the Secretary of State a calendar of the prisoners tried thereat.

Holiday on the Stock Exchange, and Bank Holiday in Scotland.

7 TH.—Registrars of Births and Deaths to transmit to Overseers, on or before this date, a return of the names, ages, and residences of all male persons of full age, and also, when and as required by the Overseers, of all women who have died between the 8th September (or the date when the preceding return was made) and the 31st December.

Latest date for Medical Officers to send quarterly list of pauper lunatics visited by them to the Clerk to the Guardians.

Solicitors, conveyancers, special pleaders, and draughtsmen in Equity in Ireland must renew their certificates between this date and Feb. 6.

9 TH.—Latest date to pay Fire Insurances due at Christmas.

Latest date for Clerk to Guardians to send quarterly lists of lunatics to Commissioners in Lunacy, and to Clerk to Visitors.

Clerks of Courts of Summary Jurisdiction to send to the Home Secretary a statement of fines imposed during the last quarter.

11 S.—Hilary Law Sittings commence.

14 TU.—Latest date upon which notices of appeal against supplemental valuation lists in the Metropolis can be given.

Registrars to apply on or before this date to the officiating minister of every place of worship in which marriages may be solemnized within their sub-districts, for certified copies of all entries of marriage solemnized, or for certificates of "No Registry," during the quarter ended 31st December last. Registrar to deliver these, on or before the 20th of this month, to the Superintendent Registrar.

Bankers' returns to be delivered at the Stamp Office not later than this date.

Latest date for Registrars of Dioceses to send to the Registrar-General a list of all chapels wherein marriages may be lawfully solemnized.

18 S.—On or before this date Registrars to personally deliver to Superintendent Registrars certified copies of all entries of Births, Deaths, and Marriages made during the quarter ended 31st December last. Last day for Local Authority to send to Local Government Board reports under Canal Boats Acts.

On or before this date returns to be sent to Mines Inspectors, giving particulars up to preceding 31st December, as required by s. 33 of Coal Mines Regulation Act, 1887.

Latest date for Savings Banks to send annual statement of affairs to Commissioners for Reduction of National Debt.

23 TH.—Between this date and the 1st February, Companies, Corporations, and County Councils compounding for stamp duties with the Commissioners of Inland Revenue to deliver half-yearly accounts to the Commissioners.

31 F.—Latest date for Clerk to Visitors of Asylums to transmit report to Commissioners in Lunacy.

Last day for Local Authorities to send to Local Government Board analysts reports for preceding year.

Latest date for Superintendent Registrars to transmit to Registrar-General certified copies of the registers of Births, Deaths, and Marriages for the quarter ended 31st December last.

Railway Companies, on or before this date, if required, to send an abstract of their annual account to the Clerk of the County Council and the Overseers of the Poor of the counties through which the railway passes.

Between the first and last days of this month the secretary of every club in which intoxicating liquor is supplied to members, and which is required to be registered under the Licensing Act, 1902, is required to furnish to the Clerk to the Justices a return giving the prescribed particulars concerning the club.

February.

1 S.—Within 21 days after this date the Clerk of the Peace of every county, and the Town Clerk of every borough, to transmit to the Secretary of State a printed copy of the Register of Electors.

Under the Licensing Act, 1902, the general annual licensing meeting in every licensing district must be held within the first fourteen days of this month in every year.

On or before this date borough Coroners to send to the Secretary of State returns in writing of inquests held by them or their deputies in the preceding year.

Latest date for Clerk to Guardians to transmit copies of annual list of pauper inmates to Commissioners in Janacy, Local Government Board, Clerk to Visitors of Asylums, Clerk to the Council of any County, and to the Town Clerk of any borough.

Reports of Medical Officers of Health for the past year should be sent to Local Government Board during this month. A copy of the Report dealing with Factories and Workshops should be sent to the Home Office.

Companies, Corporations, and County Councils compounding for stamp duties to deliver half-yearly accounts and pay duty to Commissioners of Inland Revenue not later than this date.

Four weeks at least before the 25th March Clerks to Board of Guardians to estimate the probable expenditure for the ensuing half-year and the probable balance due to or from each parish for the current half-year, and prepare contribution orders to be laid before the Guardians before the expiration of the current half-year. These estimates and the subsequent apportionments must be made on the "Assessable" value of Parishes as determined by s. 2 of the Agricultural Rates Act, and not on rateable value as formerly.

Latest date to renew certificates of Solicitors, Conveyancers, and Draughtsmen in Equity in Ireland.

2 S.—Candlemas. Scotch Quarter Day.

17 M.—Nine days at least before the 1st March (that is, on the 20th) Town Clerk to publish a notice of the election of auditors.

22 S.—Latest day for delivery of nomination papers in election of Auditors in Boroughs.

Latest date for the Clerk of the Peace of every county, and the Town Clerk or other officer having charge of the register, to send a printed copy of the Register of Electors to the Secretary of State.

24 M.—Four days at least before the 1st March the Mayors of boroughs to publish notices of the situation of polling-places for the election of Auditors.

March.

1 S.—Between this date and 1st August, persons shooting or taking wild birds are liable to penalties under the Wild Birds Protection Act, 1880, and persons selling or exposing for sale any hare or leveret (except a foreign hare) are liable to penalties under the Hares Preservation Act, 1892. Under the Wild Birds Protection Act, 1894, a Secretary of State may, on the application of any County Council, prohibit the taking of eggs within a county or any part thereof.

2 M.—Ordinary day for election of elective Auditors in boroughs.

The Occupier of every Factory and Workshop must on or before this date send return of persons employed during year ending 31st December last to Inspector of Factories, in pursuance of the Factory and Workshop Act, 1901.

Town Council of borough, on or before this date, to transmit to the Local Government Board a statement of receipts and expenditure up to last audit.

The Annual Parish Meeting is to be held in

every Rural Parish on some day between 1st March and 1st April, and Overseers to be appointed in every such parish not having a Parish Council.

Borough Treasurers to submit their accounts to audit within one month from this date, or that approved of by the Local Government Board for the making up of such accounts.

13 F.—Latest date for Returning Officers to publish Notice of Election for Urban and Rural District Councillors and Guardians.

15 S.—After this date, and until the 1st August, any person having in his control or possession any wild bird killed or taken in the United Kingdom since the 1st of this month is liable to a penalty under the Wild Birds Protection Act, 1880.

17 Tu.—St. Patrick's Day.

19 Th.—Nominations in Elections of Urban and Rural District and Parish Councillors and Guardians to be delivered by noon on this day.

20 F.—Returning Officer to make out statement of persons validly nominated in Elections of Urban and Rural District and Guardians.

Within fourteen days after this date a special sessions may be held for appointment of the days for holding not less than eight nor more than twelve special sessions for executing the purposes of the Highways Act. This is liable to alteration by the County Council, and the fixing of these Sessions is no longer compulsory, as Highway business can be done at any Petty Sessions.

Railway Companies to pay quarterly instalments of Income Tax on or before this date.

24 Tu.—Candidates in Elections of Urban and Rural District and Guardians may withdraw not later than noon on this day.

25 W.—Quarter Day. Union accounts to be made up to this date, or to the end of the Union week first completed after this date. Returns made to Local Government Board under Local Taxation Returns Act, 1877, by Corporations, and other local authorities to be made up to this date. (See 31st March.)

Overseers of the Poor to be nominated and appointed in Urban parishes within fourteen days after this date, or on such date as may be fixed by the Local Government Board.

Churchwardens and Overseers in Urban parishes and Overseers in Rural parishes, within fourteen days after other Overseers have been appointed to succeed them, to deliver to such succeeding Overseers a just, true, and perfect account in writing of all sums of money in their hands, as required by 17 Geo. II. c. 38, s. x.

Medical Officer of Unions entitled to be paid any extra fees to make out his quarterly account to this date, and lay the same before the Guardians: his claim to accrue at the expiration of one calendar month following this date, but the Guardians may pay it earlier.

Trustees of Parochial Charities to prepare accounts to be delivered to Parish Councils, and forward copy to Charity Commissioners within fourteen days.

District Medical Officers to notify at the commencement of this quarter to the Board of Guardians the paupers whose names have been inserted in the permanent medical relief list for a period of six months; advise as to the continuance of such paupers in such list, and take the direction of the Board thereon.

31 Tu.—Under the Local Government Acts, 1888 and 1894, the local financial year ends on this date. All enactments relating to accounts of local

authorities, or to meetings or other matters, are to be modified so far as is necessary to adapt them to the Act. The accounts of all County Councils, Town Councils acting as Local Education Authorities under the Education Act, 1902, Urban District Councils, and of all Parish Councils and Parish Meetings must be made up annually to this date. The accounts of Rural District Councils to be made up half-yearly to this date and 30th September.

The Overseers and every Collector appointed for a Parish to make up their accounts to this date, and deposit them for the free inspection of the ratepayers at some house within the parish for seven clear days at least before the audit.

Railway companies unincorporated to furnish statements of capital, traffic, and working expenditure to the Board of Trade not later than this date. Incorporated companies to send their returns within fourteen days after their first ordinary half-yearly meeting held in each year.

Quarter Sessions to be held the first week after this date. (See January 1.)

Hawkers', Refreshment-House Keepers', and Packet Boat liquor and tobacco licences expire on this date.

Watch Committee of Town Council to send to Secretary of State a copy of all rules made since 31st December for the regulation and guidance of constables.

Treasurer of Borough to submit his accounts, other than those under the Education Act, 1902, for audit if made up to the 1st March.

Latest date for publication of Notice of Poll of Urban and Rural District and Parish Councillors and Guardians.

April.

1 W.—In the months of April and May, or one of them, Overseers to ascertain with respect to all property in their parishes, whether any man is entitled to be registered as a voter by reason of his being an inhabitant occupier, and enter in the rate-book the name of every man so entitled, with a description of the dwelling.

Notice of intention to apply for an order under the Light Railways Act, 1896, must be advertised for two weeks during April or October.

Between this date and the 30th June, the Medical Officer of the parish to visit pauper lunatics not in asylums. (See January 1.)

The walls and ceilings of Common Lodging Houses to be limewashed in the first week of this month.

Registrars, except of London districts, to post to the Registrar-General a correct return of births and deaths registered during the preceding quarter.

During this and the two following months owners may be compelled to cut down oak-trees growing in hedges near highways ordered to be widened.

5 S.—Returns of assessed taxes made to this date.

6 M.—Commencement of the financial year for Imperial purposes.

Elections of Urban and Rural District and Parish Councillors and Guardians take place on this day, unless otherwise fixed by the County Council.

Quarter Sessions to be held this week.

Within seven days before the 15th Clerks of the Peace and Town Clerks to send their precepts as to Registration to the Overseers.

The Fund for aiding the equalisation of Rates in London is to be based on the Rateable Value as at this date in each year.

Latest date for Medical Officers to send quarterly lists of lunatics to Clerk to Guardians.

Latest date for Clerk to Guardians to send quarterly lists of lunatics to Commissioners in Lunacy and copies to Clerk to Visitors.

Registrars of Births and Deaths to transmit to Overseers, on or before this date, a return of all male persons of full age, and also, when and as required, of all women who have died during the three months ending 31st March.

9 TH.—Latest date to pay Fire insurances due on Lady Day.

Clerks of Courts of Summary Jurisdiction to send to the Home Secretary a statement of fines imposed during the last quarter.

On this date, or within seven days before, Clerks of the Peace and Town Clerks to send precepts and copies of registers to Overseers.

15 W.—Registrars to apply to officiating ministers on or before this date for certified copies of all entries of marriages solemnized by them during the quarter ended 31st March.

Guardians of Unions at their first meeting after this date to appoint the Union Assessment Committee, consisting of not less than six nor more than twelve.

Urban and Rural District Councillors and Guardians come into office, and will remain in office for three years.

Urban and Rural District Councils and Boards of Guardians must hold their Annual Meetings as soon as convenient after this date. Parish Councils must hold their Annual Meetings on or within seven days after this day.

Hilary Law Sittings end.

20 M.—On or before this date Registrars to personally deliver to Superintendent Registrars copies of entries of Births, Deaths, and Marriages made during the previous quarter.

28 TU.—Easter Law Sittings begin.

30 TH.—Latest date for Superintendent Registrars to send to Registrar-General certified copies of entries of Births, Deaths, and Marriages made during the quarter ended 31st March.

May

1 F.—Local Authorities in counties and boroughs to send to Secretary of State copies of orders made under Ballot Act as to polling districts.

Copies of draft orders and other documents under Light Railways Act, 1896, to be sent to County, District, and Parish Councils, and various Government departments, during May or November.

Overseers in the Metropolis to make and deposit supplemental valuation lists before 1st June.

Holiday at the Bank Transfer Office and Stock Exchange.

Bank Holiday in Scotland.

14 TH.—Between this date and the 4th of August, no person to sell, expose for sale, or buy for sale any description of oysters other than those known as "deep-sea oysters."

15 F.—Scottish Quarter Day.

Licences for beer retailers, retailers of wine and spirits, and dealers in tobacco and snuff in Scotland expire.

18 M.—Within sixty days after this date the half-yearly receipts for interest to savings banks are to be made out and allowed.

31 £.—Before the 1st June Friendly Societies to make returns to the end of the preceding year to the Registrar of Friendly Societies.

Latest date for Overseers to enter names of inhabitant occupiers in rate-book for registration purposes.

Latest date for Overseers in the Metropolis to deposit Supplemental valuation lists.

June.

1 M.—Annual returns of rates, taxes, tolls, and dues levied for local purposes, required by Local Taxation Returns Act, are to be furnished to the Local Government Board in this month.

Where any poor-rate due on the 5th of January last, from an occupier in respect of premises capable of conferring the franchise for a borough, remains unpaid on this date, the Overseers to give a notice, on or before the 20th of this month, to such occupier that he will not be entitled to have his name in the List of Voters in respect of his occupation unless he pays such rate on or before the 20th of July next.

Where an owner of small tenements who has become liable to pay the poor-rates under the Poor-Rate Assessment and Collection Act, 1869, omits or neglects to pay before the 5th of June any rate due previously to the preceding 5th of January, he will not be entitled to any abatement, but must pay such rate in full.

5 F.—Easter Law Sittings end.

15 M.—Sale of oysters prohibited. (See May 14.)

16 Tu.—Trinity Law Sittings begin.

20 S.—On or before this date Overseers to publish the ownership portion of the register of county voters, and a notice to voters to send in claims to vote on or before the 20th July. Publication to be effected by affixing copies to churches and chapels, or to public buildings and post offices, there to remain for a period including two Sundays at least, but not later than the 20th July.

Overseers to publish notice that no person will be entitled to have his name in the list of Parliamentary £10 and inhabitant occupiers, or £10 Burgesses and County electors, unless, on or before the 20th July, he has paid all rates due previous to the 5th January last. Notices of like effect are also to be served on occupiers who have not paid such rates.

Railway Companies to pay quarterly instalments of Income Tax on or before this date.

24 W.—Quarter Day. Medical Officers of Unions entitled to be paid any extra fees to make out their accounts quarterly to this date, and lay the same before the Guardians.

Sheriffs of London to be elected.

District Medical Officers at the commencement of this quarter to notify to the Board of Guardians the paupers whose names have been inserted in the permanent medical relief list for a period of six months.

29 M.—Quarter Sessions to be held during this week.

July.

1 W.—Watch Committee of Town Council to send to Secretary of State a copy of all rules made since 31st March for the regulation and guidance of constables.

On this date at the latest the Board of Trade to

lay before Parliament a Report respecting the applications to them and their proceedings under the Electric Lighting Act, 1882.

Between this date and the 30th of September, the Medical Officer of the parish to visit pauper lunatics not in asylums.

Special Meetings of Local Authorities for the granting of licences to deal in game to be held during this month.

Registrars, except of London districts, to post to the Registrar-General a correct return of Births and Deaths registered during the preceding quarter.

Return of paupers relieved on this date to be made to Local Government Board. This return is independent of the new Register of Paupers required to be kept for the year ending 30th September.

Before the expiration of this month County Councils are to appoint valuers for the purposes of the Finance Act, 1894, for the valuation of property for Estate Duty.

Licences to deal in game expire.

5 £.—The following licences expire on this date:—Appraiser, auctioneer, house agent, beer-dealer (retail) and retailer of table-beer to be drunk off the premises, dealer in plate, rectifier and compounder of spirits, dealer in spirits, for use of still or retort, retailer of and dealer in sweets and made wines, manufacturer of and dealer (not a publican) in tobacco and snuff, manufacturer of vinegar, dealer in foreign wines.

9 Th.—Medical Officers to send quarterly lists of lunatics to Clerk to Guardians before this date.

Latest date to pay Fire insurances due on Midsummer Day.

Latest date for Clerk to Guardians to send quarterly lists of lunatics to Commissioners in Lunacy, and to Clerk to Visitors.

Clerks to Courts of Summary Jurisdiction to send to the Home Secretary a statement of fines imposed during the last quarter.

15 W.—Registrars to apply to officiating ministers on or before this date for certified copies of all entries of marriages solemnized by them during the quarter ended 30th June.

20 M.—The Clerk of the Peace in every county, riding, or division must, before this date, issue his precept to the Overseers, requiring them to make out, before the 1st September next, a list of all persons qualified to serve on juries, and specify in the list those qualified as Special Jurors.

Within two days after this date Tax assessors and collectors to make out and deliver to Overseers a list of the persons who have not paid the assessed taxes due for the year preceding the 6th April last.

Latest date for Registrars to deliver to Superintendent Registrars copies of entries of Births, Deaths, and Marriages made during the previous quarter.

Latest date for Occupiers in counties and Householdors in boroughs to pay poor-rates due in respect of the year preceding 5th January last, so as to be retained on the Register of Voters.

Registrars of Births and Deaths to transmit to Overseers, on or before this date, a return of all male persons of full age, and also, when and as required, of all women who have died between 1st April and 15th July.

22 W.—Latest date for tax-collectors to send to Overseers lists of persons who have not paid assessed taxes for the year preceding April 6.

On or before this date Overseers to make out list of persons disqualified as occupation voters by reason of the non-payment by the 20th of the poor rates due on the preceding 5th January. Such list to be open to public inspection during the next fourteen days.

25 S.—On or before this date Overseers to remove copy of Register of Ownership voters from the places where published.

All persons on the Register of Voters in respect of lodgings, and desirous of remaining on the register in respect of the same lodgings, must send to the Overseers, on or before this date, their claims to be so retained.

Between this date and the 1st August, Companies, Corporations, and County Councils compounding for stamp duties with the Commissioners of Inland Revenue to deliver half-yearly accounts to the Commissioners.

31 F.—On or before this date Overseers are to ascertain from the Relieving Officer acting for their parish or township the names of all persons disqualified from voting by reason of having received parochial relief.

On or before this date Overseers are to add on the margin of one copy of the ownership portion of the Register, and on the margin of the list of ownership claimants, the word "objected" before the name of every person therein whom they have reasonable cause to believe to be not entitled to be on the new Register; and the word "dead" before the name of every person whom they have reason, from the returns sent by the Registrars of Births and Deaths, or from their own knowledge, to believe to be dead. If it appears that any person is entered in the ownership portion of the Register for the parish or township in respect of a £50 rental qualification, the Overseers are to add the word "objected" before the name of such person, and to insert his name in the occupiers' list.

On or before this date Overseers to make out the occupiers' list in counties, the occupiers' list in boroughs, the old lodgers' list, and the non-resident list.

On or before this date Town Clerk to make out a list of freemen voters.

Latest date for Superintendent Registrars to transmit to Registrar-General certified copies of entries of Births, Deaths, and Marriages made during the quarter ended 30th June.

Pawnbrokers' licences expire on this date; also licences to kill game and to carry a gun.

Trinity Law Sittings end.

August.

1 S.—Lammas Day: Scottish Quarter Day.

On or before this date Overseers are to sign one copy of the Register of ownership claimants, and of the lists specified under date 31st July. They are to cause a sufficient number of such lists to be printed, and to publish the Register with their marginal additions and signed by them. The Overseers are also to publish at the same time the corrupt and illegal practices list, and keep a copy of each of such lists, and of the ownership portion of the Register, open to public inspection for fourteen days after publication. They are also to keep a copy of the list of defaulters in payment of assessed taxes, and allow it to be inspected, without fee, between 10 a.m. and 4 p.m. on any day except Sunday during the next fortnight; copies thereof to be delivered on payment.

On this date, or on any day until the 20th inclusive, a person desirous of having his name entered in the lodgers' list must send in his claim to the Overseers.

Overseers to make out lists of claims and objections of occupiers and lodgers.

Town Clerks to publish lists of freemen voters on or before this date, and keep copies thereof for inspection during the next fourteen days.

Companies, Corporations, and County Councils to deliver half-yearly accounts and pay duty to Commissioners of Inland Revenue not later than this date.

Clerks to Boards of Guardians are, four weeks at least before the 20th of September, to estimate the probable expenditure for the ensuing half-year and the probable balance due to or from each parish for the current half-year, and prepare contribution orders to be laid before the Guardians before the expiration of the current half-year.

3 M.—Bank Holiday, in Scotland also.

5 W.—Latest date for inspection of lists of persons who have not paid poor-rates due January 5.

In boroughs in which there are ten acting justices, Licensing Committees to be appointed in the fortnight preceding the 20th August.

15 S.—Latest date for public inspection of the lists specified under date August 1.

Borough and county lists to be affixed to churches if published on the 1st inst.

20 TH.—Latest date for Town Clerks and Overseers to receive notice of claims and objections, and of omissions from the Parliamentary Counties, Borough, and Parochial electors' lists and registers. These notices should be delivered to the Local Postmaster, in accordance with the Post Office Regulations, which require them to be presented in duplicate not later than the 19th.

Latest date for lodgers to give notice of claims to Overseers.

On or before this date the Clerk to the Justices to give notice to Overseers of the time and place for holding petty sessions at which jury lists are to be produced.

25 TU.—On or before this date Overseers to deliver to Clerks of the County Council and Town Clerks copies of corrupt and illegal practices lists.

On or before this date Overseers to make out lists of claims and objections. These lists are to be signed and published by the Overseers, who are to keep a copy, with the original notices of claims and objections, open to public inspection at any time between 10 a.m. and 4 p.m. on any day except Sunday during the next fourteen days; and copies are to be delivered on payment.

On or before this date Overseers to deliver to Clerks of the County Council or Town Clerks the following lists:—Ownership claimants, ownership portion of register, ownership electors' objections, two copies of occupiers' and old lodgers' lists, one each of occupiers' and lodgers' claims and objection lists, two copies of the non-resident list, and one each of claim and objection lists.

31 M.—Latest date for Overseers to make out list of persons qualified and liable to serve on Juries.

September.

1 TU.—Licences for the manufacture and sale of playing cards and of patent medicines expire on this date.

List of Jurors and notice of special sessions to

Between this date and the 31st December, the District Medical Officer to visit pauper lunatics not in asylums.

Registrars, except of London districts, to post to the Registrar-General a correct return of Births and Deaths during the preceding quarter.

The Standing Joint Committee of every county, and the Watch Committee of every borough, on some day in this month, are to transmit to the Secretary of State, for the year ended 29th September last, a statement of the number of offences reported to the police, the number of persons apprehended, the nature of the charges against them, the result of the proceedings taken thereupon, and any other particulars relating to the state of crime within such county or borough.

In this month two or more of the justices having jurisdiction in a borough to appoint as many of the inhabitants not legally exempt as they think fit to act as special constables.

The walls and ceilings of Common Lodging Houses to be limewashed in the first week of this month.

7 W.—Latest date for Medical Officers to send quarterly list of lunatics to the Clerks to Guardians.

The following licences expire on this date:—Bankers', retailers of beer, cider, spirits in England and Ireland, and foreign wines; publicans retailing sweets and wines, and dealing in tobacco and snuff; and distillers of spirits.

Latest date for Clerk to Guardians to send quarterly lists of lunatics to Commissioners in Lunacy, and copies to Clerk to Visitors.

Clerks of Courts of Summary Jurisdiction to send to the Home Secretary a statement of fines imposed during the last quarter.

12 M.—The revision of the lists of Parliamentary voters, burgesses, county and parochial electors to be completed not later than this date.

Registrars to apply to officiating ministers, on or before this date, for certified copies of all entries of marriages solemnized by them during the quarter ended 30th September.

Latest date to pay Fire insurances due at Michaelmas.

Michaelmas Law Sittings begin.

19 M.—On or before this date Registrars to personally deliver to Superintendent Registrars copies of entries of Births, Deaths, and Marriages made during the previous quarter.

Quarter Sessions to be held this week. Music and dancing licences under 25 Geo. II. c. 36 to be granted and renewed.

On or before this date Town Clerks to complete burgess rolls, to come into operation for one year from 1st November next.

Nine days at least before the 1st November (i.e., on the 22nd) Town Clerks to publish a notice of election of Borough Councillors. All

election notices must have the names and addresses of printer and publisher on their face.

24 S.—Nomination papers in the election of Borough Councillors to be delivered before five o'clock this day, *i.e.*, seven days at least before the day of election.

26 M.—Mayor to attend at the town hall to decide on the validity of objections to nomination papers for Borough Councillors.

This day, *i.e.*, four days at least before the day of election, Town Clerk to publish names and addresses of persons nominated for Borough Councillors, and Mayor to give notice of polling places.

31 S.—Latest date for Superintendent Registrars to transmit to Registrar-General certified copies of entries of Births, Deaths, and Marriages made during the quarter ended 30th September.

Certificates of Writers to the Signet, solicitors, agents, and notaries public in *Scotland*, and of conveyancers, special pleaders, and draughtsmen in equity in *England* expire on this date.

Short licences to kill game expire.

After the fourth day of Michaelmas Sittings courts to sit to hear appeals from Revising Barristers.

November.

2 M.—Burgesses in England and Wales to elect Borough Councillors to supply the places of those going out of office. One-third of the Councillors, those longest in office without re-election, to go out. Municipal Borough Elections in *Scotland* are held on this day.

Copies of draft orders and other documents under Light Railways Act, 1896, to be sent to County, District, and Parish Councils, and various Government departments during May or November.

Burgess-rolls come into operation for one year.

Holiday at Bank Transfer Office and Stock Exchange

9 M.—Date of election of mayors of boroughs under the Municipal Corporations Act. The council of every borough being a county in itself, and the city of Oxford, to appoint a sheriff immediately after the election of the mayor, and elect borough aldermen to take the place of those retiring.

The Lord Mayor of London, having been chosen on St. Michael's Day, is, by 24 Geo. II. c. 48, to be presented at the Supreme Court of Judicature and sworn on this date.

11 W.—Martinmas. Scottish Quarter Day.

12 TH.—High Sheriffs of England and Wales nominated in the Queen's Bench Division for appointment in January next.

15 S.—Solicitors' Annual Certificates expire.

Between this date and December 15th, solicitors, proctors, and notaries public in *England* must renew their certificates.

19 TH.—Within sixty days the half-yearly receipts for interest from the National Debt Commissioners to savings banks to be made out and issued.

Trustee Savings Banks to make up accounts to this date, and within nine weeks publish annual statement.

26 TH.—Municipal Elections in *Ireland* in Boroughs constituted under the Municipal Corporations Act, 1843, are held on this day.

28 S.—Latest date for depositing plans and books of reference in the Private Bill Office of the House of Commons and with Clerks of the Peace.

Latest date for special pleaders, draftsmen in equity, and conveyancers in *England* to renew certificate. (*See Oct. 31.*)

December.

1 TU.—Time expires for lodging declaration with Registrar of Solicitors for certificates.

Clerks of Union Assessment Committees to send in this month the totals of the gross estimated rental and rateable value of the property in the valuation lists of the several parishes to the Clerk or respective Clerks of the Council of the county or counties within which such parishes may be situate.

Chief Constables to transmit returns as to Constabulary force.

12 S.—Latest date for delivering notices, &c., to owners and occupiers affected by private bills.

14 M.—Latest date for renewal of solicitors' certificates.

17 TH.—Railway Companies to pay quarterly instalments of Income Tax on or before this date.

18 F.—General list of Petitions for Private Bills will be made out by the Private Bill Office on or after this date.

20 S.—Clerk of the County Council to make up the "County Register," that is, the Register of County Electors for local government purposes, and also the Parochial Registers, so that it shall be completed before this date. It will come into force on the 1st January next.

21 M.—Michaelmas Law Sittings end.

Common Councilmen in the City of London to be elected on this date.

Latest date for leaving petitions, declarations, &c., at Private Bill Office.

25 F.—Christmas Day. Quarter Day.

Medical Officers of Unions entitled to be paid any extra fees to make out their accounts quarterly to this date, and lay the same before the Guardians.

26 S.—Bank and General Holiday.

District Medical Officer to notify to the Board of Guardians at the commencement of this quarter the paupers whose names have been inserted in the permanent medical relief lists for a period of six months.

28 M.—Quarter Sessions to be held during the week following this date. (*See Jan. 1.*)

31 TH.—Clerk of the Peace to deliver, on or before this date, County lists of voters to the Sheriff of the county, and Town Clerk to deliver Borough lists to the Returning Officer of the borough.

Railway Companies to prepare an annual abstract of receipts and expenditure for the year to this date, or some other convenient day in each year, and, if required, transmit a copy thereof, free of charge, to Overseers of parishes through which the railway runs.

Latest date for Assessment Clerks to send valuation returns to Clerks of the Peace.

Latest date for leaving estimates, lists of occupiers, &c., at Private Bill Office.

End of year for calculation of interest in Post Office Savings Banks.

End of the "official year" for the purposes of the Building Societies Act, 1894.

Annual Police Return to be made to Secretary of State as soon as possible after end of the year.

The following licences expire on this date:—Male servants, carriages, dogs, armorial bearings, and all "Establishment Licences."

Manager & Secretary, 63, CHANCERY LANE, LONDON, W.C. [8]

The Vertical System

Original Inventor and Patentee—T. BOWATER VERNON.

TIMES.—"By this system the most complex body of documents can be arranged with admirable simplicity." "The 'vertical' is the coming system."—*American Publication.*

The CERES System can be had in Boxes, Drawers, Cabinets, Writing Tables, &c., for private, professional, and commercial use; also in Japanned Tin Despatch Cases for travelling and security.

Much used in India and Abroad.

CERES FILING CABINETS.

Stocked in 2, 3, 4, and 6 drawers, Quarto or F'cap, or made to order up to any size. Cabinets also in Inlaid Mahogany, or to any design.

The Records of the whole of the Medical Profession registered by the General Medical Council since 1858, some 75,000, are now being arranged on this system, and when completed will form the most perfect register of its kind in London.

Officials contemplating alterations in keeping their records, should examine this system before deciding.

Correspondence or Interview solicited.

British Inventions and of British Manufacture.

THE CERES WRITING COPIER.

PATENTED.

*Perfection at Last. Press-Copying at an End.
Letter Copied as you Write.*

HUNDREDS
IN USE

HATCH, MANSFIELD & CO^{LTD}

WINE MERCHANTS.

Telegraphic Address:
"LUSCIOUS, LONDON."

Telephone No:
GERRARD, 5325.

By special appointment to His Majesty King Edward VII.
47, PALL MALL, LONDON, S.W.

DIRECTORS:

E. F. G. HATCH, Esq. (*Chairman*).

EARL OF DENBIGH.

Hon. SIDNEY GREVILLE.

LORD HYDE.

J. H. G. LANG, Esq.

(Bell, Rannie & Co.)

Hon. J. MANSFIELD.

A. ROSS MITCHELL, Esq.

C. W. HUGHES, Esq.

C. G. RAYNE, Esq.

(Newcastle-on-Tyne).

HOME DEPARTMENT.

THE extent of the Company's business has been largely augmented by the purchase of those of

BELL, RANNIE & CO. (Established 1715),

LONDON, EDINBURGH, PERTH, DUNDEE & AYR.

BARTON & CO. (Established over 100 years).

Late of St. James's Street, LONDON, s.w

C. G. RAYNE & CO. (Established 1868).

NEWCASTLE-ON-TYNE.

DREMEL & CO. (Established 1858), LONDON.

JENNER & CO. (Established 1837), SANDGATE (Kent).

TATHAM, HUGHES & EARLE (Established 1820),
24, Philpot Lane, LONDON, E.C.

The extensive stocks of the Company, together with those of the above Firms—which were taken over *en bloc*—afford a selection of Wines and Spirits which, whether in point of quality or quantity, is not to be surpassed.

THE Company is also represented by the following Branches:

MANCHESTER...16, Albert Square.

LIVERPOOL...16, Berrey's Buildings,
George St.

LULL.....9, Bishop Lane.

The Company's quotations are the lowest anywhere obtainable.

The Company pays carriage to any railway station in Great Britain, to any port in Ireland, and on quantities of 23 dozen bottles or their equivalent to any port in the world.

The Company only deals in wines of approved vintages.

The Company publishes the fullest particulars of every wine and spirit they quote, and affords every possible guarantee for authenticity.

HATCH, MANSFIELD & CO. LTD.

WINE MERCHANTS.

AGENCIES ABROAD.

TO meet the requirements of Englishmen resident abroad the Company has adopted the policy of establishing a series of agencies throughout the world, whereby customers may obtain in either the smallest or largest quantities the identical Wines and Spirits as supplied to leading Families and Clubs in England, and at the same time have the benefit of all the guarantees for quality and authenticity which the system of the Company affords.

The following are the Company's Agencies Abroad:—

INDIA	BOMBAY	Greaves, Cotton & Co.
	CALCUTTA	Krieg & Co.
	SIMLA	Cotton & Morris.
	MADRAS	Oakes Brothers & Co.

CIGAR DEPARTMENT.

Particular attention is drawn to our list of Cigars and Cigarettes, pp. 34-41 of our Home Price List, all of which have been selected with the utmost care and are in perfect condition for immediate use.

COMPLETE PRICE LIST, INCLUDING CALENDAR OF VINTAGES, AND CONTAINING OVER 400 VARIETIES, FREE ON APPLICATION.

STANDARD ENGLISH DICTIONARIES.

Large fcap. 4to, cloth, 7s. 6d.; half-Persian, 10s. 6d.; half-mor., flexible, 12s. 6d.

THE STUDENT'S ENGLISH DICTIONARY.

Literary, Scientific, Etymological and Pronouncing. By JOHN OGILVIE, LL.D. New Edition, thoroughly Revised and Greatly Augmented. Edited by CHARLES ANNANDALE, M.A., LL.D., Editor of the New Edition of "The Imperial Dictionary." Extensive and useful Appendices. Nearly 800 Engravings on Wood.

"Leaving out of account the unwieldy and expensive recent editions of Webster and Worcester, we have no hesitation in saying that this is by far the most useful one-volume English dictionary at present existing."—*Athenæum*.

In one Vol., fcap. 4to, cloth, 3s. 6d.; half-roxburgh, 5s. 6d.; half-morocco, 7s. 6d.

THE CONCISE DICTIONARY OF THE ENGLISH

LANGUAGE. Etymological and Pronouncing, Literary, Scientific and Technical. By CHARLES ANNANDALE, M.A., LL.D. New Edition, Revised and Extended.

"Stands towards other dictionaries of the smaller character in the relation of the 'Imperial' to rival lexicons—in other words, it holds the 'premier' place."—*Spectator*.

In Four Vols., imperial 8vo, half-roxburgh, £4 net; or half-morocco, £5 net.

THE IMPERIAL DICTIONARY OF THE ENGLISH

LANGUAGE. A Complete Encyclopædic Lexicon, Literary, Etymological, Scientific, Technological and Pronouncing. By JOHN OGILVIE, LL.D. New Edition, carefully Revised and greatly Augmented. Edited by CHARLES ANNANDALE, M.A., LL.D. Illustrated by above 300 Engravings on Wood.

"So far as vocabulary and treatment are concerned, we should not wish for anything better than the new 'Imperial.' The etymology is clear and concise, and the illustrations are copious, appropriate and well executed."—*Times*.

London: BLACKIE & SON, Limited, 50, Old Bailey.

"SOUND WORDS." Their Form and Spirit. Addresses on the English Prayer Book. By the Rev. GEORGE EDWARD JELF, Master of the Charterhouse. Crown 8vo, cloth boards, 3s. 6d.

A VISIT TO THE ZOO. By G. M. STONE. Coloured Illustrations, with "cages" of animals, giving a realistic representation of those in the Zoo. 4to, paper boards, 2s.

GEOFFREY HARRINGTON'S ADVENTURES. By HARRY COLLINGWOOD. Large post 8vo. Six page Coloured Illustrations. Cloth boards, 5s.

FRANK AND FEARLESS; or, Adventures Amongst Cannibals. By W. C. METCALFE. Large crown 8vo, 4 page Coloured Illustrations, cloth boards, 3s. 6d.

HUNTING THE SKIPPER; or, The Cruise of the "Seafowl" Sloop. By G. MANVILLE FENN. Six page Coloured Illustrations. Large post 8vo, cloth boards, 5s.

FLOWERS OF THE FIELD. By the late Rev. C. A. JOHNS, B.A., F.L.S. (31st Edition). Entirely re-written and revised by Professor G. S. BOULNER, F.L.S., F.G.S. With numerous Woodcuts. Small post 8vo, cloth boards, 7s. 6d.; half-calf, gilt, 14s.

[This Edition has been entirely revised, fresh Illustrations have been added, and the natural order of classification has been adopted—an Index referring to the corresponding Linnean system being added.]

NOTE.—In a paragraph recently sent to the newspapers announcing what professes to be a rival edition of Johns' "Flowers of the Field," it is stated that the existing edition published by the S.P.C.K. is now "nec sanis out of date." As will be seen from the above announcement, this statement is entirely unfounded.

A SELECTION FROM SMITH, ELDER & CO.'S LIBRARY BOOKS.

"A work absolutely indispensable to every well-furnished library."—TIMES.

In 66 Vols. Price £49 10s. net in cloth binding; or £66 net in half-morocco.

THE DICTIONARY OF NATIONAL BIOGRAPHY AND SUPPLEMENT.

Edited by SIR LESLIE STEPHEN, K.C.B., and SIDNEY LEE.

A re-issue of the Dictionary in a less expensive and more compendious form is in preparation. The entire work in the existing type will be comprised in 22 volumes instead of 66 as at present, and will be published in monthly volumes at the price of 15s. per volume net. It is hoped that publication may begin in the early part of 1903.

Also in 1 Vol. of 1,464 pages, royal 8vo., 25s. net in cloth, or 32s. net in half-morocco.

THE DICTIONARY OF NATIONAL BIOGRAPHY INDEX AND EPITOME.

Edited by SIDNEY LEE.

ATHENÆUM.—"We can conceive no volume of reference more indispensable to the scholar, literary man, the historian, and the journalist."

. Prospectus, with specimen pages, post free on application.

LIFE AND WORKS OF CHARLOTTE, EMILY, & ANNE BRONTË.

THE "HAWORTH" EDITION.

"Assuredly there are few books which will live longer in English literature than those we owe to the pen of the Brontë sisters."—SPEAKER

In 7 Vols., with Portraits and Illustrations, large crown 8vo., cloth, gilt top, 6s. each; or in Set cloth binding, gilt top, £2 2s. the Set.

Introductions to the Works are supplied by Mrs. HUMPHRY WARD, and an Introduction and Notes to Mrs. GASKELL'S "Life of Charlotte Brontë" by Mr. CLEMENT K. SHORTER, the eminent Brontë authority.

W. M. THACKERAY'S WORKS.

THE BIOGRAPHICAL EDITION.

"I do not hesitate to name Thackeray first. His knowledge of human nature was supreme, and his characters stand out as human beings with a force and a truth which has not, I think, been within the reach of any other English novelist in any period."—ANTHONY TROLLOPE, on English Novelists in his Autobiography.

13 Vols., large crown 8vo., cloth, gilt top, 6s. each. The 13 Volumes are also supplied in Set cloth binding, gilt top, £3 18s.

This new and Revised Edition comprises additional material and hitherto Unpublished Letters, Sketches, and Drawings, derived from the Author's Original MSS. and Note-books; and each volume includes a Memoir in the form of an introduction by Mrs. RICHMOND RITCHIE.

MRS. GASKELL'S WORKS. The "KNUTSFORD" Edition.

"The Edition strikes us as excellent, and will appeal not only to the very large circle who are admirers of Mrs. Gaskell, but, it is to be hoped, to many who will read her books for the first time."—WESTMINSTER GAZETTE.

In 8 Vols. Crown 8vo, cut edges, cloth, gilt top. Price 4s. 6d. each net.

With an Introduction to each Volume, in addition to a Biographical Introduction in the First Volume, by Dr. A. W. WARD, Master of Peterhouse, Cambridge. Each Volume contains a Photogravure Frontispiece. There are also other Illustrations.

ROBERT BROWNING'S COMPLETE WORKS. Cheaper Edition.

Edited and Annotated by The Right Hon. AUGUSTINE BIRRELL, K.C., M.P., and FREDERIC G. KENYON. 2 Vols., large crown 8vo., bound in cloth, gilt top, with a Portrait-Frontispiece to each Volume. 7s. 6d. per Volume.

. Also the UNIFORM EDITION OF ROBERT BROWNING'S WORKS, in 17 Vols., crown 8vo., bound in sets, £4 5s.; or the Volumes bound separately, 5s. each. And the POCKET EDITION, in 8 Volumes on India Paper, price 2s. 6d. net each in limp cloth; or 3s. net in leather. Or the 8 Volumes in a gold-lettered case, 22s. 6d. net in cloth, or 28s. 6d. net in leather.

ELIZABETH BARRETT BROWNING'S POETICAL WORKS.

CHEAPER EDITION. In 1 Volume, with Portrait and Facsimile of the MS. of "A Sonnet from the Portuguese." Large crown 8vo., bound in cloth, gilt top, 3s. 6d.

. Also the UNIFORM EDITION, in 6 Vols., small crown 8vo., 5s. each. And the POCKET EDITION, in 3 Vols., on India Paper, price 2s. 6d. each net in limp cloth, or 3s. net in leather.

MISS THACKERAY'S WORKS. Uniform Edition. Each Volume

Illustrated by a Vignette Title-page. 10 Vols., large crown 8vo., 6s. each.

List of Names, giving Latitudes and Longitudes. Second Edition. Revised to date.
Size, 7½ by 12 inches. 10s. 6d.

ORDNANCE SURVEY MAPS.

ALL SCALES of these Valuable Maps can be obtained for any part of the
British Isles from the London Agent, EDWARD STANFORD.

NOBLEMEN and LANDED GENTLEMEN will find the Ordnance
Survey Maps on the 6-in. or 25-in. scales invaluable for estate purposes; or for
residential purposes, the sheets of the 1-in. survey can be mounted to make up
admirable maps for hunting, motoring, driving, or walking, for 10, 15, 20, or any
number of miles round. Such maps are most convenient when mounted on a
spring roller, or mounted and framed like a picture, and when so mounted they are
ornamental and useful on the walls of a library, hall, or billiard-room. For Illus-
trations and particulars, see STANFORD'S RÉSUMÉ OF THE PUBLICA-
TIONS OF THE ORDNANCE SURVEY, sent post free.

[285]

PUBLIC OPINION

IS THE BEST WEEKLY PAPER FOR THE BUSY MAN AT HOME OR ABROAD WHO WISHES TO KEEP IN TOUCH WITH WHAT MEN ARE DOING, SAYING AND THINKING THE WORLD OVER.

Price Twopence.

Every Friday.

Established 1860.

Edited by **PERCY L. PARKER.**

The purpose of "Public Opinion" is to provide a weekly review of current thought and activity as they are expressed in the world's newspapers, magazines, and books, and to put on record the ideas and activities which make for Religious, Intellectual, Political, and Social Progress. It is a sort of weekly "Whitaker."

What is said of P.O.—"Public Opinion" was very prized by Thomas Carlyle, and was one of the last journals he read," said Dr. W. R. Nicoll, in *British Weekly*, May 2, 1907. "I know of two Prime Ministers who have read regularly 'Public Opinion,'" said *Daily News*, May 15, 1907. "We know of at least one who has misread it," added *Punch*, May 24, 1907.—Mr. R. B. Haldane, Secretary for War, says: "I think you have brought 'Public Opinion' on to the right lines," October 1, 1907.

"PUBLIC OPINION," 32 pages, post free to any place abroad for 13s., or in the United Kingdom, 10s. 10d. per annum.

Offices: 30 & 31, TEMPLE HOUSE, TALLIS ST., LONDON, E.C. [Specimen on application.

Published Monthly, price 6d. (by post 7d.), or prepaid, 6s. per annum, post free, and in Yearly Volumes, bevelled cloth boards, price 7s. 6d.

THE HOMŒOPATHIC WORLD

A JOURNAL FOR THE EXPOSITION OF THE LAW OF SIMILARS AND ELUCIDATION OF ITS OPERATION.

Including Medical News and Literature, Cases from Practice, Social and Sanitary Science, and Correspondence.

Edited by **J. H. CLARKE, M.D., and C. E. WHEELER, M.D.**

THE HOMŒOPATHIC PUBLISHING COMPANY, 12, WARWICK LANE, LONDON, E.C.

[254]

PARIS. 20, RUE DE TOURNON. PARIS.

ARCHIVES DIPLOMATIQUES.

Forty-eighth year of publication.

A MONTHLY RECORD OF DIPLOMACY, HISTORY, AND INTERNATIONAL LAW.

Published under the patronage, and with concurrence, of the Foreign and Colonial Offices of the important countries of the world, by the most eminent Statesmen, Lawyers, and Professors of France and other countries.

Contributors for { Great Britain: Prof. T. E. Holland, K.C. (Oxford.)
U.S. of America: A. Adee, Secretary of State.
Prof. J. B. Moore (Columbia Univ.)

Indispensable for Diplomats, Lawyers, Historians, Merchants, and Bankers, &c.

OPINIONS OF SUBSCRIBERS:

"The Archives Diplomatiques form a record of diplomatic and historical documents, so complete and valuable . . . From a letter of the Acting Secretary of the Russian Foreign Office, September 20, 1905.

"Your record enjoys a legitimate notoriety, and is to me of great service."—From a letter of the Department of Finance of the Canton of Geneva, May 31, 1904.

The Archives Diplomatiques, forming yearly four large 8vo. vols. (2,000 pages), publish every month all important International Treaties, Conventions, Protocols, &c. &c. Yearly Subscription, £2 4s., post free.

Orders should be sent to:—Bureau des Archives Diplomatiques, 20, Rue de Tournon, Paris.

A full prospectus with specimen pages will be sent on application.

KENSINGTON COLLEGE

JAMES MUNFORD,
Director.

QUEEN'S ROAD, BAYSWATER, W.

Telephone, 4348 Paddington.

The only College that

GUARANTEES AN APPOINTMENT to every qualified student at initial salaries varying from about £65 to £300 per annum, and thoroughly trains the sons and daughters of gentlemen in separate divisions.

"The applications for the services of the college-trained students during the past year exceeded the total number of students in the college by 30 per cent."—"TIMES," 17th July, 1905.

GUARANTEED APPOINTMENT BOOKLET Free on receipt of postcard.

Postal and Personal Tuition.

Day and Residential.

DUCROCQ'S SCHOOL OF LANGUAGES, 53, HAYMARKET, S.W.

Ducrocq's School of Languages offers efficient tuition in *any language, either European or Oriental*, which should be of the greatest interest to *Officers* going on Foreign Service, on the most successful method and with the help of *thoroughly qualified native professors*.

PERSONAL TUITION can be arranged for in all languages, either at the above address or at pupil's residence. SMALL CLASSES arranged in French and German only.

The Principal would be glad to receive visits from intending pupils, when he will be able to fully explain his METHOD and the way of teaching followed in the School.

Explanatory Circular will be forwarded post free on application.

DANCING, DEPARTMENT & PHYSICAL EXERCISE.

MISS ROSE BUCK,

Pupil of the late Miss Birch, holds classes daily for Ladies, Gentlemen, and Children at

30, Sloane Street, S.W.

(1st Floor).

Private and Presentation Lessons are given.

For terms and particulars apply Private Address:

52, LOWER SLOANE STREET, S.W.

THE GOUIN SCHOOLS OF LANGUAGES.

The GOUIN METHOD is an "oral method" which makes a rational application of the natural process by which the mother-tongue is acquired.

It teaches by sentences.

When necessary, it utilises the pupil's language to make his lesson clear and profitable.

It is eminently suited for *Examinations* in languages.

"We believe that no other method is so good."
Parents' National Educational Review.

33, GRACECHURCH ST., LONDON, E.C.;
and Branches. Established 1875.

LINTON HOUSE SCHOOL, 11, HOLLAND PARK AVENUE, LONDON, W.

JAMES HARDIE, M.A.,

Assisted by a large staff of Highly Qualified and Experienced Masters.

THE School provides a thorough education for boys of 8 or 9 years of age and upwards. In the Lower Forms the training is sound and general, and the work of the Upper Forms is arranged to give special preparation for the Public Schools, the Universities, and commercial life.

A special form is devoted exclusively to boys preparing for Entrance and Scholarship Examinations at the Public Schools, Naval Cadet, and other Examinations. Five times at St. Paul's, once at Westminster, and once at Blundell's School, Tiverton, have Linton House boys taken the FIRST place in Scholarship Examinations, besides Scholarships or Exhibitions at Charterhouse, Clifton, Eton, &c. Modern Languages and Science (theoretical and practical) receive a large amount of attention. Music, Dancing, and Drawing are taught by Visiting Masters, who are Specialists.

Due importance is attached to gymnastics and swimming, and athletics are judiciously fostered. There is accommodation for a limited number of Boarders, who are under the personal care of Mrs Hardie, assisted by an experienced Matron.

Prospectus and references from the Head Master.

CLAPHAM COMMON, S.W.

S. THOROLD'S, Cedars Road.

A FINISHING SCHOOL for gentlemen's daughters. Twenty boarders and fourteen day pupils are received. The fees include all English Subjects. Languages, Piano-forte, Elocution, Class Singing, Calisthenics, Drawing, and Painting.

The Principal (MISS KINDELL), is assisted by four resident mistresses, and a large staff of visiting professors.

The comfort and health of the pupils are provided for by good and plentiful diet, outdoor exercise and recreation, while the education given should fit them for any position in after life.

Entire care is taken of pupils whose parents are abroad, and references can be given to parents in South Africa, France, Sweden, Ireland, and the United Kingdom.

QUEENSWOOD

CLAPHAM PARK, LONDON, S.W.

Chairman of Governors:

Rev. D. J. WALLER, D.D.

Principal:

Miss ETHEL M. TREW.

Pupils successfully prepared for the Examinations of the London and Cambridge Universities. Complete modern buildings, warmed throughout. Detached Sanatorium. Large Garden and Hockey Field.

THE VARDON PHYSICAL TRAINING COLLEGE FOR LADIES,

29 & 30, Castle Street East, Oxford Circus,
LONDON, W.

Principal:

WARWICK M. VARDON, N.S.P.E., M.B.C.P.E.

Ladies of 17 years of age and over thoroughly trained in the theory and practice of physical education, gymnastics, drills, games, remedial movements, teaching, and necessary theoretical subjects.

Students are not taught exercises unsuitable for their sex and age, but modern exercises developing health, activity, skill, grace, erect carriage, and "nerve."

At the end of the course (about two years) students sit for recognised public certificates. The V.P.T.O. does not issue certificates of its own.

GAMES AND GYMNASIIC MISTRESSES supplied to Heads of Schools. None but holders of recognised certificates recommended.

Kindly mention "Whitaker."

COMMERCIAL EDUCATION IN THE CITY.

TRUTH says: "Our latest discovery in tailoring is Evans, 77, Great Portland Street, London, W., who can actually fit."

We have a large clientele at home and abroad, and have received thousands of testimonials.*The following just to hand (original can be seen):*

"Dear Sir, I am much obliged for your prompt attention. For some years I have been dissatisfied with the various Tailors that have supplied me. I could get none to give me a good fit. I am therefore very pleased to find that you answer to your advertisement, and shall in future be at no loss to know where I can get so well supplied."

"Yours truly (Signed) W.C.
"W. EVANS & Co."

EXPORT DEPARTMENT.

Customers sending for any of the following clothes, stating colours, and the kind of garments required, enclosing a draft or P.O.O. (crossed London and South-Western Bank, Ltd.), will save considerable time, as all orders will be executed and despatched in about a fortnight from the date of receiving same.

Gentlemen living in any part of the world can rely on having same fit and attention as if they visited our establishment.

WHITAKER'S LIST OF SCHOOLS AND CLIMATES

(SEASIDE AND INLAND).

IN the selection of a SCHOOL, the climate to meet individual requirements is often of primary importance to Parents and Guardians, and Educational facilities must generally be considered when deciding upon a locality for residential purposes. A decision is difficult where so many districts in England, Scotland, Ireland, and Wales have evenly balanced claims and diversity of advantages. In "British Holiday and Health Resorts" (*vide* pages 885-958) a uniform method has been adopted of presenting the natural characteristics and salient features of the principal health resorts in the United Kingdom. Many other places as well are noted for the number, variety, and excellence of the PRIVATE COLLEGES and SCHOOLS which flourish under favourable hygienic conditions, but isolated efforts of individuals to draw attention to the special advantages of their local surroundings having proved disappointing, Whitaker's List of Schools and Climates (Seaside and Inland) was established, and now constitutes the special educational supplement to "British Holiday and Health Resorts."

Delicate, backward girls studied. *Entire charge where parents abroad.*
Established 1850.

ACTON.

A healthy, good-class residential suburb of London, in Middlesex. 4½ miles west of Paddington, between Shepherd's Bush and Ealing. Well supplied with open spaces, facilities for recreation and means of access to surrounding districts.

BOYS. ACTON [Estd. 1875]
COMMERCIAL COLLEGE,
LONDON, W.

Principal - E. C. SUNNUCK, F.R.G.S.
To provide liberal education (moderate cost), enabling youths to enter Business direct. Preparatory Department boys from six.

Syllabus.—Holy Scriptures (Protestant lines), Usual English subjects, Elementary Science, Languages, Woodwork, Book-keeping, Short-hand, Typewriting, Business Methods. *Premises.*—Capacious, well-ventilated. Sanitation certified. *Physical Exercise* encouraged. Spacious Playground. Cricket. Football. Sports Club. Swimming. Gymnasium. *Domestic Arrangements* under Mrs. Sunnuck. Sole charge Pupils from America, India, Colonies.

ASHTEAD.

A healthy, elevated Surrey village and rural residential district between Epsom and Leatherhead, 16 miles from London. Ashted Woods, once a Saxon forest, are common lands. Surroundings are similar to Leatherhead, 2 miles.

GIRLS. PARSONS MEAD.

Principal - Miss ELLISTON,
Assisted by competent Mistresses and Visiting Professors.

HOME SCHOOL FOR DAUGHTERS OF GENTLEMEN.
To prepare girls for HOME LIFE; cultivate interest in Literature, Music, Art; to play games energetically without losing interest in quiet, useful occupations.

School Course.—Comprehensive, embracing all usual subjects for modern education.

Healthily situated in own grounds (6 acres). Hockey Field, Tennis and Croquet Lawns, Riding, Swimming. PERFECT SANITATION.

Kindly recommended by Dr. Eustace Smith.

ALDEBURGH.

Population, 2,500. Means of access, G.E. Rly. Location, on coast in between Lowestoft and Felixstowe. Aspect, E.S.E. Soil, gravel. Beach, clean shingle and sand (sea only recedes 60 feet). Bathing. Elevation, 15 feet. Much sunshine. As a health resort is steadily increasing in popularity. Protected from the west. Small rainfall, little fog. Climate dry and bracing, and beneficial for anæmia and debility. The water is quite pure and the supply constant. Drainage modern.

BOYS. Established 1868.

ALDEBURGH LODGE.

M. E. WILKINSON, M.A. Trin. Coll., Oxon.
Rev. F. J. W. GLASS, M.A. St. John's Coll., Oxon.
(Head Master).

Boys prepared for PUBLIC SCHOOLS AND NAVY (7 to 14). Best medium between home and public school. Parents encouraged send boys young, obtaining best results. "Home element" primarily important; *regime* gradually develops responsible character, boys leaving fully equipped.

SCHOOL BUILDINGS. — Extensive, attractive, comfortable. High level, sloping to beach. 5 acres Pleasure Grounds. Modern drainage. Gymnasium; Carpenter's Shop; Electric Light. Large Staff Masters and Governesses.

GIRLS. BELSTEAD HOUSE.

HOME SCHOOL FOR GIRLS OF ALL AGES.

Mr. and Mrs. DUDLEY HERVEY.

Assisted by Staff of fully-qualified English and Foreign Mistresses.

Beautiful air, especially recommended by medical men. Holidays by special arrangement. Grounds of seven acres surround the houses. Numbers limited. Safe bathing. Perfect sanitation. Pure water supply. South and west aspect. Thorough education without cramming. Examinations prepared for by desire. Gardening taught. Bicycles allowed. Terms on application.

ANERLEY.

Healthy residential suburb of London. Altitude above mean sea level 108 to 370 ft. Average rainfall 24 ins. Average weekly bright sunshine 31½ hrs. Average temperature 50.3 degrees. 200 acres of open spaces, including the Crystal Palace grounds and recreation ground.

BOYS.

ANERLEY COLLEGE, S.E.

Recognised by the Board of Education, 1903.

BOARDING AND DAY SCHOOL.

Principal: W. EDGAR WOOD, B.A., LL.B.

Special Forms for London University Matriculation, Cambridge Locals, and Public Schools.

Practical Science Laboratory with separate benches and outfits.

Special attention to Commercial Subjects.

Preparatory form for boys under 8 years of age, under Miss Wood.

Evening tuition for all University and other Examinations, in which the Principal has had over 300 successes.

AYR.

The Medical Officer of Health writes:—"Ayr, due to its sheltered position and its maritime situation, has a very equable climate. Rainfall averages about 40 ins., but rain does not lie long because of the porous nature of the soil. The safe, sandy shore makes Ayr a good resort for children."

GIRLS.

WELLINGTON SCHOOL.

Principals—Miss GAY and Miss SMITH.

Carefully selected, efficient Staff.

Private Boarding and Day School for Girls.

Course of Study: All usual subjects; Modern Languages taught (excellent results); many distinctions gained in Music; Art Department comprehensive, practical; Kindergarten division, certificated mistress; Physical Culture, speciality.

Public Examinations prepared for. Religious, moral and social training studied. Outdoor games, summer and winter.

School Premises specially erected; every essential; sanitation perfect.

Resident pupils enjoy comfort and refinement of home life.

Special arrangements for Pupils from Abroad.

BATH.

The Medical Officer of Health writes:—"Bath City and County Borough. Health resort. Somerset. Pop. 50,000. Only Hot Springs in British Isles. 'Most perfectly equipped modern bathing establishments in Europe.' Extensive Roman remains. Subsoils, freestones, clay, sand, and gravel. Elevation, 60 to 750 ft. Climate: where sheltered, similar to southern marine climates; where exposed, good range of temperature and bracing winds. Sunshine, 1,066, 1808 hrs. Rainfall, moderate, 30 ins. Water supply, pure and abundant."

BOYS.

HAMILTON HOUSE,

LANSDOWN, near BATH.

F. E. ROGERS, M.A.

(ETON AND TRINITY COLLEGE, OXFORD).

Assisted by Two Resident Tutors.

Prepares about 28 boys for the Public Schools and Royal Navy. Very bracing, 800 feet above sea level. Connected by telephone with Bath. Playing Fields adjoin the house. Gymnasium; Workshop. A regular service of motor omnibuses runs from the Guildhall to the house.

GIRLS.

GROSVENOR COLLEGE.

Principal - Mrs. LOCK.

School Course includes Religious Instruction, French, Natural Science, Class Singing, Needlework and usual English Subjects, Lectures for Advanced Pupils, Shorthand and Typewriting, Domestic Economy, Cooking.

Specialties: MUSIC, PAINTING & SOLO SINGING. All Examinations prepared for.

Premises.—Situated on high ground, near Cotswold Hills. Large, well-ventilated rooms, Modern sanitation. Pleasant Garden attached (Lawn Tennis Court).

Swimming, Medical Drill, Riding.

Health and hygiene first consideration.

Preparatory department for children under 9.

BECKENHAM.

Population, 26,330. S.E. & C. Rly. One of the select residential suburbs within 8 miles of London, which covered so wide an area in its development, that it still retains many attractive rural characteristics, including old parks, well-grown timber, extensive gardens, and shady roads. There are excellent social and educational advantages, and the low death rate testifies to the healthiness of the district.

BOYS.

CLARE HOUSE SCHOOL.

Principal - G. H. PHILBRICK, B.A.

To prepare RESIDENT and DAY Pupils under 14 for PUBLIC SCHOOLS and OSBORNE.

School Course includes all usual Subjects. Religious Instruction, moderate Church of England principles.

Situation.—High, open, healthy. Sanitary arrangements perfect.

Premises.—In 3 acres. Large Gymnasium, Playground, Cricket Field. Football, &c., Field close by.

Special attention Drill, Gymnastics and Air Rifle Shooting (supervised by Master).

Junior Class under 8. Experienced Mistresses.

MANY RECENT EXAMINATION SUCCESSES.

GIRLS.

ETON HALL.

(Recognised.)

Principal - Miss McLEAN, B.A. (Lond.)

Assisted by large Staff highly-qualified English and Foreign Resident Mistresses, Visiting Professors.

Receives daughters of gentlemen. Thoroughly sound education, careful Social, Moral Training.

Preparation—All Examinations. Over-pressure avoided.

Specialties — Drawing, Painting, Music, Modern Languages.

Situated in healthy neighbourhood (London 9 miles). Gravel soil. Light rooms.

Large Garden, Riding, Bicycling, Hockey, Tennis, Swimming, Gymnastics (Certificated Professor). *Special arrangements where Parents abroad.* Inclusive Terms if desired.

BEDFORD—see p. 832.

BEN RHYDDING.

A salubrious health resort in the West Riding of Yorkshire, situated in the Valley of the Wharfe, almost adjoining Ilkley. Fine scenery, moorland expanse, bracing mountain air, and exceptionally pure water supply. 16 miles from Leeds; 210 miles from London. Mid. Rly.

CLEVEDON HOUSE SCHOOL.

WHARFEDALE GRANGE.

Principals - E. W. STOKOE, M.A.
S. KENNINGTON, M.A.

PREPARATORY FOR BOYS 7-14 FOR PUBLIC SCHOOLS AND ROYAL NAVY.

Delicate Boys receive special attention. Entire charge taken of those whose Parents are abroad.

PREMISES—High position; dry soil; extensive, well-timbered grounds.

Spacious Class-Rooms and Dormitories. House heated throughout.

Sanitary arrangements and Water Supply excellent.

Cricket and Football Field. Tennis Courts. Large open-air Swimming Bath. Miniature Rifle Range. Private Golf Links.

BEDFORD.

The Medical Officer of Health writes:—"Bedford on the Ouse. Estimated population, 39,000. Railways, Midland, London 47½ miles; L. & N.W. to Oxford and Cambridge. Drainage modern. Water supply constant. Death rate, 10·7 per 1,000. Two Parks and several smaller recreation grounds. River-side Promenade more than a mile in length. Two Open-air Swimming Baths. Noted for its educational advantages; numerous good Private Schools. Soil, gravel and clay. Climate mild, very healthy. General and zymotic death rates very low. Surrounding country is pretty, and, with the river, affords unlimited opportunities for out-of-door exercise and sports. Bedford has made its modern reputation as a place for educational establishments, schools of every sort, for boys and girls of all ages, from kindergarten children to young men and young women preparing for their vocations.

BOYS. ORKNEY HOUSE.

Headmaster—A. H. BLAKE, M.A. (Cam.)

Boys (6 to 14) prepared all usual subjects for Public Schools. Special Class for Royal Navy.

EXCELLENT LIST OF SUCCESSSES.

Four Form Masters (each Form about 12). Visiting Masters for FRENCH, MUSIC, CARPENTERING, DRILLING, GYMNASICS.

HOUSE built for School. Highest situation; in own grounds. Sanitation perfect. Large well-ventilated CLASS-ROOMS. All Games, Bathing, Swimming.

Mrs. BLAKE has entire charge of many boys (parents abroad) from 7 until Public School life begins.

BOYS. AVENUE SCHOOL.

PREPARATORY SCHOOL FOR SONS OF GENTLEMEN.

BEXHILL-ON-SEA.

Sunshine, 1906: Bexhill, 1,990 hours; London, 1513½ hours.

The Medical Officer of Health writes:—"Bexhill has always been celebrated for the longevity of its inhabitants. The death rate for 1906 here was only 8.8. The town holds a first place among health resorts, owing to the general salubrity of the climate; genial influences of invigorating breezes and brilliant sunshine; perfect drainage; the purity of its water; and its freedom from epidemics. The sea-bathing is excellent. Residence at Bexhill is very beneficial in anæmia, scrofula and tuberculous complaints, and in diseases of the respiratory organs, which may be sent here with advantage during the greater part of the year. Especially suitable for convalescents and delicate children."

BOYS.

*Established 1894.***LAKE HOUSE
PREPARATORY SCHOOL.***Head Master—***Mr. FRANK BOND, M.A.**

(BRABENOSE COLLEGE, OXFORD).

BLACKPOOL.

Pop. 57,000. Means of access, L. & Y. Ry., L. & N.W. Ry. Location, on coast between Ribble and Wyre. Elevation, 9½ ft. to 97 ft. Aspect W. Beach, firm clean sand. Good facilities for safe bathing. Owing to its position, exposed to the open sea and the westerly winds, the climate is bracing and invigorating, and of a peculiarly tonic character. The heat of summer is much tempered by the sea breezes, and cool nights counteract the exhausting effects of the high day temperature. On the other hand, in winter the proximity of the sea occasions a marked mildness of the climate as compared with inland towns. Owing to this mildness and the abundant sunshine the atmospheric conditions are often delightful even during the winter, late autumn, and early spring. The water supply abundant, and of the finest possible character. Sunshine, 1,679 hrs., 1906. London, 1,513 hrs.

BOYS.

ARNOLD HOUSE SCHOOL,
SOUTH SHORE, LANCS.

Open and most healthy situation, between
South Shore and St. Anne's-on-the-Sea.

First considerations—Health; Physical and Moral Training.

BOURNEMOUTH.

Sunshine, 1968 hrs., 1906. London, 1,409 hrs.

Is distinguished by the general beauty of its position, which combines the attractions as well as the wholesome influences of sea and health. As a whole, compared with England, it possesses a mild, bright, and fairly dry climate. The atmosphere is naturally pure, sunny, free from fog, redolent of the pine, of low relative humidity, and comparatively undisturbed by high or cold winds. The soil is dry and warm, and supports abundant foliage.

GIRLS. **"ROTHESAY,"**
BOSCOMBE.

Principals - - Miss YORK and Miss WATLING.
ESTABLISHED 1893.

Recognised by Board of Education.

4 Resident Mistresses. 20 Visiting Teachers.

The Course of Instruction is comprehensive, and on successful modern methods. Large Gymnasium, fitted with all appliances for Physical Exercises and Fencing. Splendid premises. Rooms face south. Pupils prepared for Examinations. Entire charge of Pupils from India and Colonies.

BRIDGE OF ALLAN.

The Medical Officer of Health writes:—"Bridge of Allan has a long-standing and deservedly high reputation as a health resort. It is charmingly situated, well wooded, well watered, and sheltered by the Ochils from the north-east winds. Immediately behind it the ground rises by a pleasant country lane to a bracing hillside, so that there is available a choice of climate to suit the weather. The little town is well built, clean, and wholesome."

Bridge of Allan, Stirlingshire. Population, 3,240. On the Caledonian Railway, one hour from Edinburgh and Glasgow. The curative properties of the waters are widely known, and have for many years attracted people from all parts of the United Kingdom. There is no part of Scotland richer in historical associations than the surrounding district. Bridge of Allan may be said to enjoy a variety of climates. The lower part of the town is well sheltered from winter winds, and yet during summer and autumn it enjoys a cool and refreshing climate.

BOYS.

STANLEY HOUSE SCHOOL.

Head Master: J. DAVIDSON KELLY, M.A.

A sound, thoroughly systematic modern Education for Boys between 7-18.

School divided into three departments: Preparatory, Upper Classical, Upper Modern. Subjects appertaining to each division thoroughly taught.

OF YOUNG LADIES.

Preparation for Musical and other Examinations.

Numerous Home and Foreign References.

Prospectuses on application to

MISS BRAIDWOOD.

BRIDLINGTON.

The Medical Officer of Health writes:—"Bridlington possesses a bracing climate, plenty of sunshine, and low rainfall. Its water supply is pure and abundant, and its drainage system excellent. The extensive bay and firm sands afford unrivalled facilities for safe boating and bathing."

BOYS.

CAMBRIDGE HOUSE SCHOOL.

PREPARATORY FOR PUBLIC SCHOOLS
AND NAVY.

Headmaster - C. VENOUR GANE, B.A.
(Scholar of St. Catharine's Coll., Camb.)

Facing the Sea, in climate rapidly becoming known as one of the healthiest in England.

Subjects include Religious Knowledge, English, Latin, Mathematics, French, and Freehand Drawing. Greek if desired.

SEA-BATHING, CRICKET, AND FOOTBALL.

Private Ground. Morris Tube Range.

Games used as a means of inculcating honour and manliness. Experienced Matron.

BOGNOR.

The Medical Officer of Health writes :—"Aspect, S. The air is remarkably pure, blamy, and bracing; having mildness of southern and dryness of eastern coast. Very beneficial to persons suffering from diseases of the chest. Exceptionally good water supply; unrivalled sands and safe sea bathing, and an ideal winter health resort, protected from N. and N.E. winds by the South Downs. The atmosphere of Bognor is clear, dry and exhilarating. Fog, winter or summer, is almost an unknown quantity. In the summer few days occur on which there is not a slight breeze tempering the heat. In the winter the prevailing wind, being S.W., is warm. Snow is hardly ever seen here. At high-tide the sea reaches right up to the parade, the shore getting well washed twice daily." Sunshine during 1906, 2,023'4 hrs.; London, 1,513'2 hrs."

BOYS.**MANOR HOUSE SCHOOL.**

Headmaster: HERBERT GARDNER
(Lon. & Vic. Univ.).

Second Master: G. T. BRASH, B.A.,
B.Eng. (Inter.) R.U.I.

Premises.—New buildings, laboratories, workshop, gymnasium, bicycle shed, dark room, every school requisite and convenience. *School System.*—Thorough work in all branches. Teaching—Preparatory for Scholarship and Entrance Examinations at Public Schools and for Royal Navy.

Games—Playing Field adjoins School. Masters take part in games.

Special arrangements for Boys whose parents are abroad.

Boys met and conducted to and from London.

SOUTHBORNE-ON-SEA.

At eastern extremity of Christchurch Bay. Is much more exposed and more bracing than Bournemouth, of which it is a modern eastern extension. The air is free from all contamination by smoke. Its value for health is due to nature of soil and vegetation, to equability of climate and its mildness in winter, to its being one of the sunniest stations in England, and to the moderate rainfall, particularly the small number of rainy days.

SOUTHBORNE-ON-SEA, HANTS.**BOYS.****MOUNT PLEASANT.**

Head Master - G. E. HOLME, M.A.

Pupils received from ages of 8-14, to be prepared for entrance to Royal Navy and for Scholarship and Entrance Examinations at Public Schools. School situated on high ground on gravel soil, within short distance of sea. Climate very healthy. Most suitable for delicate boys. Drill Sergeant, Carpenter's Shop. Sea Bathing, Cricket, Football.

GIRLS.**ST. CUTHBERT'S SCHOOL.**

Principals—

Miss WILLIAMSON and Miss ROBERTS.

Buildings comprise two Houses, Senior and Junior, accommodating 40 Boarders, standing in 20 acres of beautiful grounds overlooking Sea. Good Playing Field.

The education aims at general culture, physical and social. Special attention given to English, Modern Languages, Music. School Orchestra. Department. Opportunity of attending good concerts.

Efficient staff, including resident Foreign Mistresses, Trained Physical Mistress. London Professors attend for Music and Lectures.

BRIGHTON.

The Medical Officer of Health writes:—"Brighton has the bracing qualities of places on the East Coast with a larger amount of sunshine and more shelter during unfavourable weather. Its rainfall is moderate; the roads dry rapidly after rain. The sunshine is 18 per cent. in excess of that of London, and the superiority is especially great in winter. Brighton is 7 per cent. warmer in winter and 10 per cent. cooler in summer than London. It has an unlimited pure water supply and perfect sanitary arrangements."

Brighton combines with the advantages of a seaside position some of the peculiarities of a large town, and extending as it does some distance inland, it presents great varieties in the individual aspect, in the altitude, and in the distance from the sea of particular sites. It may be almost divided into three towns, viz., Kemp Town at the east, Hove at the west (see Hove, page 855), and Central Brighton. Brighton is favoured in the possession of an aspect south and south-west, and with the advantages arising from the slope of the chalk downs and the open valley dividing the latter. The Brighton sky is famed for its clearness and brightness, and the air for its bracing quality. Sunshine, 1,861 hours, 1906; London, 1,513 hours. Pop. 123,478. L. B. & S. C. Rly.

BOYS.

Large, detached house; healthiest situation; high, facing south; exceptional accommodation; bedrooms and passages warmed. Extensive Grounds, Games, Cycling, Sea Bathing, Drill. Recreation Room (Dancing, Lectures, Badminton, &c.). Social Musical Evenings weekly.

BROADSTAIRS.

The Medical Officer of Health writes:—"Broadstairs is built on the cliffs half-way between Ramsgate and Margate. Aspect, S.E. The town, which is built upon high land on a sub-soil of chalk, thus enjoying the advantages special to this geological formation, has no northerly aspect and is sheltered from cold winds. It is peculiarly fortunate in climatic fluctuations. Remarkably free from fogs and mists. Unusually high record of bright sunshine. The climate is equable and dry, bracing in summer, and mild in winter, suitable for invalids and delicate children throughout the year. The drainage system is excellent, and the water supply pure and abundant."

Sunshine, 2,204 hrs., 1906. London, 1,513 hrs.

PERFECT SANITATION.

Cricket and Football Clubs. Drill under Qualified Instructor. Domestic arrangements under direct supervision of Mrs. Venn.

Entire charge of pupils where parents reside abroad.

Colonial Pupils received and carefully instructed. Reference to Parents in Colonies.

BURNHAM,

Somerset, on the east side of Bridgewater Bay, $7\frac{1}{2}$ miles N. of Bridgewater, occupies a very healthy situation amidst fine coast scenery, with a dry sandy soil and excellent water supply. The climate of this part of the Bristol Channel possesses special recuperative properties, and is beneficial to pupils of delicate constitution, who generally show a marked improvement in health. The late Ven. Archdeacon Denison, in describing its attractions, said that it was the "healthiest place in the world."

BOYS.**ST. DUNSTAN'S SCHOOL,**

Headmaster: K. H. BIRD, M.A. (Camb.).

Boys from 6 to 14 prepared for Public Schools and Royal Navy. Thorough grounding in all subjects, with special attention to the modern side of education. Very young boys under a Lady. Nature Study and Science encouraged.

Education given by resident Staff of University-trained Mistresses and visiting Professors in English, Languages, Science, Art, Music, Swedish Gymnastics.

Grounds.—Sixty acres. Golf, Hockey, Tennis, Cricket, Riding, Driving, Fencing.

Entire Charge of Children from Abroad.
Trained Nurse.

BUXTON.

The Medical Officer of Health writes:—"Buxton is famous for its magnificent scenery, baths, &c.: in centre of Peak district, 1,000 ft. above sea-level—the highest in England—and nowhere is the air purer or more bracing. Water supply exceedingly good and soft. Epidemics are unknown. Prevailing winds, West and South-west. Buxton has a drier atmosphere than the great majority of other resorts; difficult to find a more healthy place or one more suitable for growing boys and girls." Situated at a great elevation among the high lands of the Peak district of Derbyshire, the town of Buxton lies in a deep valley built upon the junction of the mountain limestone and the millstone grit, and is surrounded by bold and picturesque hill and moorland scenery. This valley is approached by a ravine, through which the River Wye flows to its junction with the Derwent.

BOYS.**HOLM LEIGH PREPARATORY SCHOOL.**

Headmaster: STEPHEN L. PETTITT, M.A.
(University College, Oxford).

Situated on side of Corbar Hill, overlooking Buxton, 1,000 feet above sea-level.

Special attention English and Modern Languages. All Examinations prepared for.

Premises large, well ventilated, well warmed. In own Grounds. Gymnasium, Studio, Garden (two Tennis Courts), Field (Hockey, Cricket), Fencing, Riding.

CHELTENHAM.

The Medical Officer of Health writes:—"Cheltenham is a beautiful residential town, the chief present interest of which centres about its great colleges and schools. Of these the Cheltenham Boys' College and the Cheltenham Ladies' College are best known, the latter being the leading institution of its kind in the country. The Boys' College is noted as a preparatory college for the military and civil services. There are also the Dean Close School, Pates' Grammar School, the Training Colleges for School Teachers, &c. The climate of Cheltenham is similar to the rest of West Central England in being mild with a moderate rainfall, humidity and degree of bright sunshine. The effect is soothing and somewhat somnolent. There is no disease which occurs to above an average extent. On the other hand acute rheumatism is very rare, and bronchitis and other catarrhal diseases are well suited. Children of school age appear to do remarkably well here."

BOYS.

BRANDON HOUSE AND SUFFOLK HALL, CHELTENHAM.

Mr. E. R. GURNEY, B.A. (*St. Edmund Hall, Oxford*)

To provide (moderate terms) thorough education on modern lines for Classical, Professional, Farming, Business Pursuits. *Curriculum.*—Divinity, Greek, Latin, French, Mensuration, Land Surveying. Book-keeping, Arithmetic, Algebra, Euclid, Drawing, History, Geography, Shorthand, Agriculture, Chemistry, Physical Science. *Situation.*—700 ft. above sea level, foot of Stretton Hills. *Playing Field.*—Cricket, Hockey, Football, &c. *Domestic Arrangements* under Mrs. Dixon's care.

CLACTON-ON-SEA—see p. 842.

CLEVEDON.

Population, 5,898. G.W. Rly. 133 miles from London. The aspect of the town is north-westerly, with the Welsh Coast on the horizon. It stands upon a spur of carboniferous limestone which runs from Bristol to the coast; and the soil affords good natural drainage. The place is well protected from northerly and easterly winds by the hills behind it, and by abundant woods. Clevedon is a quiet watering-place with a mild and equable climate, restful, comfortable, and beautiful. The prevailing winds are from the west and south-west; there is a good amount of sunshine, and fogs are uncommon. The drainage is excellent. Water supply unlimited and pure. It is generally bright and cheerful, with a peculiarly fresh, green appearance from the flourishing character of the trees and shrubs which line the streets and form quaint copses in the heart of the town. The climate is peculiarly favourable to children, who thrive here remarkably well.

BOYS.

WALTON PINES.

Principal - A. H. DAVIS, M.A.
(Rossall and Trinity Coll. Cambridge.)
Resident and Visiting Masters; Governess for Young Boys. Prepares Gentlemen's Sons (7-14) for Public Schools and Navy.

Colonial Pupils received and specially provided for.

Recommended by the Bishops of Calcutta and Colombo.

CLACTON-ON-SEA.

Pop. 7,453. G.E. Ry. 15 m. S.E. of Colchester, on the Essex Coast. Clacton-on-Sea faces nearly due South, and is protected by cliffs from the North winds and to some extent also from the East. The immediately surrounding country is flat and wooded. The town is built upon a gravel subsoil resting at a depth of 28 ft. upon the London clay. The air is bright, clear, and bracing, and much brilliant sunshine is experienced. Fogs are very rare at Clacton, even when other portions of the Channel district are suffering from them. The rainfall is very small. The prevailing wind is from the south-west. Trees have been planted in all the streets and the surrounding districts by the Local Authority. The chief peculiarity is its dryness, due to small rainfall, porous nature of the soil, and well-made roadways. Clacton-on-Sea is especially suitable to chest cases which require a bracing climate. Sunshine, 1,996 hrs., 1906. London, 1,513 hrs.

GIRLS.

THE COLLEGIATE SCHOOL FOR GIRLS.

Recognised by Board of Education.

Lady Principal - Miss E. M. HAYNES
(Registered in Column B).

CLIFTON.

The Medical Officer of Health writes:—"Educational centre and health resort. Clifton College and many private schools. Population (estimated 1907) 44,509. Means of access, G.W.R., main line (2 hrs. from London), Midland and other railways. Excellent train services. Situation: On sides and summit of carboniferous limestone hills, open Downs of 442 acres at elevation of 300 ft., commanding views of Somerset, the Severn, and the South Wales hills. Suspension bridge at height of 245 ft. above O.D. spans Avon Gorge. Climate mild and equable; air bracing, especially on slopes facing Bristol Channel; the mean temperature during the winter is rather lower than the south coast, but in March and April somewhat higher. The rainfall is not excessive, and does not differ much from that of the south coast. Water supply pure and constant. General death rate of Clifton for past three years averages 12.4. The zymotic mortality, infantile mortality, and fever mortality are very low."

BOYS.

"AVONDALE,"

COLLEGE ROAD.

Mr. ADAM CLARKE ROWLEY
(B.A., Oxon.).

Prepares Gentlemen's sons from 7 years of age for the Public Schools and Royal Navy. Entrance Scholarships gained at Public Schools. Headmaster's Wife personally looks after boys' health and comfort. Games on Downs (400 acres) close to house. Liberal Diet. Swedish Drill, Swimming in Summer. Indian and Colonial Children arranged for during holidays. Special care of delicate boys. Excellent health record.

BOYS.

THE DOWNS SCHOOL,

CLIFTON. BRISTOL.

Headmaster - HUGH C. KING, M.A.
(ORIEL COLLEGE, OXFORD).

Preparatory School for Boys of the age of from 7 to 15, who are prepared and thoroughly trained for the Public Schools, Navy, &c. Modern house in the most healthy part of Clifton, immediately facing Durdham Downs. Great attention given to physical development by Swedish Drill, Gymnastics, &c. Special care taken of young and delicate boys. Fees very moderate.

GIRLS.

ROYAL PARK HOUSE.

SCHOOL FOR GIRLS AND KINDERGARTEN
TRAINING COLLEGE.

Principal - Miss BLANCHE WORKMAN
(B.A., London).

House pleasantly situated near the Downs, with Gardens and Tennis Lawn; commands sunny aspect. Ventilation and drainage perfect. Few strict rules enforced—purpose being to make the life as homelike as possible. Health record excellent. Every care and home comfort. Sound modern education. Entire charge of children from India and Colonies. Pupils from 7 to 19 years old.

CLISSOLD PARK.

Occupies an elevated healthy position, with numerous parks and open spaces, contributing to make it a first-class residential neighbourhood.

BOYS.

Established 1876.

Country excursions for Natural History. Debating and Public Speaking developed.

Domestic arrangements under personal supervision of Mrs. White.

COLCHESTER.

The Medical Officer of Health writes:—"Essentially a bracing place on elevated ground receiving air fresh from the sea nine miles away. Air very pure and free from mists and fogs, but cold in spring. Sunshine above the average. Rainfall low, averaging 28 inches."

BOYS.

THE CEDARS,

STANWAY.

SCHOOL FOR THE SONS OF GENTLEMEN

(Resident Pupils only).

Principals - Mrs. and Miss MANLEY
(Assisted by Resident Governesses and Visiting Tutors).

Situated within 1½ miles of Mark's Tey Station (G. E. Main Line). Pupils are prepared for the Public Schools and may remain to the age of 14 years. Home comforts. Delicate boys receive special attention. Constant supply of Alderney milk and butter from School dairy.

Entire charge taken of boys whose parents are abroad.

CROMER.

The Medical Officer of Health writes:—"Ideal health resort combining pleasures of the seaside with beautiful inland scenery. Cool in summer. Floods of sunshine spring and autumn. Sanitation and water supply perfect. G.E. and G.N. stations." Sunshine, 1,778 hours, 1906.

BOYS.

NELSON'S SCHOOL.

PASTON GRAMMAR SCHOOL,

NORTH WALSHAM.

Headmaster: G. HARE, Trained & certificated Teacher. Aims to retain old Grammar School tone, tradition; and system adapted to fit boys for Professional and Commercial Life. COURSE OF STUDY fixed by Endowed Schools Commissioners, ensuring practical liberal education, moderate cost. Special attention Modern Languages.

SITUATION—High, enclosed grounds; gravel soil; spacious, well-ventilated rooms. Drainage and water excellent.

Physical needs amply provided for—Sea Bathing three times a week. Playing Field, 7 acres. Gymnasium. Colonial and Foreign Pupils received.

COLWYN BAY.

The Medical Officer of Health writes:—"As stated in the standard work, 'The Climates and Baths of Great Britain and Ireland,' Colwyn Bay has become one of the most important health resorts of the north. It owes its rapid rise to its exceptional situation. The town is well protected from the prevailing winds and enjoys a large amount of sunshine. The number of hours of bright sunshine in 1906 was 1,681. The rainfall is low: in 1906 it was 26 ins. Climate in winter remarkably mild and equable. Water supply of excellent quality, obtained from a mountain lake. Sewerage system recently extended. Average death rate during last ten years, 10·8 per 1,000."

BOYS.

CLIVE HOUSE.**PREPARATORY SCHOOL.**

In first rank among British health resorts. Premises stand high in beautiful grounds of 12 acres.

The number of boarders being small, each boy receives individual care. DELICATE AND LITTLE BOYS RECEIVE SPECIAL CARE, AND WORK ARRANGED TO SUIT THEIR CAPABILITIES. Boys have own gardens and own pets.

Sanitary arrangements perfect. Library, Gymnasium, Reading Room. Bedrooms well arranged; brothers can have room to themselves.

Headmaster: Rev. H. E. MOCATTA, M.A.

Highest References.

CROMER—see p. 843.

CROYDON.

Croydon owes its prosperity and progress to its being within 20 miles of London, with an excellent train service, and to various natural advantages. It is one of the largest as well as one of the healthiest towns in the county, its advantages in this respect being due to its sanitation, subsoil, and the pure air from the North Downs, on the northern slopes of which it is situated with attractive rural surroundings.

BOYS.

CROYDON MODERN SCHOOL,

11, TAVISTOCK ROAD.

Principals { Rev. HAMLIN H. JONES, B.A.
Mr. HERMANN DAX.

The Principals take entire charge of the Lower Forms, and limit the number of boys, ensuring almost individual attention.

DEPARTMENT AND HEALTH studied. Drilling; Hockey Club; large Playing Field; Tennis; Croquet; Swimming. Large and convenient premises.

Sole charge of children from Colonies, &c.

EASTBOURNE,

Sussex. Municipal Borough. Population, about 50,000. L.B. & S.C. Rly. 62 miles from London. Elevation, from sea level to 140 feet above; the districts of Mead and Upperton stand upon very high ground. Climate mild, invigorating, moderate rainfall. Bathing excellent.

The Medical Officer of Health writes: "Its advantages as a health resort are much sunshine, pure air, absence of fog, clean, quickly drying roadways, large parks and gardens with many trees, a plentiful and good water supply from wells sunk in the deep chalk, and the proximity to the breezy, health-giving South Downs. The climate is generally beneficial in anæmia, scrofula and tubercular diseases, and skin diseases; and its effects are especially beneficial in the case of convalescent children. Death-rate 1906, inclusive, 10.69 per 1,000; of residents, 9.4 per 1,000. Full benefit of winter sun is secured. Warm, sunny shelter always obtainable in centre of town. Beachy Head breaks S.W. winds, and diverts much rain, dryness of soil being promoted by great porosity of chalk." Sunshine, 2,050 hrs., 1906. London, 1,513.2 hrs.

GIRLS.**EASTBOURNE LADIES' COLLEGE.****HIGH-CLASS PRIVATE SCHOOL.**

HOUSE built for school; near Sea and Downs; large Class-rooms. Sanitary certificate.

Principals { Mrs. WRISTBRIDGE.
Miss K. FORDHAM.

EDINBURGH.

For nearly 200 years the Metropolis of Scotland, apart from its historical associations, has been famous as an educational centre. The town is built on several hills, and the altitude of different portions varies considerably. Its University dates from 1582. In the matter of climate this beautiful city has been well endowed by Nature, influenced in the matter of its bracing properties by the city's proximity to the sea. Strong south-westerly winds blow during 119 days of the year, coming with unbroken, ozone-bringing force from the Atlantic. Winter temperature same as London; summer temperature lower. Public parks, gardens, and meadows occupy 1,180 acres, 150 of which are suitable for games. Sunshine, 1,280 hrs. 1906. London, 1,513 hrs.

GIRLS.**CRAIGMOUNT.**

The education provided by the MISSES GOSSIP is that of a High-class Ladies' School. The instruction, which is thorough and on modern lines, has for special aim the mental growth and individual progress of the pupils. Home life rather than a University career is the end kept in view.

The Course of Study includes all usual subjects. Foreign Languages taught by Resident Foreign Mistresses.

The Grounds, extending to about three acres, afford abundant scope for recreation. The tone of the School is carefully guarded.

Healthy situation. Beautiful surroundings.

GIRLS.**CRAIGMILLAR PARK COLLEGE.**

Principal - - - Madame MURISSET.

HIGH SCHOOL FOR GIRLS.

Situated in one of the finest and healthiest southern suburbs of Edinburgh. Large Garden and Tennis Lawn.

Curriculum extends from most elementary stage to preparation for entrance to University. Limited classes; individual attention, under direct supervision of Principal.

Perfect sanitary arrangements. School heated with hot-water pipes and open fireplaces.

Recreation—TENNIS, GOLF, HOCKEY, &c., AND ALL REFINED GAMES.

GIRLS.**ST. HILDA'S SCHOOL,**

LIBERTON, near EDINBURGH, N.B.

Headmistress - Miss R. STOLTZ, M.A. (Hon. Classics).

Designed to provide an education to develop the moral, intellectual, and physical growth of its pupils.

LIBERTON is one of the most invigorating places in Scotland.

St. Hilda's stands in its own grounds on the top of a hill overlooking Edinburgh.

A sound curriculum is provided. Modern Languages are taught on the Berlitz method. There are special facilities for the study of Music.

Open-air exercise and games much encouraged. Riding and Swimming Lessons given.

EPSOM.

An important market town of Surrey, on western side of Banstead Downs. Occupies a situation in a very healthy open district, possessing attractive sylvan surroundings. Population, 10,918. 14 miles from London, L. & S.W. Rly. 18½ miles L.B. & S.C. Rly.

BOYS.**UPLAND HOUSE.**

Principal - G. F. BURGESS, M.A. (Oxon.).

Aim.—Preparatory for Public Schools and Navy (ages 7 to 14).

Staff.—Strong Staff of Resident and Visiting Masters.

Curriculum.—Includes Singing, Carpentering, Drawing, Swimming, Gymnastics, and Drill. Great care bestowed upon French and English subjects. No evening preparation.

Premises.—Expressly designed; all arrangements as perfect as possible. Sanitation annually tested and certificated. Grounds, 13 acres. Open-air Fives Court and Swimming Bath.

Mrs. BURGESS assisted by Lady Matron.

EXETER.

Occupies ridge-like hill, rising from east bank of the Exe to 150 feet. Open to the south-east but otherwise sheltered. Chief climatic features, warm, soft, mild, equable, calm, and free from storms. G.W. and L. & S.W. Rly.

GIRLS.**PENNSYLVANIA HILL.****EGERTON HOUSE.**

Principal - - - Miss GARDINER.

Aim of the School.—To supply sound and modern education, with individual attention to health and study. Careful moral and physical training.

Foreign Languages thoroughly taught, grammatically and conversationally.

School House.—Situated in own grounds in the healthiest and best part of Exeter. Large premises, with lofty and well-ventilated rooms.

Daily Drill.—Games under supervision. Tennis and Croquet Lawns.

Entire charge is taken of children whose parents reside abroad.

EXMOUTH.

Occupies a sheltered position on the Exe, 11 miles from Exeter. It is a pretty watering-place with considerable natural attractions. The climate is remarkable for its equability—cool in summer, and comparatively warm in winter.

GIRLS.**SOUTHLANDS SCHOOL,**

"FAIRFIELD."

Principals - - - { The Misses JESSIE and FANNY VINTER

(Late Scholars Girton College, Cambridge, M.A. Trin. Col., Dublin).

Assisted by a large and efficient Staff.

THE GLEANER *Jamaica*

or other Newspapers.

Prospectuses of Schools in this List can be placed in the reference rooms of the newspapers in which our advertisements appear.

FOLKESTONE.

Seaport. Population (estimated 1906), 35,500. Means of access, S.E. & C. Railway. 70 miles from London. Location, 7 miles S.W. of Dover.

The Medical Officer of Health writes:—"Elevation, old town (adjoining harbour) lies between two cliffs, upon which modern portion is built, protected from the north by hills. Neighbourhood, chalk cliffs, high Downs behind. Aspect, S. & S.E. Climate: Dry, equable, more or less mild according to elevation. Beach: shingle. Bathing: mixed. Improved Pullman cars on railway. The situation of the town on the cliff, and the fact that the latter projects slightly at this spot, lays it open to considerable ventilation from the sea, while the high chalk range at its back excludes a great part of the colder land winds, especially those blowing from the north. The town is one of the best planned seaside resorts. The comparatively very healthy and dry climate is due to the porous nature of the geological formation, and, in addition, the facilities for drainage make mists, damp and fogs almost unknown. The water supply is constant, and the water exceedingly pure. The sanitation of the town is carefully guarded, and precautions taken from time to time to maintain its efficiency. For an educational centre it is particularly adapted, as there is hardly a day in the winter season when a sunny walk may not be taken and general outdoor exercise indulged in."

Sunshine, 1906, 1,978 hours; London, 1,513 hours.

BOYS. **FELTONFLEET,** EARL'S AVENUE. HOME SCHOOL.

Situated in best part of Folkestone, close to the Sea.

Boys aged 7 to 14 prepared for Public Schools and Royal Navy. Pupils from INDIA AND COLONIES received. Every care given to Health and Home Comforts.

Apply, PRINCIPAL.

GIRLS. **BRAMPTON DOWN.** SCHOOL FOR GIRLS OF GOOD SOCIAL POSITION.

Principals—

Mrs. COOPER and Miss KIRBY, L.R.A.M.

STRONGLY RECOMMENDED

By Dr. WOOD, *Head Master of Harrow*, as combining thorough education with healthy outdoor life necessary for growing girls.

Special Class for YOUNG CHILDREN, who are under Principals' constant supervision.

ELDER PUPILS TAKEN TO BRUSSELS for Spring Term if desired, thereby offering UNIQUE FACILITIES for French, Music, and Art. Private Gymnasium Class; Hockey; Tennis; Sea Bathing.

GIRLS. **ST. HILDA'S.** HOME SCHOOL FOR GIRLS.

MISS ABBOTT receives a limited number of Resident Pupils for home care and education, assisted by highly-qualified English, French, and German mistresses. Religious instruction in strict accordance with the teaching of the Church of England.

Premises pleasantly situated, close to Leas and Sea. Sanitary arrangements perfect. Health of the girls carefully considered.

Large field overlooking Sea for Outdoor Games.

Preparation for University Local Examinations if desired.

GIRLS. **CALLEVA,** FOLKESTONE.

Principal - **Miss PAYNE, B.A. (Lond.).**

Thorough education. Special attention to Elocution and to Modern Languages. Allied School near Berlin, where girls can spend part of Course. Large staff. Individual care. House situated in most open part; a few minutes from Sea. Twenty minutes from Downs. Playing Field adjoining house. Every facility for healthy development. Dormitories large and airy. Separate cubicle for each girl. Entire charge of girls from Colonies.

FRINTON-ON-SEA.

The Medical Officer of Health writes:—"The meteorological observations recorded entitle it to rank high among health resorts. Aspect almost due south; climate healthy and invigorating; equable temperature. Sunshine (1906) 1,926 hrs. Rainfall 22.98 ins.

BOYS. FRINTON COLLEGE.

Principal - - K. STUART, B.A.

Finely situated. Southern aspect. Newly built. Lofty, well-lighted and ventilated Class-rooms and Dormitories.

Prepares for Public Schools, Professional Preliminary, &c. One-third of School entered for last Cambridge Local. All successful.

Every attention to health. Football, Cricket, Gymnastics, Bathing. Liberal Diet. Climate admirably suited to growing boys. Excellent health record. Special care taken of delicate boys. Entire charge of boys from abroad.

GLASGOW.

Is well supplied with parks, public pleasure grounds, botanic gardens, museums, picture galleries; fine University and Cathedral. Education, art and science liberally provided for.

GIRLS.**ST. HELEN'S,**

1, HAMILTON DRIVE, HILLHEAD.

Principals - - The Misses MALCOLM.

Thoroughly efficient Staff, Resident French Mistress.

PRIVATE SCHOOL FOR BOARD AND EDUCATION OF GIRLS.

Elementary, Junior and Senior Departments.

Course of Study.—Provides complete education on most approved MODERN LINES; thorough training given in all practical subjects; a love of literature and interest in study developed.

Pupils prepared for usual Exams. Kindergarten Department under Specialist. Boys received up to 8. Principals personally superintend comfort and home-training of Pupils.

Inclusive Terms on application.

GUERNSEY.

The Medical Officer of Health writes:—"Climate bracing, but equable. Extremely sunny. Average for past twelve years 1,913 hrs. Summers cooler, winters warmer than in England." Sunshine, 1,973 hrs., 1906.

GIRLS.**THE LADIES' COLLEGE.**

Principal - Miss A. L. MELLISH, M.A.

Strong Staff of Qualified Assistants.

Besides the KINDERGARTEN and TRANSITION Classes, there are the LOWER and UPPER School Divisions, in the last of which Pupils are prepared for usual Examinations.

The College was established 1872; present buildings erected 1880, containing large hall, 10 class-rooms, gymnasium, dressing rooms, &c., warmed and ventilated. Average number of pupils, 125. Under College roof is Principal's House, accommodating 20 boarders.

Great attention paid to Physical Education.

Gymnastics, Drill, Games, Swimming.

Fulllest particulars on application.

GRANGE-OVER-SANDS,

Lancashire. Means of Access: Furness Rly. 204 miles from London.

The Medical Officer of Health writes:—"Admirably situated on the shores of Morecambe Bay, with a genial climate and southerly aspect. The water supply is excellent, and the drainage perfect. Owing to its dual character as a sea side and rural health resort, it offers the best facilities for education under most favourable surroundings. In consequence of its situation in the protection of Morecambe Bay, it presents special advantages in the autumn and early spring to those in want of an equable climate never very cold, especially for those affected with bronchial troubles.

GIRLS.**SUNNYBRAE**

SCHOOL FOR GIRLS.

Principal - Miss M. E. BROTHERS

(Registered, Column B)

Assisted by fully qualified Resident and Visiting Staff.

Girls received from 9 years old. Thorough education on modern lines. Intellectual and physical faculties developed in pleasant HOME atmosphere for after-use. Character carefully trained.

Premises.—Built specially, stand high, overlooking Sea. Rooms large, airy, numerous. Outdoor games encouraged. Dry Playground and Tennis Court. Most successful in University Examinations.

Sole charge of Pupils from abroad or requiring extra care.

GIRLS.**MOORHURST,**

KENT'S BANK, GRANGE-OVER-SANDS.

Old-established School for Daughters of Gentlemen

Principal - - Miss BUTLER.

Assisted by qualified Staff. (Registered).

PREMISES beautifully situated; high; overlooking Morecambe Bay. Rooms well ventilated, face sea.

SCHOOL AIMS: To teach pupils how to learn; to use their own judgment; to become sensible, practical, refined and cultured women, healthy in mind and body. Daily Drill. Hockey and other games encouraged.

SCHOOL COURSE includes French, German, Latin, Mathematics, Science, Drawing, Swedish Drill, and usual English subjects.

GIRLS.**KENT'S BANK HOUSE,**

KENT'S BANK.

Principal - Miss BRINDLE.

Receives Young Ladies as Resident Pupils.

Aim.—To form character, develop gradually bodily, moral, and mental faculties, leading to happy, healthy, useful lives.

School Course.—English, Latin, French, German, Drawing, Needlework, Botany, Harmony, Calisthenics.

Extras.—Instrumental Music, Painting, Greek, Italian, Dancing. Preparation for all Public Examinations. Vocal Music specially encouraged.

School premises face Sea. Large, sunny rooms, beautiful situation, pretty grounds. *Entire charge of Orphans or children with Parents abroad.*

HADLEY WOOD.

occupies a sheltered position in a valley adjoining Barnet, of which it is a modern residential extension. The locality is a very open and healthy one. Climate, dry, bracing.

GIRLS.

ST. RONANS.

(Recognised by the Board of Education.)

Principal—

Miss LEDWARD, M.A.

Miss SHORE, B.A., Honours Historical Tripos, Newnham College, Cambridge.

Assisted by an excellent Staff of Resident and Visiting Mistresses.

Thorough Modern Education. Special attention paid to Music, Modern Languages, Drawing and Painting. Entire charge taken of Pupils from India or the Colonies.

Premises: Modern house; 3 acres of ground; 55 feet elevation. Gymnasium, Playing Field, sanatorium, Tennis and Croquet Lawns, Riding and Swimming.

HARROGATE—see p. 852.

HARROW-ON-THE-HILL.

About 10 miles from London. Tops the summit of a rise from a broad rich vale. Its healthy position, genial climate, and beautiful surroundings have contributed to make it a desirable place of residence in the country close to the Metropolis. Harrow is chiefly renowned for its famous public school and its associations with Lord Byron, one of the most noted of its scholars. From the top of the church tower which crowns the hill thirteen counties can be seen.

BOYS.

BOWDEN HOUSE SCHOOL.

Principal { Rev. W. G. PRICE, M.A.
J. C. R. ELLIS, M.A.

HIGH-CLASS PREPARATORY SCHOOL FOR THE SONS OF GENTLEMEN,
FROM 7 TO 14 YEARS OF AGE.

Fine healthy situation on the southern slope of Harrow ridge. Climate bracing. Sanitation excellent. Swimming Bath; large Playing Fields of about 30 acres. Careful moral training; Boys' happiness studied.

Scholarships gained during past two years at Harrow (2), Rossall (2), Repton, &c.

Special terms for Sons of Clergy and Officers.

BOYS.

ORLEY FARM SCHOOL,

HARROW-ON-THE-HILL.

Principal:

B. INNES HOPKINS, M.A. (Harrow & Camb.)

C. BROADRICK, M.A. (Haileybury & Camb.)

Specially built as a Preparatory School on south side of hill. All modern advantages. Large playing fields.

Boys prepared for Public Schools and Royal Navy.

Fifteen Entrance Scholarships gained in four and a half years—four at Harrow School in 1903.

Reference kindly permitted to Head Masters of Harrow, Eton, Haileybury, Marlborough, Rossall.

HAMPTON HILL.

The Medical Officer of Health writes:—"One of the most healthy districts in the Thames Valley, stands on gravel soil at an altitude of about 62 feet. Water supply from Metropolitan Water Board. Excellent drainage system, recently extended, and improved."

BOYS. BURLINGTON HOUSE.

Principal - - - ARTHUR ELSEE, M.A.

Situation.—Gravel sub-soil; in 2½ acres: good workshops; ¼ m. from Fulwell and Hampton Hill Stations.

To give thorough course of instruction to boys intending to become ENGINEERS (Mechanical, Electrical or Civil) or ARCHITECTS. Also good Modern Education where future career undecided. Individual attention. No cramming. Interest in work stimulated. Besides ordinary subjects, Science, Mathematics, Engineering and Architectural Drawing, Machine Construction, Mechanics, Carpentry and Metal Work.

Grass and Asphalte Tennis Courts.

HASTINGS AND ST. LEONARDS.

Mild winter climate. Compares favourably with many southern Continental resorts. Summer here is cool, to the surprise of strangers, who expect the contrary. Aspect, temperature, soil and sky combine to make Hastings and St. Leonards a home of safety and comfort for weakened constitutions desirous of avoiding severe weather. Climate decidedly conducive to recovery from attacks of bronchitis and catarrh; many cases of phthisis do well on the breezy heights all the year round. Sunshine, 1,994 hours, 1906.

GIRLS.

BRAYBROOKE COLLEGE

FOR GIRLS.

Recognised by Board of Education.

Pupils prepared, if desired, for Public Examinations. English, French, Mathematics, Science, Drawing, Drill. Senior and Junior Classes.

HOLMESDALE GARDENS.

Healthiest position, high ground. Sanitation excellent. Well-ventilated Class and Bed Rooms.

Large Field for Tennis, Hockey, and Cricket.

Principal - - Miss FOSS,

Assisted by Certificated Resident Governesses and Visiting Masters. Domestic supervision of Lady Housekeeper. Every care to Health and Home Comforts.

BOYS. UNIVERSITY SCHOOL.

Principal, Mr. ALEXANDER MILNE, B.A.

Assisted by resident University Graduates.

Individual preparation for Universities, Professions, and Commerce. Special feature in School Course is London University Matriculation Examination. Eighty boys passed direct from this School. Chemical Laboratory, Museum, Carpenters' Workshop, Gymnasium, open and covered Playground, &c., and all appointments of well-equipped school. The Playing Fields are beautifully situated. Great attention paid to Physical Development. Cadet Corps attached to 1st Sussex Royal Engineers (Volunteers).

HARROGATE.

The Medical Officer of Health writes :—"Harrogate is the most important centre in Yorkshire for thoroughly equipped private secondary schools. The enterprise and educational zeal of highly qualified teachers, aided by the salubrity of the climate, have made these schools famous in every part of England. Harrogate is known as the 'Queen of English (Inland) Watering Places,' and is world-renowned for the medicinal properties of its waters and its magnificent baths, which are acknowledged to be the finest in Europe. The distinguishing features of the climate of Harrogate are its bracing atmosphere, low humidity, and abundant sunshine. The mortality is and always has been remarkably low. During the last 10 years the average death-rate has been 12·62 per 1000. The incidence of disease amongst the resident population is low. Epidemic diseases are uncommon, and when they occur they are most frequently from imported cases. Respiratory diseases are infrequent and rheumatic fever is seldom seen. Harrogate is undoubtedly one of the best-drained towns in the kingdom. Sunshine records, average for 6 years, 1796 hours."

Harrogate, M.B. Population, 32,000. North Eastern Rly. Location, 18 miles N. of Leeds, 20 miles W. of York. Elevation, 320 feet to 600 feet above sea-level. Neighbourhood, open moorlands. Climate, bracing. Dry, clear air. Water supply, constant, soft. Drainage, modern. Soil, alluvial grit and shale. 1,497 hours' sunshine, 1906; London, 1,513 hours.

BOYS.

HARROGATE MODERN COLLEGE.

SUCCESSFUL AND EXCLUSIVE BOARDING

Buildings:—Include Chapel, Gymnasium, Swimming Bath, Carpenters' Shop.

Grounds:—Eight acres; Playing Fields four acres.

Prospectus, views, and references on application to Headmaster:—

L. C. W. THRING, M.A.

(Marlborough and Trinity College, Cambridge).

HENDON,

Middlesex, is a healthy suburb of London, 7 miles N.W., and possesses rural features unsurpassed within the same distance from town. Climate bracing, neighbouring country undulating. Good drainage and water supply.

BOYS.**HENDON PREPARATORY SCHOOL**

"BURNHAM."

Principals - { **A. J. M. BACON, B.A. (Cantab).**
H. A. FALKNER.

PREPARATORY FOR THE SONS OF GENTLEMEN FOR PUBLIC SCHOOLS AND ALL EXAMINATIONS.

Curriculum includes Religious Instruction, Greek, Latin, French, Mathematics, Drawing; usual English subjects; Carpentry, Riding, Swimming, daily Physical Drill.

Premises detached; garden and playground adjoining; sanitation certified perfect. Large Playing Field for usual games (under Master's supervision). Resident Lady Matron looks after younger boys, and acts as Matron to Boarders.

HEREFORD.

The Medical Officer of Health writes: "On a gravel subsoil, 189 ft. above sea level, with surrounding suburbs reaching 280 ft., intersected by the River Wye, Hereford affords a climate with a happy medium, neither too cold and bracing, nor too relaxing. Water supply and drainage good. Average rainfall, 26 in."

GIRLS.**HARLEY HOUSE SCHOOL.**

Principals - The **MISSSES EARLE.**

Close to Cathedral and Castle Green. Grounds, three-quarters of an acre in extent, afford space for Tennis, Croquet, &c.

House admirably adapted for School purposes; large, lofty rooms, well ventilated; perfect sanitary arrangements.

Boarders and Day Scholars received. Ample time allowed for study and recreation. All active games encouraged.

PUPILS PREPARED FOR HIGHER EXAMINATIONS IF DESIRED.

Classes in Cooking, Dressmaking, Nursing, Wood-carving, &c.

HERNE BAY

Has been described by the Registrar-General as "the healthiest seaside resort in England," and this statement is borne out by the fact that "Herne Bay" and "health" are at the present time practically synonymous words. The death-rate is exceedingly low, and its climatic conditions are such that, while its winters are mild, the hot weather during the summer time is tempered by the cooling breezes from the German Ocean. Analysis of the water proves the same to be of the very highest degree of purity and without any trace of contamination. The drainage of the town is new and in every sense of the word "up-to-date." Herne Bay is in every way suited as a resort for either educational, health, or residential purposes.

BOYS. HERNE BAY COLLEGE.

1866.

EUSTACE W. TURNER, M.A. Oxon.

(Honoursman in Science).

School of 40 Boarders, each receiving careful training. Little boys in separate part of house. Preparation for Matriculation, Professional Preliminary Examinations, Public Schools, or City life. Curriculum includes all English subjects, French, Science, Class-Singing, Needlework, Music (Vocal, Instrumental), Dancing, Elocution, German, Latin, Drawing, Painting, Drill.

Entire Charge Indian and Colonial Children.

HUNSTANTON—see p. 856.

HOVE.

The Medical Officer of Health writes:—"The climate of Hove is singularly dry and fresh, being open to the bare Downs on the north, and the sea on the south. There is nearly always a good breeze, which in fine weather blows off the sea by day and off the Downs at night, thus preventing any feeling of oppressive heat or intense cold. London's foggy days are generally fine and sunny at Hove. It is specially recommended for those suffering from overwork or too active life in a busy town, and as a bracing change from the damper climate of the south-west of England. The humidity of the air is as low as 50 to 60 per cent. in the summer; the ground dries rapidly after rain. Rheumatism is rare. The death returns show that almost half of the persons who die reach the age of 60, and several live to be 90."

BOYS. **HOLLAND HOUSE,**
CROMWELL ROAD.
PREPARATORY FOR PUBLIC SCHOOLS
AND NAVY.

Headmaster: W. B. C. CAWOOD, M.A.
(Keble Coll., Oxford).

Open situation facing South, within short distance of Sea and Downs.

Health, Outdoor Exercise, Diet, greatly studied.

Care of delicate children a speciality.

Special arrangements for Indian Children, Wards in Chancery, and others during holidays.

HUNSTANTON-ON-SEA.

The Medical Officer of Health writes:—"Hunstanton shares with all the East Coast watering-places a great reputation for convalescents. Apart from this, Hunstanton seems specially adapted for children. The rapidly-drying soil, the absolutely safe bathing, the magnificent sands for exercise in wet or dry weather, perfect drainage, and splendid water combine to make it an ideal place for them. The number of schools and the wonderful progress (physically) of weakly children bear testimony to these advantages."

Hunstanton, Norfolk, U.D.C. Pop., 1,893 in winter. G.E. Ry. Location on coast between Cromer and King's Lynn. Within 8 miles of Sandringham, the Norfolk residence of H.M. the King. Aspect, westerly. Soil, chalk. Beach, sand. Climate, bracing. Water, pure and plentiful.

BOYS. THE GLEBE HOUSE.

PREPARATORY SCHOOL FOR THE PUBLIC SCHOOLS, AND FOR THE R.N. COLLEGE, OSBORNE.

Headmaster, Mr. H. CAMBRIDGE BARBER, M.A.
(late Hastings Exhibitioner of Queen's College, Oxford).

The School Buildings stand in their own grounds of 7 acres, 100 feet above sea level, and include Gymnasium, Carpenters' Shop, and detached Sanatorium. Healthy, open-air life. Games and Physical Training carefully organised. Numbers limited to 45; ages, 7 to 14. No day boys are received. Illustrated Prospectus on application.

BOYS. LYDGATE HOUSE

PREPARATORY SCHOOL, HUNSTANTON.

Headmaster - R. A. A. BERESFORD, M.A.
(Formerly Scholar Selwyn College, Cambridge).

Thoroughly wide, comprehensive SCHOOL COURSE. Importance attached ENGLISH generally; ELEMENTARY SCIENCE; GEOMETRY; GEOGRAPHY (magic lantern); MODERN LANGUAGES.

Carpentry, Physical Drilling, Games, Bicycle Rides, Photographic Expeditions, Air-Rifle Club.

EXCELLENT SITUATION for Health on Cliffs, overlooking Sea. Pure Water. Good Drainage. Class-rooms, Dormitories, Bath-room, Play-room, light, lofty, well-ventilated, warmed.

GIRLS.

Established 1891.

RHIANVA COLLEGE.

Principal—Mrs. A. J. HACKNEY (Reg. Col. B.)

Assisted by Resident (German, French, English) and Visiting Teachers.

Receives limited number of resident pupils.

Educational course develops mind and character, preserving and guiding individuality and originality. Successful preparation Public, Musical Examinations.

SPECIAL ATTENTION FOREIGN LANGUAGES.

MUSIC.

Premises.—Large, detached; highest part; west aspect; facing Sea. Library, Orchestra, Debating Society, Tennis, Hockey, Sea Bathing, Swedish Drill. Entire charge where parents abroad.

Suited Anglo-Indian or delicate children.

ILFRACOMBE

Occupies a natural basin almost surrounded by craggy heights. The air is moist and unirritating; breezes are light and from the west; prevalence of cloud is small; there is a large average amount of sunshine. Daily, monthly, and yearly range of temperature is comparatively small. Winter months are warmer and summer months cooler than average of rest of Kingdom. Climate is therefore favourable to all forms of respiratory trouble; peculiarly suited to children affected with catarrh.

BOYS.

PINEWOOD.**Mr. G. T. BENNETT, M.A.**

(University College, Oxford).

Receives a very limited number of Boys to prepare for Public Schools, &c. For boys from abroad, and those who are not strong, the equable but bracing climate is exceptionally suitable. Mrs. BENNETT is a trained Certificated Hospital Nurse.

Position high, dry, and sunny.

The greatest attention given to delicate or backward Boys.

Highest references to Headmasters of Public Schools, &c.

Entire charge.

GIRLS.

OXFORD PARK LADIES' SCHOOL.**Principals - Mrs. and the Misses WARE.**

SOUND MODERN EDUCATION.

Careful training under Christian influence, with Home Comforts.

Attention given to physical development.

Young Children carefully watched over, and entire charge taken.

The House is most healthily situated on high ground, overlooking the Sea.

ILKLEY (IN WHARFEDALE).

The Medical Officer of Health writes:—"A health resort of high reputation due to its invigorating moorland air, the beauty of its scenery, and the purity and healing qualities of its waters, an ideal resort for convalescents, whether influenza, gouty, tubercular or surgical. The moorlands rise on either side to heights of 1,260 to 1,340 ft. One of the most attractive and healthy of our inland watering-places; situated among the noted bracing "dales" of Yorkshire and the valley of the Wharfe. Generally admitted to be pre-eminent for its beautiful scenery of exceptional variety. The death-rate average only 9 per 1,000. Children and flowers thrive vigorously. First-class golf courses, tennis, cricket, fishing, stabling, bathing, &c. Ilkley is noted for its beautiful, high-spirited, well-grown children."

BOYS.

ILKLEY GRAMMAR SCHOOL.

FOUNDED 1607.

Headmaster - Mr. C. W. ATKINSON, M.A.

Administered under a Scheme of the Charity Commissioners as a High-class Modern School for Boarders and Day Boys.

500 feet above sea level, close to Moors.

LEAVING SCHOLARSHIPS TO THE UNIVERSITIES.

Excellent Sanitary Arrangements. Science Lecture Room, Chemical and Physical Laboratories, Art Rooms, Workshop. Large Fields and Playgrounds.

Physical Culture studied without undue strain.

GIRLS.

"GLENDAIR." (Recognised.)

HIGH-CLASS SCHOOL FOR GIRLS.

Principals - - The Misses BALLS,
L.L.A., A.C.P., A.C.T. (registered).

Efficient Staff of Resident (English and Foreign) and Visiting Professors.

Successful examination not sole object. School inspires love of knowledge and culture, training habits which render life-work useful and pleasant; every home comfort ensured.

Curriculum embraces usual subjects for advanced education. Modern Languages. Music, Needlework.

Premises specially built, detached; sanitary and all arrangements most modern.

Gymnasium, Dancing, Riding, Swimming.

Special arrangements for children from India.

JERSEY.

Population, 52,796. The largest of the Channel Islands. Lies 13 miles S.E. of Guernsey, 93 miles from Weymouth, and 133 miles from Southampton. The mild nature of the climate, its exceptionally large amount of sunshine and luxuriant vegetation are its main characteristics. Frost being rare, and lasting snow unknown, the value of the Jersey climate for delicate, strumous, or rickety children is immense, and it is impossible to be in the Channel Islands without noticing the breadth and full development of the children. Sunshine, 2,003 hours, 1906. London, 1,513 hours.

BOYS.

*Established 1857***OXENFORD HOUSE.**

Principals: JOHN E. P. DAVEY, B.A. (Lond.), M.R.C.P.; CHARLES E. DAVEY, M.A., (Honours) Camb., B.Sc.

Classical, Mathematical, and Commercial Boarding School. Preparatory for Universities and all Public Examinations. Many successes.

School Course embraces usual English subjects, Mathematics, Classics, Sciences, Greek, Latin, Shorthand. Optional—German, Music, Painting, Typewriting. Special attention to French.

Modernised premises. Playgrounds, Cricket, Football Field, Tennis Lawn.

Entire charge where Parents abroad.

GIRLS.

JERSEY LADIES' COLLEGE, ST. HELIER'S.

Principal - Miss ROBERTS.

The education of girls is undertaken from the kindergarten to the London University Final Examinations.

Conversational French a speciality of the School Curriculum.

Resident Mistresses prepare for the Royal College of Music in Piano, Violin, and Singing. Large Gymnasium. Mistress for Physical Training. Drill, Games, Swimming. Large Tennis Ground. Sixty separate cubicles. Sunny climate. Suitable to Anglo-Indian Children.

Fees, £20 a term.

KENDAL

The Medical Officer of Health writes:—"Sheltered in the valley of the Kent and on the rising hillsides; reputed to be a wet place, but the rainfall is principally between November and March, whilst the tourist season is frequently delightful fine."

BOYS.

*Founded 1698.***STRAMONGATE SCHOOL.**

Principal - WILFRED SESSIONS, B.Sc.

A sound education by a well-qualified staff. Preparatory for Universities, Professional, Commercial careers. Comprehensive Curriculum. Manly Christian characters aimed at. Religious training undenominational.

School House, 40 boarders. Headmaster's House, 20 boarders. Laboratory, Gymnasium, Workshop, Library, Museum. Pavilion, with drying room.

Domestic arrangements under Mrs. Sessions and macons. Playground, Cricket, Football Field, Hockey, Golf, Cycling, Boating, Swimming. *Individual attention: 80 boys, 7 masters. Frequent opportunity to cultivate leisure hour pursuits.*

KINGSTON-ON-THAMES

The Medical Officer of Health writes:—"Climate mild, gravel soil mostly. Large parks and open country round town. River for rowing and swimming. Beautiful country for cycling. Breezes up or down river cause constant change of air. Paving good, rapidly drying after rain."

BOYS.

GATE HOUSE PREPARATORY SCHOOL.

Principals { Mr. HETHERINGTON, M.A.
Mr. MOSELEY.

Healthily situated, facing River Thames and Home Park. Electric Lighting throughout.

Both Principals have been engaged in Preparatory School work for many years. BOYS BETWEEN THE AGES OF 7 AND 15 PREPARED FOR THE PUBLIC SCHOOLS, NAVY, &c. Special attention paid to Scholarship work.

OUTDOOR RECREATION CAREFULLY ENCOURAGED. RIFLE SHOOTING AND MILITARY DRILL.

Copies of Testimonials and Prospectus will be sent on application.

LEATHERHEAD.

18 miles from London. Situated on the River Mole. A fine range of Downs extends along the east side, thus contributing with numerous other advantages to make the town a healthy and very desirable residential resort.

LEATHERHEAD COURT.

A FIRST-CLASS SCHOOL FOR GIRLS.

Principal - Miss TULLIS.

A healthy, refined School-Home for Girls between 9 and 19.

Premises.—A fine, modern Mansion, in the beautiful country between Leatherhead and Cobham.

Ordinary School Course includes English, Scripture, Mathematics, Science, Modern and Classical Languages, Class Singing and Theory of Music, Drawing, Needlework, Drill and Handwork.

Three Divisions. London Professors attend.

Excellent sanitary arrangements and water supply. Electric Light. Own Laundry.

ELEVEN ACRES OF GARDEN AND PLAY FIELDS.

LLANDUDNO.

The Medical Officer of Health writes:—"The climate of Llandudno possesses many advantages. See 'Climates and Baths of Great Britain' by Royal Medical and Chirurgical Society. Air dry and bracing, average temperature high, winter mild and equable, much sunshine. Sanitation excellent." Sunshine, 1,683 hours, 1906.

BOYS.

TAN-Y-BRYN.

PREPARATORY SCHOOL FOR BOYS.

Headmaster: LEONARD H. EDMINSON, M.A. (Oxon.) and B.A. (Lond.)

Stands in its own grounds, on hillside facing Sea, close to Beach, in a particularly dry and bracing and sunny climate.

Special importance is attached to the sound teaching of English.

Entire charge taken of boys whose parents are abroad.

Great attention given to Physical Development by healthy and varied exercise.

Mrs. Edminson supervises all domestic arrangements.

LEICESTER.

The county town of Leicester owes its rapid growth to its central position and railway facilities. It is situated on the Soar, a tributary of the Trent; 22 miles S. of Nottingham, and 97 miles N.N.W. of London. Leicester possesses a museum rich in local antiquities, a school of art, free library, opera house, and public baths. The New Walk is a pleasant tree-shaded promenade. The old racecourse is now Victoria Park Recreation Ground, and there are two public parks.

BOYS.**STONEYGATE SCHOOL.**

Principal - - - G. E. RUDD, M.A.

Assisted by Resident and Visiting Masters.
Preparatory for Public Schools and Royal Navy (6-15).

Curriculum.—Divinity, Usual English Subjects, Latin, Greek, French, German, Mathematics, Physical Drill and Gymnastics.

Premises.—Specially built in own Grounds outside town. Large Rooms. Spacious Playground. Gymnasium. Fives Courts.

Physical Development.—Specially studied. Access to Victoria Park for Cricket, Football, &c.

Domestic Arrangements.—Under Mrs. Rudd and experienced Matron.

Reduction to Clergy.

GIRLS.**STONEYGATE COLLEGE.**

Principals { Miss MAWSON, B.A., Lond.
Fraulein REITZ.

Assisted by Certificated Resident, Visiting Mistresses.

School Course.—Divinity, usual English Subjects, Mathematics, Latin, French, German, Needlework, Drawing, Class Singing, Hygiene, Botany, Drill.

Extras.—Greek, Instrumental Music, Painting, Dancing, Calisthenics, Swedish Drill.

Preparation for all Examinations. Studies carefully adapted to Pupils' powers, overpressure being avoided. *Specially built in 1886* in highest, healthiest suburb. Sanitation perfect.

Tennis, Cricket, Hockey, Swimming. Musical Evenings. Botanical Excursions.

LITTLEHAMPTON.

On the South Coast. The town is quite open to the south and south-west, and the air is well known to possess invigorating and restorative qualities of a very high order. Sanitation on the most approved modern principles. Water pure and supply constant. Excellent bathing facilities from a wide expanse of fine sand. The health-giving Downs, which give protection from the north and north-east winds, afford ample opportunities for outdoor exercise.

BOYS.**"ROSEMEAD."**

Principal—E. A. HOLLINGBERRY

(Rugby School and St. John's College, Oxford).

Boys prepared for Public Schools and Royal Navy. House stands in its own grounds (about 5 acres) within easy reach of Sea. Private Cricket and Football Field and Gymnasium. Excellent Sanitation. Lavatories and Bathrooms with latest improvements. Boys thoroughly grounded and prepared for Scholarships, &c. Sea Bathing, Cricket, Football, Gymnastics, Riding, &c. *Special arrangements for Indian and Colonial Pupils.*

GIRLS.**PELLEW HOUSE.**

SCHOOL FOR GIRLS.

Principal - Mrs. BRAITHWAITE ARNETT

Assisted by first-class Visiting Professors and Resident Mistresses.

The House stands in its own Grounds, and there is a Playing Field attached. A High-class School in every way. The aim of the Principal is to give her pupils a thoroughly good Modern Education, combined with careful Social and Moral Training, and the advantages of a Refined Home.

Special attention given to Colonial Boarders.

LONDON—see p. 860.

LOWESTOFT.

The most easterly point in England, on coast of Suffolk. Population, 33,123. Means of access, G.E. Ry., Midland and G.N. Joint Ry. Has long enjoyed a great reputation as a health resort, and is one of the most bracing places on the East Coast. Town is open to breeze direct from the North Sea, laden with invigorating ozone, while being completely sheltered from the north winds by high lands and woods. Water pure and supply constant. Drainage modern. Sunshine, 1,990 hrs., 1906. London, 1,513 hrs.

GIRLS.**ARDMORE,
NORTH PARADE.**

HIGH CLASS SCHOOL FOR GIRLS.

Principal and Headmistress—

Miss MARY KIDNER, Assoc. of Trin. Coll., Lond.
(Pianist).

Preparation for Examinations if desired.

Private pupils received for Music, Art, &c.

Premises.—Large; healthily situated. Sea views. Certificated sanitation.

Garden, Tennis, Croquet, Hockey, &c.

LYTHAM.

Dr. Andrew Wilson describes it as "the town of room and space and free air." An all-round-the-year health resort. Known as "the Garden of the Fylde" on account of its number of trees and rich greenery. The climate less bracing, and also quieter, than Blackpool, but somewhat more exhilarating than Southport. It is essentially a residential district suitable especially for patients affected with lung or kidney troubles.

GIRLS.

LOWTHER COLLEGE,
LYTHAM, LANCs.

Recognised by the Board of Education.

Principal - - Mrs. LINDLEY.

School beautifully situated. Excellent health records. Sound Curriculum on modern lines. Large staff, including an M.A., B.A., B.Sc. Higher Froebel Honours, &c. Music and Languages a speciality.

GIRLS.

MALVERN.

Malvern is picturesquely situated on the eastern and western slopes of the range of Malvern Hills, with extensive and magnificent views on both sides. The Hills, which rise to an altitude of 1,400 feet, are easily accessible for delicate persons, either on foot or by carriage. The climate has a most beneficial effect on invalids. The houses are so placed as to receive more than the ordinary amount of sunshine. Weakly children, especially those suffering from tubercular glands or continually recurring catarrhs, in nearly all cases do remarkably well here. The rainfall is low, and the soil dries with remarkable rapidity. The water supply is bountiful and of great purity, and the sanitary state of the district generally of a high standard. Persons having houses to let can obtain "Sanitary Certificates" from the Urban Council, and these are not granted unless the sanitary arrangements are thoroughly up-to-date. The average annual (corrected) death-rate for the past five years is as low as 9.9 per 1,000 of the population. Outbreaks of infectious disease are few and quickly suppressed, as the Malvern Urban District Council are provided with every means for promptly dealing with any case that may arise. No trouble or expense is spared in making Malvern the "Queen of Health Resorts." Pop. 17,500.

BOYS.

THE SCHOOL, MALVERN LINK.

Mr. Wm. DOUGLAS, M.A. (Classical Honours).

Late Scholar of Keble College, Oxford,

Five years Assistant Master at Rossall School, and Mr. E. H. DOUGLAS, M.A. (Mathematical Honours), late Scholar of Eton and King's College, Cambridge, ten years Assistant Master at Glenalmond, receive a limited number of Boys between the ages of 8 and 14 to prepare for PUBLIC SCHOOLS AND NAVY.

They are carefully grounded in Classics, Mathematics, English, and French.

Entire charge is undertaken of Boys whose parents are abroad.

BOYS.

Healthy development by individual teaching and careful training under Christian influence the main object of School Course.

COVERED GYMNASIUM; PLAYING FIELD FOR HOCKEY, TENNIS AND CROQUET.

Careful attention to diet.

Many Open Scholarships have been taken by pupils.

Two sections—Junior and Senior.

Principal - Miss JUDSON.

MAIDSTONE.

The Medical Officer of Health writes:—"Maidstone is situated at the foot of the North Downs, which protect it from the north-east winds, rendering the climate mild and equable. The water supply is acknowledged to be one of the best in the Kingdom."

BOYS.

Founded 1549; rebuilt 1871.

THE GRAMMAR SCHOOL.

Headmaster - REV. C. G. DUFFIELD, M.A.

Preparatory for UNIVERSITIES, ARMY, NAVY, and PUBLIC SCHOOLS.

Curriculum.—Divinity, Classical and Modern Languages, Mathematics, Sciences, and ALL USUAL SUBJECTS.

Premises.—Handsome modern Buildings, large Schoolrooms and Dormitories, Laboratories, Gymnasium, Playground, Fives Court, Bicycle Shed. PERFECT SANITATION.

Athletic Ground rented for Cricket, Football, &c., Rifle Range, Swimming.

Headmaster receives Boarders. Separate Cubicles.

MARGATE AND CLIFTONVILLE.

M.B. Population, 26,000. Means of access, S.E. & C.D. Rly. Location on N.E. corner of coast of Kent, 76 miles from London. Elevation from a little above sea-level to 105 feet. Water supply, constant, from the country district of Wingham, 14 miles from Margate.

The Medical Officer of Health writes:—"Nearly three thousand children are sent yearly to Margate for their education. The chief reasons for the world-wide reputation of Margate as a health resort appear to be: Its dry, bracing climate, the town is exposed to the sea breezes from all quarters except the west; it has the smallest rainfall in England; there is a notable absence of fog; the subsoil is chalk, and the roads rapidly dry even after the heaviest rain. In addition to a large expanse of firm, dry sands there are promenades extending along the cliffs and the sea-front for more than three miles, and a sheltered park in the Dane Valley. The above exceptional advantages combine to make Margate a specially desirable residence for growing children during their school days." Sunshine: Margate, average for 14 years, 1,600 hours, Margate stands on two hills separated by the Dane Valley. The East Hill district is called CLIFTONVILLE; it is the highest part of the town. 1906: hours of sunshine, 1,874; London 1,513 hours.

BOYS.

HERNE HOUSE SCHOOL, CLIFTONVILLE (MARGATE)

(In connection with Heath Brow School,
Boxmoor, Herts).

Principals—

Rev. WM. TAYLOR JONES, M.A., L.C.P.

Average, 25 pupils from 6 to 19. Escorts provided.

GIRLS.

GUELPH HOUSE, CLIFTONVILLE, MARGATE.

"HOME" SCHOOL FOR GIRLS.

Recognised by Board of Education.

Principal - Miss E. FINCH.

Assisted by efficient Staff of Resident Mistresses and Visiting Professors.

LOCATION.—On high ground, close to Sea Front and Sands.

PREMISES.—Rooms large and lofty; view of sea from nearly every window.

SCHOOL COURSE.—Provides comprehensive modern education. Pupils prepared for usual Exams.

Pupils from INDIA AND COLONIES specially provided for. Monthly School Magazine.

GIRLS.

"LARKFIELD,"

26, HAWLEY SQUARE, MARGATE.

Principal - Miss SEARLE.

Special Aim.—Home School for little Girls and Boys needing individual care. Health and happiness considered first. Greatest care delicate children. Recommended to parents travelling or in India or Colonies.

Pupils can be received for whole year, including vacations.

Thorough English education, with accomplishments.

Kindergarten classes for younger children.

Pleasant situation, healthiest part, five minutes from sea. Sanitary arrangements perfect. Large rooms. Gardens for games. Highest references.

MATLOCK.

The scenery of the narrow dales flanked by lofty hills and cliffs of mountain limestone, here known as tors, is very beautiful, whilst its sheltered position gives to Matlock a milder climate than that of Baden.

The Medical Officer of Health writes:—"Matlock is the 'Gem of the Peak' for scenery. Its death-rate is phenomenally low. The district has been a health resort 204 years. Its freedom from epidemics, purity of water, and 'cures' are world known. The season is year round."

BOYS. STANCLIFFE HALL,Near **MATLOCK.****Principal - Rev. ERNEST OWEN, M.A.**

(Assisted by strong Staff of Masters).

Aim.—Preparation for *Public Schools* and *Navy*.
Situation.—550 ft. above sea level. Sheltered from east and north-east, with lovely views of Derwent Valley; sunny position. Ideal air for little boys. *Buildings.*—Massive, with double walls. Large, airy bedrooms. Sanitation perfect. Detached Sanatorium, School Chapel, School Farm, Gymnasium, Carpenter's Shop, Swimming Bath. *Grounds.*—About 40 acres. Cricket (professional coach), Tennis and Football Grounds, Playground, Fives Court, 9-hole Golf Course. Gardens, Conservatory 150 ft. long. *Curriculum.*—Usual for classical and modern education. Special attention conversational French and German.

MITCHELDEAN.

12 miles from Gloucester, is on the outskirts of the Forest of Dean. The climate is most healthy and the air very bracing. In the proximity is fine scenery; large fruit farms; horse and cattle breeding establishments.

BOYS.**BRADLEY COURT AGRICULTURAL AND ENGINEERING SCHOOL.**

Each pupil an individual problem. Special care with backward and delicate boys. Full Farm course. Full Engineering course. General School curriculum with much outdoor and manual work. NEWQUAY.

The Medical Officer of Health writes:—"Newquay possesses, in the highest degree, all the well-known climatological characteristics of Cornwall, with the additional advantage of being more bracing than the extreme westerly and southerly portions of the county. The climate of Newquay is characterised by (1) the remarkable equability of the temperature, (2) the small amount of humidity, (3) the very great proportion of sunshine, and high temperature in winter. Temperatures - Mean annual max. 55°9, mean min. 47°2, mean dry bulb. 52°6, wet bulb. 50°2, mean range, 8°7. Rainfall, average annual fall 33°5 in. Average number of rainy days, 186. Sunshine, annual average, 1,760 hrs. Average daily sunshine, 5 hrs. Daily summer average, 7 hrs., winter months 3 hrs. Prevalent winds are westerly. The mild winter climate renders Newquay particularly suitable as a residence for invalids and children of delicate constitution. Sunshine, 1,879 hrs., 1906. London, 1,513 hrs."

BOYS.**NEWQUAY COLLEGE, CORNWALL.**

Principal: OSWALD D. PARKER, LL.D.(Lond.).

THE IDEAL LIFE FOR BOYS.

Thorough Tuition for all Examinations amid the happiest and healthiest surroundings.

Entire charge of Colonial pupils.

TOURISTS AND VISITORS.

PLYMOUTH.

Plymouth, with Devonport and Stonehouse, on a promontory which projects into Plymouth Sound, is separated from mainland by the Tamar, forming the harbour called the Hamoaze, around which Devonport is built, 2 miles N.N.W. of Plymouth, standing very high. The three towns combine all the attractions of an arsenal, a mart, and a place of pleasure, with all the interests of one of the most historical sites in the kingdom. The average yearly temperature is 50 degs.; the prevailing winds are from the W. and S.W. Climate mild and equable; abundant supply of pure soft water. Aspect due south. Continuous snow and severe frost are rarely met with. The celebrated Hoe is a magnificent promenade. The Corporation has a Free Library, Baths, Museum, and Art Gallery, and maintains the Hoe, where the famous game of bowls was played. The chief library contains 60,000 volumes. There are several parks and recreation grounds. Sunshine, 1,848 hours, 1906. London, 1,513 hours.

BOYS.

HOE GRAMMAR SCHOOL.

Gymnasium. *Domestic Arrangements*.—Under Mrs. Chennells and experienced Matron. *Playing Field*.—Cricket, Football, &c. *Entire charge where parents abroad or during holidays*. Inclusive fees.

RAMSGATE.

The climate of Ramsgate is equable, invigorating and bracing—unmarred by sudden change. In the summer the sun's rays are deliciously tempered by cool sea breezes. Fogs are practically unknown. The last report of the Medical Officer of Health contains the following statement:—"The year (1906) was characterized in the district by a rainfall somewhat below the average, only 21.37 inches, and by an amount of bright sunshine above the average, viz. 1,996 hours. These climatic features were also favourably distributed so that the three winter months were dry and unusually sunny, whilst the summer months were cooler than usual." The zymotic death-rate in Ramsgate was only 1.0 per 1,000 of the population. Ramsgate is favoured with a relatively warm, relatively equable, and moderately dry climate. Its sky is moderately free from cloud. Its rainfall and the number of its rainy days are smaller than those of the great majority of the stations in England. Sunshine, 2,028 hours, 1906. London, 1,513 hours.

BOYS.

CHATHAM HOUSE COLLEGE, RAMSGATE.

Founded 1797. Rebuilt 1882.

Premises.—In own grounds (1½ acres), south aspect, spacious and convenient, Electric Light, Laboratory, Workshops, Gymnasium, Library and Museum. *Playing Field*.—3 acres. Cadet Corps. Rifle Club. Sea Bathing. Domestic arrangements under Principal's Wife and Lady Matron.

READING.

The Medical Officer of Health writes:—"Reading has a healthy, equable climate with a moderate rainfall, the annual average during the past 26 years having been 23.7 inches. The beneficial effect of this is seen in the low death-rate."

BOYS.

READING SCHOOL.

Present School rebuilt in 1870-71, consisting of Main Block, Big School Room, two Masters' Houses, Headmaster's House, Chapel, Laboratories, Carpenter's Shop, Gymnasium, Swimming Bath, Sanatorium, Armoury, &c.

*References (Social) requested.***RUGBY.**

Population, 16,830. A town of Warwickshire at the Swift's influx to the Avon, 83 miles N.W. of London, L. & N.W. Ry. It is an important railway junction, a great hunting centre, and the seat of a great public school. In centre of a fine tract of country on the south bank of the Avon, 400 feet above sea level. The modern drainage and supply of pure water make it one of the healthiest places in England. Its educational facilities have a world-wide reputation. Among the more noteworthy of the school buildings are the Natural History Museum, the Temple Reading Room and Art Museum, with its interesting collection of pictures and casts, the Temple Observatory, the Jex-Blake Swimming Bath, and the Gymnasium.

BOYS.

OAKFIELD.

PREPARATORY SCHOOL FOR BOYS.

Principal - T. ARNOLD WISE, M.A., J.P.

Situating on brow of Bilton Hill.

Playing Fields (11 acres) attached to house. Covered Swimming Bath.

Drainage and sanitary arrangements reconstructed on most approved principles.

Fives Court. Carpenter's Shop. Library.

BOYS AND GIRLS.

TYNTESFIELD,
HILLMORTON ROAD.

Principals—

Miss MARGARET SIZE

(Reg. Col. B.; Froebel Higher Cert.).

Miss H. SIZE

(Cert. de l'Academie de Paris; Froebel Cert.).

KINDERGARTEN AND PREPARATORY
SCHOOL—BOYS AND GIRLS.

Continuous system of Education from 3 to 13.

Curriculum.—Scripture, English subjects, Nature Study, French (special feature), Drawing, Class - Singing, Gymnastics. Other subjects added when sufficient advance made. Music, Dancing. Handwork daily; Kindergarten occupations and Needlework. Kindergarten children attend to own gardens.

ST. ALBANS.

Population, 16,019. Means of access, Midland Rly., G.N. Rly., L. & N.W. Rly. 20 miles from London. An ancient and historic city. Its healthiness is ensured by its altitude and the existence of a bracing climate, constant supply of pure water, and modern drainage. The situation enables residents to enjoy many forms of healthy sport which the countryside affords. The fine Abbey is one of the most remarkable in England regarding its size and variety of architecture.

BOYS.

DIRLETON HOUSE SCHOOL.

HOME SCHOOL FOR SONS OF GENTLEMEN.

E. ATHERTON CUMMING, B.A.

Boys prepared for Osborne and all Public Schools. Twelve Boarders only taken.

Special care taken with delicate boys.

Breathing exercises form part of the school curriculum, and there are special classes also for boys for whom breathing exercises have been medically ordered.

The bracing situation (400 feet above sea-level) is particularly adapted to build up the physique of the boys. Highest references.

Mrs. Cumming corresponds regularly by every mail with the parents of pupils abroad if desired.

GIRLS.

MANOR LODGE.

(Recognised.)

Principal - - - Miss PALMER.

Assisted by Competent, Certificated English and Foreign Governesses: Visiting Professors.

High-class Boarding and Day School to combine educational benefits of best Public Schools with cultivation of high moral tone and refined manners by personal individual attention and training. Young and delicate children studied.

Specialities.—English, Science, Music, Drawing. Well-ventilated school buildings apart from house. Large Garden for Tennis, Hockey, &c.

Classes for Little Boys.

ST. ANDREWS—see p. 870.

ST. ANNE'S-ON-SEA.

The Medical Officer of Health writes:—"The climate is of a medium character, being milder, less boisterous and bracing than Blackpool, but more bracing than Southport or Lytham. It is built entirely on sand, which immediately absorbs all moisture, and this fact, together with the exceptionally small rainfall it enjoys, gives the atmosphere a feeling of dryness, lightness and vigour. The sunshine, moisture, and temperature compare favourably with other neighbouring seaside resorts, the last being warmer in winter and cooler in summer than inland towns."

GIRLS.

ST. ANNE'S HIGH SCHOOL.

RESIDENTIAL FOR GIRLS.

Principals—

Miss HALL and Miss FULSTON.

Spacious Premises, facing Sea, North Promenade. Large Playing Field.

EDUCATION on modern lines. Large resident Staff of Graduates and highly-qualified Mistresses.

KINDERGARTEN. (Full Froebel Certificated Mistress.)

GIRLS.

LINDEN HURST COLLEGE.

HIGH-CLASS BOARDING SCHOOL FOR GIRLS.

Charming Position on Sea Front.

Pupils prepared for Public Examinations at parents' request.

PHYSICAL TRAINING a special feature.

FEES MODERATE.

Principal - - - Miss MARK.

Assisted by Certificated Governesses and Visiting Masters.

References on application.

ST. MARGARET'S BAY.

The Medical Officer of Health writes:—"St. Margaret's Bay, situated between Deal and Dover, owes its pure bracing air to the fact that it is almost entirely surrounded by sea. It is a small and quiet seaside retreat divided roughly into two portions, one situated below the cliffs on the beach and protected from the N.E. winds, the upper portion situated a considerable distance above the sea on the chalk. The climate is very similar to that of Margate, with a S.E. aspect."

BOYS.

SUNNYDENE HOUSE SCHOOL.

ST. MARGARET'S BAY, KENT.

Headmaster: S. E. SWEATMAN, M.A. (Oxon).

Assisted by Resident and Visiting Masters.

Prepares limited number of Boarders for Public Schools and Royal Navy. Special attention delicate boys, under personal care of Mrs. Sweatman (a fully qualified nurse).

School House, specially built 1899. Elevation, 400 feet. Pure water. Certified sanitation.

Curriculum includes usual Form subjects.

Playing Field.—Cricket, Football, Hockey, Tennis Court. Great importance attached Drill, Breathing Exercises.

Highest references.

Entire charge Pupils from Abroad.

GIRLS.

PENLEE,

ST. MARGARET'S BAY.

Principal - - - Miss L. WIDLAKE.

(Cambridge Training College.)

Curriculum includes all subjects comprised in good broad Education, aim being development of moral, physical, intellectual faculties to full extent. Religious teaching unsectarian.

Music and Languages a speciality.

Special care given to girls' health and homelike life.

Excellent situation on Cliff, overlooking sea in front, open country behind. Full opportunity for Cricket, Hockey, Gardening, Tennis and Croquet.

Highest references.

SCARBOROUGH.

The town possesses some public pleasure gardens of great natural beauty, acquired and maintained by the Corporation. Near the town golf links are the new public lawn tennis courts and croquet grounds.

The Medical Officer of Health writes:—"Owing to its situation on the coast, Scarborough enjoys a climate which is mild and equable. The force of the prevailing westerly winds is greatly mitigated by the hills which surround the town on the inland sides. Only for a short time in the spring are the winds easterly, and this is the one period of the year in which Scarborough is unsuited for the delicate. The amount of sunshine is considerable. The average rainfall for the last three years is 20.6 inches. The mild, bracing climate and pure air make Scarborough eminently adapted to the favourable development of youths of both sexes."

Sunshine, 1,580 hrs., 1906. London, 1,513 hrs.

BOYS.

THE MOUNT SCHOOL.

PREPARATORY FOR PUBLIC SCHOOLS.

Principal: HERBERT WALTON, B.A. Lond.

Thorough grounding in usual subjects, Latin, Greek, German (if desired), French, English, Essay Writing, Arithmetic, Geometry, &c.

Situation.—Sunny position close to Oliver's Mount.

PREMISES SPECIALLY ADAPTED FOR SCHOOL.

Good Playing Field of about 2½ acres, with pavilion.

Liberal Table. Each Boarder receives individual care of Mrs. Walton, ensuring utmost comfort and attention in matters of health.

Physical Drill twice a week.

BOYS.

GRAMMAR SCHOOL,

33, ALBERMARLE CRESCENT.

Headmaster—

JAMES WHEATER, Inter. B.A. (Lond.).

Efficient Staff of Resident and Visiting Masters.

In Public Examinations this school holds an unequalled record.

Of nine entries for Engineer Studentships, Royal Navy, seven successes, including first place.

House situated in pleasant, healthy locality. No case of serious illness for 30 years.

BOARDERS RECEIVED ON REASONABLE TERMS.

ST. ANDREWS.

Pop. 7,621. The ancient University town and Royal borough of St. Andrews stands on rocky plateau at edge of St. Andrews Bay, 42 miles N.N.E. of Edinburgh, on coast of Fifeshire. Keen bracing climate, fine sands, cliff scenery.

BOYS.

ST. SALVATOR'S SCHOOL.

Headmaster - A. G. Le MAITRE, M.A.

(Andrew Exhibitioner at St. John's Coll. Oxford).

Assisted by a competent Staff of Resident and Visiting Masters.

Designed to afford a sound general education and prepare for Public Schools and Navy.

Facing Sea and close to golf links, its healthiness of situation renders it admirably suited for a school.

Secured second open scholarship at Sedburg, 1907.

Field of 4 acres for outdoor sports. Gymnasium, &c. Well-equipped sanatorium.

GIRLS.

VALLEY BRIDGE HOUSE,

SOUTH CLIFF.

Principals - - The Misses WHITEHEAD. English and Foreign Certificated Mistresses; Visiting Professors. Receive limited number of Boarders.

Aim.—To impart sound practical education, most approved modern methods.

School Course.—Usual English subjects, Divinity, Mathematics, French, Latin, Science, Drawing, Painting, Class-singing, Drill (Gymnasium).

Preparation for all Examinations. Situation pleasant. Health record excellent. Liberal domestic arrangements. Every facility outdoor games. Tennis, Hockey, Riding, Swimming, Sea Bathing. Entire charge of Indian, Colonial Pupils.

GIRLS.

ARUNDEL HOUSE.

MODERN EDUCATION AT MODERATE FEES.

Principal - - Mrs. A. E. SAUNDERS.

(Cambridge Teachers' Diploma).

Assisted by a Resident Staff of English and Foreign Mistresses and Visiting Masters.

Curriculum.—English subjects, Latin, French (taught conversationally), Mathematics, Music, Drawing, Painting, Art Needlework. Special attention paid to Physical Training. Organised Games.

Inclusive terms if desired. Number of boarders limited to twenty. Domestic arrangements under the care of an experienced Matron.

Illustrated Prospectus on application.

SALISBURY.

Pop. 21,900. A cathedral city in a fertile valley, on the River Avon, 22 miles N.W. of Southampton, 83 miles from London (L. & S.W. Rly), rich in historical and ecclesiastical associations. Fine public park, museum, swimming baths. Stone-henge (colossal ruins) easily accessible.

BOYS.

SALISBURY SCHOOL.

Visitor: LORD BISHOP OF SALISBURY.

President of Council:

Rev. CHANCELLOR BERNARD.

Headmaster { E. A. PHILPOTS, M.A. Trinity,
Cambridge, B.Sc. London.

Bursar: HAMILTON FULTON, Salisbury.

High, open, healthy situation outside town. Modern buildings, including Laboratory, Gymnasium, isolated Sanatorium in twelve acres of land. Sanitation certified by local authority. Electric Light and hot water pipes throughout. Wholesome, unlimited diet. Strong staff. Comprehensive curriculum. Good examination successes. Further particulars on application.

SEAFORD.

Population, 3,355. On the Sussex Coast, 58 miles from London, between Brighton and Eastbourne. L.B. & S.C. Rly. Climate of Seaford is equable, but bracing for south coast health resort. Never very cold in winter, and summer heat always tempered by cool sea breeze, so that hottest days in summer are not relaxing. It is a climate eminently suited to convalescents. The air has a true tonic effect on sick patients and produces a really marvellous improvement in a short time. The climate is dry, rainfall being small and, owing to chalky sub-soil, quickly absorbed. There is a large amount of sunshine enjoyed, and nothing to intercept it. There are no high hills to the west to cut off the evening light, and in the winter the sun sets in the ocean. The prevailing winds are south and west. From the north and east winds the town is considerably protected by high downs. The death rate has always been remarkably low, and the great age to which many inhabitants live is quite proverbial. The Seaford Convalescent Home claims to have been the first of its kind established in the county.

BOYS.

**NEWLANDS,
SEAFORD, SUSSEX.**

Mr. WILLIAM A. WHEELER, B.A.
(Kemble College, Oxford),

Mr. J. M. HAY GRANT
(Emmanuel College, Cambridge),

With Assistant Masters, prepare BOYS (8-14)
for Public Schools and Royal Navy.

USUAL COURSE OF INSTRUCTION.—Scripture, English, French, Latin, Greek or German, and Mathematics.

Playing Field (4 acres). Boys' Games carefully organised. Drilling, Boxing, Dancing.

Miss E. Wheeler takes special and personal care of the health and comfort of the boys.

BOYS.

**LEXDEN HOUSE SCHOOL,
SEAFORD, SUSSEX.**

Principal F. C. B. WELCH, B.A.

Boys between eight and fourteen specially prepared for Public Schools and Osborne College.

The Buildings, specially erected, stand in 6 acres ground on Downs. Three-quarters mile from Sea, hence Down and Sea Air combined. Rooms large, well ventilated. Sanitary arrangements certified perfect. Usual Curriculum. Religious Instruction part of regular teaching. Work varied hourly, mostly done in morning, not exceeding two hours consecutively. Playing Field. Experienced Matron. Large Play Room and Swimming Bath.

SANDOWN.

Occupies a healthy position, open to sea and Downs, on N. end of Sandown Bay, on S.E. coast of Isle of Wight. Is a bright, bracing, but relatively warm health resort, with great expanse of sea. Sandy shore, fairly dry situation.

GIRLS.

FROEBEL HIGH SCHOOL.

Entire charge of Indian and Colonial Pupils.

**WHITAKER'S PEERAGE
FOR 1908**

CONTAINS

AN EDUCATIONAL SUPPLEMENT.

SEATON.

The Medical Officer of Health writes:—"A small watering place on the south coast of Devon, situated in the centre of the large bay, extending from Portland Bill to Start Point. It has a fine bracing climate, tempered by a soft mildness. It is sheltered from the south-west by Bear Head, and from the north-east by the high lands between it and Lyme Regis. Average rainfall, 28 inches. Ground dries quickly owing to gravel subsoil. Abundant sunshine."

GIRLS. "MONTPELLIER."

Principal - MISS ROSER
(Cams. Higher Exam. Honours Cert.; South Kensington Science Certs.; Teacher's Training Cert.).

HIGH-CLASS SCHOOL FOR GIRLS.

Miss ROSER, assisted by competent Resident Staff, having wide experience (England and Australasia), will gladly furnish references.

Household arrangements most comfortable and home-like. House in thorough order and furnished on modern hygienic principles.

School Course.—Includes Divinity, English subjects, Latin, French, German, Mathematics, Botany, Drawing, Singing, Needlework, Swedish Drill.

GIRLS.**FRIEDENHEIM
SCHOOL FOR GIRLS,
SEAFORTH LODGE.**

Principal - Miss Mary GROVER.

Highly competent Resident Staff.

Recognised by Board of Education.

School Course.—All English subjects, Mathematics, French, German, Latin, Science, Needlework, Drawing, Painting, Theoretical Music, Class-Singing, Physical Exercises, Dancing.

Extras.—Violin, Solo Singing, Riding, Dancing.

All Examinations prepared for.

Premises.—Fine, modern, accommodating forty boarders. In own grounds (three acres). Bedrooms face Sea. Sanitation perfect. Special Games' Mistress. Tennis, Cricket, Hockey, &c.

Special Nursery Department 2 to 8.

SEVENOAKS.

The Medical Officer of Health writes:—"The main part of the town of Sevenoaks is built on high ground. The principal part of the High Street is situated at an elevation of over 500 feet above the sea level. The district is essentially of a good-class residential character, and, from absence of manufactories, is clean and attractive. The air is bracing. Soil, dry and gravelly. Excellent public water supply from deep wells, and main drainage to the Darent Valley main sewer."

BOYS.**AVENUE HOUSE SCHOOL.**

Principal - Mr. S. E. SYMES.

Boys prepared for Public Schools, Professional and Business Life. Number of Boarders limited.

Healthily situated, at an elevation of 450 feet above sea level. Sanitary arrangements in perfect order.

**WHITAKER'S PEERAGE
BARONETAGE,**

KNIGHTAGE, AND

COMPANIONAGE

For 1908

Contains a Special Article upon the

Stately Homes of England

Giving Information of Interest to

TOURISTS AND VISITORS.

SKEGNESS.

On the Lincolnshire coast. Population, 2,140. G. N. Rly. Highly recommended by medical faculty especially for children requiring keen, invigorating air and dry atmosphere. It boasts of one of the finest stretches of broad, clean sand in England. Sanitation and water supply most effective. Beautiful Marine Garden runs along sea front. A profusion of foliage gives the town a neat garden-like appearance. Sunshine, 1,866 hours, 1906; London, 1,513 hours.

GIRLS.

BRYTHWEN.

HIGH SCHOOL FOR GIRLS.

Principals - Misses A. and K. ROBINSON.
(Registered under Col. B.)

Situated within three minutes' walk of Sea, in quiet part of Skegness. Modern sanitary arrangements.

Pupils receive instruction in all branches of English (Scripture, History, Geography, Grammar, Elocution), Literature, Modern Languages, Arithmetic, Mathematics, Science, Shorthand, Drawing, Singing, Music, Needlework, &c., and can be prepared, if desired, for the higher Examinations. Healthy sports of all kinds are encouraged.

COLONIAL AND FOREIGN PUPILS received by arrangement.

GIRLS.

ESSENDON GIRLS' SCHOOL.

Headmistress, Miss E. H. C. PAGAN, M.A.
(Edinburgh, Honours).

Assisted by Miss CLARK, L.L.A. (Honours), certificated from Cambridge and Auxerre.

Training Colleges, Miss ELDER, certificated from Madame Osterberg's Swedish Physical Training Colleges.

Miss STAPLETON, L.R.A.M.

Mademoiselle ARNAUD.

Pupils successfully prepared for Oxford Senior and Royal Drawing Society examinations.

Sunny, seaside, bracing air. Tennis, Cricket, Hockey, Golf, Swimming.

SOUTHAMPTON.

The Medical Officer of Health writes:—"Southampton enjoys one of the mildest climates in the British Isles, the mean temperature during the ten years 1896-1905 being 51.5 degrees. Southampton last year (1906) had a higher mean temperature than any other station in the British Isles reporting to the Meteorological Office, with the exception of the Channel Islands and Scilly. The warmth of the climate is probably due to the nature of the soil and the contiguity of the New Forest to the south-west of the town, across which the prevailing winds blow. The average rainfall is 30 inches, the number of rainy days being low. Southampton is also favoured in the matter of sunshine, the annual average duration of sunshine being nearly 1,700 hours." Sunshine, 1898 hours, 1906; London, 1,513 hours.

GIRLS.

NEW COLLEGE,

WESTWOOD AND BURKDALE ROADS.

FOR THE DAUGHTERS OF GENTLEMEN.

Principal - - - Miss ALLNUTT.

Assisted by fully-qualified Staff.

The School (for girls over 7) aims to develop Intellectual and Physical Faculties to enable pupils continue education after leaving school. Usual Examinations prepared for. Limited number boarders received into Headmistress's house, adjoining school house. Electric light. Sanitation perfect.

Careful attention to health. Physical training important feature. Out-door games.

Children of parents residing abroad received whole year, special terms.

HIGHEST REFERENCES.

WHERE TO STAY IN THE HOLIDAYS.

See the Holiday Guide Section of WHITAKER'S ALMANACK, for Hotels, Hydros, Boarding Houses, Apartments, House Agents, Nursing Homes, Motor Garages, &c.

SOUTHPORT.

The Medical Officer of Health writes:—"Southport is by its character as a modern 'Garden City' eminently suited as a place for schools. All its houses, detached or semi-detached, have their own gardens. Its soil is sandy, clean and dry. The streets are broad, well kept, and planted on each side with trees. The air, generally from the sea, is clean, pure, and of even temperature. The water supply is a public one, excellent in quality and quantity." The air of Southport is very mild, dry, and also equable. In the height of summer it is not unduly hot, but it is pre-eminently a winter resort, and has almost a model atmosphere for kidney complaints and bronchial affections. Sunshine, 1,925 hours, 1906.

GIRLS. LONGSIGHT HOUSE,

QUEEN'S ROAD.

SCHOOL FOR THE DAUGHTERS OF GENTLEMEN.

Recognised by Board of Education for the purpose of Registration.

Principal - - - Mrs. **WALMSLEY.**

Premises.—Modern. Sanitation perfect.

Cricket, Hockey, Riding, Tennis, Swimming, Cycling, Fencing, Drill, Dancing.

Entire charge of Indian and Colonial children.

STREATHAM COMMON.

The Medical Officer of Health writes:—"Easily reached from London (8 miles), with all characteristics of a large, good class, healthy, residential suburb. Its chalybeate springs were discovered about 1659. The Common affords a grand elevated expanse of open ground, highest point 170 feet above sea-level."

BOYS.

STREATHAM COLLEGE.

FOR BOYS UNDER 15 YEARS OF AGE.
PREPARATORY TO THE PUBLIC SCHOOLS.

Headmaster - ROGER C. PATON, M.A.

Assisted by experienced University Masters.

Schoolhouse faces open Common. Built for School. Garden; large gravel Playground.

Schoolrooms large and well-ventilated. Sanitation efficient and supervised.

Ordinary School Course.—Usual subjects. To derive fullest benefits pupils should join between 7 and 8 years old. English Governness for very young boys. Special attention to Athletics and Games. Gymnastic Apparatus. Drill Sergeant.

SURBITON.

The Medical Officer of Health writes:—"A favourite healthy Thames riverside resort, 50 to 100 feet high. It is well drained and lighted. Water supply good. Extensive recreation grounds. Climate is mild and equable, and extremes of temperature, winds, or wet are never found. Especially suitable for children, invalids, or old people, or for those who have lived abroad. Soil gravel on lower part. Clay and loam on hill, where the air is fresh and pure from the Surrey Downs.

BOYS.

SHREWSBURY HOUSE, SURBITON.

Principal—

V. C. H. MILLARD, M.A. Cantab., F.R.G.S.

Assisted by a strong and efficient staff, prepares boys, up to fifteen years of age, for the Public Schools, Navy, &c.

Founded in 1873, the School has since been carried on with much success, maintaining its reputation for high tone and character. Official health statistics extremely satisfactory.

Every encouragement given to games. Large playing field. Many Scholarships won.

Health and comfort of boys prime consideration. Rifle Range, Carpenters' Shop, &c.

GIRLS.

CRANBROOK HOUSE.

SCHOOL FOR GIRLS.

Offers the advantages of sound, practical education, with special attention to individual capabilities of Pupils, who are thoroughly prepared for Examinations.

Course of instruction includes Holy Scripture, Reading, Writing, Grammar, Composition, Literature, History, Geography, Arithmetic, Mathematics, Science, French, Music, Harmony, German, Latin, Calisthenics and Dancing, Drawing, Singing, and Needlework.

Healthy neighbourhood. Facilities for all outdoor games. Careful attention to diet.

Principals: THE MISSES REBBECK.

SUTTON, SURREY.

The Medical Officer of Health writes:—"One of the healthiest districts in Surrey, well situated, adjacent to the breezy Banstead Downs. Climate, dry, bracing. Subsoil, mainly on chalk formation. Excellent softened water supply. Average death-rate, about 10 per thousand."

BOYS.

WELLSWOOD.

PREPARATORY SCHOOL FOR SONS OF GENTLEMEN.

Headmaster - E. P. OLDFIELD, M.A.
(CHARTERHOUSE AND KEBLE COLL., OXFORD).

Day Boys and Boarders received from 7 to 15 years.

British Holiday and Health Resorts.

[The figures at the end of the notices refer to the Educational Supplement, pp. 829-883.]

EVERYBODY, however good his constitution, needs more than ever in these wear-and-tear times to renew his health—springs periodically by a holiday amidst fresh scenes and congenial surroundings. The choice of a suitable resort for pleasure or health, recreation or repose, is often difficult; there are so many places to select from in England, Scotland, Ireland, and Wales whose claims are as evenly balanced as their attractions are diversified. Individual tastes and temperaments greatly vary, but the love of change is universal. Cheap railway fares, steamboats, motor cars, and bicycles have all contributed to extend the area within reach of every holiday-maker from which to choose a fresh source of interest. To enable a preliminary opinion to be formed with as little trouble as possible a uniform method of presenting the chief characteristics of each place has been adopted.

ABERDEEN,

Aberdeenshire. Pop. 174,579. A city and royal Burgh of great antiquity. Has a fine harbour and numerous industries, including granite and fishing. It also contains a splendidly-equipped university and ancient cathedral. *Means of access:* L. & N.W. Ry., Caledonian Ry., North British Ry., Great North of Scotland Ry., and by steamboat. *Location:* 523 m. from London. *Local distances:* 130 m. N. from Edinburgh. *Elevation:* From 20 ft. to 400 ft. *Immediate neighbourhood:* Pasture lands and hilly country. *Aspect:* East and south. *Climate:* Equable and bracing, fairly dry. *Sunshine:* 1906, 1,525 hours.

THE DEESIDE HYDROPATHIC, Murtle, near Aberdeen. Modern conditions for Health, Comfort, Convenience. Electric Light, Elevator, Heated Corridors, Electric, &c., Baths. Bracing Climate. Terms—1st Nov. till 31st May, £2 5s. 6d.; 1st June till 31st Oct., £2 12s. 6d. per week. DR. STEWART.

Water supply: Constant. *Drainage:* Modern. *Soil:* Sandy, overlying granite. *Front:* 2½ m. fine sandy beach, with esplanade and pavilion, and frequent tram service. *Sea bathing:* Separate. *Baths:* Hot and cold, and Russian. *Season:* June-September. *Recreations:* Golf, fishing, boating, cricket, tennis, &c.

ABERYSTWITH,

Cardigan. M.B. Pop. 8,014. *Means of access:* N., Cambrian Ry.; S., G.W. (Manchester and Milford branch); from London, L. & N.W. Ry. and G.W. Ry. *Location:* On shores of Cardigan Bay. *Elevation:* Slightly above sea level. *Immediate neighbourhood:* Hilly and mountainous, scored with romantic valleys. *Aspect:* W. and S.W. *Climate:* Bracing, with equable temperature, no fog, and practically no snow or frost. *Water supply:* Constant, from Plynlimon Mountain. *Soil:* Gravelly subsoil. *Drainage:* Water carriage and efficient. *Sunshine:* 1906, 1,514 hrs. *Front:* 1½ m. paved promenade, marine and south terraces divided by beautiful castle grounds. *Pier:* 600 ft.; pavilion accommodating 2,000. *Beach:* Sand and shingle, the bay broken by picturesque reefs. *Sea bathing:* Three stands, provision for mixed. *Baths:* Public sea-water swimming, and private electric and sea-water baths. *Annual feature:* Welsh National Agricultural Show, in summer. Aberystwith is well provided with facilities for amusements and recreation, and is the seat of the University College of Wales (420 students), and the *locale* of the Welsh National Library, containing the most valuable and unique MSS. in existence (see p. 830).

WATERLOO HYDRO HOTEL. Finest position on Promenade. Facing Sea. Recently enlarged. Accommodation, 200 guests. Complete installation. Doubling's Electrical Baths. High frequency, Vibrating, Massage. Hot and Cold Sea-Water Baths. Golf. Tennis. Billiards. Garage. Terms, apply MANAGER.

"DEVA" PRIVATE HOTEL AND BOARD RESIDENCE. Charming situation, centre of Promenade. Unrivalled position. Dining, Drawing, Smoking and Private Sitting Rooms, overlooking Sea. Electric Light. Cycle Room. Special Winter Tariff. Celebrated for its Home Comforts. MRS. E. KENRICK.

MOTOR GARAGE AND WORKS, 10 and 43, Terrace Road, Close Railway Station. Inspection Pit. Petrol. Practical Repairer. Accumulators charged. Dunlop Tyres, Greases, Air and Water Cooled Oils, Patches, and Spare Parts in stock. Agent Humber Napier Cars. Requirements attended promptly. E. G. PIEARS.

THE MARINE PRIVATE HOTEL AND BOARDING ESTABLISHMENT. Facing Sea. In best position on Promenade. Most comfortable. Good Cuisine. Tennis Lawn. Garage. Inclusive terms from 5/6 per day. Apply, MANAGERESS.

ABINGDON,

Berks. M.B. Pop. 6,500. 6 m. from Oxford. *Means of access:* G.W. Ry., River Thames steamers during summer. *Aspect:* South. *Climate:* Mild. *Water supply:* Constant. *Drainage:* Modern; sewage farm 1½ m. away. *Soil:* Gravel. *Baths:* Corporation river swimming. *Season:* June-Sept. Cricket, boating, swimming, golf links—9 holes.

ALDEBURGH,

Suffolk. M.B. Pop. 2,500 (double in summer). G.E. Ry., between Lowestoft and Felixstowe. A quiet and bracing watering-place on the River Alde. Golf links (18 holes); sea and river boating and fishing; good wild-fowl shooting. Beach, clean shingle and sand. Bathing, mixed. (see p. 830).

AMBLESIDE—see p. 922.**ARDROSSAN,**

Ayrshire. Pop. 6,000. *Means of access:* G. & S.W. Ry. and Caledonian Ry., also steamboat service. *Location:* 30 m. from Glasgow. *Elevation:* Sea-level. *Aspect:* West. *Climate:* Dry. *Water supply:* Constant. *Drainage:* Modern. *Piers:* Two. *Beach:* Sand. *Sea bathing:* Not mixed. Tennis and bowling clubs, model yacht club, golf club at Arder.

ARUNDEL,

Sussex. M.B. Pop. 3,100. L.B. & S.C. Ry., 58 m. from London. *Location:* On River Arun, 4 m. inland from Littlehampton. *Elevation:* Lowest, 8 ft.; highest, 104 ft. *Climate:* Mild. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Chalk and gravel. *Excursions:* Portsmouth, 28 m.; Chichester, 10½ m.; Bognor, 9 m.; Worthing, 10 m. Celebrated for its mediaeval castle and splendid park (1,200 acres), much frequented by picnic parties. This old-time stronghold, the home of successive Dukes of Norfolk, occupies a bold position on the top of a hill, the town, an agricultural centre, being picturesquely built on the slopes, amidst lovely surroundings; visited annually by large numbers of excursionists. Boating and angling on river. Excellent golf at Littlehampton, 8 minutes by train.

ASHFORD,

Kent. U.D.C. Pop. 13,500. S.E. & C. Ry., 14 m. S.W. of Canterbury and 56 m. from London. A market town in the heart of the hop district; one of the busiest centres of the S.E. & C. Ry., and the seat of their locomotive and carriage works. The Council owns the baths, recreation ground, and technical schools.

LEE & SON. The leading House Furnishers and Decorators, Auctioneers, Valuers, Accountants, House and Estate Agents, Removal Contractors and Warehousemen, 4, 6, and 30, High Street. Auction and Estate Offices: Wellesley Road. Telephone, 50.

ALFRED J. BURROWS, F.S.I. Land and Estate Agent, Auctioneer, Surveyor and Valuer. Particulars of Kentish Properties free on stating requirements. Valuations, Estate and Farm management, dilapidation and sanitary surveys. Offices:—Ashford, Pluckley and Maidstone.

AYLESBURY,

The chief town in Buckinghamshire, in a fertile vale, 43½ m. N.W. of London (L. & N.W. Ry., G.W. Ry., and G.C. Ry.). Furnishes large supplies for the London markets. Excellent hunting centre. Museum, public swimming baths, literary institution. 28 acres for cricket, football, tennis, bowls. Usual social and musical associations. Pop. 9244.

AYLESBURY MOTOR COMPANY.—Garage for 20 Cars always open. Charging, vulcanising. Inspection pits and electric light. Cars for hire. Sole agents for Humber, Daimler, and Adams-Hewitt cars. Repairs a speciality. Telegrams, "Motors." Telephone, 87 P.O.

AYLESBURY STEAM LAUNDRY. This Laundry is noted for its high-class work. Under the personal supervision of the Proprietor. Goods collected and delivered within a ten-miles radius. Telephone, P.O. 62.

JAMES ROBINSON, Proprietor.

AYR,

Ayrshire. Pop. 30,000. *Means of access:* G. & S.W. Ry. and steamers. *Location:* S.W. of Scotland, 40 m. S. of Glasgow, facing the Firth of Clyde. *Soil:* Sandy. *Drainage:* Modern. *Water supply:* Excellent. Electric light; Corporation trams. *Front:* Sandy beach. *Pier:* 900 ft. *Sea bathing:* Not mixed. *Excursions:* Train, steamer, and coach. *Season:* May to Sept. Municipal golf course, 9 holes; at Prestwick, 2 m. by tram, 4 courses, each 18 holes; tennis; Lord Eglinton's hounds hunt the locality. The birthplace of Burns, 2 m. S. of the town, is visited annually by large numbers. The Burns Monument cost £3,350, and is a beautiful piece of art by Mr. Thomas Brock, R.A. (see p. 831).

STATION HOTEL. For Tourists to "The Land of Burns," Burns' Cottage (birthplace), Brig o' Doon, &c. Within few minutes of seashore. Pleasure Steamers. Lovely Drives. Golf. Electric Light. Lift. Lounge. Bedrooms—Single, from 3/6; Double, from 6/6. Other G. & S.W. Railway Co.'s Hotels under same management at Glasgow, Dumfries, and Turnberry (Ayrshire) for Golfers. Telegrams: "Souwestern."

BAKEWELL,

Derbyshire. U.D.C. Pop. 2,805. *Means of access:* Midland Ry. A bracing but sheltered town, 500 feet above sea-level, in the centre of the Peak district. Haddon Hall, 2 m.; Chatsworth, 4 m. *Season:* May–September. Golf links (9 holes); trout fishing; chalybeate spring.

THE RUTLAND HOTEL. First-class Family Hotel. In midst of charming Scenery. Close Haddon Hall and Chatsworth. Six miles of Trout Fishing Free to Visitors. Inclusive Terms, 10/6 per day. Stabling and Garage. Telephone, 12 Bakewell.

T. TYACK, Proprietor.

BALLATER,

The Burgh of Ballater, the terminus of the Deeside branch of the Great North of Scotland Ry., lies 42 m. S.W. of Aberdeen in an open plain 700 ft. above sea-level. Normal population 1,300, largely increased in summer.

BATH—see p. 890.

BEAUMARIS,

Isle of Anglesea. M.B. Pop. 2,326. *Means of access:* L. & N.W. Ry. to Bangor or Menai Bridge; excellent omnibus service from Bangor; steamer service from Liverpool and from Bangor to Beaumaris. A quiet resort, combining all the essentials of the seaside with the characteristics of an old-fashioned country town. Fine view of whole range of Carnarvonshire mountains. Yachting, boating, fishing, golf links, tennis.

BEAUMARIS GRAMMAR SCHOOL. Strong University Staff. Preparation for Universities. Professional, Commercial, and Technical Careers. Buildings Commodious and Sanitary. Healthy Seaside Climate, suitable for Delicate Boys. Boarders received. Reasonable terms. Full particulars,

E. MADOC JONES, M.A., Headmaster.

BARMOUTH,

Merionethshire. U.D.C. Pop. 2,500. 220 m. N.W. of London, on the River Mawddach, at the entrance to Cardigan Bay. Air is bracing; town is sheltered from north and east. Good drainage and water. A seaport and fashionable watering-place. Well adapted for convalescents. The winter is mild. Good fishing; sea-bathing on sandy beach; also a bathing establishment. Golf links (18 holes). Excellent touring centre; neighbouring scenery very fine.

MARINE MANSION. Recently enlarged. Clergyman's daughter receives Boarders. 31/6 to 3 guineas. Situated close to Sea, and conducted on special lines. Large rooms facing Sea. Exceptionally good cuisine. Evening entertainments, &c.

MR. and MRS. JACKSON.

HENDRE HALL. MRS. WILLIAMS receives Boarders from 30/- (season from 35/- to 50/-). Best position, overlooking the Bay. In beautiful grounds. Sanitation certified. Lounge, Smoke, Drawing Rooms.

APARTMENTS. Gwendolen, 5, Marine Terrace. Central position on Marine Parade. Well-furnished, large, and airy rooms. South aspect. Excellent Cuisine. Board can be arranged. Moderate winter terms, or would Let Furnished.

MISS L. OWEN.

MIN-Y-MOR. High-class Boarding Establishment in own Grounds on Sea Front. Tennis Court. Lounge. Recreation and Smoking Rooms. Home comforts. Perfect sanitation. Golfing, Boating, Coaching, &c.

MR. & MRS. ERNEST LLOYD.

FURNISHED APARTMENTS, or to be Let Furnished. Bank House, on Sea-front. South aspect. Large, airy Rooms. First-class Cooking and Attendance. Special terms for winter months. For particulars, apply

MRS. EDWARDS.

BANGOR (NORTH WALES).

Pop. 11,269. L. & N.W. Ry. An episcopal city and important educational centre with a university, and owing to its mild climate a favourite place of residence. Golf (9 holes).

BETTWS-Y-COED.

U.D.C. Pop. 1,100. At the confluence of the Rivers Conway and Llugwy, on the borders of the counties of Denbigh and Carnarvon. 4 m. S. from Llanrwst and 17 m. E. of Carnarvon. Favourite resort of tourists, artists, and anglers. Lovely scenery on the fringe of Snowdonia. October. *Sunshine:* 1906, 1,375 hrs.

ROYAL OAK HOTEL. Finest situation. First-class for Families and Tourists. Headquarters Automobile Club. Motor Garage. Inspection Pit. Posting. Station omnibus. Croquet. Fishing. Billiards. Stabling. Well-appointed four-horse Coaches run daily through finest scenery in N. Wales.

D. K. and H. PULLAN, Proprietors.

BEDFORD,

C.B. Pop. 40,000. Midland Ry., 50 m.; L. & N.W. Ry., 62½ m. from London. On the banks of the Great Ouse, the embankment constituting a charming riverside promenade, the river affording opportunities for aquatic pastimes, which are made the most of. Attracted by moderate rents, good drainage and water, and excellent educational facilities (public and private), there is a large residential population (trebled last 50 years). Every provision made for athletic sports, outdoor pastimes, and indoor amusements. Regatta in July; cricket week; golf links (18 holes); hunting, polo; Bedford Park (60 acres); football, tennis, lacrosse, hockey, croquet; Bedford Musical Society; amateur dramatic and operatic society; technical teaching at the "Evening Institution" (see p. 832).

BEDFORD.

BEDFORD SANITARY LAUNDRY. The best equipped and most complete Laundry in the Midlands. Every hygienic provision and the most approved appliances. Works, Sandhurst Road. Secretary, G. C. WALKER, Auctioneer and Estate Agent. Offices, 1, St. Paul's Square.

BELFAST—see p. 891.

BEMBRIDGE—see p. 897.

BANGOR,

Co. Down. Pop.: Winter, 8,000; summer, 20,000. *Means of access:* Rail and steamer from Belfast. *Location:* 10 m. from Belfast, and 6 m. from Donaghadee; built on a hill sloping to the sea. *Aspect:* Northerly. *Soil:* Dry, gravelly. *Climate:* Dry, bracing.

BATH,

Somersetshire. County Borough. Episcopal city. Pop. 49,817. Means of access: 107 m. from Paddington, G.W. Ry.; also western main line, Midland Ry. Location: 11 m. from Bristol, on N. bank of River Avon. Elevation: 60 to 550 ft. above sea-level. Neighbourhood: Woodland, hills, and diversified country. Climate: Mild, equable, varies according to elevation and aspect. Sunshine: 1,808 hrs., 1906. Water supply: Constant. Drainage: Modern. Soil: Oolitic limestones, clays and sands. Baths: Luxuriously appointed, with every scientific application known to modern balneology. Mineral waters: Thermal springs. Season: Spring and autumn periods greatest activity. Bath, situated in a valley and at various levels on slopes of surrounding hills, occupies leading position as fashionable inland watering-place, possessing an unrivalled combination of archaeological, historical, social, and scenic attractions, besides the famous waters to which it owes its origin; their healing virtues tried 1906 by 100,000 bathers. It was a bathing establishment time of the Romans; the wonderfully preserved remains of the city's ancient splendour constitute a unique collection of universal interest. It is now a fine residential city, with excellent educational facilities and railway communications. Corporation own hot and cold springs, baths, and grand pump-room (a well-organised centre for musical entertainments), and maintain a city band. Theatre Royal, Assembly Rooms (concerts and balls), Art Gallery, Royal Literary and Scientific Institution (library, reading-room, geological museum), abbey church, and various old buildings. Royal Victoria Park (50 acres, $1\frac{1}{4}$ m. carriage drive, promenades, lawns, and plantations), Sydney Gardens (band performances, flower shows), recreation ground (county cricket, football, cycling), golf (18 holes; ladies, 9 holes—separate clubs), hunting, archery, tennis, boating, angling (see p. 831).

BATH is not only the most ancient, but is still the premier of our British Spas. Its mineral springs, supplying the most perfect suites of modern bathing establishments in Europe, rise at a temperature of 120°, the daily yield being over half a million gallons.

BATH possesses a great variety of attractions. High-class Concerts are given daily from October to May in a fine concert-hall, which opens on to covered terraces overlooking the renowned Roman Baths. Beautifully illustrated Guide post free of

SECRETARY, Grand Pump Room.

BEXHILL-ON-SEA,

Sussex. M.B. Pop. 15,000. *Means of access:* L.B. & S.C. Ry., *via* Croydon, Lewes, and Polegate; S.E. & C. Ry., *via* Herne Hill, Tunbridge Wells, and Crowhurst. *Location:* On coast, 5 m. W. of Hastings, 12 m. E. of Eastbourne. *Elevation:* From little above sea-level to 147 ft. *Neighbourhood:* Inland, hilly pasture lands, coast open. *Aspect:* South. *Climate:* Dry, invigorating. *Sunshine:* 1906, 1,990 hrs. *Water supply:* Constant. *Beach:* Shingle, shelving to sand as tide recedes. *Drainage:* Modern. *Soil:* Sandy. *Front:* 2 miles marine drive separates houses from esplanade, built along top of shore, with ornamental gardens, bandstand. *Kursaal* on E. Parade, a building seating 600 (the first of its kind to be erected in England). Large promenade deck and garden by the sea. Daily performances by excellent orchestra. Theatrical and other entertainments. Restaurant. Afternoon tea land. *Bathing:* Mixed. *Baths:* Salt-water swimming and general. *Excursions:* Battle Abbey, 8 m.; Normanhurst, 7 m.; Pevensey Castle, 7 m.; Hurstmonceux Castle, 10 m. *Season:* July-September; increasing in favour as a winter resort. Electric trams to Hastings. The old town is inland 1 m., and has extended recently with such rapidity to the shore and along it that, under the influence of Earl de la Warr, the population has doubled in the last ten years, and the town developed into a modern and select family summer resort. Boulevard motor track, $\frac{3}{4}$ mile along front; public park, 12½ acres, with tennis lawns and winter garden; golf course (18 holes); Bexhill pack of harriers; foxhounds; boating; day and moonlight coaching trips; motor and other conveyances; rail and motor service L.B. & S.C. Ry. (see p. 833).

THE KURSAAL, situate in the centre of the Promenade, is artistically and comfortably arranged. The Deck outside, with Bandstand, is screened from wind and sun. Adjoining is the prettily laid out Beach Garden, illuminated with hundreds of electric fairy lamps. First-class band performs daily throughout the season. Comfortable lounge and deck chairs. Reading and Writing Rooms.

Proprietor, W. CLAUDE JOHNSON.

THE KURSAAL BUFFET and Reading Rooms, at Sea end of Deck, form part of Kursaal. The Reading Room windows overlook the Sea and command lovely Views of the Channel. Electric Grill. Afternoon Teas a speciality. Wines, Spirits, and Cigars of the best quality. Buffet is luxuriously furnished with well-upholstered lounges and easy chairs.

Sole Lessee and Manager,

BOURNEMOUTH.

Hants. County Borough. Pop. 70,000. Means of access: L. & S.W. Ry. (107½ m. from London) and Midland Ry. Location: Extreme S.W. coast of Hants, in sheltered bight between Poole Harbour and Christchurch. Neighbourhood: Cliffs, pine-woods, valleys, luxurious growth of trees and shrubs. Aspect: South. Climate: Mild, equable temperature. Sunshine: 1906, 1,968 hrs. Water supply: Constant. Drainage: Modern. Soil: Sand and gravel. Front: High cliffs, covered foliage, intersected rustic paths, broken by deep chimes. Piers: Bournemouth, 1,238 ft., bands and refreshment and newspaper kiosks; Boscombe, 600 ft. Beach: Sandy, no currents, double tides render bathing always practicable. Bathing: Mixed. Baths: Swimming baths, Turkish and electric at Hydros. Excursions: New Forest, 15 m.; Corfe Castle, 18 m.; Wimborne, 9 m.; Christchurch Priory, 4 m.; Salisbury, 31 m.; Stonehenge, 38 m. Steamboat excursions to Swanage, Weymouth, Isle of Wight, Southampton, &c. Seasons: Winter and summer. Annual fixtures: Regatta, cricket week, horse show, chrysanthemum show, tennis, golf, and croquet tournament. Widely-spread town built within recent years on a heath covered with pines, which surround and permeate the locality, contributing to this fashionable town's position as a health resort, aromatic exhalations from pines benefiting pulmonary complaints. East Cliff (oldest residential quarter) separated from West Cliff (newest portion, more elevated) by River Bourne. Town extended more inland through valley than along coast. Valley affords maximum protection from wind, laid out 2 miles as public pleasure gardens, stream running through. Here Invalids' Walk, sheltered, quiet, sunny promenade. Municipal orchestra and bands, 2 theatres, winter gardens (vocal and instrumental concerts), Shaftesbury Hall (entertainments, lectures, concerts, gymnasium), free libraries; science, art, and technical schools; drill halls, 3 arcades; boating, fishing, coaching, hunting; 2 golf links, Meyrick Park and Queen's Park (18 holes; ladies, 9 holes); 3 large parks, provision for all outdoor pastimes; good educational facilities; excellent London railway service, and direct communication Midlands and North. Electric tramways (see p. 834).

CLACTON-ON-SEA,

Essex. U.D.C. Pop. 7,453. *Means of access:* G.E. Ry.; steamboats from London in summer. *Location:* On the coast between Harwich and Southend, 18 m. from Colchester. *Elevation:* 50 feet. *Neighbourhood:* Flat. *Aspect:* South. *Climate:* Dry, bracing; claims the smallest rainfall in England. *Sunshine:* 1906, 1996 hrs. *Rainfall:* 1976. *Water supply:* Constant. *Drainage:* Modern. *Soil:* Generally clay and gravel. *Front:* Sea wall, promenade, and cliff walk at different levels, the spaces between the terraces clothed in flowers and tamarisk. *Pier:* 1,200 ft. pavilion. *Beach:* Sands. *Bathing:* Mixed. *Excursions:* Belle steamboats; Frinton, 8 m.; Walton-on-Naze, 10 m.; Felixstowe, 14 m.; Harwich, 17 m.; London Bridge, 83 m. *Annual fixtures:* Regatta, fishing competitions. *Season:* July-September. A modern and growing town (its residential pop. doubled 1891-1901), popular family summer holiday resort and health resort of convalescents; it prides itself, amongst its other advantages, upon its sunshine records. Operetta house, Palace Theatre and grounds, tennis, hockey, fishing, boating, golf links (9 holes), foxhounds, coursing, rifle club; a number of convalescent homes. Its popularity has been fostered by its accessibility to London; and the health-giving properties of its tonic breezes are testified by its convalescent homes and institutions. Favoured in situation and climate, nothing is left undone to complete all essential arrangements for well-being of visitors and residents, general cleanliness and healthiness of town being facilitated by its all being modern-built. No better place could be found for children not in robust health (see p. 842).

EDINBURGH.

Pop. 345,967. North British Ry. and Caledonian Ry. The winter temperature is the same as in London; summer temperature lower. Public parks, gardens, and meadows occupy 1,180 acres, of which about 180 acres are available for games. Edinburgh possesses a picturesque beauty quite unrivalled. Tourists from all parts of the world are attracted to the metropolis of Scotland by its historical associations with Queen Mary, John Knox, and Sir Walter Scott. Besides the castle, Holyrood Palace, Burns Monument, and John Knox's House, are many historic buildings, museums, libraries, and a celebrated University. In the historic Castle are St. Mary's Chapel, an interesting relic belonging to the reign of David I.; the remains of the Royal Palace; the Crown Room, in which are deposited the Scottish regalia; the Arsenal; the Parliament and banqueting hall with a fine collection of Scottish armour, weapons, and regimental colours. **Liberton**, 3 m. S. of Edinburgh, connected by train service, is open, elevated, healthy (see p. 847).

THE QUEEN HOTEL, St. Colme Street. First-class Family and Tourist Hotel. Occupies most central position. Well known for its home comforts and quietness. Terms moderate. **JOHN W. GUNN**, Proprietor.

DARLING'S REGENT HOTEL, 20, Waterloo Place. First-class Temperance Hotel. Near Waverley Station, G.P.O., and Calton Hill. Boarding terms on application. Under personal management of Miss **DARLING**. Address for Telegrams: "Darling's Hotel, Edinburgh."

MILNE'S HOTEL (Family and Commercial), 145, Leith Street. Opposite Theatre Royal. Reconstructed, redecorated throughout. New smoking lounge. Billiard room and restaurant added. Terms from 7/6 day, including bath and attendance.—**T. B. McCANN**, Manager.

JENNER'S. "The Most Fashionable Shopping Centre in Scotland" for everything connected with Ladies' and Children's Dress, and with Household Furniture and Furnishings. Specialists in Scotch Tweeds, Homespuns, Tartans, Linens, Furniture, and Carpets. **JENNER'S**, Princes Street.

ST. ALBANS.

An ancient and historic city of Hertfordshire. Pop. 16,000. Midland, G.N., and L. & N.W. Ry. 20 m. N.N.W. of London. Built on the top and slope of an eminence washed by the River Ver across which once stood the important Roman station of Verulamium. The Abbey Church, now the cathedral, a grand Norman pile of vast dimensions, is one of the most remarkable in England, regarding its size and variety of architecture. St. Albans' healthiness is assured by its altitude, and the existence of a bracing climate, constant supply of pure water, and modern drainage. Park (8½ acres), recreation ground (16½ acres), children's playground (6 acres). Free public library and reading-room, corporation swimming baths, county museum, school of music (see p. 859).

RED LION HOTEL. Close to Abbey. Centrally situated. First-class cuisine. Modern sanitation. Billiards. Smoking Lounge. Private Sitting Rooms. Stabling. Terms moderate. Easy access to stations. Frequent train services to town. Telephone, 0265.

W. DORANT, F.A.I. St. Albans Auction Rooms 19-21, Victoria Street. Auctioneer and Estate Agent. Established 1870.

ST. MARGARET'S BAY,

Kent. Pop. 1,086. S.E. & C. Ry., 80 m. from London. Village health resort on coast, 4½ m. N.E. of Dover. *Aspect:* South-east. *Climate:* Dry, bracing; warmer on shore than cliff-top. *Soil:* Chalk. Well and Company's water. June to January most favourable months (see p. 869).

ST. MARGARET'S BAY HOTEL. Situated on Beach. Sheltered from north. Patronised by literary and medical men. Good fishing, and near Golf Links. Moderate and inclusive terms. Telegrams, Lamgarotte, St. Margarets-at-Cliffe. Telephone, 017 St. Margarets-at-Cliffe.

MANAGERESS.

SALISBURY,

Wilts. Cathedral City. Pop. 21,900. *Means of access:* L. & S.W. Ry. and G.W. Ry., 84 m. from London. From its history, antiquity, and position in the fertile valley of the Avon, Salisbury is a most interesting city. Chief amongst its attractions is its splendid cathedral (spire 404 feet, the highest in England), dating from 1220, one of the best examples extant of Early English architecture. Stonehenge with its colossal Druidic ruins, and Salisbury Plain, military manœuvres annually, a vast area of 200 square miles, can be visited from here. County hall, Victoria Hall, promenade concerts in the Victoria Park nightly and Wednesday afternoons during summer (Sundays excepted), Blackmore Museum, public library, golf links (9 holes) (see p. 870).

STRATFORD-ON-AVON,

Warwickshire. Pop. 8,300. 8 m. S.W. of Warwick (G.W. Ry. and G.C. Ry.) stands on the right bank of the Avon in a beautiful agricultural county. The climate is mild, moderate rainfall suits particularly children and elderly people. The chief object of attraction is naturally the birthplace of Shakespeare, with the adjoining wool-shop, the combined houses forming a half-timbered structure of two stories with dormer windows and wooden porch, a portion being used as a museum of relics connected with the poet and his times. They were acquired by the nation in 1874, and it is estimated that over 20,000 people annually make a pilgrimage to this literary shrine (*see p. 875*).

"AVONHURST," Guild Street. Private Apartments or Board-Residence. Well-appointed. Every home comfort. Few minutes' walk from Church, River, Theatre and Station. Garden. Cycle accommodation. Sanitation perfect. Special arrangements for lengthened period or winter.

Mrs. OLNEY, Proprietress.

STRATHPEFFER,

In Ross and Cromarty, 4 m. W. of Dingwall resembles Harrogate in the character of its sulphur waters, for which it is noted. The spa is open all the year round, but the favourite months for visitors are from May to the end of October. The climate is mild and dry.

BEN-WYVIS: The Principal Hotel. Extensive pleasure grounds. Amidst fine mountain scenery and bracing air. Spacious Apartments. Lounge and Music Room. Electric light. Garage. Golf. Fishing. Reduced Tariff for spring and late autumn.

STROUD—see p. 948.

WHITLEY BAY,

Northumberland, U.D.C. Pop. 7,705. N.E. Ry. A growing watering-place on the cliff coast, connected with Newcastle by electric tramway service. Golf links, bathing, boating, fishing.

WIMBLEDON—*see p. 955.*

WINCHESTER,

Hampshire. Cathedral city. Pop. 20,920. *Means of access:* L. & S.W. Ry. and G.W. Ry.; 60 m. from London; 12 m. from South Coast. *Climate:* Mild. *Baths:* Open, swimming. *Annual fixtures:* Several fairs; cricket week; golf links (3 courses, 18 holes); fishing. Winchester cathedral is the largest and one of the oldest in England, its nave being considered the finest. Other attractions are the County Hall, the Hospital of St. Criss, the Thrupp Gallery, the museum, and numerous institutions, ancient and modern. Near the city is the famous Winchester College.

WINDERMERE—*see p. 923.*

WIMBLEDON,

Surrey. L. & S.W. Ry. 7 m. S.W. of London. Noted for its open, breezy common of 628 acres, which is 200 feet above sea level. It is a healthy, bracing, residential town. *Soil:* Gravel. Well supplied with all the essentials of a modern district as regards facilities for amusements, recreation, and education (*see p. 88r.*)

BUILDERS, DECORATORS, &c. THOMAS HOLLOWAY, Successor to **PARSONS & TOWNSEND**, Builders, Decorators, Plumbers, and Sanitary Engineers, &c. A special staff of Experienced Men for Jobbing Work, Electric Lighting, &c. Drains Tested. 25, High Street, Wimbledon Common. Telephone, 53 Wimbledon.

HAWES & CO. Established 25 years. Estate Agents, Auctioneers, Furniture Removers and Storers, Wimbledon and New Malden. Tel. P.O. 99 Wimbledon and P.O. 9 Malden.

WINCHESTER—*see p. 954.*

WINDSOR,

Berks. Pop. 13,958. *Means of access:* G.W. Ry. and L. & S.W. Ry. A Royal and ancient city of world-wide interest. Its famous castle, founded by William I., has been for many centuries the seat of British Royalty, and, with Windsor Park and Virginia Water, claims the attention of tourists and visitors. These advantages, added to the proximity to Eton and its famous college, have attracted many residents to the district, and a new town has grown on the outskirts of Old Windsor (*see p. 88a*).

WINDSOR AND ETON. Everyone should visit the Royal Castle and famous College. Neighbourhood abounds in places of interest, is extremely picturesque, embraces loveliest portions of Thames Valley scenery. Write for Guide Book, Secretary Chamber of Commerce.

SOUTH-WESTERN. Family and Commercial Hotel. Close to both stations.

RIVERHOLM PRIVATE HOTEL. Garden and Landing Stage adjoining Windsor Bridge. Bath (h. and c.). Electric Light. Good accommodation for River Parties. Moderate Tariff. Miss OUTLAW, Proprietress.

WOLVERHAMPTON—*see p. 956.*

WOOLACOMBE,

Devon. Pop. 350. 1½ m. from Morthoe Station, 12 m. from Barnstaple. *Sunshine:* 1906, 1,739 hrs.

WOODHALL SPA,

Lincolnshire. U.D.C. Pop. 1,100. G.N. Ry., 18 m. from Lincoln, 5½ m. from Horncastle. *Elevation:* 50 ft. *Neighbourhood:* Flat and woody. *Climate:* Dry and bracing; small rainfall. *Soil:* Ironstone sand. *Drainage:* Modern. *Water supply:* Constant. *Mineral waters:* Bromo-iodine. The baths and pump-room contain all modern improvements. They are encircled by a tiled and covered promenade, and stand on extensive pleasure grounds, where the band plays. *Massage.* Tennis, croquet, bowls, and golf (18 holes) in adjoining grounds. *Angling.* *Season:* March–November. The bromo-iodine water, which has made Woodhall famous, is the most powerful of its kind in Europe, and many dangerous and distressing diseases give way before its curative virtues. This inland watering-place stands on a plateau some 50 feet above sea level; the neighbouring country is flat, but the town is surrounded by extensive pine-woods, moorlands, and cultivated fields (*see p. 88a*).

EAGLE LODGE HOTEL. First-class Family and Residential. Open throughout the year. Own grounds. Tennis, Croquet, Bowls. Close to Station, Baths, and Golf Links. Table d'Hôte; separate tables. Livery Stables. Motor Garage. Heated in winter.

THE ABERDEEN LINE

of Direct Steamers.

LONDON TO PORT NATAL AND EAST AFRICA.

FLEET.

"INANDA."
"INKOSI."
"INKONKA."

"INSIZWA."
"INGELL."
"INYATI."
"INCHANGA."

"INYONI."
"ILLOVO."
"IFAFA."

S.S. "INKOSI."

The Steamers of this Line sail every ten days from the West India Import Dock, calling alternately at LAS PALMAS and TENERIFFE and taking cargo and passengers for NATAL, DELAGOA BAY, INHAMBANE, BEIRA, CHINDE and QUILIMANE. They form the quickest and most direct route for THE TRANSVAAL, RHODESIA, MASHONALAND, BRITISH CENTRAL AFRICA and THE AFRICAN LAKE DISTRICT. They have very fine accommodation for FIRST and SECOND CLASS PASSENGERS at very moderate fares, are fitted with the latest appliances, Refrigerators, Electric Light and Fans, and carry Surgeons and Stewardesses. The "Inanda" and "Inkosi" are fitted with Marconi's Wireless Telegraphy. For Freight or Passage apply to the Owners:

JOHN T. RENNIE, SON & CO., 4, East India Avenue, London, E.C.

JOHN T. RENNIE & SON, Aberdeen. JOHN T. RENNIE & SONS, Durban, Natal

Or to the Agents:

CHIAZZARI & CO. Delagoa Bay.

THE RHODESIAN COLD STORAGE CO., Ltd. .. Beira.

THE AFRICAN LAKES CORPORATION, Ltd. .. Chinde.

&c., &c.

ATLANTIC TRANSPORT LINE.

LONDON to NEW YORK every Week.

The only Passenger Line from London to New York direct.

FLEET.—S.S. MINNEAPOLIS, 12,401 tons; S.S. MINNEHAHA, 12,403 tons; S.S. MINNETONKA, 12,400 tons; S.S. MESARA, 6,833 tons; S.S. MINNEWASKA, 12,400 tons (building). These new steamers are completely up-to-date, and have luxurious accommodation, large State Rooms, Music Room, Smoking Room, Electric Light, and Refrigerator. Cuisine and Service excellent. All the State Rooms and Saloons are amidships, so that there will be very little motion felt in steamers of this great size. The majority of the State Rooms are on the Bridge Deck, a position for which very high fares are usually charged. **FIRST-CLASS PASSENGERS ONLY.** Table and attendance First Class.

SCHEDULE OF FARES.—November 1 to March 31, from £11, £13, and upwards; April 1 to October 31, from £14, £16, and upwards. Return Tickets are issued at a reduction of 10 per cent. off the homeward fare. Children under 10 years half-price. Infants under 12 months free.—For particulars of passage apply to

ATLANTIC TRANSPORT COMPANY, LIMITED, 1, Cockspur St., London, S.W.,
and 38, Leadenhall Street, London, E.C. [250]

The present Subscribed Capital of the Bank is £14,000,000, in 140,000 Shares of £100 each, held by upwards of 10,300 Shareholders. The sum of £20 has been paid on each Share, thus making the paid-up Capital £2,800,000. The Rest or Surplus Fund is £1,400,000.

Current Accounts are opened with, and the usual Banking facilities granted to, persons properly interested. The Bank takes the Agency of Private Country Banks, Joint Stock Banks, and other Public Companies in England and the Colonies. Attends to the purchase and sale of British and Foreign Stocks without charge, except participation in Brokers Commission. Collects Dividends on Government Funds, Railway Stock, Foreign and other Securities, payable in England or abroad. Acts as agents for the receipt of Military and other Pay and Allowances, and generally transacts every description of Banking business.

Sums of £10 and upwards may be deposited, subject to seven days' notice of withdrawal or repayable at call. Interest is allowed thereon, according to the class of Deposit, but subject to alteration by public advertisement in the *Times* newspaper. A receipt is given for each deposit, which is not transferable, and must be surrendered on repayment of the amount, according to the conditions printed thereon.

Circular Notes of £10, £25, and £50 are issued for the use of Travellers, payable in the principal towns of Europe, Asia, Africa, America, and Australasia. They are issued free of expense, and are payable by the Agents abroad, at the exchange of the day, without any deduction whatever for Commission.

Letters of Credit are also granted on the chief Towns and Cities abroad. They may be obtained at the Bank in Lothbury, or any of its Branches.

The officers of the Bank are bound not to disclose the transactions of any of its customers.

London, October, 1907.

A. E. MANN, Secretary.

G. F. MALCOLMSON, Esq.

R. WIGRAM, Esq.

The National Provincial Bank of England, Limited, having numerous Branches in England and Wales, as well as Agents and Correspondents at home and abroad, affords great facilities to its customers, who may have money transmitted to the credit of their Accounts through any of the Branches, free of charge.

At Head Office and Metropolitan Branches, Deposits are received and interest allowed thereon at the rates advertised by the Bank in the London newspapers from time to time, and Current Accounts are conducted on the usual terms.

At the Country Branches, Current Accounts are opened, Deposits received, and all other Banking business conducted.

The Bank undertakes the Agency of Private and Joint Stock Banks, also the Purchase and Sale of all British and Foreign Stocks and Shares, and the collection of Dividends, Annuities, &c.

Circular Notes and Letters of Credit, payable at the principal towns abroad, are issued for the use of Travellers. The Officers of the Bank are bound to secrecy as regards the transactions of its customers.

Copies of the Annual Report of the Bank, Lists of Branches, Agents and Correspondents may be had on application at the Head Office, and at any of the Bank's branches.

R. T. HAINES,

CURRENT ACCOUNTS are kept in conformity with the usual practice in London and the country respectively. Customers keeping Current Accounts have the facility of discounting approved Bills, of obtaining loans upon negotiable Securities, of depositing Bills, Coupons, &c., for collection. The Bank will take charge of Foreign and Colonial Bonds, &c., and will detach and collect the Coupons as they become due, passing the interest to the credit of Customers as received. Sums of money may be paid into any Office for transmission to any other Office of the Bank for the credit of customers, free of charge. Every facility afforded for the transmission of money between London, Liverpool, Manchester, Scotland and Ireland, and for the receipt and delivery of Stocks, Shares, &c. LETTRES OF CREDIT AND CIRCULAR NOTES, payable at any of the Chief Commercial Towns and Cities of the World, are issued.

Bankers.

LLOYDS BANK, LIMITED, 72, LOMBARD STREET, E.C.

Offices.

1, FREDERICK'S PLACE, OLD JEWRY, E.C.

This Trust was established in the year 1893 for the purpose of acquiring Freehold and Long Leasehold Shop Properties, primarily in the London District, solely for investment purposes.

The Capital of the Company is divided into "A" and "B" Shares.

The "A" Shares have been fully subscribed and paid up. Dividends at the rate of 6 per cent. have been regularly paid thereon for the last fifteen years, and they are officially quoted on the London Stock Exchange.

The "B" Shares carry a cumulative dividend of 5 per cent. per annum, and are issued from time to time as required. Applications for them are invited.

The present Rental Income, arising from lettings on full repairing Leases, amounts to £22,000 per annum, nearly half of which is derived from freeholds.

The Directors, Solicitor, and Secretary, as holders of the Founders' (or Management) Shares, do not participate in profits until the dividends are paid on the "A" and "B" Shares, and one-fourth of the remaining profits is carried to a Reserve Fund. This Reserve now amounts to £4,000, and is invested in consols.

The "A" and "B" Shares together rank for priority both as to Capital and Dividends. Only fully-paid £5 Shares are issued, so that they carry no liability. Full particulars of all investments are detailed in the Annual Reports.

A copy of the Fifteenth Annual Report and Balance Sheet, showing the progress of the Trust since its formation, can be obtained on application.

EDWARD WELSH, *Secretary.*

[182]

CHURCH OF ENGLAND TEMPERANCE and GENERAL BUILDING SOCIETY.

This Company (established seventy years) PURCHASES or grants LOANS upon—

REVERSIONARY INTERESTS, vested or contingent, in well-secured *Property*.

LIFE INTERESTS in *Possession*, or in *Expectation*, and POLICIES of ASSURANCE upon Lives.

LOANS UPON REVERSIONS may be obtained either at an Annual Interest, or in consideration of redeemable deferred charges, payable upon the *Reversions* falling in, and free from the payment of interest in the meantime.

PRESENT INCOMES are likewise granted upon the latter principle to persons entitled to Reversionary Interests, who may thus obtain the means of support until their property falls into possession, without being called upon for any payment until that event.

Prospectuses and Forms of Proposal may be obtained from

ROBERT R. TILT, F.I.A., *Actuary and Secretary*. [280]

C. R. R. WEST, Esq., Cheam.

PURCHASES.—The Society purchases Reversions and Remainders, whether absolute or contingent: Life Interests, whether in possession or deferred, and generally all Interests (in approved property) that depend upon the duration of human life.

LOANS.—The Society also grants Loans on the security of such Interests, either on Ordinary Mortgage or by way of Reversionary Charge. The latter mode meets the convenience of borrowers who do not wish to make any payment for either principal or interest until their Reversionary Property falls into possession. The amount to which the Society will then be entitled is fixed at the outset, and does not depend on the time elapsing between the grant of the Loan and its repayment. The option of redeeming the Charge during the first three or five years can usually be combined with this form of Loan.

Forms of Proposal and full information can be obtained at the Society's Offices.

W. OSCAR NASH, F.I.A., *Actuary and Secretary*. [227]

THE NATIONAL TEMPERANCE LAND AND BUILDING COMPANY LIMITED,

21, CHARTERHOUSE STREET, HOLBORN CIRCUIS, E.C.

Established 1864.

Advances made upon House Property which can be repaid on the Building Society plan by easy instalments extending over a term of years to suit the Borrower: the rate of Interest is extremely moderate; Survey Fee and Law Charges low; no shares to take or premiums to pay, thus avoiding having rent raised; which would also mean increased rates in proportion. "Why not buy your house with its rent?" Deposits received at 3% interest, paid January and July.

Write for prospectus "free," and any further information promptly furnished by

T. L. GEORGE, *Secretary*.

J. W. REACHER & CO.

Stock and Share Brokers,

Mansion House Buildings,

4, QUEEN VICTORIA STREET, LONDON, E.C.

ESTABLISHED AT THIS ADDRESS SINCE 1884.

We invite correspondence with Investors, to whose interests and needs special attention is devoted.

GOOD INVESTMENTS.

For permanent Investment the following may be named:—English Government, Corporation, and Colonial Stocks; English Railway Stocks; Mortgage Debenture Bonds in Foreign and American Railways, *which yield Dividends on Ordinary Stock*; Shares in first-class Banks, such as London and Westminster, London and County, Union Bank of London, London Joint Stock, London City and Midland, Parr's, Lloyds, Bank of Egypt, Agricultural Bank of Egypt, &c.

A careful selection of the foregoing will provide an investment yielding an average return of about 5 per cent.

Investors desiring a larger percentage may turn their attention to the better class of Industrial Companies, such as Harrods' Stores, Carreras, Aerated Bread, Lyons, D. H. Evans, Van den Berghs, Brunner Mond, Weidons, J. & P. Coats, and Bolekow Vaughans, &c. The Preference Shares and Debentures of the above named appear to us well worthy of attention, even on the part of the most careful investor, and the Ordinary Shares yield a good return. We make sound Home Industrial Shares a special feature, and are able to deal at closest quotations. Upon our advice many investors bought Slaters at under par (now £12); Harrods at £1 (now £4½); Aerated Breads at £2 (now £6); D. H. Evans at £1 (now £3½); English Sewing Cottons at 12s. (now £1½); J. & P. Coats at £4½ (now £8½).

MINES.

Mining Shares are, of course, speculative. Our Notes, carefully prepared each month, and based on most recent information, should be seen by those interested in Indian, Australian, and African (Gold or Diamond) and Broken Hill Mines.

Dealing at close prices. Prompt delivery.

Cover business not entertained.

Stocks delivered to any London Banker against cash.

Foreign Correspondents will receive every attention.

Monthly Investment List free on application.

References can be given in every large town in England.

"HOW TO SELECT A LIFE OFFICE."

By G. M. DENT, F.S.S.

Extracts from a few Press Opinions.

MOENING POST.—"Mr. G. M. Dent, who is a Fellow of the Royal Statistical Society, has written a valuable pamphlet on Life Assurance, in which all the most important questions connected with the subject are discussed by a firm of merchants and an insurance broker. . . . There are two carefully-prepared tables."

PALL MALL GAZETTE.—"Deals very clearly with the main points to be borne in mind in selecting an office, and the tabular matter is very useful. Armed with this pamphlet, and blessed with a little commonsense, the ordinary man cannot go very far wrong."

DAILY CHRONICLE.—"Cannot fail to be instructive."

STATIST.—"The form of question and answer relieves the work very much from the heavy character of a statistical inquiry." "To those who may contemplate insurance, the expenditure of 1s. on this pamphlet will be a judicious outlay."

FINANCIAL TIMES.—"Carefully and skilfully compiled."

POLICY-HOLDER.—"Life Assurance as an investment, and Endowment Assurance, are both explained in a very attractive way."

UNITED SERVICE GAZETTE.—"The fact that this pamphlet has now reached its third edition amply demonstrates the value of its contents. Illustrations, proving the great value of life assurance as an investment, accompany the pamphlet, which also shows how to determine the relative merit of Offices which are not altogether 'much of a muchness' as is generally believed."

BRADFORD OBSERVER.—"The remarks on Life Assurance as a paying investment, apart from its protection against the misfortune of premature death, deserve to be widely read."

CARDIFF TIMES.—"In terse and lucid fashion, Mr. Dent not merely emphasises the utility of Life Assurance as an investment, but also explains how the assured may obtain the maximum of security and the largest return for money."

GLASGOW HERALD.—"The pamphlet takes the form of a dialogue, which, together with a series of tables, shows the features to which an intending assured should direct his attention before selecting a company."

LIVERPOOL COURIER.—"The dialogue is smartly written, and touches on many of the most important elements that have to be considered before a policy is taken in any office. Appended are illustrative tables showing how widely different offices vary in their mode of doing business."

Price 1s. By post, 1s. 1d. (under four ounces).

JOHN HEYWOOD, Ltd.,

Deansgate, Manchester; and 20, 22, 24 and 26, Lamb's Conduit Street, London, W.

FRIENDS' PROVIDENT INSTITUTION

FOR MUTUAL LIFE ASSURANCE

ESTABLISHED 1832

ACCUMULATED FUND	- - - - -	£3,300,000
ANNUAL INCOME	- - - - -	£300,000

This Institution is the Life Assurance Office established by the Society of Friends (Quakers), and is under the management of Members of that Society.

The Scale of Premiums charged is low; but, owing to careful selection of lives and economical management, very satisfactory Bonuses have been realised.

The advantages of the Institution are open to those persons who are or have been Friends; and to others who are of Quaker descent, or are connected with Friends by ties of kindred, marriage, or education, or by partnership in business.

Head Office—BRADFORD, YORKSHIRE;

London Office: 17, GRACECHURCH STREET, E.C.

PROGRESS OF THE COMPANY

During the past Twenty Years, to December 31, 1906.

YEARS.	NEW BUSINESS.		NET PREMIUM INCOME.	INVESTED FUNDS.
	Sums Assured.	New Premiums.		
1886	£608,870	£22,013	£127,442	£476,772
1896	886,428	37,039	218,658	1,158,059
1906	788,966	32,460	313,282	2,216,112

It will thus be seen that in ten years the Net Premium Income shows an increase of nearly £100,000, whilst the Funds during the same period have been increased by more than £1,000,000.

Special Features.—Low Rates of Premiums Liberal Conditions—Immediate Payment of Claims—Policies Non-forfeitable, World-wide.

INCOME POLICIES are issued which ASSURE weekly sums in case of PERSONAL ILLNESS or ACCIDENT causing a temporary or permanent Loss of INCOME. The Company's "FULL RETURN" POLICIES provide for the RETURN OF ALL PREMIUMS paid, irrespective of claims, upon the assured attaining a specified age.

Full particulars as to Policies, Rates, &c., may be obtained on application.

[145]

THE LONDON LIFE

ASSOCIATION LIMITED

(A Mutual Life Assurance Office Established in 1806),

81, King William St., LONDON, E.C.

Funds in Hand = £4,850,000

CHILDREN'S ASSURANCES.

THE LONDON LIFE ASSOCIATION LIMITED appends for the information of parents, god-parents and others who desire to effect assurances on the lives of children, a table of premiums, payable during the term of the policy or until age 21, for assurances covering death after attaining age 25 whatever the then health or occupation; and for endowment assurances receivable at a selected age or previous death after age 25. All these are ordinarily without medical examination, and the policies are fully participating; while at any time before age 21 is attained, or at death between ages 21 and 25, all premiums paid are returnable with compound interest at 2½ per cent. on surrender of the policy, subject, when necessary, to proof of title to the Directors' satisfaction at the cost of the applicants. Surrender values after age 21 will never be less than a half of the ordinary complete premiums paid (without interest), subject as above, but will in due course considerably exceed the amount of such payments. The policies are free for the whole world; and all claims are receivable immediately on proof of death (or maturity) and title.

The London Life Association Limited is not a company trading for profit, but a Society of persons mutually assuring each others' lives at the lowest possible cost. It has no shareholders to provide for, no branch offices to keep up, and it never employs travellers or pays commission to agents or solicitors to get new business. The expenses of management are thus reduced to a minimum, the average for one hundred years having been but £3 16s. 3d. per cent. of the Premiums, or £2 12s. 8d. per cent. of the Income from premiums and interest.

ANNUAL PREMIUM, with right to full participation in reduction thereof, it being anticipated that the premium will be REDUCED in the eighth year to LESS THAN ONE HALF with the prospect of further GRADUAL diminution. At any time before age 21 is attained, or at death between ages 21 and 25, all premiums paid are returnable with compound interest at 2½ per cent. on surrender (see above).

Near-est Age.	For the assurance of £100-at death after attaining age 25.		For the assurance of £100 on attaining a chosen age or at previous death after attaining age 25.

* Endowment assurances mature on the anniversary of the yearly renewal date, either before or after the age chosen according as that day is before or after the birthday on which the nearest age at entry is based. No premium is payable on the date of maturity.

† The number of premiums payable is that of the years between the age at entry and age 21; so that an entrant just before a birthday does not pay a premium just before attaining age 21.

Premiums for other durations will be quoted on application. Half-yearly or Quarterly premiums also, and full information, with forms of proposal, furnished on application to the Office. [191

"HOW TO SELECT A LIFE OFFICE."

By G. M. DENT, F.S.S.

EXTRACTS FROM A FEW PRESS OPINIONS.

"Those who are seeking an office for the purpose of assurance will do well to peruse this 'dialogue' before deciding upon any particular company."—*Bullionist*.

"The statistics as to Endowment assurance policies as investments are highly interesting and convincing."—*Citizen*.

"To those who contemplate taking out life policies, the expenditure of a shilling on this pamphlet may be recommended as about the wisest step they could take. Everyone should read it."—*Fairplay*.

"There is no doubt Mr. Dent has expended a vast amount of research on his pamphlet, and the elaborate tables which he publishes are distinctly valuable."—*Financial Times*.

"An interesting study of the dialogues and tables given will more than repay the shilling outlay."—*Dundee Advertiser*.

"All who intend to insure their lives will find much useful information in this pamphlet."—*Belfast News-Letter*.

"The publication is of value to the insurance broker and other professional men, but of more value still to the intending insurer."—*Halifax Courier*.

"A cleverly-written dialogue. Both tables are explained with great lucidity."—*Law Journal*.

"All who contemplate insuring their lives should read, mark, learn, and inwardly digest this able and interesting treatise."—*Leeds Times*.

"A well-written pamphlet. Anyone proposing to insure his life will easily find from the author's 'three interviews' how to spend his money to the best advantage."—*Liverpool Mercury*.

"Cannot fail to be instructive."—*Daily Chronicle*.

"A valuable pamphlet on life assurance. . . . There are two carefully prepared tables. No. 1, 'exhibiting in a concentrated form the more essential points to be considered in the selection of a Life Office,' and No. 2, 'showing the different results to policy-holders produced by the payment of the same money to the various offices.'"—*Morning Post*.

"A most valuable and exhaustive pamphlet."—*Nonconformist*.

"One special branch of the question, which is most lucidly treated, is the value of life assurance considered simply as an investment."—*Southport Guardian*.

"An instructive pamphlet. Insurers in search of knowledge might advantageously expend a shilling on this book."—*Statist*.

Matron:
Miss E. C. LAURENCE, R.R.C.

The Hospital has 50 Beds, and is founded for the reception and treatment of respectable poor women and gentlewomen in reduced circumstances, suffering from those many distressing diseases to which the female sex is liable. A great proportion of women thus afflicted are those upon whom the numberless misfortunes of ill-health most heavily fall—the poor gentlewoman, the governess, the wife of the ill-paid clerk, the artisan, and the very poor. Their homes are altogether unsuited for the performance of a critical operation, nor can they there have the special nursing and care which their condition demands. It is therefore obvious that the work of this Charity, in restoring Mothers, Wives and Daughters to that health upon which the maintenance of families so frequently depends, is one of real value and importance.

FREE IN-PATIENTS

are admitted on recommendation of Subscriber, one Letter being sufficient for each Patient's entire stay.

CONTRIBUTING IN-PATIENTS

are received upon payment Weekly of 10s. 6d., 21s., or 42s., according to means.

OUT-PATIENTS

attend daily at 2.15 o'clock (except Saturdays), with Subscriber's Letter, or on payment of 1s.

THE CONVALESCENT HOME

at St. Leonards-on-Sea contains 22 Beds, and is not reserved for hospital patients.

The Hospital is mainly dependent on voluntary contributions. It has recently suffered severe loss through the death of old friends, and further assistance, especially regular support, is greatly needed.

HERBERT H. JENNINGS, Sec.

CHILDREN'S Hospital in South London, situated in its poorest district (76 cots, and extensive Out-patient Department).**FUNDS GREATLY NEEDED.****£4,000** wanted **ANNUALLY** in Voluntary Contributions for Ordinary Working expenses.

Please help this Charity, "not only because it is a Hospital, but because it is a Hospital for Children."

President—The Rt. Hon. THE EARL OF ANCASTER.
Chairman—CHARLES WIGHTMAN, ESQ.Treasurer—SIR J. MURRAY SCOTT, BART.
Secretary—H. C. STANLAND SMITH. [126a]**GENERAL LYING-IN HOSPITAL,****York Road, Lambeth, S.E. ESTABLISHED 1765.**

Patrons—H.M. Queen Alexandra, H.R.H. the Princess of Wales.

This Hospital is situated in one of the poorest parts of London, in the district South of the Thames, with a population of nearly two millions.

Married women, in indigent circumstances, especially the wives of Soldiers and Sailors, and certain single women (with their first child, after investigation by the Committee), are admitted to the Hospital from all parts of the kingdom, but mainly from the immediate neighbourhood, from which, owing to its poverty, little pecuniary help is obtainable.

Subscriptions and Donations thankfully received by the Treasurer, or Miss ROSE E. WHYTE, the Secretary, at the Hospital. [112]

THE GIRLS' FRIENDLY SOCIETY.Patroness—HER MAJESTY QUEEN ALEXANDRA.
Presidents and Vice-Presidents—THE ARCHBISHOPS AND BISHOPS.

The G.F.S. is a National Society which links together in friendly bonds over 300,000 women of all ages and of all ranks of society in all parts of the world for mutual help. Its aim is to set before its members a high ideal of purity of thought, word, and deed; to help them to be true to that ideal; to be a standing witness to the possibility of purity of life and conduct for every woman and girl in the land; to guard the hundreds of thousands of girls who are growing up to womanhood from acknowledged dangers, and to extend to them the priceless boon of loving Christian fellowship and of fellowship in Christian work.

The various Departments of G.F.S. work include help for Sick Members, the care of Work-house Children, Registry Work, protection in Emigration and in Travelling, the provision of Lodges and Recreation Rooms, Industrial Training, and the encouragement of Temperance and Thrift. That it has a just claim on general sympathy and support can scarcely be doubted by those who realise the need that exists for such services as the Girls' Friendly Society strives to render.

The Publications of the Society, and all further information, can be obtained from THE SECRETARY, G.F.S. Central Office, 39, Victoria Street, Westminster, S.W. [113]

THE GORDON BOYS' HOME

(THE NATIONAL MEMORIAL TO GENERAL GORDON).

Patron—THE KING. Vice-Patron—H. M. QUEEN ALEXANDRA.

President—H. R. H. THE PRINCE OF WALES, K.G.

Chairman of Committee—General Sir GEORGE W. A. HIGGINSON, G.C.B.

THE HOME IS SITUATED AT WEST END, WOKING, NEAR BROOKWOOD.

OFFICES—5, YORK STREET, ST. JAMES'S, S.W.

The Home is constructed to accommodate 250 Boys, chosen from the homeless and destitute, between the ages of 14 and 16, and give them a training, up to the age of 18, which will fit them alike for civil life in this country or its Colonies, and for service in the Army, Navy or Mercantile Marine.

CONDITIONS OF ADMISSION.—1. None are admitted below 13½ years of age or above 15½. 2. A boy must, in the opinion of the Committee, be really necessitous. 3. He must be free from such physical or mental infirmity as would disqualify him for service in the Army or Navy, or for civil employment in the Colonies or elsewhere, which would require active bodily exertion. 4. Boys of known bad character are ineligible.

Free admission is given to such number of boys as above as can be provided for out of the general income of the Home. A guaranteed payment of £22 annually during his stay at the Home will give a right of nomination for a lad fulfilling the conditions of admission. There are now 250 Boys in the Home. Subscriptions and Donations are urgently needed in order that this number may be maintained.

Subscriptions are received by THE LONDON AND WESTMINSTER BANK, 1, St. James's Square, S.W.; by the Treasurer, General the Right Hon. Sir DIGHTON PROBYN, G.C.B., V.C., Buckingham Palace, S.W.; and by the Secretary, at the Office, 5, York Street, St. James's, S.W., from whom any further information can be obtained.

Lt.-Colonel G. A. BEATY POWNALL, Secretary. [114]

GUYS' HOSPITAL

LONDON BRIDGE, S.E.

BEDS, 600. IN-PATIENTS (1906) 8,447. OUT-PATIENTS, 147,521.

Ordinary Expenditure, 1906—£57,500.

Income from Endowments, 1906—£36,000.

For the large difference of £21,500 between assured income and ordinary outgoings, the Hospital is from year to year dependent on VOLUNTARY SUPPORT.

The Governors earnestly appeal for new Annual Subscriptions and Donations to meet this deficiency.

NOVEMBER, 1907.

H. COSMO O. BONSOR, Treasurer. [115]

HOME MISSIONS OF THE CHURCH

(Additional Curates Society).

THE ADDITIONAL CURATES SOCIETY exists to help poor parishes to obtain the assistant Clergy they require, and could not have without money assistance from outside their own borders.

The Society's work now reaches over the whole of England; it also deals with Wales, the Channel Islands, the Isles of Scilly, and the Isle of Man. It touches the slums in the centre of large cities, the poorer suburbs outside the cities, and also the mining and other industrial towns and villages. Its help is at present given to more than 1,000 parishes to assist in maintaining 1,300 additional Clergymen. The Christian work in these parishes touches more than seven millions of people.

Churchpeople who do not as yet subscribe to the A.C.S., and can afford as much as a guinea a year, are asked to accept this invitation and send a guinea to the Secretary (Canon Petit), at the A.C.S. Office, 39, Victoria Street, Westminster.

[197]

THE TEMPORARY Home for Lost and Starving Dogs,

Battersea Park Road, South Lambeth, London, S.W.,
And HACKBRIDGE, SURREY.

PATRON:

His Most Gracious Majesty the King.
President: His Grace the DUKE OF PORTLAND, K.G.

OBJECTS:

1. To provide shelter and food for the lost, deserted and dangerous dogs of London.
2. To restore lost dogs to their rightful owners.
3. When good dogs are unclaimed, to find suitable homes for them at nominal charges.
4. To destroy, by a merciful and painless operation, all valueless and diseased dogs.

INFANT ORPHAN ASYLUM, WANSTEAD.

Patron—HIS MAJESTY THE KING. | *Bankers*—Messrs. WILLIAMS, DEACON'S BANK.

This Institution maintains and educates the Orphans of persons once in prosperity, from their Earliest Infancy until Fifteen years of age.

It has received 4,738 Fatherless Children already. Forty-one were admitted last year.

About 450 are in the Asylum now.

Elections will be held in May and November this year.

Forms of nomination can be obtained at the Office.

Nearly the whole of the Yearly Income arises from Voluntary Contributions. Assistance is therefore urgently needed, and will be thankfully acknowledged.

Life Subscription for One Vote	£5 5s. 0d.
Two Votes	£1 10s. 0d.
Annual Subscription for One Vote	£0 10s. 6d.
Two Votes	£1 1s. 0d.

Offices 63, LUDGATE HILL, E.C.

[261]

HOMES OF HOPE,

Nos. 4, 5, & 6, Regent Square, Gray's Inn Rd., London, W.C.

(Established 1860.)

For the **restoration** of the **First** fallen and the **Protection** of **Friendless** young women.

Young women are admitted on any day, and coming from any quarter whatever, **if there be room** in the Homes, and **funds**.

The special efforts of this Society are made on behalf of the poor **betrayed** and **deceived** **young women** who have **taken** the **one false step**, who are really the **most hopeful** **class** **of the fallen**, and generally **to be pitied**.

In **every** case, **if** **it be possible**, the **men** are **compelled** to **pay** the sum allowed by law for the **child's support**.

While inmates of the Homes, the young women **are trained** in household and domestic duties, with a view to their **becoming good** and **useful members of society**. The great object, however, kept most anxiously before the Committee is to afford them opportunities of religious instruction.

The applications for admission are **painfully urgent**, and the charity is wholly dependent on voluntary contributions. It is hard to witness the **anguish and sorrow** of those who apply, and **pass them over** for lack of funds.

This best of all Rescue work is **hampered** and **hindered** by **debt**, and the Committee require **more Subscribers**, as the **work is limited** for lack of more money. Had they the means, **many more young lives** could be **snatched from sin**, and—**mark this!—nearly every case** that comes into the Homes **is a rescue**.

The Secretary will be happy to forward the last Annual Report.

Bankers—Messrs. HOARE, 37, Fleet Street, E.C.

[100]

LONDON FEVER HOSPITAL, ISLINGTON, N.

Patron: HIS MAJESTY THE KING.

President: The Rt. Hon. LORD BALFOUR OF BURLEIGH, K.T.

84,000 persons have been received and treated here since 1802. The Diseases admitted are Scarlet Fever, Diphtheria, Measles, and German Measles; and Typhoid when accommodation can be made available. The general ward fee is three guineas for the whole term of treatment. Private rooms, three guineas a week. Patients' payments amount to about a fourth of the annual outlay, the other three-fourths falling upon the funds of the Institution. This system encourages people who are willing to pay a part at least of the cost of their illness to do so rather than remain for treatment at home or cast themselves upon the rates. No help is received from the rates for this Hospital.

Annual subscribers of a guinea and upwards for more than one year are Governors, and donors of ten guineas and upwards in one sum are Life Governors. Domestic servants of Governors, and certain employes of subscribing business houses, clubs, and hotels, are promptly removed and treated free of charge. Application to the Secretary with a medical certificate will ensure prompt admission. The application can be made personally, or by letter, telegram, or telephone; 637 North. Bankers: UNION OF LONDON AND SMITHS, 50, Cornhill, E.C. W. CHRISTIE, *Secretary*. 163

THE

LONDON HOSPITAL MEDICAL COLLEGE.**ONE HUNDRED AND TWENTY-THIRD SESSION.**

**The SUMMER SESSION will commence on May 1st,
the WINTER SESSION on Oct. 1st.**

The largest General Hospital in England: over 914 Beds are in constant use, and no beds are closed. Being the only General Hospital for East London, i.e., for a million and a half people, the practice is immense. In-patients last year, 14,139; out-patients, 229,408; accidents, 17,276; operations under Anæsthesia, 17,256.

APPOINTMENTS. Owing to the enormous number of patients, more appointments, salaried and resident, are open to students than at any other hospital. Ninety of these qualified appointments are made annually, and more than 150 Dressers, Clinical Clerks, &c., appointed every three months. All are free to Students of the College. Holders of resident appointments have free board.

SCHOLARSHIPS AND PRIZES. - Thirty-seven Scholarships and Prizes are given annually. SEVEN ENTRANCE SCHOLARSHIPS will be offered in October.

SPECIAL CLASSES are held for the University of London and other Higher Examinations. Special entries for Medical and Surgical Practice can be made. A reduction of 15 Guineas is made to the sons of members of the profession entering for the full course.

ENLARGEMENT OF THE HOSPITAL COLLEGE. The New Pathological Institute and the laboratories and class-rooms for Bacteriology, Public Health, Operative Surgery, Chemistry, Biology, are now open.

The Clubs Union Athletic Ground is within easy reach of the Hospital.

Luncheons and Dinners at moderate charges can be obtained in the Students' Club.

The Central Metropolitan and other railways have stations close to the Hospital and College.

For prospectus and information as to residence, &c., apply, personally or by letter, to

274,285 OTHER ADHERENTS.

1,475 SUNDAY SCHOOLS.

65,581 SUNDAY SCHOLARS.

2,086 DAY SCHOOLS.

90,024 DAY SCHOLARS.

FUNDS ARE URGENTLY NEEDED, as the work is alive and grows rapidly. Contributions should be sent to the HOME SECRETARY, L.M.S., 16, New Bridge Street, London, E.C. [49]

LONDON SKIN HOSPITAL,

40, Fitzroy Square, W.

Patron: H.R.H. THE PRINCE OF WALES, K.G.

President: HIS GRACE THE DUKE OF LEEDS.

Treasurer:—W. H. ROTHERY-NUTT, Esq.

This Hospital was established in March, 1887, for the treatment of Skin Affections. It is free to the necessitous only, and also affords relief to those above that class who are unable to pay the ordinary Specialist's fees, but who can give a donation to the Hospital. At present the In-Patients' Department is closed for want of funds. The Committee require **£1,000** to **free the Hospital from debt** and to enable them to re-open the Beds, and it is for this especial purpose that the Committee most earnestly appeal to the benevolent.

Annual Subscribers of £3 3s. have the right to recommend In-patients.

Out-Patients are seen every afternoon at **1.30**, and every evening at **6.30**.

Röntgen Ray, High Frequency, and other Electrical Methods of Treatment on Wednesdays at **2.30** p.m. and Saturdays at **6**.

Up to the 31st of December last, **35,500** persons had been relieved, and the attendances exceeded **221,871**.

Subscriptions and Donations may be paid to the Bankers, Messrs. DRUMMOND, 49, Charing Cross, S.W., or will be gratefully received by the Secretary.

METROPOLITAN DRINKING FOUNTAIN AND CATTLE TROUGH ASSOCIATION.

Patroness: HER MOST GRACIOUS MAJESTY QUEEN ALEXANDRA.

President: HIS GRACE THE DUKE OF PORTLAND, K.G.

Chairman: Major-General LORD CHEYLESMORE, C.V.O.

FUNDS URGENTLY NEEDED.

Secretary: Capt. W. SIMPSON, 70, VICTORIA STREET, WESTMINSTER.

This Association is the only one of its kind. It has erected **753** Drinking Fountains for human beings and over **1,203** Troughs for horses and dogs. Supported by Voluntary Contributions. It is estimated that 250,000,000 'brink at the Association's Troughs and Fountains in one year. It promotes temperance. Confers the blessing of a refreshing drink of water on the hard-worked horses in the streets. Encourages kindness to animals.

Assistance is required to erect more Fountains and Troughs in the streets to keep pace with the rapid and enormous growth of the Metropolis and Provincial Towns.

[244]

The METROPOLITAN VISITING and RELIEF ASSOCIATION,

Including the Metropolitan Portions of the Dioceses of London, Southwark, and St. Albans.

President—THE LORD BISHOP OF LONDON.
Treasurer—GENERAL CLIVE. **Secretary**—GRANT MARSTON, Esq.
OFFICE: 46A, PALL MALL, S.W.

1. The aim of the Association is to Distribute such Funds as may be committed to it, in grants to the Local Committees of poor parishes, proportionate to the needs of each.
 2. The clergy and District Visitors are the unpaid Agents of Relief, and possess the indispensable qualification of personal knowledge of the poor.
 3. The overburdened Clergy are hereby greatly assisted in dealing with the distressing cases constantly before them. The religious persuasion of the poor is no obstacle to their relief.
 4. Every penny contributed is devoted to the relief of destitution, all the working expenses being otherwise provided for.
- Annual report will be forwarded on application to the Secretary.
 Subscriptions to enable the Committee to carry on the work efficiently are greatly needed.
 Cheques, payable to GRANT MARSTON, should be sent to the Office, 46A, Pall Mall, S.W., or to LLOYD'S BANK, Co. LTD., 16, St. James's Street, S.W.

THE NATIONAL BENEVOLENT INSTITUTION,

FOUNDED BY THE LATE PETER HERVE.

ESTABLISHED 1812. INCORPORATED BY ROYAL CHARTER.

Under the immediate Protection and Patronage of His Most Excellent Majesty the King.
Treasurer—E. JACKSON BARRON, Esq.

This Institution was founded for the Purpose of granting Annuities to distressed members of the Upper and Middle Classes of Society, who have attained the age of 60 years and upwards. The Pensioners are elected half-yearly, in May and November, by the votes of the Life Governors and Subscribers.

The sum disbursed in Pensions now amounts to £14,350 per Annum.

The total number of aged Persons who have been supported by the Institution is Three Thousand and Sixty, the gross sum distributed to them up to the present exceeding £634,000.

Subscriptions, from 5s. and upwards, will be thankfully received at the Office, and any further information given between the hours of 10 and 4 daily; Saturdays, 10 and 2.

Office—65, SOUTHAMPTON ROW, BLOOMSBURY, W.C. HENRY C. LATREILLE, *Secretary*. [118]

OBJECT: To assist the Church of England in her endeavours to advance the spiritual welfare of Sailors, Fishermen, and Emigrants, on board ship or ashore, both at Home and Abroad.

SUBSCRIPTIONS, DONATIONS, and OFFERTORIES are URGENTLY NEEDED to provide for new appeals awaiting replies. Illustrated papers, magazines, books, and warm clothing are also earnestly asked for.

The Organising Secretary (Rev. A. H. Haigh) will be glad of the opportunity either to preach Sermons, to address Drawing-room and Garden Meetings, or to give a Lecture with the aid of the lantern illustrating the work of the Mission.

All Cheques and Postal Orders should be made payable to **P. J. GEDYE, Secretary.**
St. Andrew's Waterside Church Mission, 85, Fenchurch Street, London. E.C. [109]

ST. GEORGE'S HOSPITAL, S.W.

Urgently appeals for further support, as the ordinary Income is about £12,000 less than the Expenditure.

ROYAL BLIND PENSION SOCIETY

Patron—HIS MAJESTY THE KING.*Vice-Patrons*—

H.R.H. THE PRINCE OF WALES, K.G. | H.R.H. THE DUKE OF CONNAUGHT, K.G.

President—THE DUKE OF GRAFTON, K.G.*Honorary Secretaries*—Messrs. GEORGE POCKOCK and PERCY R. POCKOCK.

This Society grants Pensions to the Blind Poor at their own homes in sums ranging from 10s. to 25s. per month.

There are at present 1,230 pensioners, residing in various parts of the Kingdom, among whom nearly £9,000 is annually distributed in pensions, paid monthly, through the agency of upwards of 900 Honorary Almoners.

Elections take place in May and November in each year.

In addition to those elected by the votes of Subscribers, not less than two are added at every election by rotation. Others are nominated from time to time to receive the "Queen Victoria," "Thomas Pocock," "James Templeton Wood" and other Memorial Pensions.

To be eligible, applicants must be totally blind, above 21 years of age, of good moral character, and in receipt of an income not exceeding £20, if single, and £30 if married. No distinction is made in regard to sex or creed; nor is the receipt of parish relief a disqualification.

Application must be made on the printed forms provided by the Society.

Subscribers of 10s. 6d. annually, or Donors of Five Guineas, are entitled to One Vote at every election, and multiples thereof in proportion. They can also assist in the Nomination of a Candidate.

The payment of a Legacy to the Society confers upon each Executor the privilege of One Life Vote for every £25 bequeathed.

The yearly report, containing the rules, accounts and all information, will be forwarded on application.

Contributions will be gratefully received by the Treasurer, or by the BANK OF ENGLAND, or Messrs. Barclay and Co.

237, SOUTHWARK BRIDGE ROAD, LONDON.

JOHN C. BUMSTED, Esq., Treasurer.

W. ELLIOTT TERRY, Secretary. [167]

SEAMEN'S HOSPITAL SOCIETY.

(Incorporated by Act of Parliament, 3, Gul. iv., Cap. ix.)

ROYAL SOCIETY For the Prevention of Cruelty to Animals,

105, JERMYN STREET, ST. JAMES'S, LONDON.

PATRONS—{ HIS MAJESTY KING EDWARD VII.
HER MAJESTY QUEEN ALEXANDRA.

PRESIDENT—HIS ROYAL HIGHNESS THE PRINCE OF WALES, K.G.

Treasurer—A. GUILLUM SCOTT, Esq.

Bankers—COUTTS & Co., London.

General Secretary—CAPTAIN G. L. DERRIMAN.

Literary Secretary—E. G. FAIRHOLME, Esq.

Upon this Institution, founded in 1824, rests a heavy responsibility. It is earnestly and respectfully submitted that it has in consequence a strong claim upon the benevolence of the humane and charitable.

The Council respectfully appeal to the Public to extend a hearty assistance—

I. By supplying early information of all acts of cruelty witnessed.

II. By increasing the revenue of the Society by annual subscriptions, by donations, by testamentary gifts, and particularly by inducing their friends to become members.

Trained Officers are despatched to all parts of the Kingdom. Nearly 7,000 convictions annually.

The increased operations of the Society necessitate a continual drain on the funds of the Society on account of the inadequacy of the yearly Subscription. The Council need much greater assistance, and unless such additional support be extended to them, this most righteous cause of humanity must suffer from insufficiency of means to carry out those many urgent measures which every well-wisher of this Society has so deeply at heart.

SUPPORTED ONLY BY VOLUNTARY CONTRIBUTIONS.

SUGGESTION TO PERSONS MAKING THEIR WILLS.

"I give and bequeath the sum of . . . to be paid to the Treasurer for the time being of THE ROYAL SOCIETY FOR THE PREVENTION OF CRUELTY TO ANIMALS, established 1824; to be at the disposal of the Council for the time being of the said Society; and I direct that the same be paid free of legacy duty." [61]

SOCIETY FOR RELIEF OF PERSECUTED JEWS.

(IN TOKEN OF CHRISTIAN SYMPATHY.)

MASSACRES in Russia (especially in the "**PIECEMEAL**" **TORTURE** and **KILLING** of individual Jews, by the "Black Hundred" in Russia, as well as mob massacres) are driving destitute Jews into Palestine. To save as many as possible from starvation this Society **GIVES** work at Abraham's Vineyard, Jerusalem, and also clothes, food, and drinking water, to the sick and feeble. Over 170,000 gallons of water were given to poor Jews at Abraham's Vineyard. They come for it all day long.

CONTRIBUTIONS THANKFULLY RECEIVED by

F. A. BEVAN, Esq., *Hon. Treasurer*, 54, LOMBARD STREET, E.C.

PRESIDENT: His Grace the DUKE OF ABERCORN, K.G., C.B.

The Association grants Annuities to Widows and Daughters of Clergymen, Medical Men, Officers of the Navy and Army, members of the Legal Profession, landed proprietors, and others of the upper and middle classes of gentle birth, above forty years of age, free from any unsoundness of mind, and medically certified to be unable, from age or bodily infirmity, to earn their own livelihood. Persons in possession of more than £30 per annum are not eligible for the benefits of the Association.

Since the foundation of the Association in 1853, annuities have been granted to 2,209 persons, of whom 1,055 are now living. Over 450 Candidates, many of them absolutely without income, are waiting to receive annuities. Waiting Candidates are assisted from time to time from the Temporary Relief Fund, and Candidates and Annuity holders share alike in the benefits of the Clothing Department and the Department of Visiting Friends.

Permanent Memorial Annuities can be established. The cost and conditions may be ascertained upon application. [124]

CONSUMPTION.

VENTNOR: THE ROYAL NATIONAL HOSPITAL FOR CONSUMPTION,

on the Separate Principle, at Ventnor, affords Hospital Treatment with Home-like Comforts to Sufferers from Consumption and other Chest affections. It consists of Eleven Blocks of Buildings (standing in Twenty-two acres), with a separate Bedroom for each Patient, facing the South and overlooking the Sea: its situation is in the sheltered Undercliff of the Isle of Wight. Facilities for Open Air Treatment are afforded. The results achieved with upwards of 20,000 Cases already admitted have been most encouraging. 150 Beds are constantly occupied.

An Annual Subscription of Five Guineas or a Life Donation of Fifty Guineas constitutes a Governor, with the usual privileges of recommendation.

FUNDS FOR MAINTENANCE ARE URGENTLY NEEDED.

The yearly expenses exceed £13,000.

Bankers—THE LONDON AND WESTMINSTER, 1, St. James's Square, S.W.

Full particulars on application to the Secretary.

Offices—34, CRAVEN STREET, CHANCERY CROSS, LONDON, W.C.

WEST END

Hospital for Diseases of the Nervous System

PARALYSIS AND EPILEPSY,

73, WELBECK STREET, CAVENDISH SQUARE, W.

Instituted 1878.

Patron—HER MAJESTY THE QUEEN.

With Special Wards for Paralytised Children. 77 Beds.

Applicants must be in attendance at the Hospital for Examination by the Physicians at half-past one o'clock upon Mondays, Wednesdays or Thursdays, or half-past five o'clock upon Tuesday and Friday evenings.

Patients contribute according to their means. The indigent are immediately and gratuitously treated upon production of a Certificate signed by a Subscriber to the Hospital, a Minister of Religion or Registered Medical Practitioner, that the applicant is known by the donor to be deserving of free Hospital Relief.

Urgent cases treated in the first instance without letter.

N.B.—Annual Subscriptions are earnestly solicited

H. C. WILLOCK-POLLEN, Treasurer.
ALFRED J. WISE, Secretary.

[247]

PADDINGTON GREEN CHILDREN'S HOSPITAL, LONDON, W.

Convalescent Home—"FAIR VIEW," SLOUGH.

Free, without Letter of Recommendation, to the Children of the Poor.

The In-Patients average **740**, and the New Out-Patients **17,000** a year; the total attendance being nearly **60,000**.

The Hospital provides 46 beds. The Convalescent Home has accommodation for 24 Children in the summer and 18 in the winter months.

New Annual Subscriptions and Donations are Urgently Needed.

DOUGLAS OWEN, *Chairman*.

GEORGE HANBURY, *Treasurer*.
W. H. PEARCE, *Secretary*. [141]

TRINITY COLLEGE OF MUSIC, LONDON.

(INSTITUTED 1872.)

President: THE RIGHT HON. LORD COLERIDGE, M.A.

Warden: EDMUND H. TURPIN, Mus.D.

Michaelmas, Lent and Summer Terms (twelve weeks each) begin respectively in September, January and April. The College provides complete and systematic instruction and training in every recognised Musical Subject, Elocution, and Languages during the day and on certain evenings. Students are received for single subjects.

The tuition of the College will serve as a preparative for all Public Examinations in the Theory and Practice of Music, including the Examinations for University Degrees.

The College Orchestra, the Choir, and the various Ensemble Classes, including the Light Opera Class, are also open to those not attending the College for other subjects.

Courses of Lectures on Musical History, the Art of Teaching as applied to Music, &c., are given during Term by recognised Teachers of the London University.

Scholarships tenable at the College are offered each year.

USED BY DOCTORS and the PUBLIC for OVER HALF-A-CENTURY.

Dr. J. Collis Browne's Chlorodyne

The ORIGINAL and ONLY GENUINE.

This wonderful medicine was discovered by Dr. J. Collis Browne (late Army Medical Staff), and the word Chlorodyne coined by him expressly to designate it. There has never been a remedy so vastly beneficial to suffering humanity, and the public should not be imposed upon by imitations. Dr. J. Collis Browne's Chlorodyne is a totally distinct thing from the spurious compounds called Chlorodyne, which only yield disappointment and failure.

The Best REMEDY known for

**COUGHS, COLDS,
ASTHMA, BRONCHITIS.**

Acts like a Charm in
**DIARRHŒA, DYSENTERY,
and CHOLERA.**

The only Palliative in

**NEURALGIA, GOUT,
TOOTHACHE,
RHEUMATISM.**

Effectually cuts short all
attacks of SPASMS.

Chlorodyne is a liquid taken in drops, graduated according to the malady. It invariably relieves pain of whatever kind; creates a calm refreshing sleep; allays irritation of the nervous system when all other remedies fail; leaves no bad effects; and can be taken when no other medicine can be tolerated.

INSIST ON HAVING
**DR. J. COLLIS BROWNE'S
CHLORODYNE.**

The Immense Success of this
remedy has given rise to
many imitations.

N.B.—Every Bottle of
Genuine Chlorodyne
bears on the Stamp
the name of the
Inventor, Dr. J.
COLLIS
BROWNE.
